Time, Age, Race and Gender:

You start this Jump on the 23rd of June 1991 and for the duration of this Jump you will not be able to change your age and after your initial choice you can not change your chosen origin. You will be a human (***Unless a Half-Magical Race reserved Perk has been taken***) with a gender of your choice, being 11 years old on the 1st of September the start of the same school year that the famous Harry Potter starts.

Perks:

For each **Origin**, the **100 CP Perk** is **Free** and the others cost 50% of their initial price.

Perks marked with a * can be "**Reserved**", making them **Mandatory** purchases when you start that Mini-Jump but granting you the non-Perk canon variant at the beginning of this Jump. It may be worth searching for the * markings now if you think you will want one. There are other **symbols** that indicate the purchases are required for other rewards.

You're a Wizard - Free

You have the ability to perform magic as if you were a young wizard from this setting, requiring you to learn how to cast spells in order to use it. You will fit into one of the three statuses of wizardkind: pure-blood, half-blood and Muggle-borns; this won't affect you mechanically but it may have a narrative effect. You may choose which of these you are unless you take the **Self Insert** or **Mudblood** drawbacks. If you have taken the **Muggle** Drawback you cannot use this Perk in Jump.

Casting - Free

This is not the magical variety but a one off choice, before the Jump starts you may use this **Narrative Perk** to receive a mental list of all canon named characters and their appearances at points throughout the series. You may use this information to recast any character as someone else even if they were not on the list so long as they are within the age range and gender of the character. When combined with other **Narrative Perks** you could change other details and then recast allowing for a situation where, if you have the sense of humour to do so, Cedric Diggory could be played by an age appropriate Kristen Stewart.

Our New Celebrity -100 CP

At the start of every Jump you can choose to be famous for a vague reason; you can choose how your fame is perceived by the public but not what it is for.

Difficult. Very Difficult. -100 CP

Whenever someone has to make a specific decision you can use this Perk to influence them, causing them to doubt themselves and become confused over what the correct or best answer is. This can cause the target to stall for years over even a simple decision making every option seem equally viable so long as you don't want them to have a single answer. This Perk can only affect a single question at a time but can affect everyone trying to answer it.

Gryffindor

Godric's Guts - Free - Exclusive

Hufflepuff

Helga's Heart - Free - Exclusive

You gain a **+500 CP** stipend to be spent specifically on this **Harry Potter and the Prisoner of Azkaban Mini-Jump**. Although you may not have your previous drawbacks you will continue being who you were previously and retain any scars you may have gained.

Perks:

For each origin, the 100 CP Perk is Free and the others cost 50% of their initial price.

They take the shape of whatever a particular person fears the most -400 CP

You now have a special type of shapeshifting similar to a boggart but in far more directions than the original.

You can at will take on the form of whatever causes the targeted person to feel the strongest emotion towards; whether that be rage, greed, fear, hope, compassion or love, you can become what embodies that emotion for them.

Expecto Patronum - Free/-100 CP/-200 CP/-300 CP

You now know the spell **Expecto Patronum** and can use this Perk to customise what creature it takes the form of.

Each rank of this Perk includes each of the preceding ranks.

For **Free** you can choose what Mundane Animal your Patronus Animal is.

For **-100 CP** you can change what Mundane Animal your Patronus is at will.

For **-200 CP** you can change your Patronus into any magical or otherwise supernatural creature from Harry Potter with the Patronus being able to mimic to a far lesser degree some of the creature's powers, whether that be a Basilisk or if you are fond of dark jokes a Dementor.

For **-300 CP** you can change your Patronus into creatures from other universes like a Pikachu or a Tribble.

If you learn the **Animagus** Transformation in universe or gain the **The difference between an Animagus and a werewolf** Perk you can change the **Animagus** form using this Perk as if it were a **Patronus**. If you are using the **-300 CP** version of this perk you will need to have visited those settings to use their powers beyond their physical capabilities.

Attempting to take the form of creatures beyond your own power will place proportional strain upon your mind and magic.

Gryffindor

You need to think of a memory -100 CP

You can call upon your memories at will to heighten and recall any of them as though you were currently living through them, intensifying the emotions and the strength you can pull from them.

Why would I go looking for someone who wants to kill me -200 CP

You can passively tell whenever someone wants you dead, who they are, how likely they are to act on that desire, and how far away from you they are.

Wandless Emotions -400 CP

When you feel strong emotions you can channel them into your magic allowing you to instinctively cast spells in order to receive the desired result, provided you could theoretically achieve the result on your own.

This heart is where you truly live -600 CP 🗝️

Through your words you can calm and focus the mind of anyone suffering from possession or mental corruption, giving those trapped within their own body the clarity and strength to break free and regain control of themselves.

This Perk is automatically applied to yourself preventing similar mental corruption and possession.

Hufflepuff

It would be best if you didn't wander -100 CP

You have a certain way about you that helps you make others cautious, not of you but of the dangers within specific areas.

Should you warn others of dangerous locations or potential threats they will always take your warnings on board and account them into their future plans even if they pretend not to.

Who'd like to come and say hello -200 CP

You have a way with nature so great that you can form a deep and lasting friendship with animals both magical and mundane.

Through this you can pacify a violent animal making it more friendly to you, even those that might normally see humans as nothing more than a snack.

And then he transformed into a rat -400 CP

There are many wizards and beasts that can take another form, hiding in plain sight or striking out with unexpected strength.

You can identify on sight when someone is shapeshifted into another form or is capable of doing so.

Through this Perk you can force people into and out of any transformation(s) they have, even when the normal requirements are not available.

The difference between an Animagus and a werewolf -600 CP * ∞∞

With this Perk you were born a **Metamorphmagus** and have learned to be an **Animagus**. As an **Animagus** you gain all the knowledge required to become one, and will gain two **Animagus** forms, the first is an animal personal to you and you must choose the second one when initially gaining this **Perk**.

As a **Metamorphmagus** you can change your physical appearance and structure taking on the form and feature of any other person similar to a Polyjuice Potion but through sheer will alone.

A regular **Metamorphmagus** is able to partially transform to gain approximations of the features of mundane animals such as a gaining duck's beak or a dog's snout however they do not gain the capabilities of the features.

Using this **Perk** however you are able to take on the abilities of these features and those of magical beasts but unlike an **Animagus** this does not allow you to fully transform. Attempting to emulate the abilities of creatures beyond your own power will place proportional strain upon your mind and magic.

Additionally with this **Perk** if you make physical contact with someone cursed with Blood malediction or lycanthropy you can choose to alter it into a controllable **Animagus** form, thereby curing them and preventing their future children from being infected by it.

Ravenclaw

I find retracing my steps a wise place to begin -100 CP

You have an amazing memory for locations and can perfectly recall everywhere you have ever visited and plot out the exact coordinates in a mental map as well as the times you were there.

That felt good -200 CP

Sometimes you just have to punch someone and when you do it with this Perk it will be blocked from the minds of anyone with authority, preventing you from being punished.

Authority figures will assume that the person protesting your punch is lying if they try to get you in trouble for it.

Even if the victim brings forth proof, the authority figure will “know” that they have faked the evidence and will dismiss any evidence presented.

Using this you will bypass any type of defences or difference in power so that they feel as though they were a normal person who was hit by another normal person.

