

by DeverosSphere V 1.3

This Jump takes place within the familiar universe of Dragon Ball Super but at a specific point of time between the "**Tournament of Destroyers**" and "**Future Trunks**" arcs. These events take place after a mysterious woman uses the Dragon Balls to resurrect Frieza, Cell, Nappa, and the Ginyu Force. She then used odd devices world wide to seal away the powers and Souls of all of Earth's strongest warriors. Wanting to control the monster within herself, she develops a linking system in which a human Soul (the Player) can possess the warriors and provide them with strength.

Difficulty:

While in the Jump, Wave Machines are active causing a barrage of waves worldwide that seal everyone's power. In addition to placing stronger fighters' consciousnesses into a state of hibernation, this evens the Playing field and allows weaker fighters like Krillin and Yamcha to go head-to-head with beings that long outclassed them in sheer power.

Easy Mode +1000 CP [*Mandatory if you have not completed 10 or more Jumps*]

In this mode all your in-Jump abilities are suppressed until your body adapts to the Wave Machines either through the Player Soul and link system or by building up your own resistance.

Hard Mode +1400 CP

With hard mode active all of your perks and abilities both in and out of Jump with the exception of Body Mod's are suppressed for the duration of this Jump. By increasing your link bond you can reduce the restraint while possessed until you either reach 100% or complete the Jump.

Gauntlet Mode +0 CP

Unlike the other modes this Difficulty starts with no points requiring drawbacks to gain CP. This Jump completely blocks access to everything gained outside of this Jump except for the Body Mod. In exchange, dying in this Jump is not a Chain Fail but you will have to choose between going onto the next Jump or restarting this Jump on **Hard Mode** with your enemies vaguely remembering your previous actions.

Background:

Within Dragon Ball FighterZ there are three alternative timelines that exist simultaneously determined by whose body the Player Soul lands in.

Unless you take the “**Player's Soul**” Scenario the Player Soul will be the Soul of an unknown civilian who is able to possess the bodies of warriors to temporarily restore their strength.

Other than “**Online Warrior**” each background corresponds to one of these timelines where you are a member of the group that timeline focuses on.

However if you do not wish to be automatically recognised as a member of that group you can instead function as a Drop-In who travels with them.

Online Warrior

You are a new character, a Drop-In, somewhere near the action as an unknown quantity with no relation to the current situation capable of shaping what will happen in this world as you may select which of three body's the Player Soul lands in.

Super Warrior

You are a good friend to and well known ally of the Z-Fighters. Perhaps they know you from back in the day's before Raditz or perhaps you're still in contact, helping them on occasion and just so happen to be there when the Player Soul awakens within the body of Son Goku.

Enemy Warrior

Perhaps you were once a great prophesied evil or the henchmen of a terrible foe, regardless you are considered an enemy of the Z-Fighters and are lucky or unlucky enough to be next to Frieza when the Player Soul awakens within his body.

Android Warrior

You just so happen to be a third party of uncertain intentions who was somehow grabbed by Android 16 when he picked up Android 18, in this timeline she is the host for the Player Soul. By a stroke of luck the Ki you emit, if you do emit Ki, it doesn't set off Androids 21's hunger.

Dragon Warrior (“Restricted”)

This option requires the user to take **+2000 CP** worth of **Drawbacks** and be in **Hard Mode** or **Gauntlet Mode**.

By doing this you will count as all 4 Backgrounds but also find 2 new threats Towa and Mira. Demons who repeatedly show up during important events, empowering your enemies normally the time patrol would arrive to help but not now. The upside is that at least they aren't getting directly involved at least not yet.

Race:

All 200 CP races can become a mutant variant by taking its corresponding drawback for 0 CP.

Earthling - Free

The term is used to refer to all of the intelligent races native to the planet, including humans, anthropomorphs, and some monsters. Earthlings are typically among the weakest races in the DragonBall universe, with the average human's power level being in the single or double digits.

Core Person -100 CP (Free Online Warrior)

The Core People are known as the god race, they resemble humans, only visibly differing due to the shape of their ears plus the range of hair and skin colors. The core people are born from the Magical fruits of the Kaiju and have innate special abilities that far surpass that of any sort of un-trained mortal being. All members of the core race contain at least a small amount of Godly Ki which they can instinctively utilize for techniques such as Magic Materialization, the Kai Kai, Psychokinesis, Telepathy and Healing.

