

# STAR TREK

In 2233, The Federation starship Kelvin came across a "black hole"-like phenomenon near a distant sun when a massive ship called the Narada emerged. The Narada used its superior weaponry to destroy the Kelvin with the first officer sacrificing his life to aid the crew's escape. Amongst the survivors of the devastating battle, a young boy was born, James Tiberius Kirk, son of the first officer of the Kelvin.

This incident ultimately sets a new series of events in motion; creating an alternative quantum universe known as the Kelvin timeline significantly different from the "Prime" universe. One change being James T. Kirk, who in this timeline grew up angry and rebellious until he was recruited by Captain Christopher Pike to join Starfleet and eventually avenge his father... but that's not what this story is about.

This story begins shortly after the death of Nero, during the first conversation between the Elder Spock of the Prime timeline and his young counterpart as their worst nightmare arrives. Ensign Mary Amethyst Star Enoby Aiko Archer Picard Janeway Sue the youngest officer in Starfleet. A skilled linguist... an unmatched warrior... a cunning strategist... a scientific genius... a gentle healer... a passionate lover... She is a woman of exceptional beauty, perfect in every way...and she's driving the crew of a certain enterprising starship INSANE!

## ENSIGN SUE MUST DIE!

A Trek-tastic Parody  
by Clare Moseley & Kevin Bolk

Gain +1000 CP

## Origin:

As you enter this jump you must be wary as there is something in this continuity similar to a jumper but disturbingly different.

The Sue are entities created by a powerful cosmic entity to explore and interact with different continuities for their entertainment.

### Red-Shirt - Free

Oh you just want to be canon fodder well one way to avoid the suspicion of the Sue is to be expendable i suppose.

### Yellow-Shirt - Free

Well taking command may not be the best way to hide from the sue as yellow shirts tend to stand out.

### Blue-Shirt - Free

To be fair I'm not sure if the Sue would even be bothered to notice you in blue as the only ones of interest for them are Spock and the Doc.

### Sue-Shirt +400 CP

Ah you plan to blend into the Sue, camouflaging yourself as one of them so that they no longer see you as a threat.

## Timeline:

There are many timelines and many worlds that the crew of the enterprise will visit during the events of Ensign Sue Must Die.

You must be wary of the resident sue as they may not take kindly to Jumper interfering with their self-inserting and have a direct connection to their patron, the true Sue.

While they may not notice you if you do nothing of interest, should you gain their attention they may decide to be rid of you.

### Kelvin - Free

This is the normal timeline in which Mary Sue Must Die takes place. You will arrive on the Enterprise moments after Mary Sue does. The Sue you must worry about will be the main Sue of the story.

### Wesley - Free

This is a variant of the prime timeline of the star trek universe. You will arrive on the Enterprise after Q's first game with Picard ends. The Sue you should avoid is a variant of Wesley Crusher, at least they are picked up as a Sue.

## Perks:

If you have taken any **Origin** other than **Sue-Shirt** you may take **2 Perk Coupons** that you can use to discount, any Perks not already discounted and not discounted by the **Sue-Shirt** Origin making them half price or **Free** for a **-100 CP** Perk.

### General Perks:

What Perks can protect you from the Sue?

#### **This is Sue! - Free**

Wow with this you're so unique and cool even if you're not a Sue as you can cause a streak of your hair to be dyed another colour and give yourself a monocolour beauty mark or logo on your face. What's more, you can cause that mark, your highlighted hair, and even your iris to change colours either on a timer or like a mood ring, letting you show off how cool and unique you are!

#### **Your beginning to see past your own selfish desires - Free (Incompatible with Sue-Shirt)**

You now have the self awareness to grow. While most jumpers start to revel in their initial power seeing others as only characters in their story you have the potential for more. This Perk acts as a **Body-Mod** that gives you self awareness and understanding allowing you to understand yourself both impartially and physisophically without your ego getting in the way. This also helps you to understand your own shortcomings and how you could grow in order to become a fuller person.

#### **We must have entered one of the magic-based nexus points -100 CP**

It seems you have a sixth sense for the super as you can now tell when you enter an area with esoteric energies or if you meet people who possess any form of super powers as well as the general category of their powers. From this you could tell when someone has biological superpowers, soul techniques or access to universal forces. Additionally this will allow you to determine if the person just has the innate potential or have been actively using their powers. This won't however tell you details like what types of magic the person performs or what their super power does and similar powers like Stands and Semblances will seem identical.

