

THE MARVELOUS **DRAGON BALLS**

The Marvelous Dragon Balls Jumpchain-V1.05 By DeverosSphere

Welcome to an Earth very similar to Earth 199999 (ie Marvel Cinematic Universe), You have arrived in the year 2008 in the USA, New York City, Manhattan island, Clinton District also known as "Hell's Kitchen".

In this world a young man will be reincarnated into the body of the recently deceased Saint Lee, an 18-year-old with a golden 5 star tattoo on the back of his right hand which takes the place of the 5 star dragon ball.

This world, although similar to Earth 199999, has a number of differences beyond the arrival of the soul who becomes Saint Lee and the Dragon Balls. Mutants and the sentinel services are already an open secret with the characters shown in "The Gifted" existing within this world. The events depicted in the various TV series take place earlier than expected such as the events of "Iron Fist" and "The Defenders" occurring approximately eight years earlier.

How will you react to being in this world and the events that take place in this city that you best know from the Marvel Cinematic story during your **ten year stay**. The arrival of Iron man, The Hulk battling the Abomination, the Battle of New York, and the Infinity War's SNAP.

Marvel Base Race:

Upon arriving in this world you will become a member of the Marvel Human race. Some of these Humans belong to a subspecies of the Human race which thanks to an altered genetic sequence allows them to manifest SuperHuman abilities. **You must pick 1 Marvel Race.**

Ordinary Human - Free

As the body you are gaining belongs to the Marvel World, it is similar to a Human Earthling of both the Dragon Ball World and world of the Jumper's origin, but has slight genetic differences.

Mutant -100 CP

A Mutant is a Human being that possesses a genetic trait called the X-Gene. It causes the Mutant to develop SuperHuman powers that manifest at puberty. Human Mutants are sometimes referred to as a Human subspecies *Homo sapiens Superior*, or simply *Homo Superior*.

InHuman -100 CP

InHumans are the descendants of prehistoric Humans that were experimented on by the extraterrestrial race, the Kree, manipulating the DNA sequence that can become the X-Gene to allow them to acquire SuperHuman abilities through a process known as Terrigenesis.

InMutant -200 CP

Although theoretically impossible there have been some cases where someone is born both as a Mutant and an InHuman, becoming an "InMutant" also known as an "InHomo Superior".

Powers:

Mutants, InHumans and InMutants all gain random powers varying on the level of strength and usefulness. At the start of this Jump you will not have access to your power but If you have not gained this power during the Jump you will gain it post Jump.

You will have two options for gaining your Powers, you can roll or you can buy them.

If you choose to roll you as a Mutants or InHumans you gain a single power and must roll 1 **D600** or as an InMutants gain three powers and roll 3 **D600**.

The resulting number will correspond to a power from the **Power Chart** at the end of this Jumpchain document that is the power they will gain in this Jump.

If you choose to purchase your powers you can do so using the Generic Superpower Supplement and gain an initial **+400 PP** per power you choose to purchase.

When a Mutant power or the first InMutant power unlocks will vary from person to person usually upon puberty but for these purposes it will randomly unlock at some point throughout your Jump.

For an InHuman to access their power or for an InMutant to access their second power they must go through the process of Terrigenesis by coming into contact with Terrigen Mist.

InMutants will unlock their third power when they have unlocked both the first and second powers.

If using the Generic Superpower Supplement, the Inhuman Power will be restricted to the Experiment Power Origin and the Mutant will be restricted to the Biological Power Origin.

The InMutant power will not have any Power Origin Restrictions.

Dragon Ball Race's:

You don't have to stick with being just a Marvel race for an additional cost you can also have the DNA of a Dragonball Race transplanted into your body. Your genetic structure and internal organs will mostly change into the chosen race but you will still technically be a Human of the marvel universe and retain the external appearance of a Human. Unlike when using the lesser shenron you will not lose any **Marvel Race** powers when gaining the Dragon Ball DNA.

Marvelous Saiyan -200 CP

This will integrate Saiyan genetics within a marvel Humans DNA, with it you'll have the physique of Saiyan, though it should be more properly called a 'Marvel Saiyan!"'

This body will gain the Zenki boost, a high physical growth potential and the ability to learn new techniques with ease. With knowledge and training this body will be able to access the Super Saiyan form but as it does not come with a tail it will not be able to access the great ape form.

