

Genkai Tokki Series 0.1

By saiman010

Introduction:

You've entered a new and fascinating world, one quite different from anything you've encountered before. In the past, this world was inhabited solely by humans, but everything changed when colossal pillars, known as the Hammers of God, suddenly pierced the Earth. From these pillars, dungeons began to appear, teeming with strange monsters that are as ridiculous as they are perverse in their attacks. Alongside these monsters, a new sentient species emerged—monster girls.

These monster girls aren't hostile by nature; in fact, most of them wish to coexist peacefully with humans. This was the beginning of an era where humans and monster girls lived together in harmony. However, this peace was short-lived, as a strange curse began to spread, afflicting both humans and monster girls, driving them into uncontrollable berserk states where they would attack each other indiscriminately. Fortunately, there is a way to break this curse, though it's far from conventional: by stripping the afflicted naked and performing perverted acts on them until they submit.

Yes, you heard that right. It seems you've been thrust into a world where the powers of ecchi and naughty touching will be the keys to powering up both your allies and yourself, unlocking new heights of strength and ability. This world isn't one for deep introspection or serious storytelling; it's all about fun, absurdity, and pushing the boundaries of what's acceptable. The games in this series toe the line between being light-hearted ecchi adventures and almost eroge experiences, so brace yourself for a wild ride.

With 1,000 CP in hand, you're ready to embark on this outrageous adventure. Enjoy your time in this world, because one thing's for sure—a lot of people will be eagerly watching to see what kind of chaos you'll stir up!

3.Monsupi Sea

The Monsupi Sea, often spoken of in legends as a phantom ocean, was long considered a place of mere imagination. However, you now find yourself amidst the many mysterious islands that populate this legendary sea. According to ancient tales, these islands are rumored to hide untold treasures, drawing adventurers from across the world in search of riches and glory. Despite the allure of its fabled treasures, no humans are known to live in this region; instead, the islands are home to various monster girls, each with their own unique traits and abilities.

As you explore this unknown land, you are surrounded by strange and fantastical creatures, each more mysterious than the last. However, there's an unexpected twist: almost everything in this world—from the monsters to the very landscape itself—seems to resemble the exaggerated forms of monster girls' bodies, particularly breasts and butts. The islands are dotted with rolling hills and valleys that bear uncanny resemblances to feminine curves, while the creatures you encounter are straight out of a hentai universe, dominated by tentacles and other similarly suggestive forms. Every corner of this bizarre world exudes a surreal, erotic atmosphere, making it both a paradise and a peril for any adventurer who dares to explore its depths.

4.Empty Plains

You begin your journey in an empty, desolate plain where nothing but vast stretches of barren land surrounds you. The emptiness is almost eerie, with no signs of life or civilization in sight. However, as you survey the horizon, you notice the distant outline of a country that seems to have recently undergone a significant upheaval. Rumors of a coup d'état have spread far and wide, and it appears that this nation is now in a state of turmoil. With little else around, the prospect of exploring this troubled land piques your curiosity. Perhaps uncovering what has transpired there could lead to new opportunities—or dangers.

Origins:

Here is where you choose your origin in this world. One's gender, race and age will be determined here.

Monster Girl Tamer

In this world, you are a human, and you can choose to be either male or female at no cost. Your age is 17+1d20 and your existence here is paramount, as you serve as the vital bridge between humanity and the monster girls who inhabit this land. It is your sacred duty to not only maintain the delicate balance of coexistence between the two races but also to strengthen and empower the monster girls who have entrusted their lives to you. As a guardian and leader, you are responsible for guiding them through the challenges they face, helping them grow in power and confidence. Your bond with these monster girls is essential, as it is through your connection that they can reach their full potential, ensuring a harmonious future for both humans and monster girls alike.

Monster Girl

You are one of the many monster girls that inhabit this world, and your gender is always female. Your age is $17+1d6$ years. You are a creature born from the rich mythology of our world, embodying the characteristics and powers of legendary beings from ancient tales. Like many other monster girls, you yearn to coexist peacefully with humans, seeking out ways to form meaningful connections with them. Your desire to live alongside humans could stem from a deep wish to find a human mate, with whom you hope to create offspring that carry on your unique lineage. Alternatively, you may be driven by a quest for greater strength, seeking out a monster girl tamer with whom you can enter into a contract.

