

Out of Context: Ki (Dragon Ball) Supplement

V1.0 By **FutureMobile4**, Original Template By **DeverosSphere**

This document can be used as a supplement in any Jump that would not otherwise have ki within its continuity.

By taking this Supplement you have chosen to be a user of Ki, a latent energy within your body, from the Dragon Ball series. You will enter into that continuity as a Drop-In awakening in the middle of a small crater. As a user of Ki you are visibly similar to a human, unless you choose not to be.

+1000 CP

If this Supplement is instead taken as an Isolated Jump, you may select a setting of your choice, even if it doesn't have a Jump Document, and use this document as a ten-year-long Jump.

Origin:

Normal Ki

This type of ki is mostly used by those whose hearts hold no evil intentions. This form of ki is mainly used by mortals and is usually shown by a white aura. Oftentimes, those who use this ki are combat practitioners, whether to grow and improve themselves, protect others, or for some other non-malicious reason.

Evil Ki

This type of ki is used by those whose hearts are filled with evil intentions to conquer and corrupt those who stand in their way. People who use this type of ki believe in nothing but power and dominance, using this ki to crush and enslave the weak. This type of ki is usually shown with a dark red or purple aura.

God Ki

Found only in divine beings, god ki is far more potent than regular ki, enough that to face a foe with god ki with any other type of ki would require far greater power to match. Those possessing god ki can only be sensed by those who possess it. God ki also tends to have some enhancing effects on one's vitality and health. The aura can vary from user to user.

Artificial Ki

Also known as Hikou, this is a version of Ki that has been created by artificial means. As a result, it can't be naturally detected by ki users, and may contain properties that are unique to its makeup.

Using this narrative perk, you can dynamically craft your method of Dropping into a Jump.

Ki Techniques - 100 CP

With enough training and focus, a ki user can learn how to use Ki in ways other than simply enhancing themselves. Ki blasts, shockwaves, flight, and more can be used and learned with enough training and practice.

Ki Sense - 200 CP

Experienced Ki users can learn how to sense and detect the flow of ki from other beings, allowing them to both track and determine their level of power. At higher levels, users can sense ki from across vast distances and locate someone with pinpoint accuracy.

Ki Aura - 300 CP

When increasing the amount of ki within your body your ki begins to manifest itself in the form of an aura, the color and appearance is your to choose. In addition to signaling that you're getting stronger, a ki aura can also be used defensively, protecting you from either natural hazards like fire and lightning and even stopping the ki attacks of weaker opponents.

Ki Control - 400 CP

You've learned the art of Ki Control, an advanced ki technique that focuses on controlling and mastering the flow of ki within your body. As a result, you waste far less ki than normally, allowing you to fight for much longer than anyone else. In addition, this refinement of your ki allows your attacks to become much more powerful than before.

Potential Unlocked - 500 CP

Through a secret ritual known only by the Elder Kai your latent potential has been unlocked, boosting your power to levels never before seen. Your physical capabilities have been boosted by a couple orders of magnitude, elevating you to new levels of power. Your ki reserves have

been bolstered as well, allowing you to last far longer in battle and unleash powerful attacks and techniques with little to no strain.

Ki Control Booster: Ultimate

Through mastery and control of your awakened power you've learned to take on a powerful new form known as the **Ultimate** form, elevating your power to an even greater level than before. In addition, your senses have been bolstered as well, enhancing them to an absurd level. This form can be maintained indefinitely if required and grows in power as your base power grows as well.

Yardratian Training - 600 CP

Through extensive training and study under the Yardratians your master and skill with using ki is elevated to an unimaginable level. Your usage of ki is so efficient to the point that not a single drop is wasted, allowing you to use your ki for a near-limitless period of time. In addition, your ki based attacks have been enhanced to an absurd degree, to the point that a simple finger beam could wipe out a planet. So great is your understanding of ki that you could learn and master any ki based technique by simply observing it.

Ki Control Booster: Spirit Control

Despite their weakness the reason the Yadratians are so widely regarded and respected comes from their understanding and master of ki, which has allowed them to accomplish feats that most would deem simply impossible.

