Filthy Monkey -200 CP

Ah if it isn't the Saiyan Monkey man you look like a weakling, you get stronger every time you almost die and you can become a big monkey and can become a shiny monkey with training.

Freaky Alien Genotype -200 CP

Often mistaken for that thing Chi-Chi Keeps in her draw, you are a member of Frieza's race who can survive with little amounts of their body remaining.
You have transformations to restrict your power but it gives greater control over what you have. Just don't call them frost demons or Arcosian's or you'll just look like a d*ck.

Santa -300 CP

You're the ghost of Christmas you're also a Tuffle, with all the Christmas cheer and spooky ghost powers that Santa is well known for. You can go through a Christmas Eve-olution to take the thematically appropriate holly jolly battle form referred to as "Super Santa".

Woo beware the Easter ghost and his battle bunny form woo.

Popo -400 CP

Congratulations maggot, you're a member of the Majin race!

Well what did you think I was some kind of ginnie ha you wish but it won't work unless you wish for pain, that's right I am really Dumplin.

By being the same race as me you get magic powers, a healing factor and a gum-like body.

There's more but you can look that up yourself, have fun but don't go the way of Blue Popo.

...Bye!

Race Plus: Android Extras

If you don't want to be the garden variety of your race you can purchase additional Android components to make you a top of the line mechanical variation.

Each purchase allows you to gain that variation of Android's components allowing you to purchase more than one type of Android gaining the benefits of both.

If you get all three of them you will be a genetically engineered life form with both cellular Implants and artificial components.

When selected you may make purchases from that category in the Android supplement using **AP (Android Points)** on **Page 40** to customize your new artificial frame.

Bro-Bot -50 CP

Perhaps you're a cold killing machine or maybe you just like birds regardless you are a purely mechanical android modeled on the race you selected previously.

+50 AP

Hoe-Bot -100 CP

Did an old man in the van offer you candy, or did you choose to make yourself like this?

Regardless you are now a Cyborg but for some reason people keep calling you an Android.

You have a bunch of cybernetic components integrated into your body at the cellular level.

+100 AP

Bug-man -150 CP

Do you like to drink people or have you been fetishised on the internet? What was I talking about oh right, you are now a genetically engineered life form, someone has gone through a generic database and picked the parts they think are the best and given them all to you.

+150 AP

Perks:

Ki Manipulation *Free/Mandatory*

Life energy or as it's better known as KI is the main type of power in this world.

You now have the potential to control it, much like the inhabitants of this world.

You will start with the most basic of basics, you know how to wrap your body in KI and how to sense Ki from a short distance.

If you do not like the color when you see it you can change your Ki aura's color but only once.

English (Canada) Subs *Free/Mandatory*

At the start of a new Jump you can choose to have the abridged effect applied to it.

Mustache *Free*

You can **toggle** your hair so that similar to a pure-blooded Saiyan it will not change from that point onwards. You can also control the length of your beard and mustache.

Did that cat just talk? *-100 CP*

There are quite a few animals that can talk in this world, How? Why? Who cares because you know now to copy it. You can now bestow sentience onto any non-sentient animal thus allowing them to benefit from any effects that are normally restricted to one or the other.

Did I learn the Kaio-Ken on my own? *-100/300 CP*

The Kaio-Ken is a technique invented by the North Kai of Universe 7, it multiplies the user's Ki turning their aura crimson for a moment however it puts the body under extreme stress.

For **-100 CP** you gain the canonical version of the technique. For a total of **-300 CP** you know a perfected version of the technique that reduces the amount of stress to the body dramatically.

Who here's tired of my third form? *-200/400 CP*

Why stick to the normal sets of transformations, instead you can take the Evil root in order to gain the Villainous Mode. Using this form your aura color will change to a dark violet-purple and your eyes will become pure red.

For a total of **-400 CP** you can force this power onto another in order to force them under your control and greatly increase their power and evil intent.

Boosted

Instead of just the Villainous Mode you now also have the far more powerful Supervillain Mode. While using Supervillain Mode the target's aura takes on a purplish black and white color while the rest of their body becomes shades of white, their eyes take on a hot pink glow and the Time Breakers' broken infinity symbol appears on their forehead.

This form continually increases the user's power in exchange for their life force.

However because you're paying for this you can choose to **toggle** the loss of life force by reducing the rate of power increase to one third of its normal rate.

Also with some time and effort you can change the broken infinity symbol to any logo or symbol that you would like to use.

What do you know about reattaching arms? -400 CP

Any part of your body can now survive and function completely separately and remotely from the rest of your body.