Perks:

Each origin gains a discount on their origins perks, and 100CP ones are free.

General

Moe Looks[Free/100CP]

Since this is a world where you'll be engaging in some rather intimate and ecchi activities with monster girls, it's only natural that you wouldn't want to do so with someone you find unattractive. That's why every monster girl in this world is guaranteed to be a 9/10 in the looks department, ensuring that beauty is never in short supply. You have the freedom to decide exactly what you look like, tailoring your appearance to suit your preferences.

Similarly, any other human in this world will be at least an 8/10 in terms of appearance, making sure that the standards of beauty are consistently high. This enhancement is completely free in this world, and you, your companions and followers will continue to maintain their 9/10 appearance in any future worlds you visit. However, if you wish for those around you, who aren't your direct companions, to also have a minimum of 8/10 in the looks department in future worlds, you'll need to spend 100 CP to make that happen. With these perks, you can ensure that everyone you encounter will be as pleasing to the eye as they are interesting to interact with.

Sexy Body[Free/100CP]

In this world, it's not just your looks that have been enhanced; your body itself is sculpted to perfection, as if chiseled by the gods themselves. This enhancement applies to both humans and monster girls, with each person's body embodying the ideal of masculinity or femininity. However, this isn't just about appearance—your body's physical attributes directly impact your stats in battle.

When it comes to breasts, their size affects your physical capabilities:

Larger breasts (up to a size I) increase your attack and defense. The bigger the bust, the stronger and more resilient you are in battle.

Smaller breasts (down to a size B) enhance your speed and dexterity. The more petite your chest, the quicker and more agile you are.

As for butts, their firmness impacts your magical and physical endurance:

Softer butts result in a larger mana pool, allowing for more extensive use of magic.

Firmer butts boost your HP, making you tougher and more durable in combat.

You get to choose the proportions of your body and those of your companions in this world for free, tailoring your physical form to best suit your preferred combat style. For an additional 100 CP, you can carry this effect into future worlds, allowing you and your allies to change your body shapes and corresponding stat boosts at the start of every new jump. This ensures that you can always optimize your physical attributes to match the challenges of each new adventure.

Ecchi Underwear logic[Free/100CP]

In this world, clothing is all about style rather than functionality, so while your outfit may look incredible, it won't hinder your movement or combat abilities in the slightest. However, there's an interesting twist when it comes to protection: conventional armor, even the skimpy kinds typically seen in ecchi and anime, is uncommon here. Instead, the effects you'd usually expect from armor—such as stats boost, resistances, and even certain skills—come entirely from your underwear. That's right, in this world, bras and panties (or undershirts and boxers for males) are the true sources of protection for warriors.

Wearing just your underwear, while potentially embarrassing, is completely acceptable and even practical. The bra you wear determines what skills and elemental affinities you gain from your equipment, while your panties provide crucial stat boosts and resistances. This system applies to both genders, with men receiving the same benefits from their undershirts and boxers.

This perk is free in this world, but if you wish to carry this unique system of magical underwear into future worlds, it will cost you 100 CP. Having two layers of protection—from both outer and inner armor—could prove invaluable in your adventures. Additionally, it's important to note that while wearing your underwear and normal clothes, you are still considered "naked" for the purposes of certain skills and abilities, which might come in handy depending on the situation.

Uhh Its Battle Damage[Free/200CP]

Now that we know underwear is what truly empowers the users of this world, you might think that regular clothing is just for show. However, that's not the case at all. In fact, the fancy clothes worn by the people of this world still function like armor. Even everyday street clothes have the remarkable ability to absorb an incredible amount of damage before they're completely disintegrated. Your body remains unharmed as long as your outer clothing is intact. You only begin to take damage once all of your outer clothing is gone, and this protection extends to your underwear. Your body will only start to suffer harm when you're completely nude, including when your underwear has been destroyed.

This perk is free in this world, but if you want to carry this benefit into future worlds—where your clothes are much more durable and can absorb 100% of the damage you would otherwise receive—it will cost you 200 CP. This additional layer of protection could be a significant advantage, allowing you to withstand much more before being truly vulnerable.