This technique, known as **Spirit Control**, allows the user to manipulate and utilize their ki for a variety of different abilities and techniques. The most basic ability is known as the Instant Transmission ability, which allows the user to teleport to any ki signature that they can detect and locate. More advanced applications are cloning (making copies of yourself), gigantification (increasing your size and power immensely), and healing (restoring yourself and others).

But the most advanced technique is the **Forced Spirit Fission**, an ability that allows you to separate and manipulate energy from your target by damaging them, allowing you to undo Fusion and/or Absorption techniques and even free trapped souls. In addition, you can use this ability in reverse by taking the released energy and rather than dispersing it, condense it into an orb and either absorb it yourself or give it to someone else.

Ki Sense Booster: Ki Radar

Your senses have grown to the point that not only can you track ki signatures across vast distances but even from other dimensions. In addition, you can also mark a target, ensuring that no matter where they are you'll be able to track them.

Ki Aura Booster: Ki Armor

This allows you to encase yourself in your own aura, turning it into a form of armor. As a result, your defenses are further enhanced, not only protecting you from all but the most powerful of

attacks, both physical and ki-based, but also protecting you from deadly environmental hazards like toxins, poison, radiation, and even the vacuum of space.

Legendary (Requires Ki Control, Yardratian Training, Full Power, Super Form)

A level of power once told only in myth has now been realized within you, and now it has been unleashed. In addition to your normal super form you have the ability to elevate it into a far more powerful variant, granting you even greater power than before. In this state your size and muscles increase greatly, letting you tower over most opponents while allowing you to move and fight with no loss in speed and agility.

As you fight your power grows at an incredible rate, allowing you to easily stay ahead of those weaker than you and eventually surpass those above you. Your ki has become so strong that it acts as an automatic barrier block and negates the attacks of weaker opponents. Speaking of ki, your body generates ki at an incredible rate to the point that it seems to never run out, allowing you to fight and use powerful attacks endlessly.

Unfortunately this form has some major drawbacks that need to be dealt with. Accessing this form sends you into a violent berserker state, causing you to lash out at anyone near you. The strain this form puts on your body is intense and can potentially kill you. Even worse the ki your body generates needs to be released constantly or else the build up will cause you to explode. With intense training these drawbacks can be lessened and eventually removed all together, granting you full mastery.

Ultra Supervillain (Requires Ki Control, Yardratian Training, Inner Darkness, Villainous Mode)

Developed by Fuu to be a superior successor to **Supervillain Mode**, this transformation elevates your power to levels matched only by the strongest of warriors. This form has two stages of transformation, a base stage where the user is surrounded by a black and dark pink aura with fragments of Demon Realm crystals floating around them. The far more powerful second stage cloaks the body and clothes of the user in black while turning their irises pink and causes dark pink lightning to emit from their body. In addition, they also grow a large pink crystal on the left side of their chest, which if broken will break them out of the transformation.

This form is incredibly dangerous to use as it corrupts the user into a more malicious mindset, which becomes even worse in the second stage while still having the power to corrupt those nearby and grant them the **Supervillain Mode**. Despite the corruptive nature of this power it is possible to resist and even break free should someone possess a strong enough will and mind.

Luckily for you, the version you have is the completed version the Fuu never made and as such most of the drawbacks of this power have been lessened greatly for you, allowing you to access this power with far greater control and less strain on your mind. With further training and development you may one day find a way to achieve an even greater state.

Ultra Jumper (Requires Ki Control, Yadratian Training, Destructive Power, Angelic Skill)

The wild, destructive power of **Ultra Ego** and the calm, focused skill of **Ultra Instinct**, two opposing forms, two opposing mindsets, to achieve one would mean sacrificing the ability to achieve the other but you have rejected such a notion and have done what even the gods and angels would deem impossible.

Through a combination of immense training and sheer stubborn willpower you've learned how to take these two opposing forms and make them work together in a new form known as **Ultra Jumper**. This form represents the perfect fusion of these two forms, a harmony that combines the destructive might of Ultra Ego with the autonomous movements of Ultra Instinct into a form that's greater than the sum of its parts. Rather than having to alter yourself to achieve this power you did the opposite and made it your own as you no longer need a specific mindset to achieve this.