Majin Race -200 CP (Discount Online Warrior)

The Majin are a race of innately Magical beings who were created by Mr. Buu and Miss Buu. They appear to be humanoids with various skin tones and antennae on their heads, they are capable of manipulating their bodies for regeneration and appearance alteration. This species has eternal youth, can survive in space and possesses an odd ki that makes it hard to tell how strong a Majin really is. If you take the “**How do we eat candy?**” **Drawback** for no additional points you may instead become a **Mutant Super Majin** gaining the ability to absorb others with your body parts at the risk of altering your mind and body if you lack control.

Namekian -100 CP (Free Super Warrior)

A race from the planet Namek who are humanoids with plant and slug-like characteristics, including green skin and antennae. They require only water for sustenance however Namekians can still eat solid foods. Namekians are an extremely Flexible and resilient race, capable of extending and instantly regrowing almost any part of their body while also being able to survive and regenerate far greater proportional damage to nearly any other race. The Namekian also possesses a Giant Transformation which allows them to grow in height, physical strength and weight, although it does not increase their energy level.

Saiyan -200 CP (Discount Super Warrior)

A naturally aggressive warrior race who outwardly are very similar to Human-type Earthlings, but with monkey-like prehensile tails. They have a natural affinity to control Ki energy even at young ages. Saiyans can utilize multiple types of transformations, the most common being the Great Ape form that occurs thanks to their tails when looking at a full moon. They can also use the Super Saiyan transformation, an ability which drastically enhances the Saiyan's power and the Super Saiyan God form which incorporates God Ki into the Saiyan.

If you take the “**Kakarot?**” **Drawback** for no additional points you may instead become a **Mutant Legendary Super Saiyan** gaining an immense and seemingly endless supply of Chaotic Ki while also accessing the legendary variations of all Saiyan transformations.

The Hera Clan -100 CP (Free Enemy Warrior)

A once powerful race that lived on the Planet Hera they are a humanoid race with teal-colored skin and orange hair. They possess innate psionic and telekinetic powers that they can train to create energy draining thread and needles. They also have the ability to take on a superior Full Power Form that changes their hair and skin color while greatly increasing their power.

Frieza Race -200 CP (Discount Enemy Warrior)

Most members of Frieza's race have red pupils and are able to "grow" white, keratinous exoskeleton-like clothing referred to as Bio Suits. They also have extreme capabilities that allow them to live as just a fragment of brain tissue in space traveling between worlds and still retain consciousness when placed within a mechanical body. Members of Frieza's race have been shown to possess multiple transformations that are used to suppress their power so they do not exert too much energy and maintain self-control over themselves.

If you take the **"You were made to die by my hand!" Drawback** for no additional points you may become a ***Mutant Frieza Variant***, receiving vastly greater gains through training and the ability to create new transformations to gain more power, such as inverting the suppressed forms to gain an armored form or mimicking the Super Saiyan form to gain a Golden form.

Android -100 CP (Free Android Warrior)

The main Androids of this world are actually modified humans instead of purely mechanical beings making it more acute to call them cyborgs than Androids. You may, if you wish, choose to be a purely mechanical Android, however this race option will still function in the same manner as a modified human who is capable of becoming stronger through training. Androids use an infinite energy reactor for power which prevents them from being detected by Ki Sense.

Bio-Android -200 CP (Discount Android Warrior)

Bio-Androids are a species of artificial lifeforms built from the cells of multiple races hybridizing their strengths and abilities. Depending on the races used to create them they can have many forms and innate powers. Because of the Bio-Androids' organic nature, they are the only known Android model to be able to be sensed via Ki Sense. To customize this race you may select **-300 CP** worth of race's with discounts applied to their respective background, you will then be a composite of those races but you cannot select the mutant upgrade options of those races.

If you take the **"Split-Personality" Drawback** for no additional points you can Mutate into a more ***Complex Bio-Android*** able to shift between your composite form and race components. As a Mutant you may spend your own **CP** with a bonus **300 CP** on more race components. You can take the race drawback to gain the Mutant variation of the purchased race components.

Other North Galaxy Races -100 CP/-300 CP

If you don't like the races presented above you can spend **100 CP** to select another race native to the North Galaxy of universe 7. This includes Triclopes, Tuffles, Yardratians, Cerealians and any race subservient to The Frieza Force including the Ginyu Force races.