Perverted monsters [Free/200CP]

In this world, most monsters have a perverted nature about them. Whether they're tentacle creatures, have body parts that resemble underwear or breasts, or engage in perverse attacks like shooting strange white liquids, targeting your private parts, or inducing intense arousal, these behaviors are all part of the natural ecosystem here. Such encounters are considered normal, adding an extra layer of challenge and intrigue to your adventures.

This peculiar aspect of the world is free and part of the environment here, but if you want these perverted monsters to appear alongside the regular monsters in future worlds, it will cost you 200 CP. This option ensures that even in other realms, you'll continue to face these bizarre and suggestive threats, keeping your adventures just as wild and unpredictable as they are here.

Man of the Sea[200CP]

You now possess the capability to expertly navigate the high seas of any world, regardless of the challenges they present. You can proficiently sail any boat or ship, provided its technology level is equivalent to or lower than vessels from the year 2024. Whether you're steering a simple wooden sailboat or a modern yacht, your skills will ensure smooth sailing across even the most treacherous waters.

Fighting Styles[200CP Each]

In this world, there are four distinct fighting styles that warriors and monster girl tamers typically use in battle. Each style offers unique advantages and suits different combat roles. You can choose one style to start with, and if you wish to add another style to your arsenal, you can do so by paying an extra 200 CP for each additional style. Here are the four fighting styles:

Venus Style

A vanguard style that excels in close-range physical combat. This well-balanced, all-purpose fighting style is known for its high abilities and versatility. Venus Style focuses on overwhelming enemies with a flurry of attacks, making it ideal for those who prefer to dominate in close-range combat through sheer volume and speed.

Knight Style

Another vanguard style that specializes in close-range physical attacks but differs in its focus on raw power and defense. The Knight Style boasts high attack and defense power, delivering fewer but much stronger hits compared to the Venus Style. However, it has a notable weakness against magic, making it less effective against magical foes. This style is particularly useful against enemies with high defense, allowing you to break through their resilience with powerful strikes.

Gunner Style

A rear-guard style that focuses on long-distance physical attacks. The Gunner Style allows you to fight from a distance using gun attacks, making it an excellent support style for those who prefer to stay out of the front lines. Additionally, it includes the ability to summon monster girls from outside your immediate party to assist in battle. This style is perfect for supporting Venus and Knight style fighters with ranged attacks and reinforcements.

Witch Style

A rear-guard style centered on long-distance magic attacks. Unlike the other styles, the Witch Style's normal attacks don't directly damage the enemy's HP; instead, they absorb MP, which can be used to summon monster girls for both offensive and supportive roles. It has the highest magical attack power of all the styles, making it especially effective against enemies resistant to physical

attacks. This style is ideal for those who want to harness the power of magic and summoning to control the battlefield from afar.

Pet Pact[200CP]

Regardless of when and where you find yourself, whenever you defeat a monster(non monster girl)in battle, there's a chance that the creature may occasionally come and snuggle up to you. This perk applies to monsters no larger than the size of a cow. When this happens, the defeated monster shows a fondness for you, allowing you the opportunity to make it your ally.

Once you've formed a bond with this weirdly affectionate monster, it can serve as a loyal companion. This pet can be used for scouting, venturing out into the wild to explore and gather materials. This allows you to collect valuable resources without having to do all the work yourself.

Monster Girl Tamer

Recruiting [100CP]

You now possess the unique ability to recruit monster girls into your party. Your natural charm and persuasive skills make it much easier for you to convince monster girls to join your ranks, whether they're intrigued by your strength, impressed by your leadership, or simply captivated by your personality.

This perk works exceptionally well with monster girls you've previously subdued, either through battle or by saving them from the madness that afflicts them. Once you've made a monster girl submit, either by defeating her in combat or rescuing her from her own insanity, your persuasive powers are significantly amplified, making it almost inevitable that she will choose to follow you. With this ability, you can build a diverse and powerful party of loyal monster girls, each bringing their unique abilities and strengths to your cause.

Backline [100CP]

As a tamer, your place is not on the front lines but safely behind the many monster girls you've recruited. With this perk, as long as you're not actively attacking enemies on the front lines and you have at least one monster girl ally by your side, all hostile enemies will completely ignore you and focus solely on your monster girl companions. This effect also extends to traps found in dungeons; any harmful effects from traps will be absorbed by your monster girl allies instead of you. This perk ensures your safety during battles and explorations, allowing you to focus on directing your monster girls without worrying about being targeted or harmed.