Ancient Runes that's a fascinating subject -400 CP

You are a master of magical runes beyond the scale of most wizards as you gain an understanding of the underlying logic of rune crafting.

Through this understanding you can use any language to create runes by inserting your magic and will into each, though some languages are more powerful than others.

In dreams we enter a world that's entirely our own -600 CP ☹️

When you sleep you are always aware that you are dreaming and are able to create and control a dream world within your slumber.

This dreamscape functions as if it were real, allowing you to accurately test and practise anything including curses and soul corrupting magic without any risk of harm to yourself or to the aspects of your mind which you can separate to act as the world's inhabitants.

When you awaken all harm to you and your mind will be undone as the world and its people return to being parts of your mind.

Should anyone be foolish enough to enter your dream worlds uninvited, they are subject to the world's laws as you deem them to be and should you awaken without letting them out a fate worse than death awaits them.

Reveal your secrets -400 CP

By touching an object you can learn all that is known about it; even if the object itself has enchantments that protect it from external information gathering you gain the collective knowledge of it from the unconscious minds of all living beings and whatever has been written about it in unencrypted books.

Dementor's Kiss -600 CP ☹️

You can now perform the Dementor's Kiss, the act of sucking out and consuming a person's soul, a punishment worse than death that completely destroys the person's soul making it impossible for them to become a ghost or be restored without building them a new soul.

You can select what soul is pulled out if there are multiple souls within a body; breaking it down and enriching the user's soul, strengthening it and fully repairing any damage it has received.

With time and experience the consumer would be able to absorb any beneficial traits the soul possess and possibly acquire a modicum of the skills and memories with the soul, this is far more effective when used in tandem with Legilimency.

There are no detrimental side effects to the user's soul from this.

You can also feed the soul to another for them to gain the same benefits.

This would not make you immune to the dementor's kiss but could allow you to overpower them, both preventing them from stealing your soul and allowing you to take any soul they have recently consumed.

This special variation has another feature by proclaiming "***I doubt where I am, and I deny where I've been.***" The map will show your current location and the area surrounding it to the scale and details that it normally would for Hogwarts.

The map can return to a blank parchment by saying "***Mischief managed.***"

Hufflepuff

A Small Rock -100 CP

Whenever something is occurring nearby that you should be focusing on, one of these Little Rock's will appear sailing through the air in order to smash an object or comically hit you on the head, though without causing any real harm, this acts to direct your attention to what you should be focusing on.

Monstrous Book of Monsters -200 CP

The Monster Book of Monsters is a particularly vicious sentient textbook that can incorporate qualities of various creatures. This version of the book is a bit different than other versions. The book can gain the abilities and mannerisms of various creatures. This lets you turn the book into a chimeric book-shaped creature.

The book is quite informative, but usually difficult to access due to its aggressive nature. This copy, while quite vicious to others, seems incredibly loving and caring towards you acting almost like a puppy or a kitten.

The bus also has an indicator for any stranded individuals of the wizarding community.

The bus comes with a follower driver and attendant who maintain the bus.

Time-Turner -600 CP *

A Time-Turner is a magical device used for time travel normally having a special timepiece which resembles an hourglass on it.

Normally a Time-Turner can only safely return the user to the past for five hours per day requiring a manual turning for each hour. However this version comes with a digital clock and a calendar function that allows the user to move forwards and backwards safely with the calendar and use a return switch to bring you back to the time you came from.

Post-Jump this return switch can be toggled to allow multiple return points in time on the way back to the present. A time stamp is used to determine how long you have been in the Jump and how long you have left.

The Time-Turner's digital clock and calendar can go up to nine decades backwards from the current "present", allowing you to arrive at any time during the selected year with one turn. Keep in mind however, that travelling in time like this has built in Anti-Paradox protection preventing you from changing the past; it does however allow you to change the context for what you have already seen.

For example, a dead person not actually being dead but just unconscious, or the person who aided you before actually being you in disguise.

Thestral -100 CP

This breed of magical winged horse has a skeletal body, face with reptilian features and wide leathery wings that resemble a bat's.

The most well-known ability of these beasts is their invisibility to those who had not seen death. In other words, they were only visible to people who had seen someone dying and fully accepted, understood and internalised the concept.

The Order of the Phoenix -300 CP 9¾

Rather than a member of the order itself this option grants you the order's mascot or at least one of its species, your very own Phoenix!

This Phoenix has willingly bound itself to you with it considering itself your friend and adopted family member allowing you to access its wonderful abilities.

Although not the most prominent of a phoenix's abilities, their song has a magically deep emotional impact striking fear into the hearts of its enemies while providing support, courage and comfort to their friends.

The tears of a Phoenix have potent healing capabilities able to bring a person back even from the brink of death though they gradually lose their power the longer they are not used and not contained.

A Phoenix also has a number of transport capabilities that allow them to aid their friends including being able to disappear and reappear at will in bursts of flames and take whoever was holding them along, similar to Apparition and effortlessly fly great distances with four people holding onto its tail.

Scenario:

You may take this scenario or leave it be.

Hogwarts Legacy

It seems your attention this year will be a little split as for the duration of this Mini-Jump you will be simultaneously in two places at once.

Both of you will have a copy of all purchased Perks, Items and Drawbacks.

One of you will continue through this Mini-Jump as normal and the other will wake up in an alternate timeline in **1890** on a flying coach from London. This coach contains a specific new student who after the coach gets attacked by a dragon will be port keyed to Gringotts where they will come into their ancient magic. You may choose to replace this new student or arrive alongside them with you being able to determine their wand, appearance, name and house as if using the in-game options from Hogwarts Legacy. After escaping to Hogwarts the students will start attending school for their fifth year. The new student will possess the power to control a mysterious and ancient magic that has recently resurged and caused a goblin rebellion.

To complete this scenario you must defeat Ranrok's goblin rebellion, step foot in the repository, pass your O.W.L.S and finish the school year.

If taken during the **SpeedRun** it will occur in tandem with the **SpeedRun** Year.

Reward:

If you complete all the objectives you may take **The Student** and up to 16 willing followers as companions for **Free**. You gain the Perks **Ancient Magic**, **Goblin Silver-Smith** and your **House's** appropriate **Legacy Arsenal** you may also purchase additional **Legacy Arsenal Perks** for **-100 CP** each.

If taken during the **SpeedRun** you may also take the items **House Chest** and **Dark Arts Battle Arena**.

If there are no active contradictions to the timeline this will be retroactively inserted as the Jump's true past.

Ancient Magic

With this **Perk** you have an affinity with Ancient magic, a powerful but lost form that may take a lifetime to master, through this you can see echoes of magic normally invisible to ordinary witches and wizards, and could easily interact with such echoes.

Ancient magic instinctively grants its user spells previously unknown to them to give them an immediate response to dangers.

The Student

If you choose not to replace the Student then they will become a companion and return to Hogwarts with you in the Half-Blood Prince as a new student.

They will gain the Origin house you picked for them, the **Ancient Magic** perk, the House appropriate **Perk** reward and **+300 CP** to be spent on this Mini-Jump, each previous Mini-Jump and each future Mini-Jump when you do them.

If you take this a second time due to the **SpeedRun** you may import the original granting them a second Origin and an additional **+300 CP** per Mini-Jump.

Goblin Silver-Smith

You gain all the knowledge and practice skill required to forge and enchant any form of Goblin-wrought silver. If you use goblin magic for the enchantments in your work it would be eligible for **Shakash**.