Any of these pieces, so long as they have enough tissue, can perfectly replicate the functionality of any other part of your body and will function as if they are still connected regardless of the distance.

This doesn't make you immortal as any part of your body that is disintegrated will be lost from the total and if the total amount remaining does not have the parts that would be required to keep you alive then you won't stay alive.

This Perk doesn't automatically regenerate any tissue but it does allow you to reintegrate any missing parts that you come into physical contact with.

This Perk also functions as a **Capstone Booster**.

The Dragon says he'll give ya three -400 CP

By taking this Perk you can select 2 more origins for this Jump in order to receive discounts from.

Boosted

With the boost you can purchase this Perk multiple times, and all further purchases give you 2 extra origins for this Jump.

The other makes Dragon Balls -600 CP

You can now once per Jump create a set of Dragon Balls that are just as strong as those made by Kami at the start of Dragon Ball Z.

Each set will look slightly different to match the aesthetic of the world you made them in, now let's just hope they aren't all sarcastic.

Boosted

Congratulations you now understand the finer art of creating Dragon Balls, Instead of your Dragon Balls being limited in potential the ones you create instead scale in power to match your strength.

Origin Perk:

Each origin receives their **100 CP** Perks for free and a **50%** discount on all their other Perks.

Drop in:

You're a *good guy*! -100 CP (Free Drop in)

As far as any supernatural methods of testing can find you are pure of heart, making you immune to many dangerous attacks such as the Devilmite Beam and the Spirit Bomb.

About five minutes -200 CP (Discount Drop in)

You can predict down to the nanosecond how long it will take to charge an attack or for any type of chain reaction to take place.

Conveniently learned off screen -400 CP (Discount Drop in)

Whenever you are learning from a teacher or teaching someone else, you can choose to go into a sub dimensional bubble.

While in this Bubble your perspective of time and the effects of time will match outside the bubble.

Any training done inside of this bubble will be **365.24** times faster than outside of the bubble resulting in a day's training matching that of a year without it feeling as anymore than a day has passed.

This can also stack with other time dilation effects and if anyone outside of the bubble attempts to see within it nothing will be perceived.

What! I don't steal techniques -600 CP (Discount Drop in)

Once per 24 earth hours you can create a new blank Perk and apply any Non-Perk skill or ability to that slot in order for it to become a **Toggleable** Fiat-Backed Perk or Drawback.

This can include transformations and even body parts both the natural and those artificially installed.

An example of this is if someone were using an Alt-Form that is a saiyen elite, infinite energy Android, they would be able to insert the great ape transformation, the power ball technique, the Zenki boost, their Saiyan tail and the infinite energy engine into the blanks and creating new Perks. The same can also be done with chest-bomb however this would be turned into a drawback not a Perk.

However these would not stack with any Alt-Form which already have those exact abilities.

Boosted

Once per ten years or once per Jump you can create 1 Blank Body Mod Perk.

This Perk can only be filled with a skill or ability that you are able to use while you are restricted to your Body Mod.

These abilities can include those that would normally be temporary or caused by external conditions, such as environments, surgical alterations, strange energy's and supernatural Items but the Perk would only function if your body mod can sustain it.

Paragon Till Death:

Catch the Monkey -100 CP (Free Paragon Till Death)

Hey you know sometimes things get boring and you end up doing fun things instead of training but fun things can be training too!

By getting this Perk you can do efficient and effective training while playing around.

Things like catching a monkey, playing on a computer, reading a book or even hitting Gregory with a mallet helps you to improve your strength, agility, focus and speed.

Kio-what -200 CP (Discount Paragon Till Death)

The Kaioken is a great technique and every time you use it or any other power up technique you can temporarily confuse your opponents, stunning them for a second or two.

S-s-so I can't breathe in space apparently! -400 CP (Discount Paragon Till Death)

You might find that it's difficult to survive in space but why should it stay that way?

With this you can choose to completely ignore the effects of any environment you're in, you can stand in water without getting wet, walk in lava without getting burned, survive in space without any air and withstand any gravitational force as if you don't even notice it.

If I turn up the gravity, then I can get stronger! -600 CP (Discount Paragon Till Death)

Feel the burn, no pain no gain... Why does this hurt so much!

Getting strong hurts a lot sometimes because the gravity is too high or because the rooms are too hot but it doesn't always help you get stronger.

With this I say enough! Any physical harm caused by strenuous exercise will make you stronger as if it was giving you an instant stackable Zenki even if it might kill or cripple you normally you will become stronger for it. Just make sure you survive or it won't help.

