

Out of Context: Saiyan Supplement

V1.16 By DeverosSphere

This document can be used as a supplement in any Jump that would not otherwise have Saiyans within its continuity.

By taking this Supplement you have chosen to be a Saiyan and you will enter into that continuity as a Drop-In by crash landing in your Saiyan Pod which damages both your Scouter and the Pod leaving you only with Saiyan Armor for clothing. As a Saiyan you are visibly similar to a Human, with the exception of your monkey-like tail.

+1000 CP

If this Supplement is instead taken as an Isolated Jump you may select a setting of your choice even if it doesn't have a Jump Document and use this document as a ten year long Jump.

Origin:

The Saiyan Army employs various ranks within their society, these positions are chosen at birth by estimating what their adult **Power Level** would be though these estimations are not always correct. The **Power Levels** mentioned in the origin description are the average not your **Power Level**. With that being the case, what is your social standing in the Saiyan class structure?

Non-Combatant:

These Saiyans are the weakest of the Low-Class with their **Power Levels** being below 500 even as adults. These Saiyans take on support roles in Saiyan society such as becoming meat preparers, cooks, pilots and engineers.

Low-Class:

Saiyans whose estimated adult **Power Level** at birth was below **1,500** are ranked as Low-Class. Almost all Saiyans are Low-Class warriors with most of them acting as soldiers, grunts and cooks.

Mid-Class:

Saiyans whose estimated adult **Power Level** at birth was between **1,500** and **5,000** are ranked as Mid-Class Saiyan Warriors. A minority of Saiyans are Mid-Class warriors, they tend to take positions of authority within the Saiyan Military.

Elite:

Saiyans whose estimated adult **Power Level** at birth was over **5,000** are ranked as Elite Saiyan Warriors, however most Elite inherit their position with a Power Level too low to be true Elites. Very few Saiyans are able to become Elite Warriors with nearly all Elite Saiyans being members of Nobility or the Royal Family.

Perks:

Note:

To get a **Booster**: Perk you will need to purchase the complimentary Perks as an example:

Almost Unique -??? CP

Something Rare Booster: Something Unique

In order to get the Perk **Something Unique**, you need to take both the **Almost Unique** Perk that it follows and the **Something Rare** Perk that is commented before the boosted Perk.

General Perks:

Power Level - Free/+100 CP/+200 CP/+300 CP

This perk refers to your initial **Power Level** at the start of this jump which can improve with time and training. A **Power Level** is an estimation of combat capability with an average mundane human having a power level between **5** and **10** with extreme examples going up to **200**. If you have a higher **Power Level** already you can treat this perk or take it as an optional drawback. For **Free** you have an initial **Power Level** of **416** the same as Kakarot's at the start of DBZ. For **+100 CP** you have an initial **Power Level** of **64** the same as Kakarot's after Korin's Training. For **+200 CP** you have an initial **Power Level** of **10** the same as Kakarot's at the start of DB. For **+300 CP** you have an initial **Power Level** of **2** the same as Kakarot's at birth.

Zenkai Boost - Free

Whenever you recover from a near fatal injury your innate power increases substantially. The faster you heal from the sustained damage the faster your power level goes up

Hair - Free

As a pure-blooded Saiyan your hair does not change from the day you were born with the exceptions of beards and moustaches.

Tail - Free

As a Saiyan you were born with a monkey-like tail that is very prehensile and can be used to grasp things as if it were an extra hand. This tail also allows you to transform into a Great Ape when you look at a full moon. If your tail is squeezed, it causes you an extremely painful and unpleasant sensation that causes most Saiyans to lose their strength entirely, but this weakness can be removed by rigorous training of the tail to strengthen it and to tolerate being squeezed. If a Saiyan's tail is removed, it can grow back in stressful situations such as if the Saiyan is in danger unless the tail wound has been scared closed.

Strength - Free

Thanks to the high gravity of planet Vegeta, your strength is far greater than that of Earthlings, making you capable of lifting ten times your own body weight even without using KI.

Durability - Free

Due to the conditions of planet Vegeta you are remarkably resilient both internally and externally allowing you to survive extreme temperatures and gravitational pressures making you far more capable of surviving dangerous environments than humans even without using KI. Also without using KI you are capable of being hit by handgun bullets, low yield explosives and sharpened blades with the only wounds to your body being bruises, slight burns and shallow cuts.

Agility - Free

You have much faster reflexes than an average Human even without using KI you are able to catch mundane arrows, flies and if you focus even low calibre bullets.

Senses - Free

You have a more powerful sense of touch and hearing than humans and gain a very keen sense of smell similar to that of a dog's.

