Ben 10: Alien Supplement

By DeverosSphere V1.07

Race Points RP
If you are selecting your starting race for a Ben 10 Jump then you gain +50 RP and if no other methods of gaining RP is available you may convert CP into RP at a 1:1 ratio.

Aesthetics
It is assumed that all listed aliens will have **AESTHETIC SINGULARITY** to a sufficient degree that they match their cannon appearance.

Hybrid
This option can only be purchased if you are selecting your starting race.
In the universe there are hybrid species born of the union of multiple races, perhaps you are one of them or perhaps you are the result of the Rooters experiments.

For this you may choose up to a maximum of four of the alien races listed below or a custom alien, these races will be allowed to go as far as your Great Great Grandparents.
You may either purchase the race's at full price in order to gain all the powers and benefits of that species or take them at a proportional price and potentially grow into the race's powers. Parents will cost 50%, grandparents will cost 25%, great grandparents will cost 12.5% and finally great great grandparents will cost 6.25% with any remainder rounded down to the nearest whole number however the total percentage must equal 100%.

For example a human with a Churl grandparent and an Orbsarian great grandparent would be 62.5% human -20 RP/-12 RP, 25% Chul -50 RP/-12 RP and 12.5% Orbsarian -80 RP/-10 RP. This means that the total for this hybrid race would be -34 RP

Subspecies
Some races have multiple variations distinct enough to be stored as separate samples in the Omnitrix. While some share the same name, other samples have been so augmented that they require a different Omnitrix codename. Regardless of which situation the multiple samples are in you are able to purchase both samples as part of a **Species Combo Price** that is the more expensive variation plus an extra **50 RP** unless it is cheaper to buy them separately in which case the **Species Combo Price** will be the more expensive variation plus half the price of the cheaper variations. If you have imported one of the samples via an "Omnitrix" you may treat the import as the more expensive variation requiring only **50 RP** to unlock the variations.

Ultimate Aliens
The Ultimate Aliens are examples of the Ultimatrix forcing a DNA sample to evolve for thousands of years in a conflict heavy simulation. The Ultimate variation chosen is the most species evolution that is best suited to survive within the simulation. With master control the simulator can be changed for the DNA sample to evolve to combat different challenges.

All Aliens were built using the **Ben 10: Species Builder Supplement**:

Species Combo Price: Ickthyperambuloid **-1002 -RP**

Species Name: Ickthyperambuloid **-5 RP**

Omnitrix Codename: Walkatrout

Ickthyperambuloids are small, blue fish-like aliens. They have stubby fins for arms, a shark-like dorsal fin, and a pair of thin, spindly legs jutting from their underside. They have a wide mouth with an underbite and gills on their cheeks.

A human is a bipedal hominin characterized by having a higher and vertical forehead compared with earlier hominins. The brain volume is about 1,400 cc. The teeth and jaw are smaller and the chin is prominent. Humans are the hominins capable of creating and using complex tools, solving problems by sense and reasoning, using symbols and language, and creating complex social structures. Over time, humans have demonstrated behavioral modernity and advancement.

Nemetrix Sample: Crocodilian

Crocodilia is an order of mostly large, predatory, semiaquatic reptiles, known as crocodilians.

Species Name: Revonnahgander **-20 RP**

Omnitrix Codename: Bishop

Revonnahganders are feline-like violet-furred aliens with pointed elf-like ears. Their hair can be black, white, or purple. They have cat-like pupils and large pointed upper canines. They have small black stripes on their arms.
Young Revonnahganders have tails called bi'nthaks, which fall off at puberty. They are extremely difficult to remove and must be allowed to fall off naturally.

Omnitrix Codename: Ditto

Splixsons are small, humanoid creatures about the size of a 10-year-old human child. They have whitish arms and faces, and wear different colored clothes. Their hands are large and possess 4 digits, and their feet are merely stubs. They have 3 fin-like growths on their head, as well as metallic parts on their arms, head or waist. Different Splixsons have these parts at different places. Female Splixsons have three pigtails in place of the 3 growths that the males have.

The overall body structure of a Sotoraggian is humanoid. Each member possesses four sharp fingers on each hand and high heel-like hooves with the front toe being longer than the back.

Sotoraggians have a strange mini-arm on each shoulder that is usually used to throw the small pikes coming out of their jetpack or bombs when their hands are occupied. Each mini-arm has three dark grey stripes.

When SevenSeven's helmet broke, it revealed bluish-gray skin and a somewhat human-shaped eye underneath. The eye had a yellowish white sclera and a thin, hyphen-shaped pupil. The eyelids also had black tarsi.

The rest of the appearance is currently unknown since every Sotoraggian seen so far is always decked with armor.

