

KERO BLASTER

Welcome to the world of Kero Blaster! A world where a species of sentient stress creatures known as Negativus Legatia started to come into being one day out of nowhere. The Cat and Frog Corporation, an extermination company, took it upon themselves to take care of it, sending out a frog with a blaster named Kaeru.

You start with **+1000 CP!**

LOCATIONS

1 ~ Cat and Frog Corporation - An extermination company, this corporation run by a purple cat takes out strange creatures for unknown reasons.

2 ~ Hinterland Fort - An old fort, this area is dirty, and mostly abandoned. Strange plant creatures and snakes call this place their home.

3 ~ Greenery Zone - A land of lush green and purple grass, as well as tall green flowers. There are many pools of mud and water here, and various insects have made their home here.

4 ~ OXOX Hotel - An abandoned hotel once run by the company OXOX - the rooms here are strangely square and open to each other one way or another. The rooms collect a lot of cobwebs.

5 ~ White Laboratories - A car factory currently run by a family of moles wearing construction helmets. Watch out for falling tires and the red thorny vines that litter the place!

6 ~ Hot Spring - Come here to relax from the hard times after work, alright? A traditional hot spring far away from the troubles of work. A shrine is nearby.

7 ~ Train Station - ...Looks like this place is pretty abandoned for the time being. In the future, Kaeru will fight against the Kaisha Man here - but for now, pick any location! [FREE CHOICE]

8 ~ Hekichi Plateau - The home of the Negativus Legatia. An icy plateau, not much lives here apart from Negativus Legatia and the local wildlife.

ORIGINS

Drop-In [FREE] - You're not like anyone else here, are you? Just the same as you ever were. Well, that's fine. Just continue on your business, I guess. Maybe you could get involved in the events to come?

Kero Blaster [FREE] - You're an exterminator working for the Cat and Frog corporation, or another company. Recently, your boss has raised up a massive fuss about the Negativus Legatia. It is your job to go out and stop them and any other odd elements in the environment!

Pink Hour [FREE] - You are an office worker for the Cat and Frog corporation, or another company. Your job is to do... something. Look after the equipment, make sure the files are sorted - it's not too clear, your boss is pretty angry at the moment.

Negativus Legatia [200] - So, you're one of the creatures behind this whole mess then. You are a specimen of Negativus Legatia. A human-sized black blob of shadow with red eyes created from people's stress and bad emotions. Go out and cause havoc!

PERKS

100 perks are free for their origins, 200 and higher are discounted

DROP-IN

Kaisha Man [100] - In this world, working is very important. Work, work, work. No relaxation. Ever. So, it's important that you know how to get work done right at least, right? You are now really good at office jobs. It's boring, sure, but that's life.

Hard Cording [200] - You're pretty good at creating little gadgets, you know? Not things that could be put into mass-production. But small hand-held items such as the Kero Blaster, Heart Boost and the Jetpack, that's where your talents really shine.

Chemistry [400] - The technology here condenses stress into a physical being - to the point that there is too much of these beings to exterminate. You now have the knowledge of this technology - of stress tech like the Work Producing Machine.

X, Y, Z [600] - So, you're not from around here. Then, you might know that this place isn't exactly... stable in areas. A frog known as Kaeru eventually manages to turn the world inside out in his adventures. You can do the same. If you choose to act out the impossible... then you can make the world be so surreal that it seems impossible.

This is a form of limited reality warping, much like a debug mode, or a level editor in a video game. You can change the laws of physics with your bare hands, or create a block of ice from

thin air. There's only so much you can create at once - about a 5mx5mx5m block. And of course, if you use this ability too much, the world will start to fall apart...

KERO BLASTER

Quiet [100] - You're a quiet type, aren't you? This works to your advantage, really. People tend to get what you're saying, and you also have a bit more willpower than the average amphibian.

Enrai [200] - You have sharp reflexes. To be specific, you're good at hopping around; being able to get up to high places. You also have a keen eye, easily the sort of person to spot things out of the normal. And when you're an exterminator, that's all you actually need.

Relaxation [400] - Sometimes, people need a shock to the system to sort things out. Now, you don't even need that. With a bit of relaxation and downtime, you now know exactly what it is you need to do next.

SUKIMA [600] - You know, you always seem to be able to handle everything that's on your plate at once. Multitasking, right? Even if nothing makes sense anymore, you can still manage to divine a path forward. Maybe try and find an exit out of the situation you're in. This perk also gives you a resistance to incoming stress.

