Styles of Magic:

The different styles of magic are the various ways to wield the types of magical energy required for the schools of magic to cast spells.

Some of these styles of spell casting can be combined to create more powerful results.

Each style of magic comes with a general spellbook which explains the Basic/Intermediary principles of the style of magic plus a full explanation/walkthrough of the most common practices and uses of that magic.

Alchemy: -50 PP

An alchemist utilises ingredients and materials to craft magical, stones, consumables and oil's often referred to as "potions" which replicate the spell that was used as a base.

The effect of a "potion" could be temporary or permanent depending on the ingredients and spell used as a base for the resource.

When removed from its container the "Potion's" spell will target what the "potion" comes into contact with if consumed the spell will only affect the drinker but when applied to an object or shattered on the floor the spell will affect everything it comes into contact with.

Artificer: -150 PP

As an artificer you understand the principles and mechanics to design and create magical artefacts using your own magical energies.

These tools are able to utilise the internal energy reserves to cast a variety of spells and magic as required by their owners, these reserves can be recharged by the user or built to be self restoring if the right material's and principles are implemented in their creation.

Bardic Caster: -75 PP

This type of spell caster is able to use spells through purely audio components

Divine Focus: -50 PP

Rather than being able to cast the spells yourself you are able to contact local devine entities and request that they cast spells on your behalf.

Emitter: -225 PP

This rare form of spell casting focuses on efficiently casting spells in a passive fashion. This allows the caster to use the magic without needing to focus on it and without draining much of their magical energy thereby allowing them to take actions as though they were not using magic at all.

Empathic Caster: -100 PP

This form of spell casting draws from the emotions of others in order to fuel and shape the spells the caster performs. The depths, quantity, quantity of the bonds you form with the donator's of these emotions will effect the power behind the spells being cast and the types of emotions being used will shape how the spells are produced.

Enchanting: -100 PP

This process of magic casting is used to envelop objects with magical formulas that allow the wielder to invoke a spell using the item as a medium with little to no magical energy required so long as the formula remains intact.

With the right materials an enchanter can enchant clothing and tools so that the spell is activated with every impact without damaging the magical formula and allowing the magic within the item to last indefinitely.

Hedge Mage: -50 PP

A hedge mage learns the process of magic by observing the natural world and replicating the untamed magic that occurs in nature.

Through this they are able to cast magic instinctively as magic capable animals and plants are allowing them easier magic casting at the cost of limiting the breadth of their spells.

False Mage: -150 PP

This type of mage tends to be from the distant future of whatever worlds see them as they are able to use advanced technology to mimic the principles of magic without the wielder directly casting their spells allowing them to cast a wide variety and scale of magic but at the cost of disconnecting them from the flow of magic itself.

Invoker: -50 PP

This type of spell caster tends not to directly cast magic themselves but instead use small amounts of their magical energy's to call upon spirits and other such supernatural entities to cast magic on their behalf.

Invokers create a connection between themselves and the supernatural entities in similar but inverse ways to a pact, they then link a personal medium to each of supernatural entities such as totems, ring's and even playing cards to call upon those specific beings when needed.

Sigil Mage: -100 PP

Through the use of etchings, rune's, tattoos and writings a sigil mage can craft arrays of varying durability in order to cast magic without the use of Somatic or Verbal components.

Sorcerer Monk: -100 PP

Practitioner's of this style utilise Somatic casting and the ambient magical energies of localised dimensions in order to subsidise their own reserves without immediate consequences.

Nominal use of these external energies will come with a cost to the user, as the energy borrowed will require repayment plus interest, this will normally be small discomforts such as stomach ulcers and insomnia with the rate of interest on this being lower the greater the capabilities of the caster.

Symbiotic Caster: -75 PP

Unlike traditional casting this method of magic does not allow the user to truly cast spells.

Instead this method bestows the user with a sentient magical organism or organ that lives within their body. The user is able to communicate with the entity so it can use their magical energy in order to cast spells while the user takes other actions.

Technological Mage: -100 PP

Using the principles and methodology behind magic you have learned how to emulate the process of spell casting though complex devices and machines. These devices will still require magical energy to be supplied as fuel but will allow any caster to process a spell using the magical circuit boards as though they were magical formulas. This process can be used in order to fully automate complex magical spells with only creation of the original circuit requiring an understanding of the process.

Transformation Mage: -100 PP [Free with Transformation]

This type of spell caster requires changing their form in order to use magic, this is sometimes done to withstand a power their normal body cannot handle safely. This can also be due to the power coming from a third party that adapts the user to itself such as drawing out the power of a magical focus to become a magical girl or altering the body into a wer-like state to be compatible with a summoned magical entity that is forced to possess the casters body.