Appetite - Free

As a Saiyans you gain an insatiable appetite. While in your base form this lets you eat great amounts with you only feeling full after eating enough to fill your great ape forms stomach, your body can store and metabolise this food without discomfort or it being externally visible.

Lifespan - Free

Your lifespan as a Saiyan is about the same as an average Earthling however you will not age the same way as Humans. Saiyans have spurt growth phases that allow them to keep their peak health, performance and appearance much longer than Humans with a Saiyan at the age of 80 being visibly unchanged from when they were young.

Innate KI - Free

As a Saiyan you have a natural affinity for controlling Ki energy, making you able to manipulate your Ki subconsciously however without practice or training this will only allow you to use it in basic ways. With training you can learn how to grant others the effects of this perk but without granting them a Perk.

Saiyan Origin - Free (Cannot be taken with “Half-Saiyan”)

This is an **Out of Context Origin Perk**. At the start of a Jump you can use this Narrative Perk to set your entry into the Jump Setting as if you were a Saiyan using this Supplement.

Dynamic Entry - Free (Requires 3 “Out of Context Origin Perks” from other Supplements)

Using this Narrative Perk you can dynamically craft your method of Dropping into a Jump.

Alternative Saiyan -100 CP (Incompatible with Origin Exclusive Drawbacks)

For each purchase you can gain an additional Alt-Form of another Breed or Species of Saiyan examples of this are the drawback Saiyan options **Universe 6 Saiyan**, **Primitive Saiyan** and **Corrupted Saiyan** but these forms do not have the penalties of the drawbacks.

Ki Comprehension -100 CP

You can learn to mimic any energy technique you observe but at a lesser degree. With training and practice you can improve it to match and surpass the original.

Saiya Power -200 CP

Using this you passively recover faster and increase your combat performance by learning while you fight. This increases your physical might, instinctual methods, natural resistance and efficiency to noticeably improve as you battle making prolonged battles more beneficial to you.

Godly Ki -400 CP

You have gained a small amount of the exceptionally pure and nourishing Ki that is used by divine beings, this makes your Ki impossible to sense by beings in possession of only mortal Ki. Through training you may eventually be able to convert all your Ki to God Ki and unlock the Mythical Super Saiyan God form.

Legendary -600 CP

You have gained an enhanced form that changes your appearance as it visually enhances your muscle mass and height. With this structural change it produces an enormous increase to your strength without impairing your speed or ability to move.

This form can be easily stacked on top of any other form with any form that uses the Legendary attribute adding a green tint to its Ki and Aura.

Godly Ki Booster: Legendary Super Saiyan God

As a Saiyan that does not kill you makes you stronger and with your combination of Ki this is truly possible. You can now combine the destructive and chaotic power of Legendary Ki with the gentle and soothing God Ki allowing you to access the **LSSG (Legendary Super Saiyan God) Form**. While in this form your body will simultaneously damage itself from your legendary Ki conflicting with your Godly Ki as it repairs the damage without you noticing. This means simply by activating the form you will gain tiny Zenkai that slightly heal you and cause your **Power Level** to constantly grow.

Godly Ki Booster: Divine Strength [Requires “Godly Abilities”, “Godly Arts”, “Godly Power” and “Godly Stress”]

There are powers and abilities that normally make strength irrelevant but now, might can make right. While in the **LSSG** Form you can use your overwhelming power to overpower any other abilities even if they normally wouldn't be affected by physical strength, such as breaking forms of immortality, fracturing body swaps, shattering spells, punching through possessions to their source, knocking back a Hakai like a beach ball, powering through Instant Death attacks such as the devil might beam without pain or sundering space-time techniques like time stop or spatial barrier using only brute force.

However the more power that is put into a technique the more power you will need to counter the technique. This means it would be far easier to overpower Guldo's Time Freeze abilities than to overpower Hit's Time Skip.

Godly Ki Booster: Superior S-Cells [Requires “Full Power”, “Super Saiyan”, “Wrathful Saiyan” and “Evil Saiyan”]

Your **S-Cells** are now far more resilient and flexible allowing them to channel any other forms of energy through them in order to access new Saiyan transformations. Examples of this would include having your **S-Cells** process **Mana** to access a **Mystic Saiyan** form, **Reiryoku** to access **Spirit Saiyan** Form or **Destruction Energy** in order to access **Ultra Ego**.