PINK HOUR

Pink Heaven [100] - You're really, really good at the art of dodging. Moving left to right, up and down... no enemies are going to get anywhere close to you, no sirree!

Time Table [200] - Good scheduling. The key to preventing yourself from overworking. You know this now - not that your team is really overworked.

Shopping Cart [400] - Know how to manage a shop? ...yes...? Good. With this perk, you now know how to charge massive amounts of money for items and get away with it! If you don't, by any chance, know how to run a shop... this perk, indeed, does teach you how to do that, as well.

True Colors [600] - For some reason, you seem to be completely immune to the stress-inducing effects of the Negativus Legatia! Maybe it's because you're constantly daydreaming... anyways, this applies to all effects that try to warp your emotional state.

NEGATIVUS LEGATIA

Zombeat [100] - You have taken on the form of a Negativus Legatia. A black, shady, hazy blob with pincers. At the moment, you're pretty harmless - although you could use those pincers as a sort of natural weapon.

Freeze Draft [200] - The Negativus Legatia's prime weapon is stress. It causes stress generally via swarming around others. You have gained this same ability, being able to cause a mild amount of stress (or another emotion you choose) in other people around you.

Change Spec [400] - Now we're getting somewhere! The Negativus Legatia come into being through other people's stress. You now may do the same thing - turning stress into specimens of Negativus Legatia.

SHIFt-JIS [600] - And now, you have the possibility for world domination. The more of a presence you and your Negativus Legatia have in the world, the more the people of the world you are in are given to your mindset.

ITEMS

100 items are free for their origins, 200 and higher are discounted

DROP-IN

Kuro Blaster [100] - This is relatively fitting for you. A energy blaster wielded by Yellow Kaeru. It fires a potent black energy that might be related to the Negativus Legatia. It's only upgradable through long-hidden means, however.

Heart Boost [200] - This appears to be a pixellated picture of a cartoon heart. If you clip it on wherever, then you gain a boost in vitality. About a third extra from whatever you had going for you before.

Jump Hotel [400] - This is a hotel much like the abandoned OXOX Hotel that can be found here. Sure, it's got cobwebs, and some of the walls are broken down... but with some renovation, it could work!

Rocket [600] - This... wasn't meant to be here. Oh, well. I'll throw it in anyways. This rocket launcher does a ton of damage against the Negativus Legatia. If you upgrade it enough with money, it turns into a turnip-themed rocket launcher.

KERO BLASTER

Tie [100] - This is a blue tie. Made from cloth, it makes you look respectable on the battlefield of business and on the battlefield of extermination.

It's My Blaster [200] - An energy blaster that can be hooked around the shoulders. You can choose from Pea Shooter, Fan, Bubble, and Fire (one each per purchase). All can be upgraded with enough money. Pea Shooter is your typical energy shot. Fan is a wide shot. Bubble is a floating water-themed bullet. Fire is an energy flamethrower.

Jetpack [400] - This is a light blue jetpack. Using it, you can boost your height with a double jump either left or right. The flame that comes from it is blue, too.

Jacket [600] - A cool-looking brown bomber jacket. It gives you an extra hit against anyone you consider an enemy. Once it is lost or destroyed, it respawns itself and can be found at the nearest coathanger. You start with one at your warehouse.

PINK HOUR

The Sheets [100] - A stack of documentation. If prompted, will come up with the most appropriate documentation needed for the current situation. Very handy for situations with paperwork.

Treasure Chest [200] - This is a treasure chest. It's made of red metal, with golden trim. Alternatively, you may have a safe instead. Inside, it contains some life-replenishing hearts, and 100 coins as a start-up gift.

Shop Bubble [400] - It's a floating bubble with your logo on it! If you jump inside, then you are transported to a shop - you own it. While two frogs will run the store here, and they will come with you on your adventures past this world; they cannot go out of this bubble.

Heart Jar [600] - This is a glass jar. It has a heart inside, and if you open it, that heart's life energy flows out and into your body - thus refilling all of your life energy!

NEGATIVUS LEGATIA

Mysterious Block [100] - This is a strange block that adapts to its surroundings. If set down in a mine, it turns into a minecart. If set down in a forest, it turns into a stump. ...this might be good for stealth purposes, you know.

Teleporter [200] - This is a teleporter built by Cat and Frog Corp. All you need to do is key it to another teleporter of a relevant location. After that, then all you need to do is step in, and it will send you to that location!