Marvelous Namekian -200 CP

This will integrate Namekian genetics within a marvel Human's DNA, extending the Human lifespan by one-third while remaining young for almost the entirety of the lifespan.

The user will gain the Namekian healing factor being able to restore cuts, bruise's, broken bones and even severed limbs. Namekian's are also able to survive off almost no sustenance and are able to stretch any part of their Body. However you will not be biologically able to produce Namekian Eggs or use the Namekian Separation, Fusion or Absorption techniques. The Marvelous Namekian can either become a warrior type Namekian with great physical potential for the growth of combat techniques or a dragon type Namekian with great mental potential for the growth of magical and technological development.

For an additional cost of **-100 CP** you can become a combination of the warrior and dragon type Namekian like the nameless Namekian who split into Kami and Piccolo.

Marvelous Core Race -200 CP

This race will have similar physical capabilities to the Asgardians of the Marvel Universe and can have numerous magical abilities, for free you can roll **1D8** to gain the power below.

You can pay an additional **-50 CP** to roll for another ability. If you already have the option you rolled you can pick any ability as if you rolled Free Choice.

1. **Heart Sense** - The ability to Feel the Good, Evil and Emotions within someone.
2. **Soul Link** - The ability to create a link between two people so that if one dies the other will die as well.
3. **Materialization** - The ability to create basic physical matter out of thin air.
4. **Life Transfusion** – The ability to resurrect a dead person by bestowing your own life energy but if you bristow too much you will die in their place.
5. **Deep Awakening** - The ability to draw out a person's latent potential and abilities.
6. **Healing** - The ability to rejuvenate anyone and restore them to full health instantly,
7. **Kai Kai** – A technique that allows you to instantly teleport to a planet, place or person.
8. **Free Choice** - Pick any of the above abilities.

Background:

Choose One

Drop-in:

Even in a world filled with power and the impossible, you are unique. You have no established history, no new memories, only a body native to the marvel cinematic universe. You might start off as an unknown, but you will have the potential to be a legend unlike any other.

World Resident:

You've learned to live a mundane, normal life even if you're not exactly normal yourself, you know how to live without drawing too much attention, even if every weird thing starts happening as soon as you have shown up.

Shield Agent:

You've entered this world as a member of the Super secret espionage agency known as S.H.I.E.L.D, an American extra-governmental military counter terrorism and intelligence agency, tasked with maintaining both national and global security.

Super Hero:

You've come into this world as a person whose heroic actions and achievements so far are well known with the world expecting far greater yet to come from you. Perhaps you are some great scientist, a dashing prince, a patriotic soldier or just one who has chosen to protect the world from forces beyond understanding. Regardless, you are known as someone who has always tried to protect others.

Perks:

A good red wooden table! -50 CP

You are a master at fast talking when it comes to money or benefiting from a transaction. With this Perk you can negotiate any price by using confusing terms and half baked logic so convoluted that even a genius will take a few minutes to realize they have been tricked. This tends to work better when you have some kind leverage to prevent the other party from going back on their side of the agreement.

Wisdom of a Z-Fighter -100 CP

You gain the knowledge of any character from the Dragon Ball universe from any single point in their life this knowledge can include KI techniques and development methods.

The KI methodology of the Dragon Ball universe is distinct and different from those used in the hidden city of K'un-Lun; it would take a lot of time and effort to combine the two.

This Perk can be Purchased additional times with the price reduced to **-50 CP**.

MC of the MCU -200 CP

Using this **Toggable** Narrative Perk you can become the narrative core becoming the center of events within the local universe. How you find yourself at these events will have logical reasons, such as S.H.I.E.L.D. asking you to help save Tony Stark from Afghanistan or a glowing Cube that when grasped teleports you to Morag as Star Lord attempts to steal the Orb. In these events you will gain an awareness that this Perk is responsible and can choose to avoid it.

A Fist with five stars -500 CP [Requires the drawback “Sainted” be taken]

This Perk can not be taken by a **companion**, it is also a **Capstone Booster**.

You gain a five-star tattoo on the back of your hand. When combined with the other six dragon balls **that when you enter the Jump will be scattered around Hell's Kitchen** you can summon a small Shenron. The power of this Shenron is far less than its cannon counterpart and the wishes it can grant are limited by the rules of the marvel cinematic universe.