Godly Ki Booster: Shared Strength [Requires “Controlled Full Power”, “Spirit Bomb Super Saiyan”, “Wrathful Boost” and “Corrupting Evil”]

While the **LSSG** Form is active you will be able to use your Evil Aura to connect to any of your companions and allies allowing you to pull out their untapped potential while also bringing out their maximum power you can then use your Spirit Absorption in order to complete the circuit and filter your Legendary Devine Ki through them in order to cause them to rapidly develop their **Power Level** and absorb the excess energy in order to rapidly advance your own **Power Level**.

Non-Combatant Perk Tree:

Preparation -100 CP (Free for Non-Combatant)

You are a master of setting up steps, plans and strategies to account for possibilities, scenarios and vague ideas that other people would not consider. This range can include cooking, engineering and fighting such as setting additional ingredients, parts, techniques that could be easily prepared to go with a meal, engine or fighting style in case of unexpected guest, damage or power up. Thanks to this you can perform premeditated feats that make it seem as though you expected the specific outcome even if you had countless other responses ready to go.

Controlled Form -200 CP (Discounted for Non-Combatant)

You have figured out how to regulate and control your body to use your strength safely. Thanks to this you reduce strength effortlessly allowing you to adjust your strength based on the situation at hand. Thanks to this you could firmly grasp the most fragile of objects without breaking them or pull against a force with the exact amount required to neutralise it without overpowering it. This can be used to advance control over other abilities such as allowing you to fire a ki blast with the exact amount of energy required to burn through an object without coming out the other side.

Psychic Abilities -400 CP (Discounted for Non-Combatant)

The innate Saiyan psychic power's are often overlooked by the warriors race as little more than lazy communication but you have tapped into the true potential of these powers. Like other Saiyan's you can use your telepathy as easy short range communication by reading and transmitting surface thoughts. Where you differ from other Saiyans is that you are not limited to only the surface thoughts of a target but their mind is willing or undefended you will be able to delve deeper into their mind to make alterations, extract information or mentally wound them. As you use this perk your capabilities with it will grow as too will your own mental defences.

Godly Ki Booster: Godly Abilities

Your Godly Ki now strengthens your mental muscles improving your telepathic power and finesse while unlocking additional physic abilities. You now use telekinesis to manipulate objects as though you were using your limbs. You can project a somewhat customisable psychic shock at a target to paralyse or incapacitate them in a variety of ways such as completely trapping their entire body or disabling specific senses or sensations. All of your psychic abilities can both grow in strength through training and benefit from zenkai like any other Saiyan muscles.

Full Power -600 CP (Discounted for Non-Combatant)

Using this transformation a Saiyan can force their power to 100% of their body and ki's maximum capabilities, regardless of what injuries they already had. The use of this transformation requires a tremendous amount of energy to maintain but allows the user to draw out the maximum power of their muscles and ki, thereby increasing their strength, resilience and speed to the max without any fluctuation or difficulty. While in this state the body will not suffer the damage that should occur from this level of overuse as this form actively heals the user at the same rate as the damage it inflicts, however when the user disables this form they may find themselves suffering from exhaustion depending on how much energy they have used.

Legendary Booster: Legendary Full Power

You are now able to push your body, ki and any other form of power you possess beyond 100% but will burn through your energy reserves the harder you push. This makes the form very useful for a single concentrated attack but less so for prolonged combat as the higher you push it the more strain and damage you will do to your body though you will only feel it when you detransform. With training you can desensitise yourself to this so that the highest you can push it too can be increased and the negative effects on your body can be reduced.

Controlled Form Booster: Controlled Full Power

While using this perk your body will automatically reduce the strain of maintaining your full power state and the negative effects of any transformation you are using and prevent the energy waste of each form. From this each body part will power up to the max when you need to use it, at a speed that will make it seem as though no change has occurred. This allows you to conserve your energy and stamina, with your body being able to use the reactive healing to actively repair any damage to your body and then let your max power explode out the moment you need it. At its most extreme level you would be able to heal fast enough to regrow a lost limb over the course of an hour.

Low-Class Perk Tree:

Patience -100 CP (Free for Low-Class)

You are able to retain interest in any activities you want to continue doing, this allows you to keep repeating the same monotonous task for a long period of time without getting bored. Through this you are able to easily handle isolation and inactivity in order to dedicate long periods of time to one thing without any difficulty, procrastinations or discomfort.

Spirit Absorption -200 CP (Discounted for Low-Class)

Whenever you are given energy or are able to take control of the energy of others such as Ki attacks you are able to incorporate it into yourself in order to temporarily become far stronger.

Martial Arts -400 CP (Discounted for Low-Class)

You have been taught a form of martial arts similar to the Turtle and Crane school letting you push your strength beyond your power level as you have gained the knowledge and principles of fighting.