Battle Tactics[200CP]

As a monster girl tamer, you now possess the ability to effectively command up to 6 monster girls at once, managing them with precision and efficiency. While your skills allow you to handle up to 12 monster girls in total, beyond this number, your commands may start to lose their effectiveness.

You can easily direct your monster girls to execute a variety of actions, whether it's attacking, blocking, staying in formation, changing their equipment, or learning new skills. Your commands are geared towards the greater good of the group, ensuring that your team operates as a cohesive unit in battle.

Heart Icon[200CP]

You now possess a special ability that allows you to see a pink heart icon stamped on certain monsters within dungeons or on the battlefield. These heart-marked monsters are unique, as when you defeat them, they will always drop equipment that is useful to one of the monster girls under your command.

The dropped items can range from underwear, accessories, and costumes to powerful weapons, all tailored to enhance the abilities of your monster girls. However, there is a limit: for each monster girl under your command, they can receive a maximum of three heart-marked items per jump.

Fusion[400CP]

As a Monster Girl Tamer, you've mastered a unique and powerful ability that allows you to fuse two monster girls into a single, formidable entity during active battle. This fusion results in a creature with stats, skills, and equipment that are greater than the sum of its parts, significantly enhancing their combat prowess.

However, this fusion technique comes with two important restrictions:

Same Type Requirement: The two monster girls you wish to fuse must be of the same type, though they can be different species within that type. For example, you can fuse a Red Dragon with a Water Dragon, as both are dragon types. However, you cannot fuse a Red Dragon with a Skeleton Dragon, since one is a dragon type and the other is undead.

Time Limitation: The fusion lasts for approximately 10 minutes, providing a temporary but powerful boost in battle. After the fusion ends, the individual monster girls cannot fuse again with the same partner—or with a different partner—for at least one hour.

This ability allows you to strategically unleash a combined force when the situation demands it, giving you a crucial edge in challenging battles.

Seal Release[400CP]

You now possess the unique ability to harvest magical crystals known as "Seals" from the monster girls you command, once every month. These Seals have the remarkable power to enhance any piece of equipment you possess. Not only do they significantly boost the stats of the equipment, but they also imbue it with a specific trait related to the monster girl from which the Seal was harvested.

For example, if you use a Seal from a Green Dragon on a shield, the shield's defensive capabilities will be greatly enhanced, particularly its resistance to magic, as dragons are naturally resistant to magical attacks. Additionally, the shield would gain the trait of being resistant to poison-type attacks and the associated status ailments, reflecting the Green Dragon's inherent qualities.

Each piece of equipment can be enhanced by up to three Seals, with the requirement that each Seal must come from a different species of monster girl. This allows for a wide variety of customization and strategic enhancements, making your gear incredibly versatile and powerful.

Now, if only you had a place to enhance your equipment...

Monster Girl Raising Expert [600CP]

As a Monster Girl Tamer, you have reached the pinnacle of your craft, becoming a true master in raising monster girls to their fullest potential. Your expertise now grants you an encyclopedic knowledge of every monster girl in this world and future worlds. This includes comprehensive details about their species, general likes and dislikes, ideal habitats for their happiness and growth, and the types of training and equipment that will bring out their best abilities.

But your skill goes beyond just knowledge. You've also developed a deep connection with your monster girls, allowing you to understand each one on a personal level. You know exactly what gifts will make them smile, the perfect date spots to keep their morale high, and the activities they enjoy most. This strong bond ensures that your monster girls remain motivated and content, which in turn makes your training sessions twice as effective.

Furthermore, your expertise enables you to guide your monster girls through the process of evolution, should their species have a higher form. Under your care

and training, your monster girls grow and develop at twice the normal rate, quickly becoming stronger, more capable, and fiercely loyal to you. Your ability to nurture and empower your monster girls is unmatched, making you a formidable tamer in any world.

Sweet Magical Scratch [600CP]

You've now mastered the more intimate and powerful ability known as the Sweet Magical Scratch. This technique, while appearing questionable to an outsider, is a legitimate method that allows you to deeply bond with your monster girls and enhance their abilities.