Shakash is the goblin principle that when a masterpiece is no longer needed by the one who paid for its creation it is returned to the smith who made it so their students can study it to make further treasures.

If you take this a second time due to the **SpeedRun** you will gain a self refinishing stock of Goblin silver.

Legacy Arsenal: Gryffindor

From your time in Gryffindor you have mastered four Force spells fully understanding the principles and uses of each spell as well as how they can be creatively used.

- The first spell you gain is **Flipendo**, the Knockback Jinx causes a force that flips a target upwards and backwards.
- The second spell you gain is **Descendo**, which slams a target down towards the ground with great force that does not do direct damage but may be damaged from impacts.
- The third spell you gain is **Depulso**, the Banishing Charm it pushes an enemy or object away from the caster with great force, it doesn't cause any direct damage but may cause indirect damage from impacts.
- The final spell you gain is **Accio**, the Summoning Charm it pulls small objects into your hand, and pulls larger objects towards you, it can also be used to summon specific objects to you so long as you know them specifically.

Legacy Arsenal: Hufflepuff

From your time in Hufflepuff you have mastered four useful spells fully understanding the principles and uses of each spell as well as how they can be creatively used.

- The first spell you gain is **Glacius**, the Freezing projects an icy-cold air stream from the tip of the wand. This can be used to freeze water, extinguish fires and trap enemies.
- The second spell you gain is **Arresto Momentum**, the Charm is used to slow a target for a short amount of time, the larger the target, the shorter the duration.
- The third spell and arguably fourth spell you gain are **Levioso** and **Wingardium Leviosa** which are both levitation charms from the same root however each has a different application. **Wingardium Leviosa** is able to lift far more weight, moving and rotating it around but cannot be used on self animating objects. **Levioso** is only able to lift its target slightly off the ground though it is able to keep hold of self animate targets such as living beings.
- The final spell you gain is **Transformation**, a spell that allows you to temporarily transform a target into random objects. If cast on an Animagus while in their animal form, they are forced to revert to human form.

Legacy Arsenal: Ravenclaw

From your time in Ravenclaw you have mastered four transfiguration spells fully understanding the principles and uses of each spell as well as how they can be creatively used.

- The first spell you gain is a specialised **Conjuring Spell**, that allows you to temporarily materialise an object from a recipe or blueprint that you remember. When used in tandem with **Reparo** it can create any components a target is missing.
- The second spell you gain is a specialised **Altering Spell**, that can be used to change the physical form or colour of objects. If used in combination with the **Conjuring Spell** and the corresponding materials you can make your Conjurations permanent.
- The third spell you gain is **Evanesco**, which can be used to destroy Conjurations. If used in combination with the **Conjuring Spell** it can be used to target objects breaking them down into their base components.
- The final spell you gain is **Reparo**, which is used to repair broken objects and structures, if used in tandem with **Evanesco** it can make damage worse.

Legacy Arsenal: Slytherin

From your time in Slytherin you have mastered four dark spells including the three Unforgivable Curses fully understanding the principles and uses of each spell as well as how they can be creatively used.

- The first you gain is **Confringo**, a spell that sends a bolt of flame at a distant target, resulting in an incendiary burst that sets the target on fire and can be used to ignite torches, pyres, and campfires, which is sometimes necessary to solve certain puzzles.
- The first Unforgivable Curse you gain is **Imperio**, the Imperius Curse places the victim completely under the caster's control, making the victim unquestionably obedient to the caster.
- The second Unforgivable Curse you gain is **Crucio**, the Cruciatus Curse when cast successfully on a living creature inflicts intense, excruciating physical pain on the victim.
- The final Unforgivable Curse you gain is **Avada Kedavra**, the Killing Curse that when cast successfully on a living being instantly forces a painless death, without causing any injury or damage to the body.

House Chest

The chest gives anyone who opens it a unique set of personalised robes that take on an appearance related to their personality and preferences, it can also be set to glow every time they cast a spell.

Dark Arts Battle Arena

This warehouse attachment contains a Battle Arena surrounded by an illusion of the Forbidden Forest. Using this attachment you can summon fully functional replicas of any type of generic enemies you have faced or specific copies of anyone you have met in order to battle them. Should you receive sufficient harm you will be ejected from the warehouse attachment, you will be fully healed and the warehouse attachment will become disabled for 24 hours.

If this **Perk** is used on a living being the copy will be an inactive copy that will function as if it were a fresh corpse.

I have to go back haven't I -500 CP

Once per jump or once every 10 years you gain a **1-UP** which activates when you die preventing a chain fail for that death unless you choose to stay dead.

You are a very unusual wizard -200 CP

You are now exempt from the bias of others, so much so that even if someone hates all wizards, humans and your gender they would not take that into account when dealing with you.

Words are, in my not-so-humble opinion, our most inexhaustible source of magic -600 CP ♠

You have learned how to use all words as if they are magic allowing you to speak in any language as if it were a mystical Incantation. An example of this would be casting **Fire** or **Feuer** as a spell in order to produce a very similar flame to **Incendio** however in most languages this would come with a higher strain on you than traditional spells.

This customised portrait can be placed onto any wall in order to create or remove one of several blueprint layouts including a tunnel, a multiple roomed house and a vault like facility that appear in the structure it's placed on.

Although the internal layout of each design is identical regardless of where it is placed, the aesthetics of the structure match the materials of the wall used.

The entrance area behind the portrait will not exist unless the portrait decides it does, making it difficult for someone to break in when not invited.

Hufflepuff's Cup -600 CP ⚡

This small golden badger engraved cup was enchanted by Helga Hufflepuff to be an internally isolated space and perform a permanent transmutation.

This method of transmutation allows you to convert any liquid into any other type of liquid, even those that don't exist in-universe and thereby surpass Gamp's Law of Elemental Transfiguration.

Through this you could convert water into blood, vinegar, wine and even liquid gold with none of it sticking to the inside when poured out.

Once a liquid has left the cup the magic keeping it in liquid state will end and may cause an exothermic or endothermic reaction.

Rowena Ravenclaw's Diadem -600 CP ↴

This diadem is often said to enhance the wisdom of its wearer, however in truth it does far more than that. While being worn the diadem clears the user's mind of all distractions, allowing them clarity of thought, and increases their perception of events, allowing them longer to think in the same span of time.

The diadem also grants the user a form of photographic memory which allows them to call up anything they have ever known and retain any knowledge they gain whilst wearing the diadem perfectly once it has been removed.

In Jump this can become an independent copy or it can replace **Voldemort's Horcrux**, destroying it and either appearing in its place or in your possession.

A part of lord Voldemort's soul was placed within you when you took the drawback "A Specific Scar" and in order to complete this Jump you must make it so that Voldemort can no longer use this part of his soul as a Horcrux assuming you haven't already dealt with it.

The easiest way to destroy this Horcrux is through your own death thereby killing this fragment with you, though this will require you to actually die and then return to life in order to not fail this Jump.

This is not the only method of destroying the Horcrux within you and there are potentially methods to deal with it other than destruction so long as its connection to Voldemort and its use in tethering his soul is disabled.

End of Mini-Jump

This Mini-Jump ends when you return home from Hogwarts at the end of the school year. Any relevant Mini-Jump-only drawbacks end. You now have the summer off and you can either spend your time in jump or optionally you can take another jump and this jump will pause.