Through this you have learned the art of fighting both with and without weapons, how to sense the energy of other beings, how to produce a basic form of Ki blast, how to produce a more complex wave of Ki and how to project your Ki in order to fly.

Godly Ki Booster: Godly Arts

Your martial art is no longer a mortal art and instead you have learned the arts of the gods. You have learned how to sense Godly ki, how to use Ki for Telepathy, how to create a Ki Shield, how to Heal others using your Ki and how to perform a form of Ki teleportation similar to instant transmission or the Kai Kai.

Super Saiyan -600 CP (Discounted for Low-Class)

You now possess a large number of S-Cells within your body which allow you to become a **Pseudo Super Saiyan**, a powerful but incomplete transformation that gives you a large power increase with a Red and Golden Aura.

With practice and training you will eventually be able to reach the **Super Saiyan** form which will grant you a 50x Boost to your power and can be pushed even further, even when **Super Saiyan** is unlocked you will still be able to use the **Pseudo Super Saiyan** form.

Legendary Booster: Legendary Super Saiyan

You are now able to use both the regular and the **Legendary** variant of **Super Saiyan**.

While in the **Legendary Super Saiyan** form your body will produce and build up a limitless amount of unstable Ki which you can explosively release for powerful attacks but should too much unstable Ki build up in your body it could cause internal explosions.

Spirit Absorption Booster: Spirit Bomb Super Saiyan

You have learned an alternate version of the **Super Saiyan** form that is similar to the **Genki Dama**. This form allows you to passively borrow energy from all life, which increases your power, slowly regenerates your body and produces a Ki aura harmful to those that touch it.

Mid-Class Perk Tree:

Persistence -100 CP (Free for Mid-Class)

You can keep coming up with creative solutions that allow you to keep trying to solve a problem with different ideas without getting frustrated as you are able to learn which solutions solve which parts of the problem.

Using this you can quickly adapt to changes in your environment allowing you to better handle danger, and emotional stress helping you to make long term plans, then follow them without fail and if needed quickly alter the plan if things go wrong.

Rage Boost -200 CP (Discounted for Mid-Class)

Through forced outbursts of rage you can temporarily draw out any untapped potential dramatically increasing your power and concentrating it into a single chain of attacks.

Dormant Power -400 CP (Discounted for Mid-Class)

You have a vast internal reserve of untapped potential that you can draw out through zenkais and training, this untapped potential passively grows through time and self care.

Godly Ki Booster: Godly Power

Your Godly Ki now restores and regenerates both your active and untapped potential at an incredible rate.

This means that you have no maximum limit on your power as you will never weaken through inaction or lack of training and that this method of growth never becomes ineffective.

Wrathful Saiyan -600 CP (Discounted for Mid-Class)

No matter the damage you are always able to Forcefully regrow your tail, what's more you are able to transform into the **Great Ape** form without a moon while always remaining in control of it. With time and practice you will be able to enter the **Ikari** state and go into the stages beyond it.

Legendary Booster: Legendary Wrathful Saiyan

You have the ability to rapidly grow while in the midst of combat with a stronger opponent, you quickly eliminate the gap in power between the two of you and are able to push even further in order to surpass their strength.

What this means is that through instinctive adaptation you quickly improve your fighting skills and battle tactics, replicating and incorporating your enemy's techniques, methods and tactics, while growing in raw power at an accelerated rate.

Rage Boost Booster: Wrathful Boost

You have learned how to incorporate your rage into your **Ikari** transformation, evolving the form so that it can constantly pull out your untapped potential, heightening your body's strength, durability and Ki density.

Visibly this form extends your hair making it a dark grey colour and makes your irises red though this form can be pushed further to become a true **Saiyan Beast**.

Elite Perk Tree:

Pride -100 CP (Free for Elite)

You can brute force your way through any consciousness related issue in order to retain control over yourself, through this you can resist any mental conditioning or mind control so that it can't affect who you are and what lines you are willing to cross.

Corrupting Force -200 CP (Discounted for Elite)

Your Ki aura can now replicate a small amount of the power of the original Evil Saiyan, allowing you to loosen the mental restraints of those who come into contact with it.

This loosens their inhibitions and allows them to commit actions they honestly want to take but would normally prevent themselves from making.

This also increases their loyalty to you but is not likely to convert your enemies into allies.

Forced Stress -400 CP (Discounted for Elite)

You are able to force your body into feeling pain and stress as if you were fatally wounded by an opponent forcing your Zenkai boost to activate in order to rapidly grow your power.

Godly Ki Booster: Godly Stress

You are now not as limited to the pain and stress you can force your body to feel.