Boosted

Why does the owie hurt so much all the time? I say no more! With this boost you build up a toggleable resistance to any kind of damage you take.

As this is a boost it won't negatively impact any Zenki boost like effects you possess and instead you will gain a boost proportional to the damage you would have taken in your base form.

Renegade For Life:

Not really, kind of a smartass -100 CP (Free Renegade For Life)

Well what do they expect if the runt gives you lip you're not going to care when he gets crushed and this can apply to anyone, not just the brat.

You can selectively emotionally dissociate yourself from others so that no matter how much suffering they go through you will not care.

[mumbling]: I dunno -200 CP (Discount Renegade For Life)

You are an expert at picking up new skills and abilities, even ones that you haven't actually seen or experienced.

So long as someone you fight alongside or against knows how to do something and it is possible for you to do it then you will automatically become aware of the basics of how to replicate it.

Whether you can learn to replicate it or not depends on the effort and time you put into learning it.

Where's the moon? -400 CP (Discount Renegade For Life)

If you have any transformations or special abilities that require a certain amount of preparation or external stimulation to activate, you can now artificially induce it at will without needing any external input.

Plant the Saibamen -600 CP (Discount Renegade For Life)

It seems that you've got a green thumb... Well, sort of. With this Perk once per day you can instantly create up to 6 Saibamen seeds.

When planted each will grow into cultivated lifeforms with the power of the strongest minion you've ever easily defeated.

Boosted

You can once per day create up to 6 Pseudo-Saibamen seeds that can each grow into a fully customisable and loyal subordinate.

The Pseudo-Saibamen's beginning maximum power cannot exceed 1/6th of your own, however if they continue to train and grow making it possible for them to exceed the strength you had at the time of their creation.

Space Duck:

Screw you bitch I'm immortal -100 CP (Free Space Duck)

It is surprisingly easy for you to trick others into thinking that you are immortal even if you're not. With this you can trick those stronger than you into a blind rage or terrify those who are far weaker than you from the futility of fighting you.

My turn! My turn! My turn! -200 CP (Discount Space Duck)

What do you mean your turn this isn't "Attack of the Saiyans" is it?

It actually might be because you can now apply the turn based mechanics of the DS game "Dragon Ball Z: Attack of the Saiyans" to any conflict you are in.

Stealth mode, don't fail me now -400 CP (Discount Space Duck)

You are a master of the krill dogs signature skill... what no not the destructo disk "stealth mode", you can block yourself from the sense and scanning tools of others to such a degree that unless you were within 30 Feet and direct line of sight, no one could find you.

Even then you might need to get their attention first.

Damn my eyes! -600 CP (Discount Space Duck)

Ah yes the Solar flare is one of the most STUNNING of all technique's, but in the Abridged world it does more than that, it causes mental pain.

Now with this Perk you can apply that effect to any non-damaging status effect, making it so that the ability will cause mental pain.

The pain would be similar to a headache or migraine.

Boosted

But why stop at the mind when you've got a body!

You can now make it so that any mental wounds you inflict will harm your target both physically and spiritually. Call Magetta a baby and watch him turn to dust.

NERRRRRD!:

Stop beating up my daddy -100 CP (Free NERRRRRD!)

Wow it seems like you get a dramatic temporary boost in power whenever you get angry.

The angrier you are the stronger, faster, more durable, you become enhancing your existing powers while letting you suppress pain to a degree, but the longer you are raging the sleepier you get.

What would Dad do in this situation? -200 CP (Discount NERRRRRD!)

"Bye son." No. "Punch it really hard?" Kind of.

By thinking of an individual you can instantly figure out what they would do in your situation or what plan they would come up with in the same circumstance.

Now I'm as strong as when we fought on earth -400 CP (Discount NERRRRRD!)

Whenever you fight someone stronger than you, you will find yourself rapidly growing in strength until you reach the same strength as them, requiring less than 2 minutes for you to improve your strength tenfold.

Massive Potential -600 CP (Discount NERRRRRD!)

Your rate of growth has been raised by a considerable degree.

Anytime you reach the height of your potential you can find a way to improve even if they are not in ways you would expect.

Boosted

You now have no maximum potential allowing you to continue growing at an accelerated rate without slowing down constantly finding paths of development in new and interesting ways.

Aren't We Demons?:

Any last, LAST ditch efforts? -100 CP (Free Aren't We Demons?)

You will always have a plan B, another idea, a new trick. It won't always work but it's better than nothing and shouldn't backfire any worse than doing nothing.

