

STAR WARS

MOVIE COMPILATION THE SKYWALKER SAGA

A long time ago in a galaxy far, far away humans and many species of aliens co-exist on planets ranging from wealthy, planet-wide cities to sparsely populated deserts.

A mystical power exists within this reality known as the Force, an energy field created by all living things which binds the galaxy together.

Through training and meditation, those whom the Force is strong with exhibit various powers such as telekinesis, precognition, telepathy, and manipulation of physical energy.

The powers of the force are wielded by two major knightly orders in conflict with each other: the Jedi, peacekeepers of the Galactic Republic who act on the light side of the Force through non-attachment and arbitration, and the Sith, who use the dark side by manipulating fear and aggression.

While Jedi Knights can be numerous, the Dark Lords of the Sith are intended to follow the rule of two: a master and their apprentice.

Galactic Species

You may purchase a race at the beginning of each trilogy or at the start of an independent scenario. Once a race has been purchased it will be free for all further race purchases and you will gain a slightly customisable Alt-Form (age, gender, skin tone) of that race.

Hybrid - Free

If you wish to be a hybrid you may select two, four or eight races. The race cost will be the average cost of the races rounded up to the nearest **-50 CP**.

To get the average cost of the races add the cost of each race and then divide the total by the amount of selected species.

The same race may be selected multiple times but repeated purchases will be the labeled price unless it was previously **Free**.

Any abilities possessed by the species will be reduced by the percentage of the species. Any race-based stipend will be reduced to the percentage of that race you had then round down to the nearest multiple of **+50 CP**.

Fusion - Free/-50 CP [Incompatible with "Hybrid"]

By picking this option you may purchase as many races as you can afford with your species being a perfect combination of each race granting you all of the natural abilities of each species. You may also have some control over the physical appearance of the resulting **Alt-Form**. For **-50 CP** you will also gain an **Alt-Form** of each race purchased.

Arkanian -50 CP

This near-human species only physically differs from humans in that they possess only three fingers instead of four. They are characterized by their skin tone ranging from tan to pale, typically with white hair and pale white eyes. The race has been genetically altered over generations with them now possessing Claw-like nails and the ability to see into the infrared spectrum.

Atoan -150 CP

This near-human species possesses an outward appearance that resembles baseline humans, however they lack a centralized heart and instead they have thousands of smaller hearts evenly distributed throughout their entire body. This feature makes them considerably faster and stronger granting them greater longevity, far quicker reflexes and superior stamina compared to humans.

Bothan - Free

A race of furry mammalian anthropoids, about 1.5 meters tall. Hailing from Bothawui and several colonies, Bothans differ in facial appearance and body structure with canine, feline, and equine features. They are known for being master politicians and spies, craving intrigue and subterfuge.

Chagrrian -100 CP

This species is composed of tall, horned, amphibious humanoids that are taller than a human with their skin tone ranging from light blue to indigo. They are most notably recognized by their thick tentacles that curve around their shoulders, as well as two more horn-like extremities above their heads. They also have tremendous ability to heal quickly, able to survive even a direct blaster shot if the damage doesn't harm anything vital to the heart or brain. Most minor wounds take minutes to heal, while major ones take mere hours with their healing factor being rapid enough that the naked eye could watch a wound close.

Gen'Dai -200 CP

This species' bodies are made out of a seemingly immortal jumble of regenerative corded muscle and nerve bundles which move like tentacles. Gen'Dai faces are humanoid with two eyes, a nose, and a mouth full of razor-sharp teeth, however they are able to use heavy armor made for humanoids to give themselves a form which can pass for any number of species in the galaxy. Lacking the vulnerable vital organs of most species, the Gen'Dai can take extreme injuries such as complete dismemberment and survive to regrow lost body parts while regenerating their wounds, making them notoriously difficult to kill.

Goblin -200 CP

Though this race's true name is not recorded they are known in some sources simply as Yoda's species with a life span measured in many hundreds of years. Members of this species are small in size, roughly comparable to that of a human child, with green skin, large eyes, long pointed ears and three-fingered hands ending in claws.

Lightsaber Forms

Each purchase of this Perk gives you basic training in one of the eight lightsaber forms with your capabilities with these forms being boosted to match your **Force Sensitivity**.

It may be worth researching each form independently to learn how appropriate they are for you.

Form I: Shii-Cho -50 CP

The oldest known form of lightsaber combat, it was a simplistic style that balanced traditional maneuvers intent on maiming and killing with a focus on disarming an armed foe and was used against multiple opponents. It was a popular form among Padawans in the Jedi Order.

Form II: Makashi -50 CP

A style regarded for its elegance, graceful presentation, and balletic approach in wielding a lightsaber. It was notable for its primary focus on facing a single opponent, preventing disarmament, and quick, very precise strikes.

Form III: Soresu -50 CP

A defensive style that utilized tight, controlled movements and strict economy of action. Practitioners of this form focused on defense entirely in any situation and committed to analyzing their opponents and openings created, often from the frustration and fatigue of the enemy, while not succumbing to fatigue or making mistakes themselves. It remained popular even during the creation of other lightsaber forms.