For a total of **300 CP** you can select any race from any of the 12 existing Dragon Ball universes other than Angel.

Any Alt-Form that you have will gain an additional upgraded, "**Supreme Mutant Variation**" Alt-Form that is comparable to the proportional increase of the Mutant variations of the Majin, Saiyan, Bio-Androids and Frieza Races.

This variation can also be applied to any future Alt-Form's or Jump race choices with the user gaining both the active "**Supreme Mutant Variation**" and Regular version as Alt-Form.

While in the "**Supreme Mutant Variation**" form any transformation will become a "**Legendary**" becoming stronger and possibly gaining additional effects.

Also, when losing to the map Boss in **Easy Mode** you don't automatically restart the map, instead you may choose once per boss to restart the boss battle over again without using the map's restart. With a young girl shooting a little boy in the face.. +200 CP

Cannot be taken with “**Did Kakarrot screw this up?**”.

Rather than starting at the beginning of the game you instead start within a year before the beginning of the Original Dragon Ball and will sporadically gain access to your perks purchased from this Jump over time unlocking the final one at the start of the Dragon Ball FighterZ Game when this Jump Begins. This selectively Restricts “**So you... must be Vegeta!**”.

What do you know about time travel +200 CP (requires “**Did Kakarrot screw this up?**” Or “**With a young girl shooting a little boy in the face..**”)

Future trunks will not appear in your timeline and your memory of the storyline will be edited so that you lose all knowledge of time travel, future trunks and his timeline. You will remember Cell, the Androids and Goku Black but your context on the events that occurred will only relate to the main timeline and its corresponding movies.

Good luck with the heart virus.

A bit of advice, in the future +200 CP

Normally you would only be here for the duration of the game but with this drawback you will be here for a minimum of ten years. If you have taken the “**Player's Soul**” Scenario then once complete you can either merge the timelines living in that or switch between them at will and split the years however you wish.

P is for priceless +200 CP

You are now a perfectionist and will refuse to accept anything less than perfection.

The Clone Saga +200 CP

It seems that you too have a bunch of Clones out there causing chaos. These guys have all the perks and race options you picked in this Jump but their minds are empty.

A Super Clone Bargain Sale +600 CP (requires The Clone Saga)

Remember how I said those Clones had all your in Jump perks well now they have all of your out of Jump perks as well good luck.

We can wish Raditz back to life +200 CP

Now not only will you have to face the resurrected evil of the Ginyu Force, Frieza, Cell and Nappa but also all of the canonically existing villains and minions with a name. This group includes the Demon King Piccolo, Raditz, Zarbon, Dodoria, King Cold, Androids 19 & 20, The Cell Jr's, Pui Pui, Dabura, Sorbet and many more.

Reborn Stronger and Sleeker +400 CP (Requires We can wish Raditz back to life.)

It seems this world is more complicated than first believed. It is not just one timeline which foes are being resurrected from but multiple containing some threats unknown to this world. Even bringing multiple but different versions of the same villains and their minions from other timelines so they can seek their revenge. These villains include Lord Chilled, Dr. Wheelo, Dr. W, Lord Slug, Turles, Garlic Jr, Mecha Frieza, 5th form Cooler, Meta-Cooler, Androids 13,14 & 15, Future Android 17 & 18, Hatchiyack, Bojack, Janemba, Z-Broly, Bio-Broly, Super Buu, Abo, Kado, Mira and many more. It's a good thing that the Wave Machine affects them too.

How do we eat candy? +200 CP

You are always hungry and if you don't fulfill your desire for delicious food at least 18 times a day you may find yourself in a hunger-induced rage.

Buu eat you! +600 CP (requires how do we eat candy?)

Now you not only have a deep hunger but it takes a darker tone as you now want to eat powerful fighters. You can hold off this desire with a strong enough willpower but it will be far harder if you don't keep yourself full. Should you lose control, everyone is on the menu. If you do lose control I hope you have absorption abilities or a way to turn someone into food otherwise it will get messy.

Kakarot? +200 CP

When it comes to fighting you tend to go into a powerful rage, the longer the fight goes on the less control you have over yourself but with a few minutes breather you can normally calm down.

KAKAROOOOT!! +600 CP (requires Kakarot?)

Turns out it's not just fight that sets you off any time you get hurt any time you are annoyed your rage builds greatly taking far longer for you to calm down. What's worse there is a name out there and you don't know who's but if you hear it you will fly into an uncontrollable rage.