During your nightly visits to your monster girls' rooms or after you've pinned down and subdued a berserk monster girl (a state that makes them see humans as enemies), you can begin the Sweet Magical Scratch. This involves touching them in their most sensitive areas or erogenous zones, which are unique to each monster girl species and individual. Despite appearances, this is not a prelude to anything inappropriate like sex—it's a technique designed to make the monster girl reach a climax. The purpose of this climax varies depending on the situation:

Healing and Curing: If the monster girl is suffering from any abnormal status ailments—such as diseases, curses, or even the berserk status—your Sweet Magical Scratch can completely cure them. It's a powerful method to restore your monster girls to full health and sanity.

Heart Crystals: If the monster girl is completely healthy and has absolute trust in you, your Sweet Magical Scratch can cause them to drop Heart Crystals. These crystals are incredibly valuable, as they are keys to accessing a special dungeon deep within the monster girl's mind called the "Deep Recesses."

Each monster girl has three Heart Crystals, and by using them, you can enter this unique dungeon within their minds. Clearing the Deep Recesses dungeon rewards you with items and equipment tailored specifically to that monster girl, enhancing their abilities further. But the true reward is what this process does for the monster girl herself:

Ascension: Each time you clear a Deep Recesses dungeon, the monster girl undergoes an "Ascension." Her basic stats will grow stronger, and she will unlock a unique skill that dramatically increases her power in battle. For instance, a Goblin might gain:

Goblin Call: Summons fellow goblins to assist in battle.

Makeshift King: Proficiency in using makeshift weapons effectively in combat.

Goblin Luck: A significant boost to luck, improving outcomes in battle and other scenarios.

Comfort in Skimpy Outfits: The goblin becomes more comfortable wearing revealing outfits in public, potentially boosting morale and certain social interactions.

In addition to these powerful effects, the Sweet Magical Scratch also allows you to alter the physical attributes of your monster girls. By poking, pinching, or slapping the breast or butt you can change the size and shape of their breasts, as well as the softness and firmness of their buttocks. This customization further fine-tunes their stats, allowing you to optimize each monster girl for their specific role in battle.

Monster Girl

Monster Species [Monster girl Only/ none discounted/Varied]

As a monster girl in this world, you have the opportunity to choose your species, which determines your inherent abilities and strength. The species are divided into different tiers, with higher costs corresponding to more powerful monster girls. Additionally, you gain the mythological abilities associated with your chosen species.

Free- Common Monster Girls: You are a relatively common and weak monster girl. Your species might be something like a goblin, pixie, or slime. While these creatures are not known for great power, they possess unique abilities that make them versatile and useful in various situations.

200 CP - Intermediate Monster Girls: Your species is still not particularly special, but your power is above that of the weaker monster girls. Here, creatures like orcs and harpies begin to appear. These monster girls are tougher and possess abilities that make them formidable in battle, although they are still considered mid-level in the hierarchy.

400 CP - Mid-Tier Monster Girls: At this level, more powerful monster girls start to appear. You possess the ability to break boulders with ease and have other significant powers. This tier includes creatures like succubi and angels, known for their potent magical abilities and combat prowess. You are now a force to be reckoned with in the world.

600 CP - High-Tier Monster Girls: Your species is part of the great creatures that exist in this world. Here, you find powerful beings such as chromatic dragons, hydras, cyclopes, and giants. These monster girls are immensely strong, capable of taking on entire armies, and possess abilities that can turn the tide of battle.

800 CP - Mythical Monster Girls: Your species is named after mythological beings that rank among the gods. Depending on which god your species is named after, you will gain abilities related to that deity. For example, if you choose to be a species named after Thor, you will gain the ability to command lightning and possess immense combat power. These monster girls are at the pinnacle of power, with abilities that can shape the very world around them.

Front Liner[100CP]

As a monster girl, your place is right in the thick of battle, leading the charge on the front lines. Unlike tamers who stay back, you thrive in the heat of combat. With this perk, you will always be the primary focus of your enemies' attacks, drawing their attention away from your allies. Your presence on the battlefield is impossible to ignore, and enemies will be compelled to target you first, allowing your allies to strategize and attack without interference. Additionally, any traps encountered in dungeons will be triggered by you first, ensuring that your companions remain safe while you bear the brunt of the danger.