Form IV: Ataru -50 CP

An acrobatic and aggressive lightsaber combat style that placed greater emphasis on using the Force to enhance movements in all areas of combat and required great room to attack from all directions. Due to its nature, it was considered a demanding fighting style both physically and through the Force.

Form V: Shien/Djem So -50 CP/-100 CP

Two fluid disciplines of lightsaber combat, which were considered physically demanding styles due to their requirement of quick transitions from dedicated defensive stances to all-out attacks. For **-50 CP** you only gain either Shien or Djem So but for **-100 CP** you gain both and **+50 CP** that can only be spent in the **Lightsaber Forms** section.

The **Shien** variant emphasized blaster redirection, and practitioners could utilize a reverse blade grip.

The **Djem So** variant taught users maneuvers for saber-to-saber combat and blaster deflection.

Form VI: Niman -50 CP

Considered the most popular lightsaber combat form in the Jedi Order, it balanced the qualities presented in all the other forms but did not incorporate any notable strengths. Less demanding than all the other previous combat styles, its approach was a careful balance between offense and defense but leaned towards the latter and extensive integration of Force powers.

Form VII: Juyo/Vaapad -50 CP/-100 CP

Considered the most aggressive and unpredictable form and therefore the most controversial, it was a combat style with a history of the Jedi High Council forbidding it and later allowing only select users to practice the style. It was a style considered both physically and emotionally exhausting. For **-50 CP** you only gain either Juyo or Vaapad but for **-100 CP** you gain both and **+50 CP** that can only be spent in the **Lightsaber Forms** section.

The **Juyo** variant focused on aggressive assault and a mindset that drew upon anger and negative emotions to fuel relentless assault. This mindset caused many users to fall to the dark side of the Force or close to it.

It seems you have a Jostar Cure and every time you are in a flying vehicle it will be a crash landing

Kill him now +400 CP

It seems that it is very easy to convince you to kill someone, as all that you need to be told is that you should kill someone who you consider an enemy by someone you don't consider an enemy and you will almost without thinking try to kill them.

Whenever you implement an out of the box solution to a problem the problem will solve itself and cause your solution to be more harmful than helpful.

End of the Prequel Trilogy

This Mini-Jump ends on 18 BBY and any relevant Mini-Jump-only drawbacks end. By doing this you can take one of four options:

Next Episode: [Mandatory “The Long Road”]

You will need to exist within the universe until 0 BBY before you can start the next Mini-Jump in this Document **Episode IV – A New Hope**. You can either spend your time in Jump participating in the **Pre-Original Trilogy Scenario Options** and/or optionally go on another Jumpchain adventure while this Jump is paused.

Next Start:

You can move onto any section of this document that you have not yet completed.

Next Step:

You can move onto another Jumpchain and when you return move onto any section of this document that you have not yet completed.

Going Home:

The Jumpchains are over as you return to your original world from a galaxy far far away.

Scenario Options - Pre-Original Trilogy

None of these people seem to be a Skywalker, I'm not quite sure what's gone wrong but see if you can do what they didn't and take down the Sith backed evil organization before the original protagonist shows up and steals your thunder.

Scenario Option - Star Wars Rebels

You seem to have awoken on the planet Lothal the same day that the orphan Ezra Bridger meets The Ghost's crew. To complete this scenario you must secure Lothal's independence from the Galactic Empire.

Reward:

If you complete the objectives you may take the Perk **The Little Guy** for **Free** and gain **+500 CP**. You can either move onto another section within this Jump or optionally go on another Jumpchain adventure while this Jump is paused.

The Little Guy

When you designate a specific organization as your enemy you learn about every group fighting against the targeted enemy as you and how you can contact them. You also gain the skills required to manage the whole organization as if it were a few people.

Scenario Option - Soulcalibur IV

A wave of power has caused a disturbance in the force flowing from a gate to another dimension three warriors of the force will journey to the gate in order to deal with this power themselves, the Apprentice, Darth Vader and Yoda. To complete this scenario you must enter the gate and deal with Algol yourself.

Reward:

If you complete the objectives you may take the Perk **Far, Far Away**, the Items **Soul Edge & Soul Calibur** for **Free** and gain **+500 CP**. You can either move onto another section within this Jump or optionally go on another Jumpchain adventure while this Jump is paused.

Far, Far Away

Using this **Narrative Perk** you can choose to insert any compatible Jump you have completed into the history of a new Jump so long as the connections you set up between the two are plausible. This perk allows you some control over the details of how they are connected, however the options must be canon and the perk itself will organize and orchestrate any details you do not fill in. For example using this perk you could make a Sci-Fi Jump's events take place in another galaxy from the events of a fantasy game, you could make the events of a historical comedy take place in the history of a futuristic grim dark story, making historic connections between the two continuity's and you could make the events of one fantasy story the long lost history of another.