Why... Didn't... You... DODGE! -200 CP (Discount Aren't We Demons?)

You know, yelling dodge is more distracting than helpful but that's all part of the plan. By shouting dodge you can distract anyone thereby making them fail to dodge.

I'm gonna throw you at that mountain -400 CP (Discount Aren't We Demons?)

Forget tough love this is downright brutal the more intense and brutal the training you give your students the quicker they will grow. This is to the same scale as if they have gained a Zenkai boost from the damage of being your student. This stacks with actual Zenkai boosts.

You do know that technique is forbidden -600 CP (Discount Aren't We Demons?)

Once per ten years or once per Jump you can absorb a willing or mindless/soulless body improving your strength and gaining that body as a new Alt-Form.

In the event that you as a Jumper would be incapable of taking that Alt-Form it is modified to match your restrictions.

You are able to move the mind and soul of that person if they have one, into a side space of your mind, merge with it completely, or consume it for more power.

Boosted

Once per Jump or once per ten years you can absorb a perfect copy of anyone from any point in your previous Jumps, so long as at the time they would have been willing to be absorbed.

You can also choose for this copy to have had a blank mind and soul allowing you to consume it guilt free.

Big Bad:

Stupid Monkeys hit by falling rocks -100 CP (Free Big Bad)

So what if they're dead and so what if you killed them?

If you want to, you can rewrite the historical depiction of any actions you have taken in order to either change the reasons behind it or to remove your connections to those events.

This will only affect the passing knowledge of it and not affect those who participated in the events.

Like a bitch -200 CP (Discount Big Bad)

You know exactly what words will salt those slugs as you are an expert at emotionally breaking people.

You are able to quickly learn the right things to say in order to upset someone personally.

Using this with a small amount of time and basic knowledge about the target you can consistently make them cry like a bitch with almost no effort.

You just sit there and let me -400 CP (Discount Big Bad)

With this Perk it's easy to get away with stuff if you want to transform, they will just let you. You want to reach 100% power, and they just sit right there and let you!

This Perk grants you a type of transformation plot armor that allows you to become your most powerful form without any interruptions.

Then let God strike me down where I stand! -600 CP (Discount Big Bad)

If you want to hit me then you actually need to hit "me" that's right with this Perk you can ignore anything that doesn't specifically target you.

This means that things that would normally affect a group of individuals such as viruses that target a specific gender, a wish to kill all members of a race or an attack that targets people at random, won't have any effect on you.

Boosted

Next time bring it your a game bitch If someone wants to take you out then they'll need to do it the old fashioned way.

You are immune to any indirect powers, such as if someone targets you specifically with the Dragon Balls, gods calling down a lightning strike and even someone using the Hakai's on another version of you, none of it can affect you.

Regular Minion:

Hitting the broadside of your mom -100 CP (Free Regular Minion)

You are the king of Comebacks, you have an instinctive knowledge of brevity, irony and sarcasm, allowing you to make witty remarks and ironic insults able to really get under someone's skin.

A Full Nelson -200 CP (Discount Regular Minion)

Any grapple or pinning techniques you use will function as if the person you are performing them had an ordinary human's frame, maneuverability and flexibility regardless of the biology of the entity you are using it on.

This will work even if realistically they should be able to easily escape your restraints.

Nudity Makes You Stronger -400 CP (Discount Regular Minion)

Ah yes but it's not limited to a single planet you can grow in strength proportionally to the percentage of your body surface that is showing.

You will gain a proportional boost of 10% if 10% of your body is showing and If you were completely naked you would be at a stackable 200% power.

I stopped on the way to plow YOUR mother! -600 CP (Discount Regular Minion)

Yeah this is getting too literal, once per day you can instantly resurrect any one person, so long as they have died within the span of a year and did not die of natural causes.

When they are resurrected if it is available their body will regenerate to a sustainable state with their mind/soul taking over the restored body.

If the body was destroyed during or after their death then a new body will be created and they will resurrect in the nearest available space to your position.

Boosted

You can now instead once per day, perfectly revive any one person regardless of how or when they died.

This can be done either next to you in a new body or in the original at the body's current location.

You can also choose to implant an unconscious obedience upon anyone that you resurrect.

This means that although they will retain their memories and personality, they will be instinctively loyal to you above all other things, following any orders you give.

Executive Minion:

I can tell you what really happened to your planet! -100 CP (Free Executive Minion)

You might know many secrets, and using this Perk you know exactly who those secrets are valuable to and how much they are willing to pay for them.