You were made to die by my hand! +200 CP

You have a hatred of one species from the Dragon Ball world. You can ignore it to an extent but should the opportunity show itself you really want that race dead.

This is the end! Die! +600 CP (requires You were made to die by my hand!)

You now have a completely irrational hatred for that race. You would be happy to wipe out entire worlds to kill them and if anyone gets in your way you are more than happy to kill them first.

Split-Personality +300 CP

It seems that you are not alone there. You have an alternative persona within you, one who cannot take control unless you lose control. They seem to be the antithesis of you but they seek out what desires you refuse.

Split-Personality Takeover +600 CP (requires Split-Personality)

It seems this new persona really wants control as it is constantly fighting you for dominance and unless you keep this persona suppressed it will take control eventually. Unfortunately for you, if you have any drawbacks other than this, then the persona, although not able to directly contribute to setting them off, will attempt to use them to weaken your mind and attempt to take control for themselves.

Scenario:

I'm the Jumper Now (Dragon Warrior Only)

For this scenario you will take "Player's Soul", "The Sound of an Ocarina", "In other words, I BECOME you!" and "Finally Full" regardless of their restrictions. As you Play through each arc you must complete its corresponding Scenario taking the form of both the Player spirit and the Scenario race simultaneously as a small hive mind.

Failing any of the scenarios counts as a Jump fail.

Rewards:

On the completion of each Scenario you will receive rewards for that Scenario.

You will also gain these boosted scenario perks:

The Strength of our Link [Boosted]

Any ally you are linked to who is using a technique to boost their abilities will find that it is twice as effective.

Dark Eyes see the Dawn [Boosted]

When your fog-like ectoplasm comes into contact with any energy attacks you will be able to absorb the energy from the attack to refuel your own reserve's.

Become part of something Great! [Boosted]

If you somehow become separated from an entity you can retain all of its knowledge, skills and abilities. However, retaining any racial abilities may require your body becoming augmented.

Literal Split Personality [Boosted]

When creating a persona it no longer needs to be a copy of your own mind. You can now create a copy of anyone else's mind. Regardless of whether the mind is exactly the same as the original or an alternative persona it will be loyal to you and think of itself as an extension of you and unrelated to the original.

Android 21

This Bio-Android Companion was made in the image of Dr Gero's wife Vomi using the DNA of many races including Majin Buu. Thanks to your actions she has full control of her multiple forms and can be imported into your next jump for Free with **+600 CP**.

Player's Soul (Online Warrior Only)

For this scenario you must complete each story mode, taking the place of the Player Soul, as a ghost-like entity. You are able to possess and switch between the bodies of fighters in order to counteract the effects of the wave machines. You will gain a flat backed linking system, which makes it so that the higher your bond level with an individual, the more of their suppressed power can be drawn out of their body while you're possessing them. You can increase your link bond by fighting in their body to increase your spirit compatibility, or by improving your friendship. First you will start by possessing Goku's body and when you have completed the super story arc you will restart possessing the body of Frieza if you succeed in the Enemy Arc you will restart once more this time in the Android arc possessing the body of Android 18. One advantage you have over the original spirit is that you can apply your perks and racial abilities on anyone you are possessing. Post Jump you can keep this spirit form as an additional alt-form and possess people in a similar manner to this Jump.

Rewards: +500 CP

The Strength of our Link

Now with this perk you can actively boost the power of any ally in direct proportion to your link bond. If Taken with "**Limit-Breaking**" you can apply the perk to yourself at full power and your allies proportionally to your link bond as if you were each fighting alone.

The Sound of an Ocarina (Super Warrior)

Long ago a great hero was sealed within a music box to contain a great evil and now the box is open, and the hero is gone you will take his place, the place of Tapion. With both halves of Hirudegarn now free of the music boxes but one still within you, you must permanently trap or destroy the two halves before they can rejoin, however unlike you and the other fighters Hirudegarn is unaffected by the Wave Machines making destroying it far more difficult. You gain an additional alt-form which is the same race as Tapion but for the duration of this Jump that form will have all the racial abilities of your purchased race.