#### **There's no crime in being exceptional -100 CP (Incompatible with Sue-Shirt)**

With this perk you gain a self awareness of your own capabilities and your attitude making it so that you have self awareness of when you are being insufferable. This also gives you a form of **Toggleable** social protection making it so that whenever you will be far less annoying to others and others are far less likely to feel jealousy towards you.

### **I sent them on their way doctor -200 CP**

You have the charismatic talent required to sabotage others without them realising you are their enemy. With this you will understand what actions you can take with the knowledge of how to frame it to make the sabotage seem beneficial.

### **Thats a sonic screwdriver im building one of those for science class -200 CP**

The laws of physics tend to be different in the various universes, meaning that without it being Fiat-Backed the principles for one type of technology may not work within another universe. With this Perk any tools or technology you build will be **Fiat-Backed** making it so that it will continue to function in each jump. Additionally this will give you a passive awareness of what knowledge you possess is compatible with the current laws of physics meaning you are aware of what knowledge others can use within the continuity without **Fiat-Backing**.

### **I was so wrapped up in my own feelings -200 CP (Incompatible with Sue-Shirt)**

You now have a better awareness of others as you can now use this perk to perceive the view of others as though you were them. When **Toggled** on this passively prevents you from desensitising from others but can be **Toggled** off. If used on someone specific you could also use this perk to view any part of their history from their own perspective but this will be as they remember it rather than how it actually was.

### **Regeneration's a tricky thing -400 CP**

Like a certain Doctor you have gained an ability to regenerate as a **1-UP**. This means that once per Jump, if you die this perk will activate giving you a randomised body as an **Alt-Form** based on your active **Alt-Form** and species when you died. You will gain a new randomised **Alt-Form** with the body's features such as body proportion, height, age, ethnicity, gender and appearance all being randomised so long it is naturally possible for that species. When this activates you will be locked into the **Alt-Form** until the start of the next jump or for ten years whichever happens first.

### **She used her powers and newfound will to give herself a real body -400 CP**

You are now able to create new **Alt-Forms** for yourself and others even when you do not have a physical form. The limits to these **Alt-Forms** are that they are restricted by what **Alt-Forms** you already have. You can create **Alt-Forms** for any species you already have an **Alt-Form** of or that you have a DNA sample for and any **Alt-Form** you create for a Species can not be innately more powerful than that species naturally can be.

### **A tiny fraction of my being was able to get through -600 CP**

Just before a Jump begins you will gain a mental list of every reality within the local multiverse and the general details about each one. You can then choose to drop a copy of yourself within any of those realities, each copy will be identical to you however it will be limited to your Body-Mod's and any purchases gained in that Jump.

### **Timeline Perks:**

Well these Perks make you a real powerhouse within their local setting, however these don't all seem to be completely Fiat-backed meaning that they don't work quite as well **Outside of that Timeline**. If you visit another version of that timeline in the future they will work as intended.

#### **Logic is a wreath of pretty flowers which smell bad - Free (Exclusive to Kelvin)**

Why follow logic when you can use it like a skipping rope? You are now able to make logic bombs, which are nonsensical logic statements that force any logical entity such as a vulcan or computer to contemplate them causing them to fall into a logical paradox. This statement will cause them to be trapped in the statement dwelling on it in frustration as they are forced to try and solve it until they are either snapped out of it by another individual or self-destruct in the logical equivalent of madness.

**Outside of that Timeline** you can still make logical, paradoxical and contradictory statements that theoretically could function as a logic bomb but nothing forces those who hear them to be trapped within the logic bomb.

#### **Technobabble - Free (Exclusive to Wesley)**

You now know how to spout technobabble with the best of them as you can string together impressive and scientific-sounding words into sentences that are ultimately just nonsense. Whenever anyone hears these statements they will put together what you have said as the solution to the current problem as a Plot contrivance.

**Outside of that Timeline** you can still create a "word salad" of scientific or "science-sounding" terms that are jumbled together into impressive-sounding nonsense. The statement will no longer have the protection of its Plot contrivance and those with a deeper understanding of the subject will know that its nonsense.

#### **The Force - Free (Exclusive to Rey)**

May the force be with you! You can now wield the Force as well as a Jedi master and a Lord of Sith, it doesn't really matter which as you can use the light side and dark side without consequences.

**Outside of that Timeline** you are only about as strong as a pre-padawan youngling but you could tap into other universal forces to give you a boost with strange results. I mean they do call it the Speed Force for a reason.