There. Now ya won't miss him -200 CP (Discount Executive Minion)

If you kill or otherwise destroy someone or something you can choose to erase all memories and documentation of and about them.

Prepare yourself, for the beast within -400 CP (Discount Executive Minion)

Congratulations you can now turn into a big green monster, no not that one but it is basically the same thing you're bigger, stronger and pumped full of energy.

The more excited you get the stronger you get and this never reduces your maneuverability or flexibility.

This can also be stacked on top of any other transformations you have even if you use the real big green one you can stack it.

ZA WARUDO!! -600 CP (Discount Executive Minion)

With this Perk by holding your breath you have the ability to stop time for your local layer of universal time-space.

Time will be stopped for as long as you can continue to hold your breath as if you were in your base form.

You may move about and use your various powers while time is stopped however other time sensitive individuals might be immune or resistant to your frozen world.

For example Gods of Destruction would be aware of the passage of time however they would be unable to move while it's stopped, angels however would be completely unaffected by it.

Boosted

You can now undetectably, completely toggle time within any pocket dimension or Jump continuity including all alternative timelines, realities, dimensions, angels, gods of time and any other time related effects or anomalies from within the Jump this can be done both individually or all together.

You will be unaffected by this freeze in time and can toggle any companion, follower and properly you own to be unaffected, however you are unable to move or damage anything frozen. You can simultaneously target multiple different Jump realities that you have been to before, being able to use this Perk to stop or continue time even while you are not there.

Old Guy:

No, wait... Super Kami Guru -100 CP (Free Old Guy)

Ah yes like the great and powerful Guru you can add titles to your name.

These titles will heighten the perceived importance of your position and no one will ever question the validity of these titles.

How does it feel to be the bronze medal -200 CP (Discount Old Guy)

You can now summon an instant list of the most powerful fighters in any category.

If you want to see who the third strongest Namekian is or who the third strongest fighter that Krillin knows is then this is the Perk for you.

Our dragon would literally wear him like a scarf -400 CP (Discount Old Guy)

You can now fill any supernatural Item with your energy be this Ki, Magic or any other type of supernatural power which comes from your body.

By charging an Item with your energy, that Item will improve its relative abilities to match your own skill level with that energy.

Overtime this charge will be lost from the Item requiring that you recharge it for the Item to keep its capability.

You can also store any charged Item within your body allowing it to passively retain and recharge its energy but at the cost of reducing the rate that your body restores that type of energy.

IT WASN'T THAT MUCH -600 CP (Discount Old Guy)

Like the many wise and cunning teachers of the past you can be lazy and perform the potential unlock skill like Guru you can see the strength yet untapped, the power yet unleashed and with a single touch you can unleash this valley of strength hidden deep within.

Well some of it, you can't get it all out in one go but you can keep using it to give out more boosts but if they stop training you won't be able to pull out much more.

Boosted

Do a little dance, make a little.. What, oh yes you can perform the Old Kai's Potential unlock. It is like Guru's version but as a transformation that constantly pulls out the user's potential and allows them to access the maximum potential of their transformations without any stamina loss.

The Good Dr:

Pull your pants up, man! I'm not that kind of doctor! -100 CP (Free The Good Dr)

Congratulations you now have a PHD in any two subjects of your choice and are considered the world or universal expert on both subjects, oh and don't worry you have the background knowledge and experience to back it up.

...Well, bird's the word -200 CP (Discount The Good Dr)

B-b-b-bird-bird-bird-bird-birds the.. oh sorry it got stuck in my head. This Perk can counteract any type of hypnosis or mind control simply by singing part of a catchy song. This results in the target getting that song stuck in their head to muffle and block out the mental conditioning.

I still have to install the cappuccino machine! -400 CP (Discount The Good Dr)

It's not coffee but with this Perk you know how to create a lot of different types of technology native to this continuity.

As an extra bonus once per ten years or once per Jump you can Fiat-Backed any Item.

HOW LONG HAVE I HAD THIS?! -600 CP (Discount The Good Dr)

Did you really think that you wouldn't be able to use any of the technology of another body? Well normally you wouldn't be able to but with this Perk you can have full access to any of the mechanical components that any of your Alt-Forms have installed regardless of the Alt-Form you're using.

Boosted

But why should you stick to technology?

Instead you can mentally toggle any and all of your Alt-Forms in order to gain and use all of that Alt-Forms powers and abilities as if you were actively using that form.

Time Traveler:

I can fill the part -100 CP (*Free Time Traveler*)

It turns out you fulfill an ancient prophecy, not just one but all of them.