Monster Girl Type[200CP Each]

In this world, a fighting style determines how a monster girl engages in battle, while her type dictates which skills she excels at learning and her optimal positioning on the battlefield. When a monster girl learns and uses skills aligned with her type, she becomes twice as effective in wielding them. Here are the four basic types:

Melee Type: The most fundamental type, Melee fighters are at home in close combat. They move forward and deal damage directly to the enemy in front of them. Melee types are proficient in learning skills related to short-range weapons, excelling in hand-to-hand combat and other close-quarters techniques.

Ranged Type: Ranged types specialize in attacking from a distance. They are adept at using long-range weapons like bows, guns, or magical spells that can hit enemies from afar. These monster girls are best positioned at the backline, where they can unleash their attacks without being directly threatened by the enemy.

Healer Type: Healers are the backbone of any team, focusing on restoring the health and vitality of their allies. They excel in learning skills that involve healing magic, recovery items, and other supportive abilities that keep their companions in fighting shape. Healers are typically positioned safely away from the front lines, where they can focus on supporting the team.

Buffer Type: Buffers are specialists in enhancing the abilities of their allies. They learn and utilize skills that increase the strength, speed, defense, or other attributes of their team, making them invaluable in turning the tide of battle.

Buffers usually stay behind the front lines, using their powers to boost the effectiveness of their comrades.

To gain additional types beyond your initial choice, you can spend an extra 200 CP for each new type, further diversifying your monster girl's capabilities and role on the battlefield.

Free Will[200CP]

As a monster girl, you have developed the ability to maintain your free will in any situation. This means that the effects of mind control, charm, or any other abilities designed to strip away your autonomy will be completely negated or simply fail when used on you. Your strong sense of self and independence makes you immune to these attempts, ensuring that you remain in full control of your actions and decisions, no matter the circumstances.

Lets Get Along [400CP]

You now have the ability to effortlessly get along with your fellow monster girls, as you are far from being a loner. This perk enables you to quickly become friendly with other monster girls, making it easy to form strong bonds and connections within your group. Additionally, you possess a unique talent that allows you to subtly join in on another monster girl's and their tamer's alone time—provided you're on good terms with both parties.

When you manage to join in, you receive a small benefit from their Sweet Magical Scratch sessions, usually in the form of a minor buff. If you participate in enough of these rituals, you can accumulate more significant advantages over time. Additionally, there's the fun and bonding that comes with a three-way connection, enhancing the camaraderie within your group.

In future worlds, this perk also grants you the ability to have similar three-way fun with people you've bonded with significantly with any ritual gaining a miniclu buff here and there, expanding your connections and deepening your relationships across different adventures.

96 Erotic Methods [400CP]

You have now mastered the secret techniques known as the 96 Secret Attacks. These unique attacks are executed in collaboration with your monster girl allies, where you and your team unleash 96 different attack combinations. Each attack in the sequence has its own unique effects, ranging from healing you and your allies from status ailments to completely obliterating your enemies.

However, be warned: the more powerful the combination attack, the more stamina and MP it consumes. The instant-kill attacks, in particular, will drain your resources immediately, leaving you completely exhausted. Use these devastating techniques wisely, as the cost of their power can leave you vulnerable if not managed carefully.

Perfect Partner [600CP]

As a monster girl, you are the ideal second-in-command and the ultimate support for your monster tamer. You excel at training and satisfying your tamer's needs with unparalleled effectiveness. Your skills are finely tuned to complement your tamer's abilities, allowing you to work in perfect harmony. Whether it's assisting in battle, offering strategic advice, or providing emotional support, you adapt seamlessly to your tamer's needs, ensuring that both of you perform at your best.

In training, you can help other monster girls reach their full potential faster, acting as a mentor and guide. Your presence amplifies the efficiency of training sessions, leading to quicker mastery of skills and techniques. In combat, you instinctively know how to support your tamer, whether it's by covering their weaknesses, enhancing their strengths, or taking the lead when necessary.

Your bond with your tamer is so strong that it allows you to anticipate their needs and desires, making you the perfect partner in every aspect. This connection also makes you more effective at fulfilling the tamer's goals, whether they're tactical in nature or more personal. You are the ultimate support, providing stability, strength, and unwavering loyalty.