You will **not** receive any of the stipends from the Mini-Jumps and will instead be required to take drawbacks in order to gain **CP**. The drawbacks you choose will receive **double** the stated **CP** and can be taken from any section in this Jump document.

You will then start the Jump, however during the first year the inciting events of all the movies will occur simultaneously!

- The **Philosopher's Stone** will be hidden at Hogwarts.
- The **Chamber of Secrets** will open as Tom's Diary finds a new host.

To complete this Gauntlet you and your allies must be victorious in the **Battle of Hogwarts** at the end of the 1991 school year. Normally this battle will be against Voldemort and his army with it occuring in some fashion regardless of your actions.

Each event noted above will empower Voldemort and his army with the fewer resolved when the **Battle of Hogwarts** begins increasing the difficulty of the battle.

Reward:

For completing this not only do you have all of your outside powers, Items, companions and abilities returned but your drawbacks are removed and you gain a new origin.

If you have any previous purchases that would have been discounted by your selected reward origin you will be refunded the difference of the **CP** price.

If you qualify for any of the **Secret Rewards** you may receive them after the Gauntlet is completed but before making the **Gauntlet Ending Choice**.

Gauntlet Ending Choices:

Finish:

If you choose to, you may finish this Jump gaining all of the stipends you would have received if not for the Gauntlet and spend them across the document, you may not take any drawbacks, once you are done you may go directly to the **Ending Choice**.

Continue:

You can choose to continue in this Gauntlet's continuity by receiving the Stipend for the Philosopher's Stone Mini-Jump and completing it without taking Drawbacks. Once finished with that section you will move into the Chamber of Secrets Mini-Jump as if you were playing as normal.

Restart:

You may restart this Jump in a new universe and you may pause this Jump to do other Jumps before you return to this document. When you return the two **Origins** you gained in this gauntlet will be your mandatory Origin and this gauntlet section will be disabled. Any Purchases within this Gauntlet will count towards **Secret Rewards** and if different continuity's both versions of ancestor picked through **True Heir of Jumper** will be gained.

A lesser **Noble House** with few pure-blood ties who went into extinction during the last wizarding war. The house was targeted due to it being openly opposed to the Dark Lord to the extent that they had disowned the only surviving direct descendant for being the Dark Lord's supporter. This prevents him or his descendants from ever claiming the position of Head of House.

Noble Inheritance:

As the heir of wizarding nobility you are entitled to certain claims, for each Noble Heir Perk you purchased you will gain **+1 NP** Noble Point to be spent in this section.

Nobile Race +1 NP (Requires True Heir of Pendragon)

For each of your **Half-Race** Perks you may choose to be the descendant of what the race considers nobility. You won't gain authority but this will help your standing with the race.

Seat of Jumper - Variable NP (Requires - True Heir of Jumper)

You may take this for the **True Heir of Jumper**, instead of gaining a **Lesser Seat of Nobility** you may insert a Noble House in a name of your choice retroactively inserting it into the Jump's history.

- For the **Free** version this house will be a **Noble House** often referred to as lesser Noble houses. These are those Houses officially registered after the Statute of Secrecy resulting in the house lacking any political power.
- For the **-100 CP** version this will be a **Noble and Venerable House** registered as noble before the Statute of Secrecy giving you political power and **+1 NP**.
- For the **-200 CP** version this house will be a **Noble and Ancient House** instated by the Norman kings giving additional NP totaling **+2 NP**.
- For the **-300 CP** version this house will be a **Noble and Most Ancient** founded and officiated before the Norman Conquest giving additional NP totaling **+4 NP**.

- 3 Noble and Most Ancient Houses have **20 seats** each.

A number of rules may alter the number of seats one House may control requiring multiple representatives to use all seats but they cannot be taken away.

Unless a Vote is specifically important, most seats don't attend voting sessions, reducing the total number of seats voting to about two hundred seats split between three main factions with a total of four hundred and forty six potential seats being active in **1990**.

If the Lord of one House is the acting Proxy for another House, they may use all of that House's seats as though they were their own.

Lords Ring - Free

This magical ring is connected to the Head of a Noble House as it holds the coat of arms and mantra of the house. You gain one ring per house that you are the Legal Heir of and you are able to wield the magic within the ring when you are of legal age or have been Emancipated.

The magic within the Ring indicates that you are the Head of the Noble House and have ownership of all of the Houses Lands, Vaults and Properties, its magic cannot be faked by any method within the continuity. This Ring can also be used to list any Family owned properties including relics, properties, biological samples taken and take control of any protections that are a part of the property, recall them to a family vault or show their current location. If you have multiple Lords Rings you may merge them allowing you to show any and all house crests at will or separate them into separate rings.

Family Magic -2 NP

Your House has an Ancient Grimoire focusing on a specific magical subject, passed down from family each Head of the House to the next, adding to or improving upon the book. Using this book you are able to learn its powerful spells the family has monopolised. If you want this Grimoire to be more powerful, you will have to update it as you go.

Lord's Manor -2 NP

This ornate and elegant estate is surrounded by elaborate gardens, including a fountain. It has a pair of wrought-iron gates that permit select individuals to pass through them as if the gates were smoke. The castle is also surrounded by a moat that projects an illusion of the castle being in a flooded lake.

Independent Magical Island -15 NP

Your family is the head of state for a magically hidden and protected island nation off the coast of the British Isles. In muggle law this island is a British Overseas Territory making it self-governing and is not under the jurisdiction of the Ministry of Magic as it is considered a sovereign state under magical law with it even having its own branch of Gringotts. The exact nature of this nation is up to you to determine, you could if you wish, be the sole resident.

Perks:

Empath -100 CP *

Through this magical empathy you are able to sense, feel, or otherwise experience the emotions, or emotional experiences, of the people around you.

Using this you can easily determine when the emotions of others are false and bypass any Occlumency capabilities they have to see their true emotions.

Nonverbal Spellcasting -100 CP

You have learned how to perform nonverbal spellcasting, a method that allows you to cast spells using intention instead of incantations.

Using this Perk it is easier to perform nonverbal magic than verbal magic but nonverbal magic tends to require more focus and reduce the potency of the spell being cast.

Wandless Magic -200 CP

You have learned how to perform magic without the use of a wand.

Normally not being able to channel magic through a wand would make spells less accurate and less potent but with this Perk you will no longer have that issue.

Historically wandless magic was the normal method of spellcasting with wand magic being created as a teaching tool for beginners, however in time this tool became a crutch causing witches and wizards to see wandless magic as a mark of great skill.

Seer -200 CP * *

Seers are extremely rare, being able to see into the future by going into a trance-like state and then make accurate prophecies of the future.

Unlike most Seers you will have full recollection of your predictions, however you will not remember any of the complex action involved or the consequences related to the prophecies.

Items:

Consumables restock once a year and Items lost or stolen will return to you once a week. Though not all of these Items are magical in nature they have all been found in Britain.

Magical Portrait Free/-50 CP

You may select any picture or portrait that you know of and receive a magical wizarding variant where due to enchantments placed on portrait the subject is animated, changing with the time and seasons or if it is a portrait of a person it will become a semi-sentient imitation of them.

The first purchase is **Free** with all further purchases being **-50 CP**.

Anti-Cheating Quill -50 CP

This Quills is enchanted so that it can be connected to any book, library or database and auto-writes answers to written questions based on the contained information.

