compiled by /u/randalReps

Welcome to the “Cryptobros” Jump chain, a jump that will take you to the exciting and unpredictable world of cryptocurrencies, decentralized madness, and some seriously funky blockchain antics. Cryptocurrencies are digital currencies that use cryptography to secure and verify transactions, and to control the creation of new units. They are decentralized, meaning that they are not controlled by any central authority, such as a government or a bank. They are also volatile, meaning that they can change in value rapidly and unpredictably.

In this jump, you will have the opportunity to explore and experience the crypto world, and to participate in various crypto activities, such as mining, investing, trading, or launching new coins. You will also have the chance to interact with the crypto community, and to join or create your own crypto projects, groups, or movements.

You will also face the challenges and risks of the crypto world, such as hackers, scammers, regulators, or haters.

You will start this jump with 1000 Crypto Bros (CB) coins. You will also have a choice of various perks, items, drawbacks, and scenarios, which will enhance or challenge your crypto adventure. You will have access to your jump chain warehouse, where you can store your crypto portfolio and items, and where you can return after each jump.

This jump will last for 10 years, during which you will have to survive and thrive in the crypto world. Are you ready to join the Crypto Bros, and to have the ultimate crypto experience? If yes, then let's go! To the moon!