Warlock: -100 PP

These types of mages tend to gain Power from a pact made with an otherworldly Power, these can be Eldritch entities, God's, Demons, Fey and even humans who have surpassed mortality. These casters receive the methods, knowledge and immense pool of magical energies for spell casting from their patron entity but become subordinate to those entities and are unable to use the magic against their patron or their interests.

The type and amount of rewards and limitations from a pact depend drastically on the type of entities your patron is and the type of pact was agreed on.

Witchcraft: -50 PP

The practice of Witchcraft is not directly combative and focuses on the interconnected threads of the universe allowing the witch to easily pool magic to indirectly enact spells, curses and blessings that are difficult to track or defend against.

Due to the esoteric patterns of witchcraft it often requires outside sources of magic such as a coven, a patron or catalyst to successfully cast large spells.

Wizard: -50 PP

This type of mage is considered the standard type of magic user by the general populace, they study the principles of magic and spells that they wield only utilising their own reserves of magical energies.

Casting specific verbal and somatic components often through a specific medium they are in tune with in place of material components.

Schools of Magic:

The various Schools of Magic each teach casters their own methods for blending and processing specific magical energies in order to produce their desired results.

Each School of magic comes with a specific spell book that contains a general guide for mages of that school from the basics of combining the required quantities of magical energies to the complexities of internal energy conversion.

The first few pages of each spell book contains notes on the safe practices of using that school of magic and a self updating guide to magical creatures and supernatural entities relevant to the school of magic.

Also called parasite magic this school of magic is able to create localised areas of magical drain that regenerates your reserves by feeding off of energy such as offensive spells, objects of power or fields of energy.

Arcane Magic: -200 PP

Arcane magic is the structured form of magical notation giving it a variety of uses but a strict process of actions when it comes to application.

Due to this nature memorising spells is mentally taxing and becomes very difficult to retain when casting resulting in most spellcasters preparing specific spells in advance then being unable to recall the process after casting.

A way that some arcane casters bypass the memory issue is by engraving the spell into an aspect of themselves so that they can be cast without preparation but often limiting their range of magic.

Blood Magic: -175 PP

A type of magic that uses blood as a conduit for spellcasting to tap into the life force of others. The main purposes of blood magic spells are to create links in order to manipulate specific targets through methods such as scrying, mind control and using life force draining to use as fuel for other forms of magic.

Blue Magic: -150 PP [Discounted with Mystical Bloodline]

This type of magic is considered odd as rather than traditional spells it focuses on performing magic associated with monsters. Though this comes with a number of example spells for the user to learn from, the priority of this magic is replicating the capabilities of another creature through new spells and can potentially give the user access to all of a creature's unique powers.

Chaos Magic: -200 PP

The general use of chaos magic is to warp reality on a macro scale allowing for offensive, defensive and utility magic that function in similar manner to solid illusion magic.

Contrary to the common belief, chaos magic is not the absence of order but instead an order so complex that any tiny change in any variable will drastically change the results of a spell.

Due to this, chaos magic is considered extremely unstable and requires a massive amount of magical energy to control every relevant variable of the spell in order to guarantee the desired results.

Chi Magic: -250 PP

This school focuses on manipulating the life of spirit energies within others.

The main aspects of this magic is to block or release different parts of spiritual energy within a target to allow different results.

This school of magic is used to enforce magical agreements by forcing both parties to make a connection between their essence and the contract itself.

These agreements can be represented by a medium such as a written document or remain a verbal agreement without a medium.

Both parties will be required to follow the contract to the letter with the consequences having been varying depending on the contract spell that was cast.

Contract magic can be broken destroying its medium or by negating the wording within the contract.

Users of contract magic can be selective with their choice of words, to create loopholes or alter what the receiving party has asked for.

Craftsman Magic: -50 PP [Free with Christmas Magic]

Curse Magic: -75 PP

This school focuses on the various applications of curses, a type of magic that causes the target some form of adversity or misfortune through various effects.

The most common effects of curses are bad luck, sicknesses, infertility, ugliness and pain but can also include most long term negative effects.

The main two types of curses.

- **Encompassing Curses:**

These are considered surface level curses, they can be broken with enough Power or using anti-curse magic, improperly breaking this kind of curse should not harm the one who is inflicted by it but will cause pain to the one who cast it.

- **Conditional Curses:**

These are curses that are layered on a deeper layer they are called conditional curses as in order for them to bypass an essence's natural defences it must have gaps through which the curse can break. It is incredibly difficult for a conditional curse to be broken through any way other than fulfilling its condition and if a conditional curse is forcefully broken it can kill the one who was cursed and a severe backlash will occur on the one who cast it.

Encompassing Curses can have conditions placed on them though this does not make them conditional curses.

Demon Magic: -125 PP [Discounted with Infernakinesis]

This school of magic is usually used by demons due to the energy being natural to their bodies. Though this magic has a wide variety of uses it tends to function best for offensive and mental alteration for non demonic entities as the fire and demonic energies used can cause great suffering and corrupt a non demon's mind in order to overPower and subdue them.

