

Generic Ass Wiper

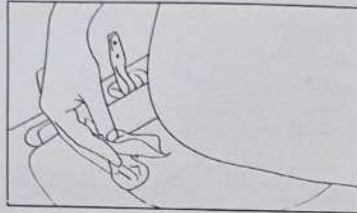

To the serial toilet blocker. I am here to help.

Here is a guide on how to wipe your ass properly without using half a ton of toilet paper and rendering the toilet useless for anyone else in the building. Please consider it both basic potty training plus a community service to your fellow occupants.

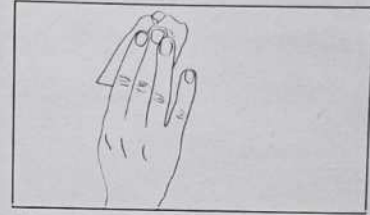

PHASE 1

Start out with a decent size wad of tissue; three balled-up squares should be plenty.

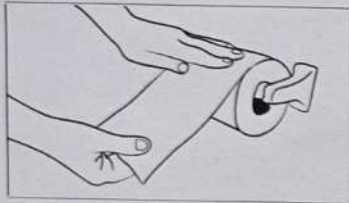

Reach around and behind your butt, and lean onto the opposing cheek.

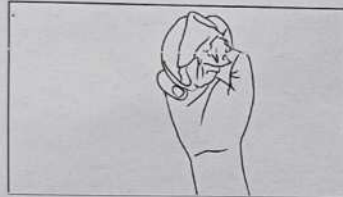

Wipe with the pointer, middle, and ring fingers of your acting hand under the toilet paper. Have your middle finger slightly raised with your pointer and ring fingers resting partially behind.

PHASE 2

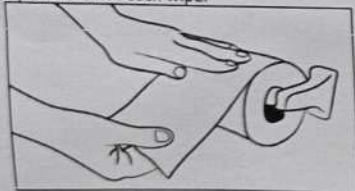

Follow the directions of Step 1 (with the reduced paper amount), using increasing pressure with each wipe.

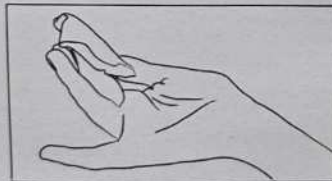

Be sure to check your progress..

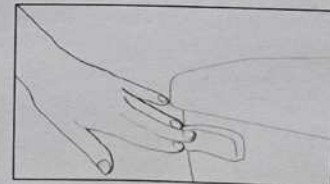

PHASE 3

All you'll need now is one square.

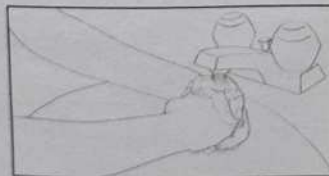

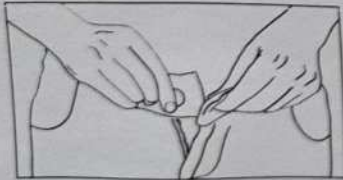

Don't be afraid to enter, just a little.

Don't forget to flush!

PHASE 4

Adjust your clothing as necessary and then wash your hands with soap and water.

It's important to remember that toilet paper does not grow on trees...well...maybe it does but either way you should try to be sparing to save the planet and those poor bastards who have to unblock the loo it each time you go.

Because some people need help to wipe their ass on a chain.

Enjoy spending your next 10 years learning how to do so you smelly prick.

All of the world's toilet supply alongside all the knowledge and means to create toilet paper and bidets was lost in the great cataclysm, a post apocalyptic event that took place an indeterminate number of years before you arrived. In addition to this horrific and foul smelling creatures have been attacking survivors for years, the survivors have been making due with cobbled together ass wiping supplies made from leaves and remnants of old clothes but they are ineffective at best.
