by u/daltonoreo

Introduction

Welcome Jumper to the mystical and strange land of Noita, set in a world where every pixel is out for your blood. Strange abominations crawl through the skin of this world, from technological terrors to mystical beasts. Nothing is out of the ordinary here and you are no exception. How far can you venture, Noita? **Take +1000CP OR Gauntlet Mode 0CP**

Age and Gender: While Noita translates to Witch you may begin as any Gender or Age as you wish, for the Gods care not.

Location

The world of Noita is a vast place with many strange locations, many of which are deadly to those inexperienced or ignorant. Feel free to choose any starting location, but for +100CP you may roll a 1d8 instead

- **1. Holy Mountain:** The Starting location of every Noita's journey. You will start directly outside of the Mountain Temple. No Danger is to be found here... Usually. But, if you venture into the Temple your journey to the Depths will begin with the Mines.
- **2. Desert Pyramid:** Ah the Wind Whipped Dunes of the desert, and the high standing Pyramid. You will start on the left side of the Pyramid. Inside you may find only danger, however a great reward lies inside should you best it.
- **3. Snowy Wastelands:** The freezing chill of the Wastelands washes over you Noita. Here you may find nothing but snow and ice, however somewhere beneath you is a treasure, if you can find it.
- **4. Mines:** The first step into the depths. A dreary and damp place filled with strange creatures and Hiisis alike. However Wands and Potions may be found here with little risk, if you avoid Stendari that is. You will begin in the mid-level of the Mines.
- **5. Coal Pits:** Welcome to the Deeper Mines Noita. Here coal dust fills the smoggy air as mining equipment long decayed litters this place. Explosive stockpiles and radioactive containers are quite common here.
- **6. Snowy Depths:** Another step deeper... Here Hisii activity has become more abundant with Snipers and Machine Turrets. Pray that you do not encounter Ukko the Thunder-mage
- **7. Hisii Base:** Oh dear Noita you are in trouble now. You will begin directly inside of the Hisii's main base, which if not obvious by now is Swarming with Hisii. Good luck Noita.
- **8. Underground Jungle:** This is the furthest I will take you Noita. The Underground jungle is a wonder of life, blood thirst life that is. Watch out for flames and Myrkkyhiisi.

Background

While all Backgrounds are considered Drop-ins you may Specialize in certain aspects of the game, Choose one and gain a discount in all of their specialty perks.

❖ **Stranger**

You are a Stranger in a Strange land Noita. There is nothing here that you may understand, yet you possess the will and luck to continue on. You alone Noita have the strength to complete this land.

❖ **Explorer**

To be an explorer is to not ask the world it's secrets, but rather demand it. Searching through every crack and crook for all they offer. You Noita are among their ranks and with time and effort the world will lay bare for you.

❖ **Alchemist**

All Alchemists seek mystical knowledge and to practice their art. Though all alchemists have different rituals and arts their goal stands true for all, The Perfect formula. Weather the Philosopher's Stone, The Pancrea, or perhaps the Transmutation of Life. You Noita are amongst their ranks.

Perks

You may gain **2 Free General 100CP Perks** and a **Discount** on **1 General Perk of Each Listed Cost** [200CP, 400CP, 600CP.]. Discounted 100CP Perks are Free. Any Perk which is Stackable may be purchased multiple times.

-Stranger Perks-

❖ **Stranger in a Stranger Land [100CP]**

This world is broken Noita, it's very easy to tell, and though you may not be an explorer you always know the general status of the world you are currently in. However this knowledge is almost never specific and only the most common knowledge will be revealed to you.

❖ 4 Leaf Clover [400 CP]

You find yourself luckier than most Noita when it all comes down to the wire. A bullet just grazes you, or a sword misses your vital parts. However this luck is not plot armor, and it will fail if you push your luck too hard.

❖ Balanced [800CP]

You Noita are like a gyroscope with legs. Your balance is that of legend and could make a trained tightrope walker look like a bumbling baby. You now possess the ability to balance on even a blade's edge, maybe even a speck of dust if it would support you. You will never be unbalanced by anything unless you wish it to, however you can still be pushed off if you just stand still.

-Explorer Perks

❖ Back of Your Hand [100CP]

All Explorers must always know where they are going. Thankfully for you Noita you now possess a perfect sense of direction. Whenever you are traveling to a place you have already been you have a perfect sense of direction and knowledge of the safest route there-(From all threats you know of). Additionally any terrain you travel (that is currently unobserved by other intelligent creatures) will change into a more favorable one for you, however this reverts back to its original state upon observation.

❖ Radar [400 CP]

To be a Explorer one must always travel off the path to unknown lands, and you Noita always know where to go. You now possess an internal radar that can direct you in the vague direction of your goal. This Radar does not tell you how to get there, only the direction you must travel. The more specific or difficult you make your goal the more vague the directions will be until they are nigh-impossible to follow (EX: Your Soulmate).

❖ Adventurer's Spirit [800CP]

Exploration does not come without its risks. You will be hurt, beaten, and perhaps even die. However, to a true Explorer all may be overcome. You now possess an indomitable will and

drive to your goals, and if given effort all but the most impossible tasks may be achieved given hard work and time. Additionally reality will slightly bend to your favor from the sheer force of -your will. However, this bending is limited and cannot save you from something like a bullet to the head.

-Alchemist Perks-

❖ Alchemist [100CP]

The Art you practice Noita is The Divina Arte, but your knowledge is only basic. Regardless, all Alchemic Recipes you know will work in other worlds/universes/settings regardless of their physics or magic's rules.

❖ Practitioner [400CP]

As your knowledge grows, so does your skill. Whenever you enter a setting that possesses alchemic knowledge you will instantly learn all but the best kept secret recipes. However this knowledge does not guarantee that they will actually work, and trial and error must be done to weed out the wheat from the chaff.

❖ Magnum Opus [800CP]

The mark of a true alchemist is that of their Magnum Opus, a once in a lifetime achievement that few ever reach. However you Noita are a Magnum Opus itself upon the Art. All Potions and Elixirs you create can be imbued with either 10x The Power or 10x The Duration. Additionally mixing Elixirs will never have any unintended side effects or reactions.

-General Perks-

Rewards (Gauntlet Only)

❖ NG+ (Requires 1000CP in Drawbacks) [Perk]

The Work has been completed... Time begins to pass around you, though not in the direction you would expect. Old memories are forgotten, and the World is restored. Once per Jump (or every 10 years) you may reset the world to its original state, before you arrived.

❖ The Sampo [Item]

You have completed the Work, perhaps not perfectly but it is finished none the less. The gear glows faintly blue as its power washes across it like an ocean of glass. This is a limited philosopher's stone and can transmute any material, Lead to Gold and Gold to Lead alike. But, that is only a taste of its power. If you were to somehow utilize it properly, perhaps you could turn entire worlds into glittering gold and silver. Effectively The Sampo can transmute upto 100kgs of material into any material you know the chemical/magical composition of everyday

without consequence. If you wish to use The Sampo for a greater effect you must construct a large machine that is able to handle the full power of The Sampo (Which will most likely crumble after one use)
