Welcome to Amestris, the most successful military dictatorship outside of reality! The nation of Amestris contains individuals skilled in Alchemy, the science of creation itself. Alchemy is used for all kinds of things, from repairing small objects by mathematically working out how they should be when whole, to combining animals into creations that Satan himself is disgusted by. It's a shame you had to come when you did, there's some rising tension in Ishval right now. It's making people rather paranoid. There are three State Laws for alchemists. Do not create gold. Do not create people. And do not oppose the military. We trust that you will follow those rules easily...

You have 1000cp to spend, good luck.

# BACKGROUND

Either roll 2d8+14 for your age and keep your current gender, or pick a new age and gender yourself for 100cp

- **Drop-In (Free)**

- No helpful memories, but also nothing clouding your own judgment.

- **Apprentice (100)**

- You were apprenticed to an alchemist, performing minor works until you finished your apprenticeship and began your own research.

- **Military (100)**

- A riot in your original home was stopped by the military, inspiring you to join at a young age. You've shown some talent for alchemy, which has been encouraged by your superiors.

- **University (100)**

- You've spent the latter part of your life studying engineering, chemistry, and biology in order to perfect your alchemy.

- **Foreigner (100)**

- You came to this country to learn about its ways and to see what you could emulate to use to your advantage when you return home.

- **Brotherhood (???)**

- To obtain something, something of equal value must be lost. For every CP you pay, up to eight companions gain the same amount to spend on Origins and Perks. Origins are not free, they must be bought and paid for, like everything else.

# ABILITIES

• **Advanced Formulae** (100 CP) [Free University]  
○ Alchemy comes to you as easily as breathing does. Your greater understanding allows you to perform more complex alchemy. You can combine this with Simplified Formulae for multipurpose combat alchemy.

• **Automail Limb** (100 CP) [Free Military]  
○ You gain an implant point. You can use automail and have a basic automail limb that is stronger than a natural limb.

• **Martial Training** (300 CP) [Discount military]  
○ You’ve spent months training your skills on the range, allowing for greater accuracy with all ranged weaponry and an instinctual knowledge of using those you are not familiar with.

• **Truth** (800 CP)  
○ You’ve committed the ultimate taboo, Human Transmutation, Alchemy’s one and only unforgivable sin! As a result, you have lost something important, but gained something in return.

◆ **Foreigner:** You lose the ability to speak, being a foreigner in Amestris is bad enough, but a foreigner who cannot speak, well, let's just say you better not draw attention to yourself.

◆ **Apprentice and University:** Your dominant hand was lost, making it difficult to draw, write, and do other jobs without automail.

◆ **Military:** Your non-dominant arm was lost, but you may be able to replace it with automail. The Military may begin an investigation into your incident, as alchemists of your caliber rarely make mistakes so severe that they would lose a limb.

◆ **Drop-In:** You lose your dominant arm.

The result of your loss is that you gain the ability to perform alchemy without a transmutation circle, and your knowledge of the science is expanded to the point where you have effectively mastered both Simple and Advanced Formulae.

• **Simplified Formulae** (100 CP) [Free Apprentice]  
○ You understand the connections between parts. You can make large alchemy circles far more easily and far less complex than others. You can combine this with Advanced Formulae for multipurpose combat alchemy.

• **Alkahestry** (300 CP) [Discount Foreigner]  
○ You understand how to perform basic Alkahestry, An art from Xing which can perform transmutation from a distance using linked circles, and can heal wounds of many kinds by following the pulse of the body. With practice or tutoring you can make a real skill from it.

• **Melee Training** (300 CP) [Discount Drop-In]  
○ They say true strength comes from within, and you’ve taken that literally. You become proficient in combat with melee weapons and basic hand-to-hand fighting.

• **Homunculus** (800 CP)  
○ Homunculi are artificial humans, and after being kidnapped, experimented upon, and implated with a philosophers stone, you have gained the powers of one. Your speed, strength, regeneration, and lifespan have all increased, but your mind may be slightly altered.

◆ **Central-Pride:** You’ve gained the Shadowform ability, if there is any light showing you can create shadowy tentacles capable of penetrating solid rock, and even steel with time. The downside is that you view nothing as being able to beat you, so you will always underestimate the abilities of others.

◆ **North-Wrath:** You’ve gained the power of the Ultimate Eye. You can track anything, see any weakpoints, and every movement. If you’re diligent and practice often, you'll be able to counter any attack before it’s even made. The downside is that you're quick to anger, and your wrath must be constantly in check or you may slip into a murderous rage and destroy everything around you.

◆ **South-Lust:** You’ve gained the power of the Ultimate Spear. Projected from your fingertips, the spear extends up to four meters and can pierce or slice through most materials with ease. You also seem to get your way more easily with other people, their attentions diverted by your body. The downside is that your desires are overpowering, and you must keep your whims in control lest you lose yourself to your lusts.

◆ **East-Sloth:** You’ve gained the Speedboost ability. You can move at incredible speeds, but you’ve become complacent, seeing no need to move most days and you desire to do as little as possible.

◆ **West-Greed:** You’ve gained the power of the Ultimate Shield. When you use it your skin becomes dark and harder than diamonds, and you gain a frightening, demonic appearance that will unnerve those around you. With practice you can use it over small segments of yourself instead of your entire body. The downside is that you are always trying to take that which is not yours, the ideas of fair trade and cooperation are foreign to you.

◆ **Ishval-Envy:** You’ve gained the Shapeshifter ability. Your body is incredibly dense, weighing nearly a ton in any form. You can change your appearance to any creature you can imagine, even fully clothed people. The downside is that you can no longer tolerate humans.

◆ **Xing-Gluttony:** You’ve gained the False Door. An attempt at creating a permanent doorway to The Truth, you are capable of banishing anything into the void as long as you can get within range. The downside is that you are always empty, forever seeking a way to fill the void within, you must do your best to avoid devouring everything in sight.

## Important Notes:

1. This CYOA follows the FMA manga/2009 anime.
2. All of the negatives from Truth and Homunculus will disappear once you leave this world. Taking both at once means Truth is inactive until you’ve left the FMA universe.
3. All complications are removed regardless of what you decide at the end.
4. You can either replace an existing homunculus or exist alongside them as a prototype.
5. Your alchemy will always work as intended no matter what universe you're in.
6. Alchemy can be taught, but your students will lack a lot of the fundamentals you take for granted. It is a science after all, and science is only useful if you know what it does.
7. Post-jump the Laboratory can either become a warehouse extension or part of a property you have elsewhere. Whichever you prefer.