For example:

 - Orange (Good) an effective information extraction device regardless of how brutal it is would be considered Good.
 - Blue (Evil) a toaster that can only warm bread is evil.
- The Green/Red alinement focuses on gaining either personally or as a whole as Good or Evil:
 - Green (Good) you take money from the take a penny leave a penny even if you don't need it.
 - Red (Evil) you have a conversation with someone and neither of you gains anything from it.

System Builder:

A system is a special tool designed to refine and customise the user's essence with different systems having different complexities.

Any gained **XP** can be set to be stored until you choose to distribute it or auto-deposited into a levelling option at whatever ratio the user wishes.

XP is also often gained as a **Reward**.

This section can only be purchased from using the **Custom System** Power Type Option.

XP Gaining Methods:

XP, is a unit of measurement for the energy that the system uses to form and develop the user's essence.

XP can be gained through a number of methods described below or by methods described in the perks the user has.

Execution Points System: -50 SP [Free with Race Levelling System]

The most common method of gaining **XP** is by killing an enemy and gaining **Execution Points**.

The amount of **XP** earned is three quarters of a calculated amount.

This Equation is not entirely accurate, but is an approximation of the actual number.

The Enemy Experience Statistic as determined by their species multiplied by the Enemy's theoretical Level multiplied by its combat proficiency and deducts how much **XP** you have gained from them previously.

Extort Point System: -50 SP

You gain **XP** whenever you defeat an opponent allowing you to **Extort Points** from them.

The amount of **XP** earned is a quarter of the calculated amount.

This Equation is not entirely accurate, but is an approximation of the actual number.

The Enemy Experience Statistic as determined by their species multiplied by the Enemy's theoretical Level multiplied by its combat proficiency and deducts a third of how much **XP** you have gained from them previously.

Extirpate Points System: -50 SP

You gain **XP** whenever you destroy or have **Extirpated** something.

Each whole object is assigned an amount of **Extirpated Points** when within range of the system.

This value is calculated from the potential price if sold, the effort put into the item's creation, the materials the item is made from and the Power stored within the item.

Any items extirpated for **XP** is completely erased and absorbed by the system leaving no remains.

Expertise Points System: -100 SP [Discount with Reactive Levelling System]

Whenever you perform a specific type of action or activity that would improve your **Expertise** in a specific or general way you gain a small amount of **XP**.

If taken with “**Skill System**” every time you level up a skill, you will gain bonus experience, with low-level skills offering only a lower amount of character **XP** than high-level skills.

Exploits Points System: -100 SP

Once per day you will gain XP based on the level of fame your action has gained.

The more well known and famous your **Exploits** become the more **XP** you gain.

This will be larger the more active thought is given to your **Exploits**.

Exploration Points: -150 SP

Whenever you discover new information from **Exploration** or research such as location, types of lifeforms, abstract or academic information you gain **XP** proportional to the value of the information you have discovered.

Existential Points: -50 SP [Requires Exploration Points]

Whenever you discover **Existential** information that a mortal mind cannot comprehend you gain a massive amount of **XP** the more abnormal the location or information the more points you get.

WARNING: This does not grant you additional protection from the mental harm caused by the knowledge you gain.

Expanding Points: -150 SP

You gain **XP** once every ten earth days. As you **Expand** the square footage of land you own it increases the amount of points you will gain.

Examination Points System: -200 SP

Once per day an impartial function within the system will **Examine** everything you have done that day and award you points.

The system will use a grading panel comprising of 405 judges from every moral alignment combination from the following grid combinations:

- **Karmic Morality:** Good, Neutral, Evil
- **Social Morality:** Chaotic, Neutral, Lawful
- **Moral Awareness:** Smart, Neutral, Stupid
- **Style Morality:** Cool, Neutral, Efficient
- **Moral Perception:** Black/White, Shades of Gray, Orange/Blue, Green/Red, Purple/Yellow.

Each morale alignment can independently bestow you with a level appropriate amount of **XP** for each action they grade or give you a negative score but the total award cannot be reduced lower than 0 or the highest individual positive grade.

When you are awarded **XP**, a summary of what activity had the highest and lowest scores as well as what 10 alignments bestowed you the most and least amount of points that day.

Existence Points System: -100 SP/-200 SP/-300 SP/-600 SP

You will draw potential energy from the reality gaining **XP** simply for **Existing** at a steady pace for **-100 SP** or **-200 SP** this will be equivalent to gaining 1% of the total **XP** required for you to reach the next level every 140 minutes, for **-300 SP** or **-600 SP** this will be improved to 1% every 14 minutes guaranteeing that you will gain enough **XP** to level up at least once per day. For **-100 SP** or **-300 SP** this will only level one system at a time allowing you to either set it to a specific Levelling System to gain **XP** on or you can passively spread the **XP** gained across all Levelling Systems you have at a ratio of your choice. For **-200 SP** or **-600 SP** all of your levelling systems will each gain the full amount of their brackets **XP** with the **Class/Job Levelling System** only Gaining **XP** on its equipped Classes.