Species Name: Terretnal Ogre **-205 RP**

Omnitrix Codename: Toepick

Members of this species are ogre-like aliens with yellowish-green skin, weed-like spikes on their arms, and pointed fingertips. Their faces are hidden behind metal cages due to how horrifying they look to anyone who sees them face-to-face. These faces are supposed to resemble an eldritch horror. They also have a layer of tentacles that covers their true faces.
Connected to this cage is their armor, which wraps around their shoulders and goes halfway down the chest, and is connected to their pants by chains. Their pants are a simple pair of black briefs, with a metal waistline matching the color of their armor.

Ultimatrix Codename: Ultimate Crashhopper (Civil War)
A hyper-evolved Orthopterran from an Unknown planet. Ultimate Crashhopper possesses additional high-tension tendons on his arms, giving him spring-loaded punches for extra power. He also possesses an enlarged abdomen capable of emitting a bright flash of light to blind foes thanks to the bioluminescent bulb located at the end of his abdomen.

Ultimatrix Codename: Ultimate Crashhopper (C-Predator)
A hyper-evolved Orthopterran from an Unknown planet. Ultimate Crashhopper sacrifices his arms at the gain of extra legs for additional kicking power. In addition, he can pop off globs from his abdomen to use as an extremely bouncy projectile.

Nemetrix Sample: Mucilator
Mucilator appears to be a fat, grey, rock-skinned alien that has small red eyes with dark purple circles around them. It has purplish-pink spheres all over its body,

Species Name: Piscciss Premann **-300 RP**

Omnitrix Codename: Klorber

Piscciss Premann resembles a fiddler crab with a goldish brown-colored armor, a sideways mouth, four scythe-like legs and a large, powerful pincer for a left hand. Within the pincer was a power blaster combined with a chemical sprayer. When he goes underground by spinning his legs, he retracts his head down, making his neck disappear.

Omnitrix Codename: The Worst

Atrocians have short, stubby arms and legs, with black fingers and toes (though females tend to have pink fingers). They are short in stature and have warts on their head. Yellow, blue, and pink colored members of this species, including both males and females, have been seen.
Atrocians can grow curly hair on their heads like humans, although this has only been shown on females. Males have eyebrows and lumps or spots on their arms while females don't. Their tongues can be pink or blue, and their teeth tend to be crooked, misshapen, and broken-looking, but this is probably due to their poor hygiene.

Ultimatrix Codename: Ultimate Gravattack (Civil War)
A hyper-evolved Galilean from Keplorr's Orbit. Ultimate Gravattack no longer has legs and floats entirely by manipulating his gravitational field. His skin crust becomes more jagged, as crests and peaks form on the surface. His planetary core is engulfed in his mouth now, with a red spiral circling outwards. His hands are much larger than Gravattack's. The most notable change, however, are the three smaller orbiting planetoids that spawn around him, caught in his gravitational field. They each have a little face on them that resembles Gravattack's original form in orbit mode.

Ultimatrix Codename: Ultimate Gravattack (Counter-Predator)
A hyper-evolved Galilean from Keplorr's Orbit. Ultimate Gravattack's core is comprised of a black hole that he is capable of manipulating. He can also generate planetoids capable of assimilating nearby material into their mass, growing in size and increasing their orbit.

Species Combo Price: To'kustar **-1800 RP**

Species Name: To'kustar **-730 RP**

Omnitrix Codename: Way Big

Antitrix Codename: Way Bad

To'kustars are gigantic humanoid creatures with four-fingered hands and extremely muscular bodies that generally have a white base color for their body, face, limbs, and hands with details such as their torso and legs stripes, shoulder spots, stum-like feet, head and shoulder blades, in a primary or secondary color.

A hyper-evolved Evolved To'kustar. Ultimate Way Big is visibly similar to a non-evolded To’kustar however he is twice as large, some white parts of his body are blue, and he has two curved horns on the left and right sides of his head. Ultimate Way Big is able to project more powerful blasts, create cosmic energy saws and fly.

Ultimatrix Codename: Ultimate Way Big (Counter-Predator)
A hyper-evolved Evolved To'kustar. Ultimate Way Big is a MASSIVE planet-sized titan composed of Cosmic Storms, able to alter his own size and density via shedding off or generating more of the Cosmic Storm that composes his body.

Nemetrix Sample: Elefantokyo
A miniscule predatory bacteriophages composed of a crystalline nucleic acid molecule surrounded by a protein structure, This makes it look as if it were a cross between an arachnoid and crystalline mechanoid.

Species Name: Methanosian **-775 RP**

Omnitrix Codename: Swampfire

Methanosians are a humanoid plant-like alien species with a green and black colored body with root-like feet, seemingly holding rocks. Also, their shoulders and head have red and yellow petals. Methanosians can either have four or five fingers.