A Spell-Checking Quill -50 CP

This quill is enchanted to correct an individual's spelling errors. As the charm's potency decreases over time, its effects might backfire, leading to correctly spelled words becoming misspelt.

Flying Furniture -50 CP/-100 CP

You may select a piece of furniture to be enchanted to fly, allowing for you to travel to a destination through the air.

Typically, choosing a rug or carpet aids in the comfort of transport but more robust objects such as a trunk can be chosen for a greater sense of safety.

The first purchase costs **-50 CP** with all further purchases being **-100 CP**.

Probity Probe -100 CP

This device is a type of magic detector that looks like a golden car antenna.

The Quill of Acceptance/Book of Admittance -150 CP *

This magical quill detects even faint sights of magical ability in children and attempts to inscribe their names in a large parchment book known as the Book of Admittance.

The Book of Admittance refuses to allow the quill to write in it until sufficient evidence of magical ability is displayed, thus guarding against Squibs being incorrectly admitted.

Post-Jump you can alter this to pick up other types of supernatural abilities such as picking up the signs of potential Jedi.

Metal Wand -200 CP

An odd-looking sonic tool like the one found on Barty Crouch Jr., it seems not to be a real magic wand but instead some kind of screwdriver.

Trunk Mansion -400 CP

If someone with permission opens this they will find a ladder going down into a 4 floor mansion with magical utilities in line with Muggle items, its own clean supply of water and oxygen. The outside area is as tall as the mansion and 8 square miles of garden in an artificial environment which can be used for farming. While the Trunk is open it can't be moved with any force less than what would be needed to move its contents and when closed it will be light as an ordinary trunk. If this Trunk is opened by anyone without permission it will be identical to the mundane furniture. If the trunk is destroyed a new trunk will be created in the closest safe location to the previously destroyed one to act as an entrance and exit.

Blue Police Box -1000 CP

An odd blue telephone box that was found in the back of Ollivanders that is bigger on the inside and seems to have some method similar to a time turner and Apparition that allows it to move through **Time And Relative Dimension In Space**.

Problematically there aren't any instructions on how to use it.

Drawbacks:

Harry Potter and the PS1 Game +500 CP/+1000 CP *

It seems that there is something wrong with this jump and instead of it being the movie universe you are instead in a PS1 game.

For **+500 CP** this means that what you see of the world will be blocky with flat textures on the floors, walls and people who are now complex NPCs.

For **+1000 CP** the entire world will function as a **PS1** video game of the Harry Potter World with events forced to stick to a linear plot with optional time sensitive subplots; you will not gain a lives system or any of the in-game power ups however there may be collectibles that do nothing.

You must reserve this drawback with the effects of the drawback taking place for the entire Jump; however the **CP** will not be available until the **Post Potter** section.

19 Years Later +500 CP

It seems your time in this jump will be much longer than expected as you must wait another 19 years until the 1st September 2017, the day Albus Severus Potter was supposed to board the Hogwarts Express for the first time.

The Cursed Child +500 CP (Requires "19 Years Later")

It seems that you are going to stay longer than September as someone has been messing with time; normally these events would not take place however with this drawback they will occur even if specific people have not been born.

During the 2017/2018 school year you appear in an alternate timeline, one where Voldemort has won the second wizarding war.

In order to finish this Jump you must undo what has been broken either by fixing the world or by restoring the past.

You gain a **+500 CP** stipend to be spent specifically on this **Fantastic Beasts and Where to Find Them Mini-Jump** though to use it you must stay within the wizarding world for one more year. Although you may not have your previous drawbacks you will continue being who you were previously and retain any scars you may have gained.

Perks:

For each origin, the **100 CP** Perk is Free and the others cost **50%** of their initial price.

Are You Magizoologist Material -100 CP

You gain the knowledge of how best to look after any creature that comes under your care.

If it walks on two legs -400 CP

As Chief Burdock Muldon of the wizard's council found out, the definition of 'being' is not as clear as the legs they walk on.

Using this Perk you are able to set the legal guidelines for what is and is not considered a sentient and sapient being, and should you find a race that lacks it you may grant their entire species sentience and/or sapience.

A Ferret of Monstrous Size -200 CP

You are able to enchant any creature with a memetic field so that anyone who sees it will both continuously and subconsciously believe that it is an odd variation of a mundane animal, not a supernatural creature.

Controlled Selling and Breeding -200 CP

You have learned the courting and breeding methods of all the creatures under your care as well as how best to protect and incubate their offspring.

M.O.M. Classification -200 CP

This offers a guide to the perceived danger level of a creature at-a-glance, both for yourself and others.

The Office of Misinformation -200 CP

Some magical catastrophes or accidents are simply too glaringly obvious to be explained away, however with this Perk you can always produce perfect falsified evidence with a plausible non-magical explanation in order to salvage the situation.

Items:

Items lost or stolen will return to you once a week.

The first purchase of a discounted Item is half price with **-100 CP** Items being Free.

Any further purchases of an Item after the first is full price.

Fantastic Beast Feed -100 CP

This feed trough produces a limitless supply of the perfect food for any creature that attempts to eat from it.

For each origin, the **-100 CP** Companion is Free and the others cost 50% of their initial price.

Fantastic Beasts -??? CP

You may purchase any creatures from the book "**Fantastic Beasts and Where to Find Them**" with their price being their **M.O.M. classification** multiplied by **-100 CP**.

The first purchase of a specific race of magical beast will get a **+100 CP** refund meaning that your first **Flobberworm** and **Horklump** are **Free**.

Variant -100 CP

This can be taken with any other purchase and will allow you to alter your chosen Magical Beast so long as it is still clearly a member of that species.

Puffskein -100 CP

Puffskein are found worldwide, they are spherical in shape and covered in soft, custard-coloured fur. A docile creature that has no objection to being cuddled or thrown about. Easy to care for, it emits a low humming noise when content. From time to time a very long, thin, pink tongue will emerge from the depths of the Puffskein and can snake through a house searching for food. The Puffskein is a scavenger that will eat anything from leftovers to spiders.

Wampus Cat -400 CP

The Wampus is a magical cat native to the United States, somewhat resembling the mundane mountain lion or cougar in size and appearance, however its yellow eyes have the power of both hypnosis and Legilimency.

Hungarian Horntail -400 CP

Supposedly the most dangerous of all dragon breeds, the Hungarian Horntail has black scales and is lizard-like in appearance. It has yellow eyes, bronze horns, and similarly-coloured spikes that protrude from its long tail. The Horntail has one of the longest fire-breathing ranges (up to fifty feet).

Bowtruckle -100 CP

The Bowtruckle is a small tree-guardian apparently made of bark and twigs with two small brown eyes. It is found mainly in the west of England, southern Germany, and certain Scandinavian forests.

The Bowtruckle, which eats insects, is a peaceable and intensely shy creature but if the tree in which it lives is threatened, it has been known to attack; however an offering of woodlice will placate the Bowtruckle long enough to let a witch or wizard remove wand-wood from its tree.

Chimaera -400 CP

This rare Greek monster has a lion's head, a goat's body, and a dragon's tail. There was only one recorded instance of a wizard killing a Chimaera, although the victor died from exhaustion after killing it.