XP Boosting:

These **XP** options can not be taken without an **XP Gaining Method**.

Excessive Points: -50 SP

Whenever your actions **Exceed** the requirements for gaining **XP** you will gain additional **XP** in proportion to the scale that you surpassed the requirements.

Executive Point System: -100 SP

This **XP** System treats your subordinates as if they had an identical system to yours whenever they gain **XP** you as their **Executive** gain additional **XP** equivalent to a **30%** of the **XP** that they would have gained if they used your system. This amount may situationally increase depending on circumstance.

Levelling Options:

The different methods below each have their own **XP** requirements with each additional level requiring more **XP** to level again.

Each level up the user will gain a number of **Level Points** that are spent to improve the user. If the options have been purchased below **Level Points** can be spent on **STAT's**, in the **Stores S.P.E.C.I.A.L.** menus and on the **Gacha**.

Level Points can also be converted to **Abilities Points** and **Class/Job Points** if you have an insufficient amount when making a purchase.

When experience is gained it can be distributed between the purchased levelling systems at the ratio decided by the user.

Without the **Unending System** option, the maximum total level for each system is Level 200.

Player Levelling System: -200 SP

This levelling system allows you to gain **Player Levels** which each grant a number of **Level Points** that can be used to dynamically improve yourself.

Reactive Levelling System: -200 SP

Whenever you gain a **Reactive Level** the system automatically distributes the **Level Points** based upon your actions during the previous level.

Class/Job Levelling System: -200 SP

Through this Levelling System the user gains a **Class/Job** of their choice from a list of valid options.

The **Class/Job** will distribute some of the **Level Points** in a way related to that job.

Each level the user gains an amount of **Class/Job Points** which can be spent on the development tree or converted into **Progression Points**.

These buffs will remain permanently in effect even in the face of subsequent **Class/Job** changes.

Every **Class/Job** you obtain starts at level one regardless of how high you may have been in other **Classes/Job's**.

Normally you are only able to equip one **Class/Job** at a time needing to switch your equipped **Class/Job** to give them **XP** and level up.

There are some **Classes/Job's** such as the "**Jobless**" **Class/Job** that allow the user to equip multiple classes.

There are also **Classes/Job's** that allow the user to level up **Classes/Job's** that are not equipped such as the "**Parasite**" **Class/Job**.

You do not lose progress from changing the equipped **Class/Job** to another.

There are a number of ways that a **Class/Job** can be unlocked.

The main method of unlocking **Class/Job** is By levelling up a **Class/Job** you have already unlocked.

Most basic and civilian **Class/Job** can be unlocked by performing certain tasks related to the **Class/Job** Additionally some advanced **Classes/Job's** require meeting specific requirements. A majority of classes require both of these methods in tandem to unlock them having both a Minimum specific **Class/Job** Level and meeting additional requirements.

On rare occasions a new or a unique **Class/Job** can be gained as a **Reward**.

Prestige **Class/Job** can be unlocked either by reaching the maximum level of multiple **Class/Job** with some having additional requirements or by completing specific branches of a **Class/Job** development tree.

If the options have been purchased, **Classes/Job's** can be unlocked via the **Achievements, Titles, Store** and **Gacha**.

When purchased with the **Expertise Points System** the user will gain additional **XP** if they perform certain tasks related to the **Class/Job** they have equipped.

Each **Class/Job** has access to a development tree that suits the **Class/Job** and each time you meet the level requirement you may make additional purchases from the development tree using the **Class/Job Points**.

If the **STAT** option was purchased then every level will increase by the **Class/Job** through a predetermined **STAT** bonus.

If the **Abilities** option has been purchased then when reaching preset **Class/Job** levels the user will unlock **Abilities** reinvent to the **Class/Job**.

The **Abilities** that can be purchased from the **Class/Job** development tree tend to be superior to those received for free from levelling up the **Class/Job**.

The boosts gained from a **Class/Job** are maintained even when said **Class/Job** is changed for another.

You do not have to spend **Class/Job Points** on the **Class/Job** development tree for the **Class/Job** that you received them from and can instead use them on any equipped **Class/Job**. You may change classes at any time, retaining any benefits you've gained from them. If you switch back to an old Class/Job its level will remain what it was when you switched out of it.

In the event you extend a **Class/Job** beyond its maximum level it provides bonuses at the same rate it had before reaching maximum level.

If the option is purchased then when exceeding the maximum level, instead of gaining new **Abilities** from levelling, the **Abilities** already gained through the **Class/Job** levelling are given sub **Abilities** that upgrade their capabilities similar to levelling from proficiency.

These upgrades are gained at the same intervals that the **Abilities** were obtained.