Deviant Monster Girl[600CP]

As a Deviant Monster Girl, you are an exceptional and rare variant of your species. You possess unique abilities, enhanced strength, and a distinct appearance that sets you apart from your standard counterparts. Deviant Monster Girls have survived countless battles, adapting and evolving beyond their original forms, making them formidable adversaries and invaluable allies.

Your combat abilities are significantly more powerful, with enhanced stats, unique attacks, and special abilities that only Deviants can wield. These abilities often come with special conditions or powerful effects that can turn the tide of battle. Like a deviant red dragon now can create explosive breath attacks.

In addition to your enhanced combat prowess, you have a unique and imposing appearance that reflects your Deviant status, often adorned with distinct markings, armor, or features that signify your strength and experience. This appearance not only strikes fear into your enemies but also commands respect from allies.

Your Deviant nature also grants you resilience against certain types of damage and status effects, making you harder to defeat and choose one type of physical attack like pierce or slash to be immune to or one element now and any status effect like sleep and poison you are now immune to. As a Deviant Monster Girl, you are a force to be reckoned with, bringing exceptional power and a distinct edge to your tamer's team.

These walls also absorb the energy from impacts, reducing overall structural damage and significantly increasing the castle's durability.

You can now upgrade your soldiers who are stationed to protect your castle by selecting from the following options:

High-end Equipment: Your soldiers are now equipped with advanced armor and weapons of superior quality. This upgrade significantly improves their combat efficiency, giving them a distinct advantage over larger armies that possess inferior gear. Even when outnumbered, your soldiers will stand victorious in battle due to their superior equipment.

They work tirelessly, automatically engaging any intruders and sabotaging enemy equipment, making them a perfect defense unit.

They excel in both reconnaissance and aerial combat, making them valuable assets for defending your stronghold from sky-based threats.

battle. Their magical abilities ensure your forces are protected against both physical and magical threats.

Nun Nunnery:A nunnery is established within your castle, and the nuns not only maintain the holy grounds but also serve as healers for your soldiers. With their divine magic, they can swiftly tend to the wounded, ensuring that your army is always in top condition, even during prolonged battles.

Barbarian Tribe:A tribe of savage barbarians has joined your forces. They are bloodthirsty warriors who live for the thrill of battle and carnage. Although rough around the edges, their brutal fighting style and strength make them formidable fighters. They are loyal to you, as working under your command satisfies their lust for destruction.

Magical Girl Squad:Your army now includes a squad of five magical girls, each serving as commanders. These magical girls possess unique powers and skills that enhance your army's cohesion and combat abilities. Their leadership and magical prowess will inspire your soldiers, keeping morale high and ensuring efficient operations on the battlefield.

Import Facilities [100BP Each]

You now have the capability to import any type of building you desire into your walking castle, as long as it fits within the walls of your castle. Each imported building costs 100 BP. These buildings can be anything from specialized workshops, advanced research labs, market districts, magical towers, training grounds for soldiers, or even personal residences for high-ranking officials.

Airport/Dock [100 BPEach]

You now have the capability to add either a dock or an airport to your castle. The airport will be built inside the castle walls, equipped to handle airships and other flying crafts, making it ideal for trade, travel, and military purposes with the outside world. Meanwhile, the dock will be built on the edge of your castle's landmass, allowing ships to come and go with ease, facilitating sea-based trade and travel.

These additions will greatly enhance your castle's connectivity with the world, making it a bustling hub for trade, commerce, and diplomacy. If desired, you can purchase the other option (dock or airport) for an additional 100 BP.

Bath House [100 BP]

A luxurious bath house where your citizens, soldiers, and guests can relax and rejuvenate. It can have hot springs, saunas, and steam rooms. The bath house also improves morale and serves as a social hub, attracting more people to your city.

Companions:

My Old Team 50

You may import or create your companions you have brought with you for 50 CP each, or 8 for 300 CP. Each one gains a free background and 600 CP to spend. They may not take drawbacks, but you may give them CP, spending 100 each time to give them an additional 200 CP.

My New Team 100

Sometimes having friends would be nice. Buying this once will allow you to add any allies you've made here as companions. You may buy this multiple times.

Drawbacks:

You are limited to +900 Cp from drawbacks.

Rule 63 [+0]

Well then... looks like we are entering a world where instead of focusing on the monster girl but instead the *monster boys*. If you want to see bishonen monsters ripping each other's clothes off, be my guest.