A hyper-evolved Methanosian from the planet Methanos. Ultimate Swampfire has the appearance of a humanoid tree instead of a walking plant like Swampfire. Ultimate Swampfire's body is dark brown in color, and now has three blue gooey shells containing an organic, blue-colored gel-like solution of kerosene napalm on each of his arms and a large one on his back. He also has a smaller pod on his front, through which his face can be seen. Ultimate Swampfire's body is composed of petrified wood.

Ultimatrix Codename: Ultimate Swampfire (Blossomed)
A hyper-evolved Methanosian from the planet Methanos. Ultimate Swampfire is now covered in a layer of methane moss, and has giant tree trunks for arms from which he can fire powerful explosive blasts, and can use said explosive blasts to leap through the air for short distances. In addition, he now can throw "scatter bulbs", which explode into a flurry of seeds that then fly out at high speeds upon contact.

Species Name: Chronosapien **-880 RP**

Omnitrix Codename: Clockwork

Chronosapiens are large, round semi-humanoid aliens generally resembling mechanical clocks. They have translucent windows on their chests displaying their innards, which appear to be various gears, and round short heads with a semi-circular appendage on top. When moving, Chronosapiens produce gear-like sounds. Chronosapiens come in a wide variety of colors, including golden-yellow and black. Chronosapiens can have facial hair, such as a mustache.

Species Combo Price: Osmosian **-2150 RP**

Species Name: Null-Augmented Osmosian **-1720 RP**

Omnitrix Codename: Amalga-Myriad

Amalga-Myriad is an Osmosian sample that has absorbed the DNA of thousands of aliens imprisoned in Null Void. Amalga-Myriad has the legs of Four Arms and secondary arms resembling Wildmutt. Amalga-Myriad's head is very similar to Heatblast's, but more monstrous in appearance and is surrounded in flames, his left arm resembles Four Arms but with a hand belonging to Wildmutt and a black tentacle protruding from the elbow. The tentacle has green circuit-like patterns similar to Upgrade, and blue stripes near the tip echoing XLR8's tail. His right arm is a tentacle patterned after Heatblast's body. Amalga-Myriad's wings are uneven, as his right wing resembles Stinkfly's while his left wing resembles a Null Guardian's but with a structure resembling Heatblast's body as well as a set of Null Guardian tentacles protruding from his back under his wings.

Omnitrix Codename: Amalga-Mix

Amalga-Mix is an Osmosian sample that has absorbed the DNA Playlist of the Ultimatrix. Amalga-Mix's face mostly resembled Jetray but has a patch on his right eye consisting of green skin and Humungousaur's eyebrow, and a jaw belonging to Humungousaur that split like Ultimate Spidermonkey. His torso came from Humungousaur but had a backside colored like Jetray. Draped over it was the cloak/set of wings of Big Chill but without the patterns. His right arm was crystalline like Diamondhead and his first mutation, but also had two magenta crystals on his shoulder resembling Chromastone's, and his hand was shaped like one of Lodestar/Brainstorm's pincers. His left arm mostly resembled Swampfire's, but with a shoulder spike belonging to Lodestar and a hand and wrist claw belonging to Rath. His right foot resembled Jetray's, while his left foot resembled Rath's. He also had Humungousaur's tail, two of Brainstorm's legs in place of a secondary left arm, one of Spidermonkey's arms as a secondary right arm.

Ultimatrix Codename: Ultimate ManaFest
A hyper-evolved Anodite from the planet Anodyne Ultimate ManaFest is a humanoid figure of golden energy with yellow accents and enigmatic black silhouette within the body. His five head is taken up by four tendrils, two of which are massive. There is one eye on each tendril and a central on on his forehead. His back has two smaller tendrils.

Species Combo Price: Alien X **-3050 RP**

Species Name: True Celestialsapien **-3000 RP**

Omnitrix Codename: True Alien X

Celestialsapiens are humanoid aliens whose entire bodies are solid black, excluding their hands, which are white. They have tiny white star-like spots all over their bodies, giving them the appearance of a starry night sky. They have glowing green eyes with no pupils, and their forehead bears three horn-like protrusions.Though Celestialsapiens are capable of virtually anything they are restricted in what they can do by requiring a majority vote between, the "voice of love and compassion" and the "voice of rage and aggression" with the Omnitrix user being required as the deciding vote.

Ultimatrix Codename: Ultimate Alien X
A hyper-evolved Celestialsapien from the Forge of Creation. Upon transformation, Ultimate Alien X pulls every Celestialsapien in existence into itself and fuses them together into one collective body. This fusion has true omniscience, allowing them to make decisions across the entire omniverse however they must get a majority vote from every Celestialsapien they have fused with.

CHANGELOG:
V1.01 : Text Change
V1.02 : Renamed Petrosapien to Substrata Petrosapien
Added Surface Petrosapien and Antrosapien
V1.03/1.04 : Text and Format Changes
V1.05 : Added Ultimate Forms