Race Levelling System: -200 SP

All **Race Levels** begin at level 1.

When levelling up, gaining bonuses to their capabilities and if the options have been purchased they gain bonuses to their **STAT's** and additional **Progression Points** until they reach the maximum race level for that species.

The Maximum race level for the species can vary between level 10 and level 100.

When at the maximum race level for that species has been reached the evolution system provides choices for possible evolutions.

After evolving the previous race becomes an Alt-form and can no longer level up using the **Race Levelling System**.

Some evolutions may require certain conditions to be met before they can be taken.

For example a "**Goblin**" when at max race level would have the evolution option "**Hobgoblin**" available but if they focus enough on poison skills the evolution option "**Poison Goblin**" is available, if they live in swamps the evolution option "**Swamp Goblin**" is available.

When an evolution option has been selected the following things occur.

The Race level is reset back to Level 1 however, the bonuses remain the same.

If the options have been purchased the user can be Rewarded with **Titles**, **Resistance/immunity**, **Class/Job** and/or **Abilities** that are related to the race.

If the Reward is already unlocked it is instead boosted.

With each increase in Race Level the race will grow into a new and more Powerful subspecies of its kind, with the transformations variling in the amount of physical change it provides.

Each evolution requires more **XP** to progress in equivalent levels than its predecessor

Additionally, the **XP** Given to the race level also applies to all Alt-forms allowing them to level up and evolve into even greater forms however the race bonuses only apply to the corresponding Alt-form.

System Functions:

This is a list of additional features the system can incorporate to aid its user.

UI System Free/Mandatory

This brings up notifications whenever relevant events such as when gaining **XP**, a new level or when receiving a **Reward** which are most commonly **XP** and **Items**.

You can also call up a menu to navigate this system to access the other purchased components of the system and edit the menu settings.

Map System: -50 SP

Your system now comes with a dynamic map that will auto fill to reflect your current location. By default this will be the details you can directly perceive and everything within a 1 metre diameter of you though this may change depending on other aspects of the system.

Party System: -50 SP

You may invite up to four others to gain access to your system becoming a '**Party**'.

All party-members will automatically gain access to the system and its benefits while in the party the upper limit is doubled every time this option is purchased.

Taming/Summoning System: -50 SP

This system shows you a list of all Animals, plants and other entities that have been tamed or entered a valid contract with the user.

If the user has a valid condition they can summon or de-summon the entity via this menu.

Management Systems: -50 SP

You are able to see the system data of your subordinates and allies as if they had an identical system to yours regardless of distance or location.

Otome System: -50 SP

This functions as a relationship Indicator quantifying your relationships with other people within a list.

When interacting with others, you can receive conversational prompts that can be used or ignored to advance the relationship. Relationships may become temporarily strained due to the user's action, but will not deteriorate simply due to time apart.

Seasonal System: -50 SP

At specific times of the year the system will have a makeover corresponding to a relevant holiday granting themed **Rewards**.

STAT's System: -50 SP [Free with Player Levelling System]

This is a list of your Statistical measurements, the default examples being Strength, Dexterity, Vitality, Intelligence, Wisdom, Charisma and Luck but this can be changed on initial acquisition.

STAT's may be improved through training them, though the higher they are, the harder they are to improve this way.

Boosts to **STAT's** can be received as a **Reward**.

Inventory System: -50 SP [Free with Class/Job Levelling System]

This is a sub space storage place that also lists the items stored within it and within other storage slots that the user has.

Rewards can be set to automatically get stored here.

Skills System: -50 SP

The **Skills System** is a list of learned abilities which represent the most basic and yet most fundamental abilities of the current jump such as "Diplomacy", "Speech", "Survival" and "Unarmed".

New **Skills** can potentially be gained each jump for **Skills** you do not already have which are fundamental to the jump such as gaining Energy Weapons in a sci-fi setting and SpellCraft in a Fantasy setting.

More complex **Skills** can be received as a **Reward**.

Whenever you gain a level, you gain **Skill Points** that can be allocated to **Skills** improving their capabilities in that subject.

Skills can also be improved by reading specific books, learning relevant knowledge, gaining relevant perks, sometimes when raising other **Skills** by a certain amount and boosted as a **Reward**.

Additional **Rewards** can be gained when reaching specific milestones with **Skills** or sets of **Skills**.

Card System: -50 SP

Rewards, Items, XP, Store purchases and Plugins can be turned into cards for long term storage or to be granted to others.

You may also convert these cards into either a pre-existing or new and customisable card game.

If taken with **Party System, Taming/Summoning System, Management Systems** or **Otome System** you may create card copies of the respective **Party** members, **Tamed/Summoned** creatures, **Subordinates** and/or **Relationships** which you will be able to use to summon the cards target.