But this is not the end but merely the beginning as through training and refining you can apply this to any and all opposing forces and energies, creating new powers, abilities, and forms through the union of opposites, removing any drawbacks they may have possessed. Uniting the light and dark sides of the Force, combining the powers of Order and Chaos, and even mastering the combined power of the Life and Anti-Life Equations are now within your capabilities.

Jumper Max (Requires Ki Control, Yadratian Training, Perpetual Energy Generator, Ultimate Creation)

It would seem that you're not the perfect creation, but instead its successor. Someone saw the power of the ultimate lifeform and sought to improve upon the design and the result was you. Even in your imperfect state you are leagues ahead of the original in their perfected form, able to casually kill them with a simple blow. Just imagine how powerful you'll become when you achieve your **Perfect** form. But that alone is not what makes you superior to the original.

You possess a powerful adaptive ability that allows you to grow, adapt, and evolve as you exist, becoming more and more powerful as time goes on. This rate of adaptation increases further through exposure to various hazards and dangers. Constant exposure to heat and radiation will eventually result in you being able to withstand the heat of stars. And yet there is still one last ability that lets you stand above your predecessor.

Rather than simply absorbing biomass to grow stronger you can also choose to absorb various items of power to further enhance yourself and gain new abilities. Absorbing an item that lets you shoot fire would give you the ability to manipulate and control flames, consuming the energies of a nuclear reactor would let you release nuclear blasts from your body, the possibilities are potentially limitless.

Breaker of Limits (Requires Yardratian Training, Full Power, Inner Darkness, Destructive Power, Perpetual Energy Generator)

When it comes to getting stronger, you are a legend. Just simple training is enough to see great increases in power, easily making leaps and bounds with your training. When you're really being pushed to your limits you'll find your growth rate rising at an exponential rate, achieving levels of power in a matter of days that most people need years or even decades to reach.

It's not only raw power that you improve in, your skills and talents are also bolstered by your growth. When it comes to learning new techniques and skills you're less like a sponge and more like a black hole, absorbing and consuming any new teachings with ease. Techniques that require years to master are learned in days for you.

But most importantly, you are able to take techniques, skills, and abilities that require some external or internal factor that you don't possess, like a bloodline or magic, and repurpose them to be able to function and work for you through ki alone. As an example, a magic spell that allows you to shapeshift into other people can be altered to be powered by ki and allow the user to alter their ki signature to match the form they take.

God of Ki (Requires Ki Control, Yardratian Training, Super Form, Villainous Mode, Angelic Skill, Ultimate Creation)

Your mastery and understanding of ki has awakened you to a higher level of power, beyond even the Gods of Destruction and the Angels of Zeno. No longer flesh and blood you have become a living mass of ki, a perfect fusion of all types of ki, although you can take on a flesh and blood form, granting you access to various abilities and powers. First is agelessness and immortality, rendering you immune to the effects of time, illness, toxins, and more. Things like food, air, water, and sleep are now optional and any injuries you sustain are healed near-instantly, requiring total body destruction to kill you.

Next, due to your unique nature, ki-based attacks and harmful ki abilities have no effect on you, being absorbed into your body to strengthen you permanently. Your power has been enhanced massively, by several hundreds orders of magnitudes. Any and all ki techniques you see are instantly learned and mastered, allowing you to use their full capabilities with no issues. Your ki has become so dense that just a simple release of power can send tremors that could be sent across space itself.

Lastly, your understanding of the nature of ki allows you to, with time and practice, create new forms of ki, only limited by imagination. Temporal ki, nightmare ki, gummy ki, lustful ki, and more are all within your capabilities. In addition, you can share and grant the ability to use ki to other beings should you choose to.

Normal Ki Perk Tree:

Pure Ki - 100 CP (Free for Normal Ki)

Your ki is exceptionally pure, allowing you to use it to purify and cleanse evil energies and deal more damage to beings with evil intent. In addition, this makes you incredibly resistant to corruptive energies and powers, ensuring that only the most powerful of such things will be able to affect you. Best of all, any power, technique, item, or ability that requires having pure ki will be empowered by an order of magnitude.

Share The Power - 200 CP (Discounted for Normal Ki)

This allows you to transfer your ki to other people to enhance and empower them. The more you give the more powerful they become. This does come at the cost of weakening yourself but your allies can share ki with you as well.