You can wield any magically restricted weapon, open any fingerprint lock and you are a perfect ingredient for any supernatural ritual.

I found a way to surpass my farther -200 CP (*Discount Time Traveler*)

You've found a way to go beyond any ordinary form you have ever unlocked.

As soon as you unlock a form you can access one or two more powerful versions of that transformation but you are highly unlikely to find any way to progress these forms further.

These new forms always come with some type of trade off such as gaining strength in exchange for speed or gaining durability in exchange for stamina.

An example of this is if you unlocked the Super Saiyan transformation you instantly know how to access Super Saiyan Grade 2 and Super Saiyan Grade 3.

And they kill *everyone* -400 CP (*Discount Time Traveler*)

Sometimes your ticket gets punched and all you can hope is that there is a way to come back from it.

Three years before you lose/die a split timeline will be created where someone you know in the future will come back in time to warn you of the danger.

During this time the you who has been warned will perceive both timelines simultaneously being able to see the actions, intentions and breakthroughs of the alternative timeline.

At the end of the Jump or when the future version is completely destroyed whichever happens first you will absorb the future version gaining all of their benefits with none of their weaknesses.

Seriously, what is that? -600 CP (*Discount Time Traveler*)

Some of the things you face don't exist in canon!

Do you know why?

Well, besides Multiverse Theory.

It's because you can use this Perk to target others to cause continuity to zigzag at bizarre angles even without your input in new and fascinating ways, perhaps you will find yourself fighting Mecha-Cell, Golden Cold or God of Destruction Buu.

Choose to have this apply to your allies and Maybe it will result in super Saiyan god Goten, Ultimate Krillin or KaioKen Master Yamcha.

Target the story and perhaps Garlic Jr will become a true opponent while the Androids are completely different people.

Boosted

This Perk becomes a **Narrative Perk** that grants you far more control over the specific events that happen, you can use this to "will" specific versions of your targets into existence and if it is canonically possible reality will change events to make it happen.

Boosted

For **+200 CP** he will drop you into this new timeline for a full year before returning you to the same time and place he got you from as he wants to see what you might do if you were their full time.

Maybe he's got a basement? +200 CP

It seems that there are always bigger bad guys who are hiding around the corner planning to show up just when you are struggling the most with the real bad guy.

Like that time Vegeta's cousin showed up after Yajirobe cut off his tail or when Bonyu appeared before Jeice and Burter attacked Goku or even that time Frieza's dad showed up on earth.. wait that one actually happened, fine Frieza's granddad.

"Crash"... like your car +200 CP

All financial purchases and decisions you make will end badly, your new car will fall out the sky, your new house will have a car crash through it and those peaches you bought will be rotten when you open them.

Maybe you want a personal shopper but they just stole your identity and most of your money. Ok good luck farming and making your own stuff.

Did I say it too soon? +200 CP

Yes you did and every attempt at a romantic confession or to kindle a relationship will crash and burn in a humiliating way.

I'm gonna tell the captain +200 CP

Any time you defeat an enemy their boss or superior will instantly find out that you have and how you did it.

Why does he keep kicking me in the Dick +200 CP

Everyone is going to aim for where it hurts the most.

Your almost as strong as Gohan now. +200 CP

Somehow no matter how hard you try you are always a B-tier fighter at best this doesn't stop you getting stronger it just makes it so that all the main characters and some of the secondary ones are always at least a little bit stronger than you.

Your not dealing with the average Saiyan warrior anymore +200 CP

Everyone except you is the legendary version of their race.

I'm not done ripping the wings off this butterfly +200 CP

Ok you are now a psychopath who loves to torture your enemies even in the middle of a fight and you won't see the fight as over until you've broken your enemies.

I drank it! +200 CP

You are fat, really fat, as big as Guru surprisingly.

Well since you asked me nicely +200 CP

You are too nice and will believe anyone who asks you politely to help them or let them go.

Get Dumped +200 CP

The events of Team Three Star's playthrough of Dragon Ball Xenoverse with the Majin Time Patroller Dumplin will now occur during your time here so expect strong and strange people to show up.

The Adventures of Puddin' +200 CP

The events of Dragon Ball Xenoverse 2 are now canon so expect to see Puddin the daughter of The Demon God Dumplin and Demon Goddess Towa show up as well as strange new copies of other enemies good luck.

If taken with "Get Dumped" gain an extra +100 CP and both events take place simultaneously.

I hit that rock harder than I thought +200/400 CP

You don't remember anything about Dragon Ball z, you may remember the events of the original Dragon Ball but you will think they are just humans.