Shopping System: -50 SP

The **Store** is accessible through the menu. If you have purchased the relevant components you can use the **Store** to purchase useful items, level boosting items, **Plugins**, crafting recipes, Combat Techniques, **Skills**, Spells, **Titles**, specific **Classes/Job's** and some **Abilities**.

Cost naturally scales with the value of the commodity in question.

There are additional **Store** sections that allow the user to spend accrued points if they have purchased the relevant options.

Level Points can be spent in the **Store's** S.P.E.C.I.A.L. menus to access new Attributes, Blessings and demi-perks that are added to the perks list.

Progression Points can be spent in the **Store's Abilities menus** to access new **Abilities** that are added to the **Abilities** list however the **Store** only shows **Abilities** the user can afford that are related to the currently set race and **Class/Job**.

Class/Job Points can be spent in the **Store's Class/Job menus** to access new **Classes/Job's** that are then added to the selectable **Class/Job** list however the **Store** only shows 20 **Classes/Job's** at a time.

Purchasing through the **Store** is done in a similar method to online shopping by selecting the commodity you wish to purchase, which adds them to a basket that can be edited and then requires payment at the checkout.

Gacha System: -50 SP [Requires Shopping System]

Once per day, the user may make a spin of the free **Gacha**, winning a random **Prize**. If the corresponding options have been purchased then they could win an amount of currency, a random type of system **Points**, a random crafting recipe, a random technique, a random spell or a random **Reward**, they could even win extra gacha spins to get even more prizes.

The range for how valuable the possible **Prizes** are is immense, but the average will always be slightly useful to you, no matter how Powerful you are, and no matter how worthless, the win will never be something negative.

Around specific holidays you will also be able to access a holiday themed **Gacha** with holiday themed **Prizes**.

Level Points can be used to spin any **Gacha**.

An access pass can be purchased from the **Store** to gain time limited access to any temporary **Gacha's**.

However it is cheaper to access **Gacha's** that are no longer accessible either due to the holiday no longer being celebrated or the holiday not existing in your current setting.

Data Interface System: -50 SP

You gain a heads-up-display that shows an intuitive user interface in the form of little semi-transparent floating squares of light that are invisible to anyone else.

The interface will passively show the user level, **XP** percentage, your **HP** health points, **MP** mana/magic points, **SP** stamina points and **RP** reserve points the cumulative nutrients in your body including Carbohydrates, Fat's, Proteins and other similar supernatural energy reserves. These values can be displayed as a percentage of their calculated numerical value.

Elemental Attribute System: -50 SP

Elemental attributes indicate what attributes the user has a specific connection or affinity. The most basic level of this would be the 4 classical elements of Fire, Water, Wind and Earth but can include styles of magic such as Illusion and conjuration, types of energy including Ki and Psionics while other attributes can take on the forms of certain themes of abstract concepts this can include stars, flower and even Christmas but the broader the attributes is the lower the benefits you get from it.

These attributes grant you greater Power and resistance to attacks of that attribute, and offer a greater connection to elementals of that attribute.

An attribute helps the development of Powers that follow this theme in every form and any form of magic that the user casts which is related to this theme is easier to learn, more Powerful, costs less, is stronger, faster, and is overall a lot better. Casting magic without an affinity is possible, but it is more difficult, they will also be significantly weaker and less efficient.

Magic is not the only tool that is affected by Magic Affinity, Elemental cultivation schools of ninjutsu, martial arts, or kinesis also benefit from attributes for manipulating the elements.

Further training can increase the Power and efficiency of the techniques using your element improving affinities you aren't naturally inclined towards.

New **Affinity's** can be gained via specific **Classes/Job's**, **Abilities**, as **Rewards** and through specific sections of the **Store**.

Divine Blessing System: -50 SP/100 SP

For **-50 SP** this is the list of Blessings bestowed by God level entity's to the user and also allows the user the possibility of purchasing from the **Store** or receiving a Device Blessing as a **Reward**.

For **-100 SP** the subconscious of all local gods can live-streamed your actions, they can send messages, comments, **Rewards** and Blessings but can't get directly involved in your action.

If you meet one of these gods they may vaguely remember you but will not know the specifics.

Abilities System: -50 SP/150 SP

This feature grants the system access to **Abilities** that will be displayed in a list, **Abilities** are the many and varied individual abilities that can be used or enhanced with the system.

The way **Abilities** are improved is primarily through proficiency gained in the same process as the **Expertise Points System** by constantly using the **Ability** you wish to improve, doing so that **Ability** will slowly level up, gaining more side abilities or spells and becoming broader in scope. **Abilities** can be earned through experiencing events that the **Ability** would aid in.

Occasionally a new or a unique **Ability** can be gained as a **Reward**.

Abilities can also be gained from the different Levelling systems and by non Jumpchain methods such as a Stand arrow.

Once an **Ability** has reached Level 10, it is Mastered and it evolves to become a new and stronger version of the **Ability** at level 1.

