

BETHESDA Tutorial Jumpchain
GAME STUDIOS
Version 1.01
Created By DeverosSphere and Ursine The Mad Bear

The Who and the Why

Welcome **Jumper** which is what you now are, normally this would mean you were a human from the planet Earth but not always.

Your Benefactor is a powerful entity that may be referred to as “**Jump-Chan**”, they will be sending you out to go on adventures through what you once thought to be fictional universes.

By default you will be in that universe for 10 year stints referred to as a Jump, before continuing onto another Jump in another fictional universe, creating a chain, hence the term “**Jumpchain**”.

The Tutorials

This Jump Document is a safety net for new Jumpers who may want to rush off to their favourite settings, not thinking how dangerous those places are to actually live in and prematurely ending their chains.

In order to properly prepare new **Jumpers** for the wide variety of environments and settings they will eventually have to interact with, instead of a single setting, you will spend one year in each of ten different **Levels** that give the **Jumper** the basic necessities and experience for the real deal.

The main feature of this category of Jumpchain is that dying does not end your life or your chain.

Instead, you will have the choice of trying again with no penalty, returning home and ending your chain or skipping the Tutorial and going directly into a Full Jump though this is not advised if you could not survive the Tutorial.

If you prematurely end the Tutorial Jump you will lose all of the purchases and things collected from this document, only retaining your memories and any skills that could have been learned in the real world.

If you do start again after dying, you do not have to repeat any Level that you have already completed.

Additionally, if this Jump is done as your first Jump additional options and rewards will be provided.

Jump Mechanisms

As a **Jumper** you will be expected to take on new identities in each world you visit, gaining access to resources native to that jump through **CP**, a non-transferable non-bankable meta-currency that can be used to purchase from the **Jump-Catalog** also known as the Jump Document.

The **Jump-Catalog** contains various useful perks, items, and companions which are native to that universe, you gain them in exchange for **CP** making them **Fiat Backed**, a state that retains its universal laws allowing it to function even when the laws of physics are completely different.

Local Abilities can be learned and Items could be stored within your Warehouse to be taken into future Jumps however unless they are supported by the local universal laws or something that is **Fiat Backed** they will not function correctly if at all.

Typically **1000 CP** is given to the Jumper by their Benefactor at the beginning of each new Jump though the amount and naming conventions may be different depending on the Jump that is being entered.

+1000 CP (Choice Points)

Unique (Optional)

If this is your first Jump you may select to be the one and only version of yourself to exist across the infinite Omniverse with exception of any intentional imitations, replications or copies of you.

Level Selection

These are the ten different **Levels** you will visit in the course of this **Jump**.

Each **Level** is a simulation of a distinct universe from a popular genre or setting under the same umbrella term used as the theme of the **Jump**.

Unlike normal **Jumps** the people, animals and even gods met during this Jump will not really be alive and will instead be advanced physical simulations who function through distinct movement patterns, in-Jump events dependent on the **Jumpers** input and self generating dialogue trees similar to a character from an interactive **RPG** video game.

You may choose to go to a specific time and location within the Level or go to an auto generated version created using all canon media from that universe.

If you go to a Jump in Future that a Level is based off you will not be able to import the events of the level into that setting.

You may choose to do these Levels in any order or take the **Randomised** option in the Drawback section for extra **CP**.

In each **Level**, you acquire an identity that fits the setting, with all appropriate memories.

1. Where's Waldo?

In this Level you will be a travelling companion of Wally Waldo and his dog Woof with you all travelling to distant lands in time and space using a magic walking stick in order to solve puzzles and mysteries with the intention of helping hand wherever you can.

A villainous antagonist Odlaw will follow your group and recruit other villains in order to steal the magic walking stick.

2. Fallout

In this ruined world the United States had a nuclear exchange against China in 2077 resulting in the post-apocalyptic world in which the level takes place.

Some of the population were in underground Vaults when the bombs fell, they were supposedly constructed to protect the populace but were instead used for social experiments ending in disaster.

When you start this level you will be leaving one of the underground Vaults entering into one of the mutated wastelands that was once a part of the united states of america.

3. The Evil Within

This level immediately thrusts you into precarious situations where you are constantly being pulled through a distorted world full of nightmarish locations and horrid creatures forcing you to experience madness incarnate, and come into contact with all manner of horrifying realities.

4. Wolfenstein

This level has you in a world where you can fight against the Axis powers. Earlier titles are centred around Nazis attempting to harness supernatural and occult forces, while later games are set in an alternate history in which Axis powers won World War II.

5. Deathloop

In this level you find yourself on Blackreef Island which is within a time loop set to repeat the same day for eternity.

6. Ghostwire

This level is overrun by deadly Spirits thanks to a dangerous fog created by a dangerous occultist which caused the majority of the world's population to be separated from their physical form.

7. Doom

This level is set on Mars, where a military-industrial conglomerate has set up a scientific research facility into fields such as teleportation, biological research, and advanced weapons design. The teleportation experiments open a gateway to Hell, resulting in a catastrophic invasion of the Mars base by demons.

8. Dishonored

This level takes place in the industrialised Empire of the Isles, a relatively small archipelago of island nations situated in an ocean covering most of the planet, with human civilization only flourishing on the Isles.

9. The Elder Scrolls

The elder scrolls series takes place in the high fantasy world of Nirn where magic and supernatural beings exist. You will start this level imprisoned in one of the nine provinces of the continent of Tamriel

10. Prey

In this timeline the Soviet Union encountered a species of eusocial aliens in the 1970's causing an invasion of earth in the 2030's.