18+ [+0]:

Really? Alright. The setting just became a lot more lewder than it already was as the bands of light used to conveniently hide the private parts of the human body are now removed and you have a full view of said bodies, and other such fun stuff is no longer prohibited.

Hope you have fun with this.

Supplement [+0]:

Not exactly the most in-depth of places, so you can use this jump as a supplement for other jumps. The CP here can only be used in this jump, and vice versa; this includes extra CP from drawbacks.

Time Extender [+100CP]

You have the option to extend your stay in this world. For every 100 CP you take from this option, you can add another 10 years to your stay. The maximum CP you can gain from this drawback is 800 CP.

Perverted in Nature [+100CP]

It seems you have a tendency towards lewd behavior that others find inappropriate. Your actions are often met with disapproval and disdain, as people have little patience for your antics. This may lead to strained relationships and difficulty gaining trust or respect from others.

Leaping in the Nude[+100CP]

Well let's be honest the outfits that are used by the monster girl here barely count as armor. And unfortunately, you're required to fight in these skimpy outfits. Throughout your stay here, you're compelled to wear revealing outfits that offer no defensive capabilities, leaving you essentially naked in battle despite appearing armored.

Amnesiac [+200CP]

You find yourself in a state of amnesia, devoid of memories from your past jumps. The experiences and knowledge you've accumulated are lost to you, leaving you in a state of uncertainty about your identity and purpose. As long as you remain in this jump, your past will remain shrouded in mystery, making it difficult to discern your true self and your place in the world.

No one trusts you[+200CP]

Well you are an outsider to this world so it's only natural that people will have some trouble liking you. It will take time for people to warm up to you hey, be patient, it's not like you're actually criminal right. You will hear a lot of accusation going your way.

Ticklish Body [+200CP]

Well it won't be an ecchi series if you don't have an excuse for girls to touch each other. You are extremely ticklish that renders you helpless when triggered. Even the slightest touch in the spot of your choosing can send you into fits of uncontrollable laughter, leaving you incapacitated and unable to focus on any task at hand. You can take this drawback multiple times choosing an extra place where you are sensitive.

No Powers[+300 CP]:

You find yourself in a jump where outside powers and your warehouse are off-limits. You must rely solely on your own abilities and resources within this world, facing its challenges and trials without the aid of external assistance.

Playgirl [+300CP]:

It seems that you have a rather complicated situation on your hands. Despite not having any recollection of your actions, you frequently wake up beside different women, much to your dismay. What's worse is that these women claim to have

been seduced by you and demand that you take responsibility for your actions. Many of them hold significant power and influence, making it possible for them to force you into marriage if they so desire. If you do find yourself forced into marriage, your chain breaks. If you're still unmarried at the end of the Jump you can take all of the women with you for free.

Yandere Stalker [+300CP]:

You have attracted the obsessive affection of someone who is deeply infatuated with you, but unfortunately, her love borders on insanity. She will stop at nothing to make you hers, resorting to extreme measures such as sabotaging your relationships and even imprisoning you if necessary. What makes matters worse is that those around you seem oblivious to her alarming behavior, dismissing it as normal and refusing to intervene. If you remain confined for a year without interruption, her chains on you will finally be broken. You may choose a Canon character as your Stalker, and if you want you can take your Stalker with you for free at the end of the Jump.

Ten Years Later:

Go Home: What, you finished? Here? Well, we won't ask. Whatever it is you gained here, we hope you enjoy it. You return home with all that you have accrued over your chain, and time resumes in all the worlds you visited.

Stay Here: This world does have a certain... allure, hmm? Don't worry, we won't judge. Add 1000CP as a bonus.

Move On: Ah, but of course. The journey never ends, does it? Go forth and have fun. Make some new friends.

**Also at the beginning of future jump anything
perks and items that affects monster girls will
work on any female of a non human race.!! Be
responsible ok!!**

Notes:

1. This is the jump I had the most fun building as it was the most unique mechanic even for an ecchi game series. But man making multiple jump chains in parallel is hard. Probably not going to do that again.
2. I decided to combine all four existing series because one making one for each game would be boring for me and two this an ecchi series there would not enough substance for jump if i choose one game to base it on.
3. For the castle walker i have not decided i should classified it as both a building and vehicle or just both. So here I will let you guys decide what
