[Introduction]:

.So Welcome to this "Completely" normal world that just happens to have this game that so many people love, its yu-g@@@###. I'm joking with you, is the world of Dragon Ball Heroes, a world that has developed a massively popular card/arcade game based off the Dragon Ball franchise, the only real problem is soon a number of the games players started going missing, this has been the fault of the demon realm as in order to ruin the Dragon Ball timeline they have been adding and replacing people, best i can say is have fun in this world of heavy altered Dragon Ball. Here's some points **+1000 CP** and try your best to not die, it's not just a card game after all, you start a month before our soon to be Beat falls into his first adventure, and if you can save a few people lost in the new world, well that's up to you.

.Prison Planet 2 Return of the old: 0 CP

-If you have had Dragon Ball jumps in the past you can select them for Fu to steal for the creation of his second attempt at building a prison planet so you can revisit old friends and new enemies.

.Greed? Or Charity? 0 CP (Special)

-Well what do we have here, A Deal? So I'll cut right to it then, the Dragon Balls are hax and we all know it, so how about this. In Exchange for being unable to use them for a selfish wish, i'll give you an extra 2 discounts in the item Section? This does include indirectly.

.Insufferable Glory Hound: +100 CP

-Goku believes he's your best friend and will show up to help you now. Whenever you're about to win a fight, Goku will appear and finish it for you. Unless he was there previously, he won't show up to help you until you're about to win. Everyone will credit Goku with the victory, despite you having done all of the work. For +300 extra CP, you now must participate in any fight that Goku does, and he'll always hog all of the action. You've gained the ability to teleport to Goku no matter where he is. This power automatically activates whenever Goku's about to fight. You can take Goku with you after this jump for free.

.Mute Protagonist: +200 CP

-You've gained the ability to communicate your thoughts and feelings through gestures and body language. You're incapable of speaking. People will sometimes misinterpret what you want in comical ways or just pretend that you agree with them in an attempt to get you to do stuff for them. For +200 extra CP, only people who have names and main characters from this franchise get voices. Cell, Gohan, and Frieza can talk normally. Even Appule gets a voice, despite being a minor character. But a taxi driver or a shopkeeper? They're as mute as you are.

.Are you done powering up?: +200 CP

-You know that thing people do where they stand there while they yell and power up? Now nobody does that. Everyone in this world instantly powers up, transforms, and they charge their attacks up very quickly. You don't gain these benefits. You do not remember taking this drawback, no just not playing the game.

.Excessive Collateral damage: +300 CP

-Any battle involving you is significantly more destructive and will quickly level the place you're fighting in. The landscape might as well be paper mache for all the resistance it offers. Small altercations can make the area look like a hurricane came through, and the aftermath of big battles resemble the grand canyon. For +200 CP more things you personally own seem to be targeted as well, with some battles being moved to such areas without your notice.

.Pragmatic Fighters: +300 CP

-This world is filled with arrogant people who throw away easy victories by constantly taunting their foes and giving them chances to fight back. Even the good guys will sometimes let the bad guys fight back and turn the tables on them. Not anymore. Everyone in this universe is significantly more pragmatic and will focus entirely on achieving their goals in battle, by any means they have available to them, while still retaining their personalities. There's very little discussion and everyone fights at 100% from the very beginning, with a single minded determination to crush their enemies. For +300 extra CP, your enemies are like machines, always taking the most advantageous route they can think of and leveraging their powers in ways they'd normally not use if it gives them an advantage. They'll even be willing to train in preparation to destroy you!

.Determined Fighters: +300 CP

-When you would strike a finishing blow against an opponent, they'll sometimes have a second wind that lets them stand back up again, injured but still able to fight. They'll often give a short monologue explaining how they won't back down. For +300 more CP, this happens every time. You could swat a fly and it would spit blood and ask you if that's the best you can do.

.And I took that personally: +300 CP

-All of the bad guys will always prioritize you. They could have the option to attack hundreds of other people, but they'll decide to go after you, specifically. Even if there's a better target. Your enemies really don't like you.

.Hang on Guys!: +300 CP

-Your allies will need to be rescued considerably more often than they normally would. You'll find yourself rushing to save your friends when they get overwhelmed by opponents that they need your help to defeat.

.To fight alone: +300 CP

-Events will conspire to have you face off against most enemies in 1 vs 1 battles. Coincidences will take place to make sure that you get a 1 vs 1 with the strongest opponent on the field. This doesn't happen all of the time, but it's often enough that you won't always be able to count on your friends to help you to victory.

.Recruitment Drive: +400 CP

-Your enemies now have 50% more minions on their side. They'll have recruited some extra allies who make the most sense logically. For +400 more CP, the enemies are accompanied by recolored clones of themselves. This is treated as being completely normal.

.Well Guess We All Goners: +500 CP

-Guess We all got Screwed Now, Somehow the Time Patrol dropped the ball and a time split happened so now Goku is on planet Yardrat as a baby and Earth is without a Hero, guess where you come in? Now unlike **Stay tuned for the next episode of....** This Drawback doesn't Force you to stay in the Dragon Ball world, but now the time line is linked at a 1 to 6 and any Big Bad that you don't Stop will find a way to earth, have fun not dying. For +300 CP more, you're Avatar Starts off at the Power Level of Kid Goku as of Episode 2 of Dragon Ball. If you Got the **Stay tuned for the next episode of....** Drawback with both you Start at Oldman Gohan's old home, sadly he died from the flu.

.Training Montage: +500 CP

-Whenever you encounter a group of enemies, the weakest member of the enemy team will now be no weaker than 70% of the strength of the strongest member. The enemies are aware of this phenomenon and will work to exploit it to their benefit.

.Big Villain Team Up: +600 CP

-Villains from your past jumps have resurfaced here to fight you once more. They've joined your enemies and are working against you. For +400 more CP, all of these people are Ki users now if they weren't before.

.Super Saiyan Bargain Sale: +600 CP

-Every organic and inorganic being now has their own version of the super saiyan transformation. Just like going Super Saiyan, this multiplies their power by 50 times. For +400 extra CP, there is now a SSJ2, SSJ3, and SSJ4 equivalent for every being to potentially unlock. For +300 extra CP you will be exempt from this effect.

[Notes]:

.For those that don't know, cards are summons of Warriors throughout history that a limited

-Example: SSJ2 kid Gohan, that can only fly, use hand to hand combat, and the one handed Kamehameha.

.you make cards by getting a blank card with a set rarity that says how many points to use, then you get stickers that are placed on the card to make a custom one, they tried this for the arcade version once but it only really worked in the switch game.

.I've put on suggestions

.Cards keep their personality but only have the powers on the cards and will follow orders.

.Super Saiyan Bargain Sale includes the jumper in the drawback as well but any forms gain by this drawback aren't jump backed to work.

.I moved **Techniques of the Yadratian** to 4ap as the power over fusions was a bit too good over all.

.The effects of **Dragons Resolve**, will massively decrease the negative effects of the **Majin** race absorbing others, and being overpowered by their personality traits, what would turn a buu in to a 4 year old would only make them slightly impulsive, this will basically drop the effects to 1% normal.