You will start this level as a human in an area being invaded by the Typhon either on earth, a moon station or on a space station.

Age and Gender

This category is personal to each jumper often offering the Jumper to choose what their age and gender is, for this jump and most others you can choose to be whatever gender you want to be, though your age may be altered to fit the identity granted by the specific Level you are in.

Origins

Your **Origin**, also known as a Background, provides you with a history and memories from the setting unless you become a **Drop-In**.

Choosing to be a **Drop-In** either through a specific Origin or as a separate choice makes it so that you appear at the start of the jump unknown to the rest of the world.

Your **Origin** provides a discount on particular perks, items, Companions, and other things available for purchase with **CP**.

The provided **Origins** should come with a quick summary containing information that explains the background and mentality of the type of jumper who might pick it.

Socializer

This type of Jumper experiences fun in their interaction with others, being happy to collaborate and join forces with others in order to face any problem and achieve bigger, better results than they could on their own.

Explorer

These Jumpers want to see new and unique things, always hoping to discover new secrets. They enjoy the surprises that are possible to find searching the walls in order to access a secret passage that might result in new secrets, unique items, customisation and unlockables.

Achiever

These Jumpers are all about progressing and status, solving any problem that comes their way and always finding a quicker way to win.

Bragger

This kind of Jumper is highly competitive, getting a thrill from winning and seeing other people lose. They want to be the best and it should come as little surprise that the only way for that to be true is if they beat everyone else.

Perks

Perk is a blanket term for powers, skills, and abilities that have been unified into a singular section but some Jump Documents will have sections for purchasing powers, skills, or abilities separately from the **Perks** in these situations they are considered distinct from Perks when **Meta-Perks** are applied.

Meta-Perks are perks that alter or affect the functionality of a Jump Document such as increasing the initial CP, gaining an extra Origin or granting Free Perks.

Narrative-Perks are activated before a Jump begins in order and sometimes during in order to give the Jumper control over the continuity of the Jump. This allows them to alter people or events within the Jump such as including AU/Fanfic Options that otherwise exist in that Jump.

In a tutorial Jump the perks should be mainly for support, cost no more than **-400 CP** and should be worded so that they are in line with the umbrella term for the tutorial.

The perks in this document are not mandatory but are a good archetype for the kind of perks you may make.

General Perks:

Basic Requirements (Free to All)

This perk provides an in-universe personal history, as well as a basic adult education and memories which all fit the identity you acquire for that **Jump**.

This perk should also grant Supernatural Skills, Traits and Abilities required for basic participation in the **Level/Jump** which are **NOT Fiat Backed** or retained post **Level/Jump**. Additionally should you not have a Spirit, Soul, or other essence this perk will grant you one.

A Jumper's Body (Free for All)

This Perk improves the **Jumpers** physical fitness so they are above the average physical fitness for their selected Race or Species.

A Jumper's Mind (Free for All)

At the start of each **Jump** this perk will repair any psychological issues or brain damage so that the **Jumper** is not hindered by mental problems.

Tutorialise (Free for All)

This **Narrative Perk** allows the **Jumper** to Toggle a **Jump** before it starts so that the world within the **Jump** functions as a Tutorial **Jump**.

By activating this Perk you alter the **Jump** so that the Jump world and those within it are advanced physical simulations instead of real locations or people, in a similar way to a futuristic interactive **RPG** video game. If this perk has been toggled on, dying does not end your life or your chain and instead will restart the Jump requiring you start from the beginning.

This can also be used to Toggle a Tutorial's Level so its inhabitants are not Simulations.

Skin Deep (Free/50cp)

This makes the **Jumper** beautiful by the standards of anyone who sees it. These are often a graded Perk with multiple options, in this example the **Free** option would make them appear to be a 7/10 by anyone who sees them and the **-50cp** would make them a 10/10.

With each purchase of this you will gain 1 new customisable **Alt-Form** that may range between $\frac{1}{4}$ and $1\frac{1}{2}$ your base form's total body mass. Although by default this would be an organic hominid form you may choose to design it to match the structure and composition of other beings however they will not retain any special features of that type of being without being supported by perks or visiting that setting to gain setting data which will function like a Non-Bodymod Perk.

Lucky Duck (Free/50cp/100cp)

Perks relating to luck will increase the **Jumper's** luck and can be set as another graded Perk, these grade examples are all using two sided coins with 0% chance of landing on the edge. For **Free** this makes a coin toss 50/50 removing any inert bad luck. For **-50cp** this makes a coin toss 65/35 in your favour. For **-100cp** this makes a coin toss 80/20 in your favour.

Origin Perks

These Perks are discounted by **50%** for their **Origin** with their **100cp** perks being **Free**.

Origin Perks relate thematically or mechanically to their origin, sometimes this requires a creative interpretation of the origins meaning.

In a normal jump each **Origin** will traditionally have four perks priced as **100cp**, **200cp**, **400cp** and **600cp** which will act as a **Capstone Perk** that can often be improved or gain additional abilities through a General Perk that is called a **Capstone Booster**.

This area is designed to hold your possessions and provide a homebase and while the entrance is closed it is protected from any threats in a setting barring specific drawbacks.

Personal Possessions (Free)

All of your Pre-Jump belongings will be put in the warehouse.