Swedish Short-Snout -400 CP

This attractive silvery-blue dragon's skin is sought after for the manufacture of protective gloves and shields. The flame that issues from its nostrils is a brilliant blue and can reduce timber and bone to ash in a matter of seconds.

Diricawl -100 CP

This flightless magical bird is known to Muggles as the Dodo. It is plump, fluffy-feathered and native to the island of Mauritius in the Indian Ocean.

While Muggles believed this bird to be extinct, in reality, it has the ability to disappear and reappear elsewhere as a means of escaping danger, similar to apparition.

Manticore -400 CP

Scenario:

Fantastic Beasts The Movie:

During this year a magical accident will occur that will send you to a version of New York City, in an alternate timeline in **1926** at the same time and place that a British wizard and "magizoologist" Newton "Newt" Scamander arrives.

The sad difference between the world you know and the one you find yourself in is that Jacob Kowalski was never born and his small but very important contribution is missing and this in turn will prevent the downfall of Grindelwald.

You will lose all memories relating to this Scenario, the events of this film and the people involved but retain your knowledge of hogwarts.

In order to complete this Scenario you will need to take a prominent role in either ending or preventing the wizarding war. This may take multiple movies.

Reward:

You gain **+1000 CP** that can only be used in this **Fantastic Beasts and Where to Find Them Mini-Jump**.

End of Mini-Jump

This Mini-Jump ends after one year and you can either continue onto the next Mini-Jump or optionally go on another jumpchain adventure while this jump is paused.

Similar to doing a group obliviation the more people who already know about it the harder it is to conceal. As the Secret Keeper, you are the only person who is capable of revealing the protected information to others, regardless of who knows about it. You are also not under the restrictions normally required for a Secret Keeper. This can also be used to passively break any Fidelius Charm you come into contact with.

Root of Knowledge: ♠

As a seeker of knowledge sometimes finding the answer is only the beginning.

Requires:

- Standard book of spells chapter seven
- I know exactly the counter curse
- Have you ever heard of this spell
- Words are, in my not-so-humble opinion, our most inexhaustible source of magic

Reward:

You are rewarded with **+300 CP** and the **Words of Power Perk**.

Words of Power

At the start of each Jump you will learn the fundamental building blocks of the magic native to that Jump's continuity. These blocks are technically the most basic and primitive spells in that field of magic with some producing minor effects such as flame while others seemingly do nothing. Using these building blocks you are able to construct any spell possible within that continuity by using the correct combination of blocks.

Reward:

You are rewarded with **+300 CP** and the **Domination Perk**.

Any spells that are cast in this tongue have the power of the spell greatly increased and any defenses that would normally hinder the spell are greatly weakened when the spell comes into contact with them.

If the user knows any words from any other dragon languages they can gain complete comprehension of it becoming as fluent if not more so with the language than a member of the corresponding dragon race.

Spirit: ☹

Solid Soul

You are able to make the energy of your heart, mind and soul into physical manifestations allowing you to construct spiritual armour and complex solid illusion from your spiritual energies but are restricted to only using your own energies for this. You can manipulate these manifestations to improve them when they are reabsorbed which you can do almost instantly. The easier of the two ways to improve the energy's is to inflate the manifestations increasing the mass of the projection and growing the amount of the energy your body contains when it is reabsorbed. The harder of the two ways is to refine the manifestation into a denser amount of energy which becomes stronger and more durable when reabsorbed. A beneficial side effect of manifesting these energies in this way is that they cannot be consumed or manipulated by most of the entities who would normally be capable of doing so.

Rag Tag Team Leader: ☉

You have a habit of solving problems in ways people don't normally expect and helping those who follow you to do the same.

Requires:

Whisps are weak soul like entities without any form of life or consciousness, they are however able to follow logic formulas in order to follow your commands. Whisps are able to possess any spiritually empty form including but not limited to statues, armour, corpses, skeletons and even soulless but otherwise living bodies. You are also able to alter this effect so that instead of being believed to be a trick it is the effect of one of the power types local to the Jump or one of the power types you are capable of performing. While this perk is active any expert will be unable to distinguish it from the true power type and may even believe they understand how to replicate its effects.

Once bestowed a title the Head of House is entrusted with a custom Lords Ring as appropriate to their position.

The following Items will also gain a **Capstone Booster**:

Cloak of Invisibility

The **Cloak of Invisibility** now grants you far more than mere invisibility. While wearing it for all intents and purposes you cease to exist for anyone other than yourself allowing you to pass through everything, move without regards to gravity and whilst being worn you can even choose people to forget that you exist.

Time-Turner

Felix Felicis

A Convincing Counterfeit

This locket is no longer limited to taking on the form of another object and can now produce an identical copy of whatever object is being targeted. When created the fake takes the original's place stealing any protection or tracking the original had.

Deluminator

You can now use the **Deluminator** to completely control what a target is able to see, allowing you to show them exact and perfect facsimiles of events or completely remove something from their field of view. Through this you could make locations appear completely different, make day appear to be day or see at night as though it were day.

Interdepartmental Memos

These documents are now upgraded so that they can dynamically take on the appearance of any documentation whether physical, magical, spiritual or digital. Appearing to be completely genuine as far as the target can tell even if it is supposed to be a handwritten letter that they had written and they know for a fact that they did not.

Auto-Answer Quills

The Quills is now connected to every form of documented information within the local continuity when you ask or intend to answer a question you will gain every valid answer to it and can have any of the answers auto fill the question.

Divinity: Trickery

Though this Perk does not give you any way to wield divinity, if you do achieve godhood or a method of divine control, you gain an innate divine connection to the domain of Trickery.

Collector of a Shattered Soul: 4

By gathering all of Voldemort's canonical Horcruxes you have discovered his secrets and improved upon them.

Requires:

- A Specific Scar
- Tom's Journal
- Nagini
- Resurrection Stone
- Salazar Slytherin's Locket
- Hufflepuff's Cup
- Rowena Ravenclaw's Diadem

Through this connection you can project your mind into any of your Horcruxes to gain finer control over them and can even destroy them from afar.

Should your body die, each Horcrux can function as a limited **1-UP** allowing your soul to possess the Horcrux and regrow your body, using the fragment in the process.

Be warned that to craft a Horcrux without suffering the canon complications you should strengthen or grow your own soul so that less of it is required or more of it is excess to your body meaning that you do not need it to sustain your heart or mind.

The following Items will also gain a **Capstone Booster**:

A Specific Scar

This drawback is converted into a **Perk**, the Scar becomes toggleable and grants you all of Voldemort's skill and knowledge at the Start and End of any Jump he is in.

Tom's Journal

This book is no longer limited to only copying Dark Lords and now allows you to add any famous figure from any point in their life to this book as a new page.

Nagini

Nagini is no longer limited to a snake Animagus and both the perk and the companion can take on the form of any kind of snake both mundane and magical.

Resurrection Stone

This stone is no longer limited to summoning the souls of the dead but can now create new souls that can take any shape or form as you wish but as a fresh soul they will only have the knowledge, intelligence or experience you give them. If you have previously examined other souls you can use this to create approximations of them.

Salazar Slytherin's Locket

Through using this locket you are able to view the innermost emotions of others regardless of distance, and you may also force the target to experience them as realistic hallucinations.

Hufflepuff's Cup

The powers of this cup are no longer as limited, allowing you to permanently change any form of matter into any other form of matter, both within the cup and by using it as a magical amplifier to affect anything you can affect with your magic.