Examples are that this Shenron with the full power of a wish can only create a single Senzu Bean or about 68 cubic centimeters of the “No. 0 matter” which is needed for most capsule corp technology. The dragon balls can grant the knowledge of any individual to any other individual but should the minds of the two individuals be too different then there can be side effects including brain damage. The dragon balls can alter the DNA of a Human to become a marvel variant of a Saiyan, Namekian or even a core world person but it will override Mutant or InHuman DNA causing the target to lose their powers. Each race's potential would also be restricted by the talents of the recipient. The dragon balls are incapable of creating marvel variants of the race's which Frieza, Cell and Majin Buu are members of and any attempts to create a hybrid race will have a 99.9% chance of mortality. **Once the dragon balls have been used the ones not in your tattoo will scatter around the world you are on**, with the higher energy in the marvel cinematic universe it will not take a full year for the balls to charge additionally they will charge faster if they are close to a compatible power source.

This Perk gains Post-Jump Upgrades based on how many Scenarios have been Completed.

Drop-in Perks:

Kung-Fu Barbecue -100 CP [Free for Drop-in]

You are amazing at the primary components of cooking, knowing what foods need how much heat over how long and what seasonings best suit them.

Using this Perk and a bit of time you could make a top class meal with just frozen meat, a little salt and open fire.

This Perk also helps you figure out methods of using more specialized abilities for cooking purposes.

Not a Kame School Technique -200 CP [Discounted for Drop-in]

Sometimes people will ask questions and sometimes you don't want to answer.

With this Perk you don't have to so long as you give at least a response you can satisfy the question they are asking.

If someone wants to know what something is, just tell them it's not finished yet and they will stop asking.

You can call him the 'Kame Sennin'! -400 CP [Discounted for Drop-in]

Perhaps you're not that good at making up an excuse but you don't always have to.

This Perk makes it so that if you give the opening of an answer the other person will happily elaborate on the lie by filling in the blanks with what they already know.

Any gaps in the flow of their logic will be dismissed as them just not knowing something.

This is now a Turtle School Technique -600 CP [Discounted for Drop-in]

Any time you see an abnormal technique such as Magical Spells, Ki Techniques, Mutant Powers, Super Science, Demonic Curses and even the Divine Blessings, you will be able to reverse engineer the concept and replicate the Technique as a Ki Technique however the energy required could be dramatically higher than the original depending on how well its replicated.

Using gold to make copper - [Boosted]

Not everyone focuses solely on Ki and you may have other things you prefer to focus on using this boost you are no longer restricted to only using concepts as a Ki Technique.

So long as you understand the concept of an abnormal technique you can replicate it with any abnormal skill set which you possess just keep an eye out for the energy cost.

Bystander Perks:

I didn't take myself as a god -100 CP [Free for Bystander]

Despite your power, despite your species using this Perk all methods of testing including a DNA test will show you to be biologically Human.

So long as you do not have physical features that contradict this, people will not think that you are anything else, at least not without proof and even that can be dismissed if approached the right way.

At will you can **Toggle** or change the settings for this Perk to register as any other species that you have a Perk, Origin or alt form that indicates you as that race.

Conceal and control -200 CP [Discounted for Bystander]

You have the capability to consciously weaken any of your abilities to any state between being at full power or to the point of seemingly non-existence allowing you to train difficult to control powers at low level without needing to worry about losing control.

This skill will even allow a Mutant or InHuman who has switched their power to the lowest setting be completely hidden from any power detection devices so that even the most specialized Mutant detection devices of the sentinel services will not differentiate them from an ordinary Human.

Student of the year -400 CP [Discounted for Bystander]

You have a knack for learning and so long as you are theoretically able to replicate a technique and have a strong enough compatible source of power, you will be able to learn how to do it. This will usually not take too long unless it's an ability far beyond your capabilities even so the longest it could possibly take to perfectly replicate the most complex technique for the least capable novice with this Perk is one year of dedicated study and practice.

Now you see me -600 CP [Discounted for Bystander]

You will now have the **Toggable** ability to always be able to find yourself in the blindspot of everyone's vision, with you having the effect of directing everyone's attention away from yourself so long as you do not directly interact with anyone.