For a total of +400 CP you will lose all memories of all Dragon Ball media with the exception of Dragon Ball evolution which you will gain the full knowledge of and will believe to be canon.

Blew himself up along with his opponent? +200/400 CP

Every time you are close to defeating your opponent they will self-destruct, possibly wounding you in the process.

For a total of +400 CP you will always get caught up in the explosion so I hope you're durable.

I was a baby during this part +300 CP

This is embarrassing your an infant, an itty bitty baby and none of your Perks or Items can change this.

You will age at the normal rate for babies and still have access to all your Perks and Items but you're still just a baby.

You have been trained in the ancient ways. +300 CP

All of your fighting techniques are woefully outdated and inefficient.

Any real fighter could see that a mile away.

I do not know what this “Bulma” is but it sounds needy +300 CP

Every character is now really emotionally unstable and wants your full attention, some may take drastic actions to make this happen.

As an added annoyance this attention is never in a romantic sense so don't think this will help you get a harem.

Right, that thing I do +300 CP

You always find it difficult to remember what technique and abilities you can actually do taking a few seconds to remember your special skills that no one else has learned.

...and the brain damage +300 CP

After every fight you will lose all of your short term memory for the next hour.

Krillin owned count +300 CP

You get beat up a lot, every time in fact, your defenses are paper thin every so everyone can cut you open with a basic punch and every time you get smacked a counter will pop up making a ding to point out you've been owned.

Ghost Nappa +300 CP

Anyone you kill in this Jump will haunt you in a very annoying way, possibly driving you into a berserker-like fit of rage if you become to mentally vulnerable.

An Albino Namekian +300 CP

Racism yes now all Namekian will have a passive hatred bordering on the violent all for the sake of a lie and good luck trying to get a wish out of a dragon that doesn't mess you up.

You're still weaker than the last 3 guys I killed +400 CP

It's an uphill battle as it seems that everyone you fight is way stronger than you even if canonically they should be way weaker than you, tactics and planning are your only friends good luck.

A *Terrible* nightmare! +400 CP

Every night you get real weird dreams, sometimes disturbing, sometimes inane, they can't hurt you but they are weird. If you have some dream control Perks or Items you can resist to an extent but only to cover yourself. Should you go a day without at least an hour's sleep you will start vividly hallucinating your dreams.

I hope you packed your bags kid... +400/600 CP

For **+400 CP** you have a specific reaction to certain foods. What foods? You don't know at first but can find out through trial and error. Every time you eat one of these foods you will have a vivid hallucination, sometimes fun but often very bad.

If you don't eat anything in a day you are guaranteed to have a very bad trip at midnight. For an extra **+200 CP** what foods give you this reaction are randomized every day.

Why do you want to die? +500 CP

For the duration of this Jump you will die at least once a year.

One that's nice, fresh and ripe for abuse +600 CP

Every enemy you face will have 3 new transformations that each improve their power dramatically.

If they already have transformations then these will stack on top of them.

The pecking order +600 CP

No Perks

No Items

No Warehouse

Bie.

Popo +700 CP

He's terrifying, a possible rapist and now he's coming for you.

Scenario:

You may select as many Scenarios as you wish, they will occur in the order listed below.

Mortal Level-up:

When you start this Jump the mortal level of universe 7 is the lowest of all the universes with its grade gradually growing to the second or third lowest by Age 780 thanks to the personal development of Son-Goku and Friends.

The mortal level is the way of measuring the average development, or "quality", of the mortals existing in a universe and is normally used to measure the effectiveness of that universe's Supreme Kai and God of Destruction.

By taking this Scenario it's now your job to raise the mortal level of universe 7 and reap the rewards.

Raising the mortal level can be done by raising the average strength, intelligence and prosperity of the universe's inhabitants however there are various other factors that can increase the level. You will be able to see the current mortal level for all 12 universes at-will regardless of whether they exist or not in your continuity.

As this scenario is about raising your own mortal level any acts of sabotage you commit against other universes will result in a technical deduction of your own score without affecting the universe itself.

Your final grading will be taken 10 years after you arrive if you arrived in the standard time and place the grading will occur during Age 771.

Reward:

For each universe's rank you have moved up by in your final grading you will gain **+250 CP** to spend however if you actually manage to raise universe 7's position to the highest ranked mortal level of all universes you will gain a bonus **+250 CP**, totalling **+3,000 CP** but be warned this will not be a simple task.

Additionally you will gain the Perk "**Mortal Boost**".