Rewards: +500 CP

Dark Eyes see the Dawn

For successfully dealing with Hirudegarn you gain his most mystic ability the power to turn any part of your body into fog like ectoplasm to prevent damage and for short range movement. If Taken with "**Z-Reflect**" the ability becomes reactively localized to incoming threats any punch or Ki blast can pass right through any spot in your body without you needing to activate the ability however a smart opponent might be able to take advantage of this.

In other words, I BECOME you! (Enemy Warrior Only)

Now instead of being the race you purchased you will become a Tuffle parasite the same as Baby but with all the racial abilities you purchased added on top. You will gain the parasite form as an extra alt form and are able to produce parasitic hivemind extensions of yourself able to infect others to put under your control. Your objective is to infect all of the heroes, villains and all the peoples of earth with your parasite extensions this is easiest done by defeating them first.

Rewards: +500 CP

Become part of something Great!

If any creature is inside of you or you are inside of it either from absorption, symbiosis or parasitisation you can overlap its mind with a copy of your own to become a singular entity as if in a hivemind. For the purposes of perks or other abilities this makes the creature an extension of your body. If Taken with “**Jumper Jr**” instead of overlapping the entity's mind you can instead replace it by moving the original mind into a slightly customisable version of the entity with between 1% and 50% of its original power.

Finally Full (Android Warrior Only)

Fu Fu Fu, where is the fun in letting an innocent girl suffer for the mistakes of her creator, time is not on your side so you should change it. You will now gain a demon race alt form which will be your outer appearance with all the racial abilities of the race you purchased. Your mission is simple, you must save good Android 21 from her intended demise. I know this sounds easy but a specific group won't like you messing with history so beware as progressively stronger time patrollers will show up to try and stop you from saving her. You should be glad of two things, first that the wave machines seem to be having as much of an effect on the patrol as you, which should even the field a bit and second the time patrol won't use time travel to undo what you've already done, meaning they can't undo your victory's.

Rewards: +500 CP

Literal Split Personality

On command you can create a subservient alternative persona of yourself within your body to either take control, aid in multi-tasking or give you advice. The Persona does not necessarily need to be Evil, it could be an exact copy of you or it can be any variation of yourself that you can describe with a simple sentence such as the restrained you, the smart you, the confident you. If Taken with “**CloneZ**” you are able to bestow your created personas their own bodies with between 1% and 50% of your power if you die then you take over your CloneZ's body regaining your abilities and gaining its experiences. The clone body doesn't have to be your own but your persona may find it more difficult to control an unfamiliar body. If the clone dies its mind returns to you and you gain its experiences and abilities.

A Spark of Greatness (Requires Gauntlet Mode)

If you successfully complete this Jump in Gauntlet Mode you can take this final scenario. If you do end up failing this scenario you will not be penalized and instead you will be moved onto the next Jump or return home depending on your choice.

You will appear on Mount Paozu in Age 737 the day baby kakarot was supposed to arrive. You will be an infant regardless of any previous drawbacks or Jump restrictions and you will be found by a man who will later be known as Grandpa Gohan. This world is a hybridisation of the worlds shown in the various official Manga, Movies and TV series of Dragon Ball, Dragon Ball Z, Dragon Ball Super, Dragon Ball GT and of course the Video Game Dragon Ball Fighterz. This world however has two important things changed, first Krillin defeats his bullies and remains at Orin Temple and second Kakarot will never arrive on earth having been teleported to planet Metamor when the pod was supposed to land on earth but keep in mind that Raditz still thinks that this was Kakarot's destination so eventually he will be coming.

For this scenario you will lose all drawbacks you have taken in this Jump but you will only have access to the Body Mod and the perks/items that you received for Free in this Jump. Your mission is for yourself and a sustainable population of the earth to survive until Age 797.

Death or the destruction of earth is not an instant failure. So long as the damage to earth and the death of the people is undone within two and a half years the scenario will not count as a failure. The restoration can be done using the Dragon Balls or other such means.

Reward:

If you Manage to complete "A Spark of Greatness" you will gain your spark which you can incorporate as soon as you have it or you can delay sparking until later.

You may also take as many willing locals from this scenario world as your companions into future worlds.

END:

Dear Old Days

Has this been too much for you or maybe you just want to go home. That's fine you will be taking everything you've gained back with you back home.

Dragon Power

You want to stay In this world? I'll warn you, things will get worse, Goku Black, The Tournament of Power, Moro and things far worse than those later on.

If you're certain you can take **+1000 CP** as a bonus, good luck you will need it.

Power of Dreamer