Any object you're holding while using this will also become completely unnoticeable until either you are noticed or you put it down.

Now you don't - [Boosted]

When upgraded you can have this ability affect all images of you including both digital and hand drawn. This filtering effect can function even when you are talking, touching and fighting someone however they will still notice any physical effects caused by your actions.

Shield Agent Perks:

A.C.R.O.N.Y.M. Master -100 CP [Free for Shield Agent]

You have mastered an odd talent for developing code names and project titles becoming an expert at creating “**Abbreviated Code Relying On Names Yielding Meaning**” that are relevant to the project you are working on and as complex or simple as you would like.

Gut Feeling -200 CP [Discounted for Shield Agent]

You have gained an instinctive ability that will always allow you to sense when someone is maliciously attempting to deceive, influence or manipulate you.

This also allows you to vaguely deduce what they are planning, allowing you to anticipate, quickly adapt and prepare for several steps they might have planned against you.

Rules of Leadership -400 CP [Discounted for Shield Agent]

Your leadership ability is amazing, with you being comparable to Nick Fury as you possess an innate understanding of how to win the loyalty and devotion of anyone under your command allowing you to effectively keep order and morale.

This extends to you having enough ability to easily command an entire organization on the level of S.H.I.E.L.D.

This also extends to other required abilities to run an organization, like resources administration and even charisma, if needed.

Level 10 clearance -600 CP [Discounted for Shield Agent]

You will always have up to date instant access to any intelligence or documentation from all systems and networks from all in-Jump government agencies.

This information is converted into a mental database with statistical correlation capabilities.

This information includes access to all secret documentation and restricted information.

Alpha Level - [Boosted]

You are now able to receive up to date instant access to information known by anyone in-Jump. Any non documented information will be documented and added into the mental database.

The database will also automatically gain notations that indicate what information is false and if it was intentionally falsified by who and for what reason.

Hero Perks:

The Unflappable Hulk -100 CP [Free for Hero]

You now have complete control over your own emotional state allowing you to prevent yourself from feeling certain emotions and allowing you to react better to situations. Additionally you will be able to instantly differentiate between your own emotions and those that manifest artificially allowing you to protect yourself from emotional attack.

That is America's Ass! -200 CP [Discounted for Hero]

You are a hero and wherever you go you can **Toggle** this perk to have as many people as you'd like feel a great deal of admiration, pride and even patriotism towards you. This makes others far more likely to follow your requests and inspires the notion that whatever you are doing is for the benefit of others. This may not stop people from attacking you but they will feel discomfort in fighting you along the same lines as if they were attacking Santa Claws.

Stark Intelligence -400 CP [Discounted for Hero]

You have a gift for technology and you will find it easy to figure out how the internal components of any technology works as soon as you see it. As long as you have the materials on hand you find it easy to recreate any technology you find or combine it with any other technology you have come into contact with even for technology from the furthest reaches of the Galaxy.

That's not your origin story -600 CP [Discounted for Hero]

All heroes and villains have an origin story, the day they got their powers and the events that made them the person they are today, and with this Perk you can take it for yourself. This Perk will make you aware of when someone is about to start an origin story, what they will gain out of it and what you have to do to take it for yourself. When you take their origin you will gain their power set but remember, you have to go through the events losing what they lost and gaining their strengths and weaknesses for yourself.

It is now - [Boosted]

With this upgrade this becomes a **Narrative Perk** that no longer limits a backstory to just yourself and instead of just hijacking origins for personal gain, you can copy them for further use on both yourself and others. Now when you are made aware of a potential origin story, rather than being forced to go through the same events in their place personally, you can just select a person (yourself or others) and a particular Origin, then selectively apply fragments of that Origin story to bestow the new strengths and weaknesses.

Afterward, the wielder will feel fatigued and require sleep. Normally In Humans, the psychological after-effects of confronting one's inner rage and hatred could take decades to overcome but this staff will allow them to take a Zen like view of those emotions knowing they are there without letting them cause harm.

Shield Agent Items:

Tesseract Battery -100 CP [Free for Shield Agent]

You get three of these Tesseract Battery's a week. They are small devices initially created by Arnim Zola to store the power drawn from the Tesseract. Such batteries were used to power many HYDRA weapons such as Arnimhilation 99L Assault Weapon, HYDRA Cannon and the Peruvian 0-8-4.

