

POKEMON ADVENTURES MANGA Generation 1

JUMPCCHAIN CYOA

By Kuriboh_Knight97

hello there! Welcome to the world of Pokémon! My name is OAK! People call me the Pokémon Prof! this world is inhabited by creatures called Pokémon! For some people, Pokémon are pets. Others use them for fights. Myself... I study Pokémon as a profession. First, what is your name?

this is the world of Pokémon alright but a very different one from what you've seen before, it's darker more brutal, the kind of world that takes the taming of super powered monsters and applies logic. The kind of world where cutting your opponent in half is a valid strategy to end a match whether you're doing it to the Pokémon, or the trainer. This is the world where gym matches routinely end with a Pokémon's death and it's harder to find a GYM leader who isn't evil than one who is. Given the harsh nature of the world it's only natural that you have something to defend yourself with.

BACKGROUND

Battler- fight, fight, fight you're the sort who takes Pokémon battling to the extreme, the kind who throws caution to the wind and sense out the window in search of your next big match. This world is probably as close to your paradise as there is.

Trainer- tactics strategy battle, all of these are secondary your main focus is in the job description, training Pokémon is your purpose and passion if that makes them better at winning fights for you, well that's just a bonus isn't it?

Thief- prepare for trouble and make it double, wait wrong world. Whether you're a member of team rocket or an independent it means little you are a thief and that means your first priority is finding a way to take what you want from the world and not get caught doing it.

Healer- and of course there's always the group who saw the title Pokémon and thought of bright colorful happy series focusing on friendship and lighthearted battling. This is not the jump for you but if you insist, then this is the best option to try and regain that childlike innocence in a darker take on the series.

Devolution 150 as a result of team rockets genetic experimentations your starter is able to devolve from any evolutions that used an evolution stone at will reverting to it's prior state, for obvious reasons the Eevee line gets the greatest benefits from this

DRAWBACKS

My story +0 if you want to take the place of Red, Green, Blue, or Yellow this is the choice to take for it, pick one you now replace them in this world their history and life is yours

Magikarp Potential +100 your Pokémon will be strong enough to face the champion's, eventually for now it's a bit weak and all exp gains for any Pokémon you train is halved

Frustration +100 your starter Pokémon dislikes you, it doesn't hate you and even the dislike can be fixed with time but for now expect lots of pranks and attacks and don't expect it to listen more than once a month or so

Sucker +100 I don't want to say you're an idiot but. You have the poor tendency to believe everything you hear from somebody else, someone offers an obviously bogus item you'll buy it without a second thought. And have you heard about that prince of an impoverished nation that doesn't exist, you'd be sending your every cent out fully expecting to get it back with interest.

For an extra **+50** you forget you ever took this drawback

A Wild Zubat Appears +100 no matter where you go you will be swarmed by massive amounts of Zubats every 3 days, to make it worse you cannot capture them and cannot gain any exp from defeating them for an extra **+50** the odds of one being shiny are multiplied by 10

Phobia +100 you are afraid of Pokémon with a certain body type (like birds or bugs) can be taken twice the first will just be a minor fear and preference to avoid the selected type, the second will have you frozen immobile in terror at the sight of it

League Regulations +100 you know what all three of the first protagonists did, compete in the league. You know what none of the first protagonists did, collect all 8 Kanto GYM badges. Care to guess what you have to get if you want to take part in the league, all 8 Kanto badges

Poor Luck +200 you have issues with catching Pokémon, as it it's unlikely to work. The catch rates of all balls are cut ultra balls only work as well as great, great is only as good as standard, and the iconic poke ball just won't work at all for you. Even the 100% guaranteed master ball only has a 50/50 shot of working if you're the one who threw it

Incompetent battler +200 regardless of your skill or intelligence in anything else or even your experience fighting, you cannot battle. When in a Pokémon battle you become an idiot of the highest degree, facing fire better throw grass at it, they switch to water best use a rock type. In general when fighting you will always make the decision that is the absolute worst choice you could possibly make (now go use explosion with your last Pokémon when your opponent still has 2 left it'll totally work)

Target of Team Rocket +200 team rocket knows your name and face and they want your Pokémon, as long as you have even a single Pokémon they will do anything to take it from you

Eyes Met Across the Grass +400 congratulations, you like so many others are now obligated to battle any trainers you make eye contact with, this is not negotiable

To Beat The Very Best +400 odd thing about the elite 4 in this world, they're terrorists and now they've decided you're the number one target they have to deal with to get what they're after Lorelei, Bruno, Agatha, and Lance are after you and won't stop until you're dead and buried

Hunted +400 one of the legendary birds has noticed you and decided it doesn't like your face, so now it's going to try and kill you to get rid of it and it cannot be captured. For an extra **+200** instead of one of the birds its Mew or Mewtwo

Wilds Hate You +600 as it says every wild Pokémon except legendries will hate your guts and wants your severed head on a platter, ceases to apply if a Pokémon is ever captured but until then they'll want nothing more than to kill you

Notes

You cannot take a member of team rocket as a companion if you take the **target of team rocket drawback** you can't join the team either this includes Giovanni Lt. Surge Sabrina Koga and Blaine

Same applies to the elite 4 if you take **to beat the very best**

You also obviously cannot take the character you've replaced with **my story** as a companion

Items are replaced at the end of the week if destroyed and at the beginning of the next jump if lost or stolen and you don't find them yourself, single use items like potions stat boosters and pokeballs are not replaced if used

Advice welcome and gens 2 onwards are being worked on (slowly)

Change log

Non-Kanto Starters option now covers until sobble

Added Psychic perk

Increased cp for wilds hate you, and eyes met across the grass