This perk allows you to force yourself to feel emotional/spiritual pain and stress which can cause your body to discover new powers and abilities.

Evil Saiyan -600 CP (Discounted for Elite)

This allows you to gain the ability to internally utilise **Evil Aura**, although this is not a true transformation it will allow you to survive in the vacuum of space and increase your muscle mass by a considerable degree, while likewise proportionally increasing your height to cause no reduction in your speed or agility.

With time and training you can learn the **Evil Saiyan** transformation causing an even more noticeable increase in height and muscle mass while giving you sterner and more defined eyes. It also gives you wilder hair that reaches down to your knees with a single forehead lock of hair.

Legendary Booster: Legendary Evil Saiyan

You can now generate a thicker Ki aura which can be manipulated in order to create solid limbs such as floating hands or a tail.

These limbs can act either independently from your body or replace any lost limbs allowing you to retain any of the original's supernatural functions.

Corrupting Force Booster: Corrupting Evil

Your Evil Aura is now able to possess and corrupt those without enough willpower to resist, forcefully transforming them into a Berserk state that internally utilises Evil Aura.

Although while in this state they will act only on instincts they will obediently follow your commands.

Items:

Any lost or stolen items will return to you after a week in the same condition as when you had it. Any damaged items could potentially be repaired and have the broken condition removed if worked on by a capable engineer.

Saiyan Armor - Free

The Armor is as durable as steel yet extremely stretchy being able to be worn by Saiyans while changing between their regular and **Great Ape** forms without having any tearing issues.

You may choose to have any set of Saiyan Armor that a Saiyan of your class would be permitted to wear including the Full Battle Armor, the RIT Battle Armor, the Chest Plate Battle Armor, the Modern Battle Armor, the Universe 6 Battle Armor and the planet Sadala variant.

These suits of Battle Armor come in a colour scheme of your choice.

If destroyed, a new set of Battle Armor in the same style and colour scheme will appear in front of you after one week.

Broken Scouter - Free

This Scouter is supposed to be a wearable, all-purpose computer that is mainly used to measure power levels however this Scouter was broken in the landing.

You may have any make and model of Scouter including the full visor and helmet variants.

Broken Saiyan Pod - Free

This Round Spaceship is used by Saiyans as vehicles purely for transportation purposes, as it contains a fuel-efficient faster-than-light drive, an interplanetary transport system and a suspended animation system that minimises the resources needed to keep the passengers alive.

It is used to send unconscious Saiyans to distant locations, with the intention that they conquer the planet.

Although these ships have exceptionally strong armour, which normally allows them to not be crushed or outright destroyed upon landing this Pod had a malfunction in the landing protocol causing it to be badly damaged in the landing.

You may have any make and model of Saiyan pod in a colour scheme of your choice and with any additional decals you wish.

Combined Forms:

Each of the Saiyan transformations can be used at the same time allowing the forms to work together.

Stacked Forms:

Stacking transformations is the easiest way to use multiple forms at once but is less powerful than merging forms. These are the 4 stacked combinations of capstone forms and an example of Super Saiyan being stacked with Super Saiyan God.

Full Power + Super Saiyan = Super Saiyan Grade 2/3

Full Power + Wrathful Saiyan = Full Power Wrathful Saiyan

Full Power + Evil Saiyan = Full Power Evil Saiyan

Super Saiyan + Wrathful Saiyan = Wrathful Super Saiyan

Super Saiyan + Evil Saiyan = Evil Super Saiyan

Wrathful Saiyan + Evil Saiyan = Evil Wrathful Saiyan

Super Saiyan God + Super Saiyan = Super Saiyan Blue

Merged Forms:

Merging transformations is a difficult but powerful way of combining transformations as they are able to be pushed further into additional forms and grades. These are the 4 merged combinations of capstone forms, with the stage beyond that and the Super Saiyan form being merged with the Super Saiyan God form.

Full Power + Super Saiyan = Super Saiyan 3 Full Power

Full Power + Wrathful Saiyan = Wild Oozaru/Unleashed Saiyan

Full Power + Evil Saiyan = Pure Evil Saiyan

Super Saiyan + Wrathful Saiyan = Golden Great Ape/Super Saiyan 4

Super Saiyan + Evil Saiyan = Supreme Saiyan/Infernal Saiyan

Wrathful Saiyan + Evil Saiyan = Goliath Great Ape/Primevil Saiyan

Super Saiyan God + Super Saiyan = Super Saiyan Rosé

Super Saiyan 3 Full Power + Saiyan Beast = Grey Great Ape/Super Saiyan 5