Weapons that use Tesseract Batteries tend to project blue energy either as a beam or a pulse which can vaporize most organic matter including Humans with ease.

These energy projectiles tend not to be as effective against other materials for example it would be completely absorbed by Vibranium, but with focus it can still create a hole in a brick wall.

Shield Bracelet -200 CP [Discounted for Shield Agent]

This metallic silver wrist bracelet has a slot for a Tesseract Battery and can emit a hemispherical gold-blue protective cover.

This energy shield can resist the firepower of almost any firearm.

The protection is strong enough that even if a high power explosive is detonated in front of it, so long as the user can fully hide behind the shield they would not even feel a sense of shock from the blast.

The only drawback for this device is that it has a large consumption of energy as such it would completely drain a Tesseract Battery of power in less than a day if in constant use.

One Tesseract Battery is supplied with this purchase but will not be replaced once used.

Lola -400 CP [Discounted for Shield Agent]

This cherry red 1962 Chevrolet Corvette appears to be identical to the one owned by Agent Phil Coulson.

Helicarrier -600 CP [Discounted for Shield Agent]

This is an advanced flying command center that doubles as an aircraft carrier the same as those used by S.H.I.E.L.D. as highly strategic mobile bases from which they could perform a number of effective reconnaissance, stealth deployment, or direct strike operations. This version was specifically designed to be capable of sustained, independently-powered flight, via four, massive repulsor turbines, which allow it to stay in the air indefinitely although it is able to utilize seaborne and submersible capabilities.

The Super Saiyan Forms

If you took the Saiyan Dragon Ball Race you should eventually be able to develop the transformations up until Super Saiyan 3.

Unless you gain a tail you cannot transform into a Great Ape meaning that SSJ4 is unavailable. Unless you have Godly Power or make more Saiyans for the ritual you can not access SSG.

The Rules for The Infinity Gems

The in Jump Infinity Gems will function the same as in the movie while in Jump but if you keep them post Jump due to how they function they will only be usable as a bunch of pretty rocks. You could use them as research materials or possibly a battery.

The scenario rewards will each be able to function post Jump to the degree that they are shown to work individually in the movies.

Wish Dragon Rules Explanation

All wish dragons can bestow any wish as long as it does not exceed the power of their creator. However, each dragon has a set of rules that guide what wishes they are allowed to grant. Each Dragon's rules were originally taken from the dragon ball wiki page for each dragon but this section has been slightly altered due to feedback as the interpretations of some of these rules are somewhat disputed within the dragon ball community so take them with a pinch of salt.

The Rules for Kami's Shenron

- Shenron can grant one wish.
- Shenron will not grant the same wish a second time. To better explain this two different people can make the same wish for themselves such as immortality, youth, or resurrection but they can not have the same wish target themselves twice.
- Shenron can wish back more than one person per wish, so long as:
 1. They died within a certain period of time of the wish, often thought to be a year.
 2. They did not die from natural causes such as sickness or old age.
 3. They are included within the wish parameters.
 4. They have not already been wished back before.
- Shenron is believed not to be able to kill a person that exceeds the power of his creator.

The Rules for Dende Shenron

- Shenron can grant two wishes.
- This Shenron is more powerful than Kami's Shenron.
- Shenron can wish back more than one person per wish, provided that they are all within the wish parameters.
- Shenron cannot grant immortality.
- Shenron is believed not to be able to kill a person that exceeds the power of his creator.

The Rules for Porunga

- Porunga can grant three wishes.
- Porunga is more powerful than both Kami's Shenron and Dende's Shenron.
- Porunga can only bring one person back to life at a time.
- Porunga is morally opposed to killing anyone who is good.
- Porunga will not revive or relocate someone against their will.
- Porunga will only grant wishes given in the Namekian language.
- Porunga is believed not to be able to kill a person that exceeds the power of his creator.

The Rules for Super Shenron

- Super Shenron can grant one wish.
- Super Shenron has no known limits to what he can do.
- Super Shenron will only grant wishes given in the language of the gods.
- Super Shenron can grant a wish thought in the language of the gods.
- It is possible that Super Shenron can not kill a person that exceeds the power of his creator, Zalama The Dragon God who is thought to be the true god of creation for the collective dragon ball universes.