Rowena Ravenclaw's Diadem

Ravenclaw's Diadem is now upgraded so that whilst it is being worn you will be able to passively use divination to discern knowledge about any subject from the collective knowledge of the universe allowing you to find any secrets lost to time.

Sword of Godric Gryffindor

The sword of Godric Gryffindor can now strengthen itself with more than just what substances it touches, allowing you to merge it with any other weapons and wands gaining their combined capabilities. You can also separate them back out at will.

Divinity: Soul

- **The Goblet of Fire**
- **The Order of the Phoenix**
- **The Half-Blood Prince**
- **MacGuffin Will**

Reward:

You are rewarded with +1000 CP and the Item **Hogwarts School of Witchcraft and Wizardry**.

Hogwarts School of Witchcraft and Wizardry:

You have gained a pocket dimension copy of Hogwarts Castle that can be imported in any jump. It is a Scottish wizarding school established around the 10th century and considered to be one of the finest magical institutions in the wizarding world.

Though this building may have a number of rooms and Items that can be purchased in-jump, the ones in this magical building cannot be separated from it.

The scope of the land you are rewarded with includes everything within the boundaries of the extensive school grounds surrounding it, which included sloping lawns, flowerbeds, vegetable patches, as well as a loch called the Black Lake, a large dense forest called the Forbidden Forest, several greenhouses and other outbuildings, and a full-size Quidditch Pitch.

One of the castle's towers holds an owlery, which houses all the owls owned by the school and by students.

The land you own outside of the school grounds includes Hogsmeade station to the south, Hogsmeade Village to the north and the Forbidden Forest to the east.

The following Items will also gain a **Capstone Booster**:

Philosopher's Stone

The Philosopher's Stone can now act as an infinite supply of magical energy allowing you to use it as a magical source and allowing even a muggle to cast powerful spells; as well it can be used to make any spell you cast permanent.

The Goblet of Fire

You may write any names and place them within the Goblet of Fire and hold the individuals chosen to the contract of the tournament.

Instead of just stripping the supernatural abilities from those who refuse to participate it will now do so for anyone who loses and allows you to drink from the Goblet to gain that power.

MacGuffin Will

This Item can now be used whenever you want, allowing you to pull the Items directly out of the page that can aid you in solving any problem and push you towards discovering any potential threat. Naturally, you must still make sense of how to use this yourself.

Elder Wand

Just by touching this wand you permanently remember the collective magical knowledge stored within it and any spell that is cast using this wand is far more controllable with you being able to empower a spell to reach up to 100 times the strength in comparison to a regular wand.

Divinity: Magic

Though this Perk does not give you any way to wield divinity, if you do achieve godhood or a method of divine control, you gain an innate divine connection to the domain of Magic.

Lost or Found: *

Should a solution or the problem be what you are after finding it is always the goal.

Requires:

- Floo Powder
- **The Marauder's Map**
- The Maze
- **A Personal Graveyard**
- **Room of Requirement**
- **Misty Archway**
- **Seer**
- **The Quill of Acceptance/Book of Admittance**

Reward:

You are rewarded with **+800 CP** and the **Delivery Service** Perk.

Delivery Service

Whenever you are looking for a specific object you can use this perk to instantly gain knowledge of its current location both in name and coordinates. This also allows you to teleport it to you so long as if you were at its current location you would be able to remove it from its restraints, take it elsewhere and lift it above your head with one hand.

The following Items will also gain a **Capstone Booster**:

Floo Powder

By spreading the Floo Powder into a circle you can create an active portal between your current location and any other location you know the name or coordinates of. The portal will have a film-like barrier that prevents anything from moving through it without a conscious awareness causing it to move.

The Marauder's Map

This magical map is no longer limited in scope or range and you can dynamically set where the map is looking at by proclaiming "*I'm bored where I am and should see where I'm not*" and thinking of a specific location. This will cause the map to show the location and the area surrounding it to the scale and details that it normally would for Hogwarts.

The Maze

You can now set up a second version of this Maze which is dynamically shifting at the entrance to your warehouse.

Anyone who tries to enter your warehouse without your active permission will need to make their way through the maze to enter.

Should someone enter the maze you will be awakened and informed.

A Personal Graveyard

You may select anyone to teleport to this location automatically restoring them mentally, physically, spiritually and any other measure to their prime.

You may also tag anyone you know so that if they die or are destroyed they will automatically be teleported to this location and restored but they cannot leave the Warehouse if they have already used the Graveyard to come back to life in that Jump.

Misty Archway

The Misty Archway is no longer limited to only visiting other realms of existence and can now be used to create new ones. Through this you can create alternative afterlife's and control the restrictions with. This can also create pocket dimensions that can contain a singular world however unless you have a way to claim the new realms they will be restricted to the Jumps you create them in preventing you from visiting them without a way to travel between Jump Settings. You start out only able to control the broad strokes of such dimensions, but in time will be able to learn how to control what emerges down to the smallest grain of sand, within reason. Strangely, the ability to create thinking life through this item yet eludes you-perhaps due to its innate link to death?

Room of Requirement

This room is now upgraded so that anything that has been lost within the continuity and is not likely to be found by its owner will be brought to this room and held in stasis. You can set the room to auto return any type of property to its owner or set it to alert you to anything of interest that you may want to see.

Seer

Using your sight you can perceive the magic, heart, mind and soul of others even when unable to use your eyes allowing you to see anything normally undetectable like spirits or psychic manifestations. You can also use this to dynamically look into the past, present and future though this may require a medium to focus on a specific event.

The Quill of Acceptance/Book of Admittance

The Quill can now do far more than detect if a child is magical by writing the name of a person within the Book of Admittance that person will gain the magical capabilities of a wizard, however this will not take effect unless the writer has the person's face in their mind when writing their name.

Any similar power type that can be gained by writing their name and putting the common title in brackets such as (Mutant), (Quirk User) or (Jedi), this will not affect the target's philosophy, only their abilities so someone marked as a Jedi could still become a Sith. One final note is that you can only enter power types from settings you have visited.

If a power type is granted that would normally be inheritable by the target's descendants the granted power can be transferred to descendants in the same way.

Divinity: Discovery

Though this Perk does not give you any way to wield divinity, if you do achieve godhood or a method of divine control, you gain an innate divine connection to the domain of Discovery.

Death's Command

Now you are the master of the Hallows you are the master of death, you can see how and when someone is fated to die then change it as you see fit, to cause them a specific death or grant them life unending; though be warned erasing a person's end may lead to a fate worse than death.

A True Master

Any Items you own will refuse to allow anyone else to use them unless they have been given specific temporary permission by you.

Additionally any Item you own will teleport to you whenever you call it. If another version of any specific Item you own exists in-Jump it will respond to your will as if it was your own, though by itself this Perk will not fiat-back them.

The following Perks and Items will receive **Capstone Boosters**.

The Boy-Who-Lived

This Perk no longer leaves marks of physical harm from surviving instant death and each time you die this Perk grants you immunity to that specific method of death.

Be thankful it's not your neck

This Perk is no longer limited to being used only 10 times a day allowing you to use it without limit on any intact objects you have direct contact with.

You have proven yourself useful

You are no longer limited by how much artificial material you can make and can have the material take on whatever colours you find appropriate.