It is possible for multiple **Ability** to unify into a new **Ability** that contains the old abilities of the component **Ability**, upgraded versions and even entirely new **Ability** will eventually reach a point where they cannot evolve or unify any further, though this may be subverted with certain purchases.

Abilities can also be gained through an Appraisal skill or using the **Abilities Points**, in the **Shopping System**.

Abilities Points can be gained when levelling up via the **Race Levelling System**.

It also shows any **Ability** that is related to the currently set **Race** and **Class/Job**.

Selecting the **Abilities** you wish to purchase adds them to a basket and then requires payment at the checkout.

For **-50 SP** your system will have access to a single type of **Ability** but for **-150 SP** your system will gain them all.

- **Passive Abilities:**

These are **Abilities** that can be continuously kept on with little to no use of the users energy reserves, such as perception enhancement **Abilities** that are ingrained into the body. They do not need to be turned off and on, but they can be if needed.

- **Active Abilities:**

These are **Abilities** that require intended activation often requiring use of MP or SP while in use, such as combat and transportation **Abilities**.

- **Progression Abilities:**

These are **Abilities** that when gaining Proficiency levels unlock **Sub-Abilities** that unlike other **Abilities** can be updated in new circumstances if you have them Progression **Abilities** can add to the **Combat Technique List** and the **Spell List**. One example of this is the "Extended Sight" **Ability** which grants alternative vision abilities When in a world where the emotion spectrum is connected to the colour spectrum the system can add additional sight **Sub-Abilities** to see the target's emotions and its cosponsoring colour.

- **Style Abilities:**

These are **Abilities** that bestow Combat Techniques to the **Combat Technique List** as they progress allowing the user to perfectly imitate a movement from the technique.

This in and of itself does not give the user understanding of the technique but with repeated use this can lead to them understanding it. Each time a **Combat Technique** is activated the user will perfectly mimic the movements of the selected technique without interruption requiring the user to cancel or finish the technique before they can make other movements. With practice these techniques can be chained with other techniques in order to construct a choreographed pattern of strikes and movements.

A subsection of the **Combat Technique List** allows the user to inspect the movements that comprise a technique allowing them to repeat and understand how the components of each technique works and comprise a new technique that can be added to the Combat technique list.

Any **Combat Techniques** can be learned outside of the **Combat Technique List** and the movements that comprise those techniques can be used to create new Techniques.

- **Spell Abilities:**

These are **Abilities** that bestow **Spells** to the **Spell List** as they progress allowing the user to perfectly imitate the casting of a spell.

This in and of itself does not give the user understanding of the magic but with study and repeated use this can lead to them understanding it.

Each time a **Spell** is activated the user would perfectly mimic the casting procedures and spell circles of the specific **Spell** from start to finish without interruption requiring the user to cancel or finish the **Spell** if they wanted to manipulate energy differently.

With practice this **Spell** can be augmented in order to control the magnitude, direction and speed of the projection.

A subsection of the **Spell List** allows the user to inspect the components that comprise a spell allowing them to research and understand how each spell works.

Any **Spell** can be learned outside of **Abilities** and any learned casting components can be used to create new **Spells** that can be added into the **spell list**.

- **Resistance/Immunity Abilities:**

This is a list of the passive reductions for damage types that the user has gained.

Resistance reduces damage the user takes whereas Immunity completely negates damage of that type.

For example Fire Immunity completely negates mundane fire with some kinds of Fire such as Planar Flames still being able to damage the user.

You can gain a **Resistance/Immunity** either as Rewards from other sections of the system or from receiving damage of that attribute. It is even possible to gain new **Resistance/immunity** just through proficiency, such as repeatedly subjecting oneself to burns to eventually gain Fire Resistance 1.

Once a **Resistance/immunity** has reached Level 10, it is Mastered and it evolves to become a new and stronger version of the Resistance/immunity at level 1.

Jump System Integration: -50 SP [Requires Abilities]

Any perks, items and Powers from any jump can be combined with this system allowing them to grow as if they were a part of it.

This also functions as a List of jumpchain Perks the user has. If the user has a perk that allows them toggle perks on/off it can be done with this menu. This list can also be used to categorise perks via the perks function, origin, methods and many other categories.

This also allows you to integrate any other system you have purchased into this system gaining the benefits of both.

If you have purchased the **Class/Job Levelling System** each background or origin equivalent can unlock a **Class/Job** of the same name.

Crafting System: -100 SP

This system gains a list of every recipe you have unlocked or otherwise know how to make. By selecting a recipe and submitting the required materials the recipe will instantly be completed.

The item will be crafted by simulating you crafting that item and will grant you the passive knowledge and experience of having crafted it without gaining any of the active memories.

The recipes used for creating can be gained through either levelling a **Ability**, levelling a **Class/Job** or by manually crafting the item.

Questing System: -100 SP

The user can gain quests that can include completing narrative threads, delivering items, solving a current problem, collecting a set of items or defeating a specific number of a certain type of foe.

