STARTING PLANET

Roll 1d8 to decide your starting location or pay 100cp to decide for yourself.

1.

Coruscant: This planet wide metropolis is the capital of the Republic and the home of the Jedi Order. The city is stacked upon hundreds of levels, each one becoming more dangerous as you descend. Despite the crime that occurs below the surface, Coruscant is probably the safest place in the entire galaxy.

2.

Dantooine: A peaceful farming planet, and home to secret Jedi enclave. Much of Dantooine is still uninhabited, and there are dozens of Force sensitive ruins spread out across the planet. Pretty much the only threats on Dantooine are the raiders, the wild animals, and the occasional fallen Jedi.

3.

Korriban: The ancient homeworld of the Sith, this planet is deeply entrenched in the dark-side of the Force. Korriban is one big wasteland with only a single small settlement. The Exchange has a small presence on the planet, and the old Sith tombs currently lie undisturbed.

4.

Manaam: The entire surface of the planet is one big ocean, and the only terrestrial settlement is the massive artificial island know as Ahto city. Manaam is the Selkath homeworld, and the galaxies sole provider of Kolto, a powerful healing substance. The planet is neutral, but maintains an alliance with the Republic.

5.

Telos IV: Telos is a major Republic world, and the headquarters of the Jedi Agricultural Corps. The diverse and fertile environment supports planet wide farming, and both the Republic military and Telos Security Force provide protection for the planet.

6.

Onderon: Onderon and It's moon were some of the most heavily occupied planets during the Mandalorian wars, and despite being liberated by the Republic, some of the people of Onderon have developed a new distaste for both the Mandalorians and the Republic. Xenophobia and isolationism is sweeping across the planet, and it may not be long till differences in opinions led to direct conflict.

7.

Taris: Taris is essentially the poor man's version of Coruscant. The society is human centric, the rich have even more control, and crime occurs much more often and is more widespread. The planet has been recently liberated from the Mandalorians, and is currently free of oppression from the Exchange. Taris has only be a small Republic force defending it.

8.

Free Pick: The Force has given you the opportunity to make your decision for free. Pick any of the starting planets above and pay no cp.

ORIGIN AND APPEARANCE

Each origin will give you a new history and set of memories from this universe.

The memories will affect your personality and influence how you act.

However, you're still yourself, and you can overcome some of these new instincts through time and willpower. Your age may be reset to anywhere from 18-25 and you can either keep your current gender or change it.

1.

Drop-In: You start off in a transport ship heading toward your chosen planet. You have a bag with you that carries your lightsaber, I.D, and some essential supplies. When you arrive you will be given a datapad that shows the location of your home, and any unique items you've chosen. You start off with no Jedi training, no history, and only your current knowledge of the KotOR universe.

2.

Jedi: You're currently a Padawan in the Jedi Order. You've spent nearly your entire life with the Jedi, you have friends, a caring master, and even a rival. You start off on your chosen planet with your master.

3.

Sith: You left the Jedi at some point during your training, believing that they were weak and foolish, and that you were destined for greater things. You embraced the dark side of the Force, and became a dark Jedi, you also met another young Padawan who agreed to be your apprentice. You're both currently hiding out on your starting planet in a luxurious home that you "acquired".

4.

Gray Jedi: You were taught the ways of the force by your parents who had abandoned the Jedi Order years ago. You learned that things shouldn't be categorized into black and white, and gained insight into both the light and dark sides of the Force. You've recently left home to find your place in the galaxy, and begin your adventure on your starting planet.

5.

Mandalorian: You were captured by the Mandalorians years ago while you were still a young apprentice. They were initially going to kill you, but decided to take you in instead. You received training and tutelage in the Mandalorian ways, and were eventually accepted into a clan. You managed to survive the war with a few other Mandalorians, and you're all now hiding out on your starting planet.

SPECIES

You can either remain human, or become an alien. Choosing an alien species will add additional memories, instincts, and beliefs to your origin that will affect your mind and personality. You'll be able to understand alien languages regardless of species, but you'll only be able to speak the languages that are listed in your selection.

COMPLICATIONS AND FUTURE

If you desire more points to increase your power, take up to +600cp worth of complications below.

The Crusaders: Perhaps you're interested in seeing the conflict that led to the current state of the galaxy? If so, this drawback will have you arrive sixteen years earlier than you normally would've, during the time when the Mandalorian's launch their first few raids against the outer rim, triggering the conflict that will eventually become the Mandalorian Wars. If you choose this option you'll remain in this world for a total of twenty six years and have the opportunity to change many things for the better, or put the galaxy in even worse peril if you wish.

[+0cp]

Slow: Your connection to the Force comes with a slight delay. Your visions will come to late to be useful, your reactions will be slowed, and your Force powers will have varying amounts of lag. You may be able to overcome this complication through long periods of training.

[+100cp]

Wild: You have difficulty controlling your Force powers. Telekinetic abilities will react to your emotions, and your other powers will randomly stop working for short periods of time. You may be able to overcome this complication through either strong willpower or long periods of training.

[+100cp]

Broken: Several years ago one of your limbs or major organs was damaged and had to be replaced with a cybernetic prosthetic. The replacement functions just as good as the original for day-to-day tasks but it will suffer damage from combat and other strenuous activities, and some Force powers may cause the prosthetic to temporarily fail. It's possible to remove the prosthetic's flaws if you're sufficiently skilled with electronics but it would take time and some good quality parts.

[+100cp]

Blind: Years ago your eyes were severely damaged and couldn't be replaced. You can still see by using the Force but your vision is in black and white and you can't see any fine details in things, however your vision may improve with time and training. If you pick this drawback as a miraluka your natural Force sight will simply start off greatly impaired.

This will also make working with aliens extremely difficult. If you are an alien the effects of this complication will be inverted, humans will act hostile towards you and see you as untrustworthy. Your companions are exempt from the effects of this complication.

Phobia: You're afraid of starships. Speeders and space stations are ok, but being in any vehicle that goes up into space will cause you to have a crippling panic attack. You can be knocked out and dragged onto ships unconscious, but you'll have terrible nightmares about dying in fiery explosions or floating in the endless void of space.

DEPARTURE NOTES

1. See the Star Wars Supplement for notes on general topics about the setting.
2. All companions and stasis pod followers automatically gain a connection to the Force if they accompany you into this jump regardless of whether or not you took the companion import.
3. If you purchase a starship without getting piloting as well it'll run on autopilot until you learn how to fly it.
4. You cannot make focusing crystals or teach Force powers to people in other universes. At least not right now...
5. You need focusing crystals from the Star Wars universe to build more lightsabers. All the other parts can be replicated.
6. Any complications you may have chosen are removed at the end of the ten years regardless of what option you choose.
7. If you have alien form it will become an alt. form post-jump.
8. The Mantle of the Force crystal won't change the color of your lightsaber if you buy it in jump.
9. If you buy an origin specific lightsaber crystal then change your alignment later you won't lose access to the crystal.
10. The "Sever Force" power can be used to cut individuals off from other sources of magic/supernatural power. It will ONLY work if the source of power an individual is using comes from outside their body, and is a natural force in their universe.