It was Death and he felt cheated

You no longer need to limit death to a single chance within a single day and may let them run wild until the target has met their final destination.

Cloak of Invisibility

This cloak now does more than simply hiding its wielder as it removes them from the awareness of reality itself allowing them to be hidden from all senses and methods of detection including fate itself with any outside divination and prophecy showing how events would go without you.

Misty Archway

This gateway is no longer limited to the afterlife and will now grant you passage to anywhere and everywhere within the local multiverse or any pocket dimensions that were created in other settings using this Archway. Post-spark it can even be used to map and visit every multiverse without restriction.

Resurrection Stone

You are no longer limited to only summoning shades, you can now use this stone to truly resurrect the dead, recreating their body from any point in their life, though it is advisable that you summon their shade first as they may prefer their afterlife.

Elder Wand

The pride of this wand resents the notion of being a weaker choice than others and to that end so long as it has your permission it devours and merges with any other magical focuses you give it, the Elder Wand then gaining the combined power and skill of both.

Divinity: Death

Though this Perk does not give you any way to wield divinity, if you do achieve godhood or a method of divine control, you gain an innate divine connection to the domain of Death.

Wand Builder:

Through wandlore, a future wandmaker could learn the ancient secrets of creating a wand, each having four components: wood, core, length, and flexibility. However, no single aspect of wand composition should be considered in isolation of all the others.

Rolling is not mandatory for any wand. However, if you roll for all options on the first wand you will receive **+100 CP**. You may not take this stipend a second time even if you completed the **SpeedRun Gauntlet**.

Wand Handle:

You may also choose to add a customisable Wand Handle and decorate it as you see fit having a comfortable grip, a blade attachment, an animal head such as the one of your Hogwarts house and many other options.

Keep in mind this will not alter how your wand works and this is purely for comfort or vanity.

Wand Length:

Wands are usually between 9 and 14 inches with some custom wands being shorter wands or longer wands.

Roll 1D6 + 8

Longer wands might suit taller wizards, but they tend to be drawn to bigger personalities, with a more spacious and dramatic style of magic.

Shorter wands tend to favour elegant and refined spell-casting with particularly short wands choosing wizards whose character lacks something.

There might also be some correlation between a person's size and the lengths of their wands but judging solely by height is a crude measure.

Flexibility:

The firmness of the wand wood is a factor not often considered separately from the other components of the wand but it tends to denote the degree of adaptability and willingness to change possessed by the wand.

These are the grades of flexibility from most flex to least flexible.

Roll 1D20	Flexibility
1.	Quite Bendy
2.	Fairly Bendy
3.	Very Flexible
4.	Quite Flexible
5.	Surprisingly Swishy
6.	Swishy
7.	Slightly Springy
8.	Supple
9.	Reasonably Supple
10.	Whippy
11.	Pliant
12.	Brittle
13.	Hard
14.	Solid
15.	Stiff
16.	Rigid
17.	Unbending
18.	Slightly Yielding
19.	Unyielding
20.	Roll Again

Wand Style:

The style of a wand can vary dramatically even within the categories stated below.

Roll 1D8	Name of Style	Description of Style
1	Notched	Unlike other wands this style is asymmetrical containing multiple segments where it is jagged and arched.
2	Classic	This style of wand is the most cylindrical having been smoothed down to remove any protrusions or divots.
3	Soft spiral	This style of wand is mostly cylindrical but contains a uniform curve that follows the wand around the edge to the tip of the wand.
4	Spiral	This style of wand is made of multiple interlocking pieces of wood that all twist around one another into a singular spiral.
5	Stalk	This style of wand is mostly cylindrical however it has nodules on its shaft.
6	Ringed	This style of wand is mostly cylindrical however it contains multiple outcroppings of rings running down its length.
7	Crooked spiral	Unlike most other styles of wand this one curves off slightly from the grip following the spiral inlay of the wood.
8	Natural	This style of wand is similar in appearance to a branch as if freshly fallen from a tree.

Magical Cores:

Every wand contains a magical core, these cores are created from magical creatures and act as the will and intent behind a wand, making it responsible for shaping and guiding the spell that is being cast.

Three Supreme Cores:

Due to Mr. Ollivander having opted to only use phoenix feathers, unicorn hairs, and dragon heartstrings, those types of wand are the most commonly used by witches and wizards from around the world.

Roll 1D60	Name of Core	Description of Core
1-6	Dragon Heartstring	Considered to produce the most powerful and flamboyant magic and helps in learning spells faster and easier, however they are more prone to accidents.
7-12	Phoenix feather	These are capable of the greatest range of magic, though may take longer to reveal this but tend to show the most initiative, sometimes acting on their own.
13	Thestral Tail Hair	Thestral tail hair is regarded as an unstable, if not the most difficult, substance to use in wand-making. It is the most potent, but incredibly tricky to master.
14-19	Unicorn tail hair	Not very powerful, but the least prone to accidents and the least likely to change loyalties.
20-22	Veela hair	Veela hair cores made for "temperamental" wands that will only let a select few wield them.
23-26	Troll whisker	Blunt and easy to wield but inferior to most other cores.
27-28	Thunderbird tail feather	Extremely powerful, though difficult to master as they tend to cast curses on their own pre-emptively, they are also particularly good for Transfiguration.
29-33	White River Monster spine	Produces spells of force and elegance.

34-35	Rougarou hair	Believed to have an affinity for the Dark Arts.
36-37	Horned Serpent horn	Exceptionally powerful and sensitive to Parseltongue, vibrating when it is being spoken.
38	Basilisk horn	Powerful and unruly having a strong affinity for the Dark arts and Healing magic.
39-42	Curupira hair wands	Unstable and known to choose talented, but also unpredictable owners.
43	African mermaid hair	If anyone other than the rightful owner attempts to pick it up, it would shock them.
44-47	Snallygaster heartstring	These wands are capable of learning a wide range of magic quickly but often lack the power of most cores.
48-50	Wampus cat hair	An extremely stable wand that has an affinity for curses but is lacking in most other areas.
51-54	Jackalope antler	A consistent wand that lacks any speciality or power but is more malleable than most being able to adapt to any specialisation.
55	Fairy Wing	A good wand for someone free-spirited and less practical or is able to cast powerful Charms and Magic involving Air, and is sometimes beneficial for Divination.
56-58	Koralle	A consistent and stable wand but lacks the power of most others.
59-60	Acromantula Fang	Aggressive and unruly often resulting in backfiring spells for any one other than its rightful owner.

Wand Wood:

The trees used for wands tend to be specially grown within magical areas in order to produce wood able to channel magic.

The wood tends to act as body and nerves for the wand allowing the magic to be channelled and directed in a specific direction.

Roll 1D50	Name of Wood	Description of Wood
1	Acacia	Tricky wands that often refused to produce magic for anyone other than their rightful owner.
2	Alder	Best suited to non-verbal spell work, whence came its reputation for being suitable only for the most advanced witches and wizards.
3	Apple	Powerful and best suited to an owner of high aims and ideals, as this wood mixes poorly with Dark Arts.

Note:

On magical strain: Within Harry Potter canon magical stamina appears to be functionally identical to mental stamina. Perks referring to magical strain should generally be assumed to be referring to purely mental strain, with over-straining magic leading to losing capabilities for a while-think Tonks not using her Metamorphmagus abilities during the half-blood prince. Naturally, sufficient overstrain would lead to death.