#### **Super Captain - Free (Exclusive to Steve)**

It seems you are the most powerful one around with more strength than the avengers and supposedly smarter than Tony Stark and Mr Fantastic though you only seem to know it when putting the knowledge into practice.

**Outside of that Timeline** your physic is just above human limitations allowing you to use impressive levels of strength, speed and stamina but it only slightly helps your intelligence.

### **Super-duper Man - Free (Exclusive to Clark)**

Faster than a speeding bullet, more powerful than a locomotive, able to leap tall buildings in a single bound. Look up in the sky, it's oh it's you. You now possess every possible Kryptonian ability and are not hindered by kryptonite, red sun or magic.

**Outside of that Timeline** you only really have tactile-telekinesis, a variation of telekinesis where you can manipulate objects through direct physical contact. You may ask how is this any different than just touching it? Well you could telekinetically interact with yourself to mimic super strength, super speed, and super durability.

### **Witchcraft and Wizardry - Free (Exclusive to Hermione)**

Wo wo wo its magic you know. You can perform the same magic as any other witch or wizard within the Potter-Verse with you having the power and level of knowledge to complete a mastery in every subject.

**Outside of that Timeline** you will still have magic but it will be about the level it would be if you were a wizarding child, also your magical knowledge isn't quite compatible as it seems to come from a different version of harry potter magic than your power meaning some spells will work and others wont.

### **Guide to the Omniverse - Free (Exclusive to Other)**

When entering a setting you can select any native character to temporarily gain the powers they canonically have, however when leaving the setting this perk loses their powers.

Both **Inside** and **Outside of that Timeline** you gain a map of every multiverse and parallel reality. This map gives you the multidimensional layout and reality coordinates for every work of fiction, every fanfiction and every alternate version of everything you could ever decide you want to visit.

### **Origin Perks:**

#### **That.. seems really outside the realm of Xenolinguistics -100 CP (Free with Red-Shirt)**

Sometimes when you are talking to someone what they are saying makes no sense even if you speak their language fluently. With this perk you will be able to understand exactly what any sentient species means to say to you even if you don't know a thing about their language.

#### **There's no way she's coming back -200 CP (Discounted with Red-Shirt)**

You need to be careful wearing a shirt of that colour as red-shirt's tend to suffer from death by example. While this Perk won't protect you from a group death it will prevent you being the sole victim of a transporter malfunction, the wrath of a random omnipotent being, a death plague or other deadly events as fate seems to overlook you.

**Dinna have the power -400 CP (Discounted with Red-Shirt)**

The power truly is within you as whenever you are trying to use a device and it either doesn't have a high enough power output or its battery is drained, you will be able to use this perk to power the tool so that it will function until what your doing is finished.

**I cannae explain it, captain -600 CP (Discounted with Red-Shirt)**

Sometimes things just work out for you in completely unexpected ways. Once per year you can activate this Perk by targeting a challenge or problem that you want resolved in a way beneficial to you. This will automatically resolve the target in a way that is outside of your perspective and everyone else's.

**The new ensign is kind of cute -100 CP (Free with Yellow-Shirt)**

There is something about a man in a yellow uniform that grants them a blend of confidence and swagger. With this perk you always have a reputation for being a charismatic and fearless leader with those who don't know you holding you in a positive regard regardless of if you deserve it.

**Shouldn't you be in the medical bay -200 CP (Discounted with Yellow-Shirt)**

A good captain knows how to get their people to follow orders. With this Perk anyone who sees you as their superior will follow your orders without question regardless of how much they disagree with it.

**We've unleashed something terrible -400 CP (Discounted with Yellow-Shirt)**

Sometimes you just don't know what horror your actions can unleash. With this Perk whenever you perform an action that results in an otherwise unknown effect you will gain awareness of what your actions have done.

**Got a bit awkward once the universe had reset -600 CP (Discounted with Yellow-Shirt)**

Once per year you can activate this Perk essentially resetting the status quo as if the jump were in an episodic adventure. Should an important character die or if grand events forever change the fate of space, time and the universe itself, you can use this to reset everything back to the way it was before the events began bringing everyone back and returning the status quo.

**Look at the Time -100 CP (Free with Blue-Shirt)**

Sometimes you are stuck dealing with people you really don't want to talk to, with this you will always know the best exit excuse. Sometimes this can be as simple as saying "oh i've got to go" other times it can be a complex web of lies, regardless with this you gain the knowledge required to escape the situation without complaint.

**That was no accident -200 CP (Discounted with Blue-Shirt)**

You have a seventh sense for when things are intentional and when they are an accident. When an action takes place you will know if it was happenstance or if someone put the events into motion. This will also tell you if you were the target but not who the target was if not you.