Jumper and Companion Corp [400] - Your very own corporation...! Well, while as a Negativus Legatia; you won't have much use for this... it'll make a good home for the many other Negativus Legatia you certainly make.

Work Producing Machine [600] - A machine that pumps out work endlessly. It looks like a grey and black engine. Work over work over work. It never ends! Truly, this is a cause of stress to end all stress.

DRAWBACKS

Drawbacks are recommended to each origin. If you think it makes sense to pick it, go for it!

Drop-Ins, Kero Blasters and Pink Hours

Mad/Angry/Possessed [100/200/300] - For 100, you're mad about... something. Not sure what. Pick a subject. Your voice seems to have turned into a speech bubble - and all the text in it's completely scribbled out!

For 200, this has the further effect of you turning slightly inhuman in shape. Are you OK? You seem to be even madder, winding yourself up into a rage over the smallest topics some of the time.

Finally, for 300... you have been possessed by the anger. It's taken hold of you fully. Someone's going to have to stop you, because - even though you're fully aware of what's happening - you can't stop yourself! It's like your instincts have taken full control...

Yellow/Pink/Blue [100/200/300] - For 100, you are now... yellow. Weird. Anyways, since you're yellow, the world's gone a bit weird on you. There'll be patches of areas here and there where you might sink through. A bit like an old video game. You'll know them when you see them.

For 200, you are now Pink. With a capital P. In addition to the previous drawback, you no longer have any weaponry, and cannot attack in any way, shape or form. I would suggest you run.

For 300, you are in Blue, otherwise known as Zangyou Mode. You are now staying here for 10 more years than the usual, unable to fight and somewhat unable to interact much with the world around you. It's over-time.

Overworked/Can't Relax/Physical Manifestation [100/200/300] - For 100, you have been put into overtime duty. That's right, you have to mop up the work other exterminators failed to do. Shouldn't be too hard.

For 200, it does start getting a bit stressful to handle. Doing this sort of thing 24/7 leaves no time for other plans, huh? And is it just you... or are those Negativus Legatia splitting?

For 300, you are indeed correct. Your stress is causing the Negativus Legatia to come into being, but your job is (likely) to take out the Negativus Legatia. You're going to need to get a substitute or something while you take a vacation.

Negativus Legatia

Small/Tiny/Microscopic [100/200/300] - For 100, you are small. Just a bit smaller than usual, no big deal. About the size of a child instead of a full grown adult.

For 200, you're the size of a dog instead. You're going to have to rely on numbers to help you now, as you can barely reach the doorknob in your current state!

For 300, you are the size of a basketball. It's thankful that Negativus Legatia seem to form out in the wilderness, because you'd get exterminated close to the city.

Squad Size Issues/Production Problems/Going Solo [100/200/300] - For 100, you seem to have issues with gathering fellow Negativus Legatia around you to help you conquer and take over areas... maybe you need to try a different approach?

For 200, now you can't even produce Negativus Legatia yourself; if that was possible for you to do. It seems like gathering allies will be hard.

For 300, any and all allies that you manage to find will be driven anyway no matter what for the duration of the jump. It might be because of your appearance, or it might be because you're giving them bad vibes.

I'm Happy/Joy to the World/Positive Thinking [100/200/300] - For 100, it looks like you're weak to a single emotion. Someone who expresses that emotion at you will corrode away the darkness surrounding your form.

For 200, you are weak to a specific emotional spectrum. For example, if you picked happiness; you would be weak to any sort of expression of joy for Joy to the World. Additionally, emotions corrode away at you even faster.

For 300, you are weak to every emotion excluding a single emotion. If you picked happiness, then you would be weak to everything but happiness. Emotions corrode just as fast as Joy to the World. On the bright side, at least you get an emotion sense to help you out now.

All Origins

Omake Mode [600] - For the duration of your stay here, you will initially be in the world of Kero Blaster. A year in, Kaeru will exterminate the Negativus Legatia from Cat and Frog Corp. Then Yellow Kaeru exterminates the Negativus Legatia from his Cat and Frog Corp. After Blue Kaeru exterminates the Negativus Legatia...

Yellow Kaeru will exterminate the Negativus Legatia again?! This is called Omake mode. In Omake Mode, parts of the world get scrambled. Numbers are in the ground. Random pools of water are stock-still in the middle of the air. While this is the final extermination by Cat and Frog Corp known, the world will stay like this after Yellow Kaeru's second attempt to exterminate the Negativus Legatia.

Are you willing to survive a world that makes no sense?