The active quests that a user has available to them will be available in a viewable list.

The user can also receive daily quests that require them to do small tasks to improve themselves.

The user can receive dynamic quests for predesignated tasks such as completing a document or delivering something as requested.

The quest will always award **XP**, with the amount depending on the quest's difficulty.

Occasionally if a corresponding option has been purchased Quests will award the user with valid **Rewards** relevant to the completed quest.

These quests will screen themselves to automatically remove quests that oppose your morality.

Titles System: -100 SP

Titles are granted to individuals when they meet certain conditions.

Most Titles grant the recipient a **Reward** related to the title.

When a user of the system accomplishes an achievement or feat, they may find themselves gaining a **Title**.

There is no limit to the number of **Titles** that may be held at once.

Achievements System: -100 SP

If you achieve certain notable milestones, then you will receive achievements along with **Rewards** comparable to the achievements' difficulty.

Divine Domain System: -100 SP [Requires Elemental Attribute System and Divine Blessing System]

This is a list and accessible segment for the Divine domains that the user has dominion over. Any entity that gains a Divine domain will progress into being a deity but depending on the number of domains and the strength of the domains the user may only be at the divine level of a demigod.

Any attribute could be a divine domain with each divine domain being a specific area of interest for deities, that grants them mastery over it, allowing them to create control and destroy expressions of that domain through only their divine will.

Multiversal Reward System: -50 SP/200 SP

By default all the **Rewards** you receive will be relevant to the setting you are in.

For **-50 SP** the **Rewards** may also come from one alternative setting of your choice upon purchase or for **-200 SP** the **Rewards** can come from any setting.

Regenerative System: -200 SP [Discounted with Player Levelling System]

When you level up any of the levelling systems, your body is completely restored. If taken with **Interface System** the users **HP**, **MP** and **SP** are restored to its maximum amount.

Login System: -200 SP [Discounted with Reactive Levelling System]

You now have a login component that will ask you to log in during every 24 hr period.

Logging in will give you a small level appropriate **Reward** every day with larger level appropriate **Rewards** at every log in milestone.

The average **Reward** quality will improve with each consecutive login.

Bloodline System: -200 SP [Discounted with Race Levelling System]

This feature allows you to gain toggleable bloodlines as **Reward** and purchasable options.

Bloodlines are special innate Powers belonging to certain clans and races that are descended from a Powerful entity inherently giving its users advantages that normal people do not possess. Some Bloodlines can be used to take on physical/magical features and capabilities of the bloodline it is descended from while some may allow you to transform into that creature for a period of time.

The user may have multiple bloodlines however without a method of support the bloodlines may conflict with one another.

Plugin System: -200 SP [Discounted with Class/Job Levelling System]

By default you gain three **Plugin** slots: 1 character **Plugin** and 2 event **Plugins**.

Through this you can equip any plugins you own granting your "**Powers**" while they are equipped.

These **Plugins** come in two types the first is a character **Plugin** that grants you all of that character's "**Powers**", the second is an event **Plugin** that grant's you a "**Power**" based on a famous event.

Dynamic System: -200 SP [Requires Unending System with Abilities System, Skills System, Titles System, Achievements System” or Class/Job Levelling System]

The system will constantly be making new content to accommodate new jumps, setting, cultures, events and what the user is capable of or has learned.

Dungeon System: -200 SP [Discounted with Class/Job Levelling System or Race Levelling System]

You are able to create dynamic Dungeons that can generate monsters, traps, and treasures using transmutation magic.

This transmutation magic is Powered by energy extracted from the surroundings, this setting can be modified to act as a purification device to absorb specific types of energy such as corruption energy or Miasma.

You may select or have randomised a theme and level based difficulty for the dungeon, which will alter the dungeons environment, treasure and monsters.

You may also set a dungeon to incorporate aspects from previous locations you have visited and replicate dungeons you have been to before.

The monsters within will never attempt to escape, but the floor layout and monsters within can change depending on what sort of challenge you’re looking for.

Whenever you get a new **Ability** you will temporarily gain access to a tutorial Dungeon that will explain how to use the **Ability**.

If you manage to complete a dungeon you will gain a **Reward** related to the theme and scaled to the selected level.

You can also acquire dungeons as optional missions or tests from external beings of great Power which may contain life-like artificial beings that can imitate realistic appearance and behaviour.

Unending System: -200 SP/400 SP

This can be purchased for **-200 SP** for a single **Levelling System** to have no maximum level or **-400 SP** for all **Levelling Systems** to have no maximum level.

Any Alt-form gained from an evolution can now use the **Race Levelling System** allowing them to gain the alternative race evolutions.

Integration System: -600 SP [Requires Unending System]

With this option you can choose to merge multiple systems together gaining the combined benefits of each with dynamic customisation for overlapping aspects.