**We neutralized it -400 CP (Discounted with Blue-Shirt)**

Whenever you think you have resolved a problem such as dealing with an enemy or stopping a cosmological event this perk will let you know if it has actually been resolved. With this you will know if when killing an enemy if they will stay dead, if not vaguely how long it will take for them to come back or if when preventing a star from exploding how long your resolution will last.

**Would it be prudent to consult with my future self -600 CP (Discounted with Blue-Shirt)**

Once per year you can activate this Perk in order to contact yourself from the future, this future self will have all your knowledge and memories up to the point this perk is active and all the memories you would have gained by the end of the jump if you had never used this perk after that point. **Post-Jump** you can choose to merge with these alternate selves gaining the memories and experiences of that alternative version of yourself.

**I know both kirk and spock desire me -100 CP (Free with Sue-Shirt)**

You seem to have some form of supernaturally generic beauty that makes everyone see you as extremely beautiful and universally adored, at least by those who don't know you personally. With this everyone who doesn't know you personally feels an instinctive love and admiration towards you however this effect ends when they meet you.

**I was born on the U.S.S. Kelvin.. just like you -100 CP (Free with Sue-Shirt)**

Whenever you enter a jump you can use this **Narrative Perk** to customize your background, allowing you to historically be your idealized self or change the events of your life up to that point including parentage, birth and upbringing.

**I must tell you about my horrible medical condition -200 CP (Discounted with Sue-Shirt)**

While others must suffer through the hardships of life you now have a type of plot armour that makes it so that you no longer have any real obstacles towards your goals. In a practical sense you will no longer have to deal with red tape or outside hindrances that would prevent you from succeeding at anything in life.

**I spent the last few years building up an immunity -200 CP (Discounted with Sue-Shirt)**

You now have a supernatural resistance in life protecting you from any weaknesses that others of your race should suffer from. You will no longer be harmed by diseases, radiation or any weaknesses that your species has that most other species don't. Additionally every aspect of yourself will be improved so that it is above the average for your species.

**I have the most perfect record of any starfleet cadet -400 CP (Discounted with Sue-Shirt)**

It seems that you have lady luck at the end of a gun barrel as no matter what tool you are using you always seem to hit the mark. Should you need to get a perfect score at darts you could pick up a set of tooth picks and always hit the bullseye. You could pick up a bean bag and throw it at a wall and still hit a giant robot's weak spot, even if you were to somehow miss a target it will either ricochet off a dozen targets before it hits your target.

**I must take over the bridge and lead the crew -400 CP (Discounted with Sue-Shirt)**

Of course you are the main character, who else could it be? With this Perk the plot and events seem to revolve around you, nothing important will happen unless you are around and you will find yourself stumbling into events where you are the linchpin that determines how the situation is resolved..

**I'm half-deity myself, you know -600 CP (Discounted with Sue-Shirt)**

You seem to have an overabundance of inconsistent powers and you are effortlessly skilled at anything you try to do regardless of the situation. Whenever you need to be stronger you will gain a random superpower or skill perfect for the situation allowing you to resolve it with ease, however afterwards you will lose the power or skill only getting new ones when you need them.

All of your out of Jump Items other than Bodymods will be disabled for the duration of this Jump.

**I convinced myself that i was entitled to that love +400 CP**

All of your out of Jump Companions blocked from entering this Jump for the duration of this Jump.

**Think of it as "Unconditional Love" +400 CP**

You have now been brainwashed to love the Sue regardless of what protections you have.

**I gather you'd prefer to shoot me in the face again +500 CP**

You have such a shootable face as everyone who meets you just wants to punch, shoot or stab you in the face. They dont know why and for the most part they will probably control themselves but some people will just let their instincts take over.

**I just love my new red uniform +600 CP (Mandatory for “Red-Shirt”)**

You're under the effects of the Red Shirt phenomenon as whenever danger lurks around it seems to head straight for you. Good luck, you'll need it.

**An overabundance of inconsistent powers +600 CP**

Everyone you fight seems to be able to pull random bullshit out of nowhere as though they have a limited form of plot armor. This will only work once per enemy per year.

**The Singular Perfect Sue-niverse +1000 CP**

It seems you have arrived a bit late, the Sue have won and set up their perfect Sue-niverse where everyone is Sue. You will need to either find a way to reverse this or stay hidden because no Jumpchain is going to be willing to let you continue as a Jumper after becoming a real Sue.