Soul Edge & Soul Calibur

These two magical swords now view you as their true master and are loyal only to you. The **Soul Edge** is a large blade, imbued with the power to consume souls and become stronger. It is also able to enslave the minds of anyone else who attempts to wield it. The blade itself takes on a crystalline structure with a red hue covering the blade and a blue core while having formed a proper handguard. The eye is now situated in the handguard instead of being on the blade itself. While wielding Soul Edge your connection to the dark side of any form of power is magnified. The **Soul Calibur** is a sword infused with a good energy damaging evil and cutting through any kind of physical barrier with ease. The sword has a large crystalline/ice structure vaguely resembling a sword, including the hilt. While wielding Soul Calibur your connection to the light side of any form of power is magnified.

Scenario Option - Fallen Order

You awaken on the planet Bracca on 14 BBY the same day that the Second Sister is looking for a Jedi.

In this Scenario you must join the crew of the Stinger Mantis in their scavenger hunt for a Jedi Holocron that contains the information on all potential younglings.

To complete this Scenario you must get the Jedi Holocron and prevent the Empire from getting a hold on it.

Reward:

If you complete the objectives you may take the Perk **Force Echo**, the Item **Youngling Holocron** for **Free** and gain **+500 CP**. You can either move onto another section within this Jump or optionally go on another Jumpchain adventure while this Jump is paused.

Force Echo

This perk can work with or without the force but will be more powerful the more powerful your Force abilities. Using this you are able to acquire information about people or events associated with an object or a place simply by touching or entering it.

Youngling Holocron

This Jedi holocron contains a list of the names and locations of every Force-sensitive person across the galaxy, as well as their approximate talent and potential for mastering the Force.

This Holocron updates itself every time it's opened allowing you to track a specific jedi by toggling them.

Post-Jump you can alter this to pick up other types of supernatural abilities such as picking up every living wizard.

Scenario Option - The Force Unleashed

You awaken on the Rogue Shadow with everyone believing you are supposed to be there, on the day that Galen Marek is sent to assassinate Rahm Kota. To complete this scenario you must either insure the formation of the organized resistance or the creation of Darth Starkiller.

Reward:

If you complete the objectives you may take the Items, the **Helm of Darth Starkiller**, the **Ceremonial Jedi Robes** and the **Sith Stalker Armor** for **Free** and gain **+500 CP**. You can either move onto another section within this Jump or optionally go on another Jumpchain adventure while this Jump is paused.

Helm of Darth Starkiller

This helmet resembles that of a bounty hunter helmet with two chunks of metal that curve into the side of the head. While being worn the user is able to magnify the amount of power they can wield dramatically by instilling fear in their enemy and awe in their allies.

Ceremonial Jedi Robes

These white Jedi robes have been worn by only the most honorable Jedi Masters or given posthumously to those Jedi who sacrificed everything to protect and defend the galaxy. They have an innate connection to nature, life and light allowing you to greatly enhance your connection to the light side of the force.

Sith Stalker Armor

This sinister armor is normally painfully grafted to the flesh and bone of its wearer in order to magnify their pain, rage and suffering. While wearing it you are able to connect to those emotions focusing them without the negative consequences allowing you to greatly enhance your connection to the dark side of the force.

Scenario Option - Survivor [Requires Fallen Order]

You awaken at 9 BBY on the Imperial capital world of Coruscant on the date that Cal Kestis and Bode Akuna attempt to steal military data from Senator Daho Sejan. To complete this scenario you must arrive on Tanalorr with none of your enemies alive on it.

Reward:

If you complete the objectives you may take the **Custom Lightsaber** options **Hilt Shifter**, and **Blade Shifter** for **Free** or be refunded the cost if you already have either as well as gain **+500 CP**. You can either move onto another section within this Jump or optionally go on another Jumpchain adventure while this Jump is paused.

Scenario Option - The Force Unleashed II [Requires The Force Unleashed]

You awaken at an Imperial facility on the planet Kamino, at the same time that Darth Vader observes the training of a clone of his former apprentice Starkiller and labels the clone a failure. To complete this scenario you aid the clone in their journey of self discovery ending with the scenario ending when the clone faces the decision to either capture or kill Darth Vader.

Reward:

If you complete the objectives you may take the **Amplification** lightsaber crystal and **Twin Saber** lightsaber modifications for **Free** or be refunded the cost if you already have either, you gain **+500 CP** and you gain a customisable Silver skinned Human, Dathomirian, Zabrak Hybrid Alt-Form known as **Maulkiller**. You can either move onto another section within this Jump or optionally go on another Jumpchain adventure while this Jump is paused.

Original Trilogy

You gain **+500 CP** which can only be spent in the Original Trilogy section.

You may choose to start on Tatooine, Yavin 4 or the Tantive IV, unless your background drawback has you starting somewhere else or you choose to continue from the Original Trilogy from your current location.

Origin Selection:

Within this Jump you will have the option of what origin you have by selecting an origin you will lock into doing this Trilogy until you have completed Episode 6 the Return of the Jedi.

Depending on the type of power it is possible to gain 1% of a power and still be able to train it beyond the initial 100% of your opponent's ability.

Traitor

Alone with friends -100 CP