Mortal Boost

Your ability to train and develop any skills and or abilities will be multiplied by the numeric value of your final mortal level score for the "Mortal Level-Up" scenario plus the mortal level of all beings who act as your companions and or followers.

For context in Age 780 universe 7 had a mortal level of 3.18 and universe 9 had the lowest mortal level at 1.86

Jumper VS:

At the end of this Jump you must wait 10 days on the cell games arena.

During these 10 days everyone from your previous Jumps and the meme variation of these Jumps will have access to the cell games arena.

Anyone who enters the arena will challenge you to a duel, you must accept and win every 1 on 1 challenge regardless of the type of contest whether that be a fight, a children's card game or a rap battle.

If you are not participating in a challenge then you must accept any that are given, if you are participating in a challenge when the time runs out it is an automatic victory and any challenges not taken when the 10 days end are null and void.

Reward:

If you manage to come out victorious over every battle then you will receive a one off **+500 CP** and for every character you defeat you will gain a Summon Perk.

The Perk will be in the following format.

Summon:[Insert character name]

Once per ten days you can summon [Insert character name] for 1 hour.

During this time [Insert character name] will retain all of their memories, skills and abilities.

While summoned [Insert character name] will be loyal to you and follow your orders to the best of their abilities so long as they are not morally or emotionally opposed to the order.

If you have an Item or Perk that allows you to change someone into a companion then you can use it on this summon as if they were a resident of the Jump you are in but doing so you will permanently erase the Perk **Summon:[Insert character name]** from everyone that has it.

DBM:

Your Jump will continue at least until Age 794 during which a new race known as the Vargas will appear telling you about a multiversal tournament when you enter this tournament you will be faced with 39 teams from across the Dragonball Multiverse including the original 20 and 19 more that take the Super, GT, Abridged, Video Games and other extended canon's into account.

Reward:

If you manage to come out victorious over the tournament then you will receive **+500 CP** and can recruit every willing tournament member as a companion.

The Gauntlet Games

On the completion of this Jump, you will start this scenario, during which all of your Perks, Items, and warehouse will be disabled while you will be reverted to your body mod, the only Perk that you will be able to keep is the free **“Ki Manipulation”** Perk.

You will be given a training arena where you will not age while you are in it, you will get regular personalized meals, any injuries will heal at an accelerated rate whenever you are not actively training and you cannot die.

When you are ready you will be put into an arena where you must fight a one on one fight against every distinct Dragon Ball Villain from all continuities including Dragon Ball heroes, AF, Super and any fan fiction that has been created by any employee who has worked on any official Dragon Ball property.

You will start from the weakest Villain which is Oolong from the time he terrorized Aru Village with each consecutive villain being more powerful than the last.

You will occasionally have to fight different versions of the same villain who will not remember the previous fight but each consider you their hated enemy.

If you are killed or lose any fight you are sent back to the training area and get fully healed.

To complete this scenario you must defeat all of the Villains but you may quit at any time forfeiting the reward, reactivating your Perks and gear before moving onto your next Jump.

Reward - Ki Potential

As a reward the **“Ki Potential”** Perk becomes a Body Mod Perk and you get to keep the **“Training Area”** as a Warehouse extension with all of its effects being toggleable.

Ki Potential

Life energy or as it's better known as KI is the main type of power in the Dragon Ball Universe.

You now have the knowledge and potential to control the Ki of your origin world and transform it into a form usable by the techniques of the Dragon Ball universe.

You will start with the knowledge and skills you have learned over your time in the multiverse allowing your body mod to utilize Ki as if you were using the body of a Dragon Ball Human.

Zeno's Adjudicator

For this scenario you will have a copy of yourself be created in each of the twelve universes. Each copy will be that universe's equivalent of your purchased race. Your Job within each universe will be to review each universe's mortal level and the performance of each Supreme Kai, God of Destruction and Angel attendant. You must add this information to an official report that indicates your professional suggestions on what actions need to be taken and who would be an appropriate replacement for each possession if needed.

To complete this Scenario Lord Zeno must enjoy your report and allow you to organize the Tournament of Power on his Behalf.

Reward - Who's the Boss

As a reward you gain the "**Works for the Boss**" Perk.

Works for the Boss

Whenever you inform someone who does not know you that you are an employee of their superior they will believe you without further enquiry.

End:

And now the end is here
And so I face that final curtain
My friend I'll make it clear
I'll state my case, of which I'm certain
The Jump is over and you must choose

I've lived a life that's full
Go home

I traveled each and every highway
Next Jump

And more, much more
Stay here

I did it, I did it my way
Something I cannot expect