Elemental Ki - 300 CP (Discounted for Normal Ki)

Although rare, sometimes ki takes on elemental properties, like Jiren's fiery ki or the toxic ki of Lavender. Now you ki has the ability to take on elemental traits, becoming hot enough to burn like fire, sharp and fast enough to cut like the wind, heavy and tough like earth, flowing like water, electrifying like lightning, and many more to choose from.

Ki Alteration - 400 CP (Discounted for Normal Ki)

Highly skilled users of ki can create rudimentary weapons and items out of said ki. These items are always basic things like hammers, blades, shields, rings, spears, and other simple items. More complex constructs can be created but would require a massive amount of focus, training, and ki to be achieved.

Ki Control Booster: Ki-reate

Or you could just take this and skip all the training. This elevates your skill with ki constructs to the point that you're basically like a Green Lantern, making it so that your only limitations are your amount of ki and imagination. In addition, by expending a certain amount of ki you can create actual physical items like clothing, food, and more. The larger and more complex the item you're creating the more ki required. Stuff like clothes and food require nearly nothing, but something as large and complex as a city would require enough ki to vaporize a planet.

Full Power - 500 CP (Discounted for Normal Ki)

A rather risky yet rewarding technique, you've learned how to enter the **Full Power** state, a powerful transformation that unlocks the full 100% potential of your power. As a result, your body and muscles grow larger while your ki is raised to its absolute limit. This form, while powerful, comes with a serious drawback, while in this state your body will suffer from physical strain as you force yourself to use your full power without restraint. What's more, this form is incredibly taxing to maintain and will exhaust you quickly. As a start, you can only maintain this form for 5 minutes before burnout, but with intense training the drawbacks can be diminished.

Yardratian Training Booster: Limit Breaker

Due to your training with the Yadrations not only have you learned how to maintain your **Full Power** state for much longer and with far less strain you've learned how to access an even greater form known as **Limit Breaker**. By pushing your **Full Power** form even further beyond you can access the powerful yet dangerous form known as **Limit Breaker**.

In this state, your physical abilities are enhanced to levels far beyond that of even the Full Power state, and your ki has grown to such a degree that it practically erupts from your body, destroying anything near you that can't withstand the pressure. This form is far more taxing than even the Full Power state and you will be seriously injured and lose consciousness upon leaving it at the start. Only through intense, rigorous training can the drawbacks be lessened.

Super Form - 600 CP (Discounted for Normal Ki)

Just like a certain monkey-tailed alien race you have access to your own super form, its style and appearance yours to design. In this super form your base power is enhanced 100-fold, elevating your physical abilities and ki to levels unheard of. As of now this form is taxing to maintain and will be difficult to control and access, often only awakening in times of extreme stress and crisis. With enough training and practice it's not only possible to control this form but also allow you to maintain it for extended periods of time.

Yadratian Training Booster: Even Further Beyond

Thanks to the training from the Yadrations it turns out that your new super form isn't the end but a new beginning. Through constant training and pushing your limits it's possible for you to unlock more powerful super forms, granting you even greater power and potentially new abilities for you to use.

However, each new form will become harder and harder to unlock and master than the previous one. In addition, this grants any and all alt-forms you possess the ability to unlock and obtain their own super forms. Ever wonder what a super-kryptonian would look like or a super-transformer?

Share The Power Booster: Ki Healing

You've now learned how to heal and restore damage by using your own ki. Broken bones, lacerations, bleeding and more are all within your capabilities, requiring you to simply focus your ki on the injury to begin the healing process. The more damage you or the victim has sustained the more ki required to repair them. The only downsides are that you can't heal the dead and you can't cure illnesses.

Elemental Ki Booster: Avatar

Rather than simply mimicking the element with your ki, you now have the ability to generate, manipulate, and control not just one element but four of your choosing. It can be the classical elements like fire, water, wind, and earth, or some other combination. With further practice and training these elements can then be mixed and matched to create new elements and even imbue your ki with them.

Evil Ki Perk Tree:

Seal-Resistant - 100 CP (Free for Evil Ki)

Oftentimes when a great evil is too powerful to defeat by conventional means the heroes often resort to sealing them away, to the constant frustration of countless evil beings. As such in order to prevent you from suffering a similar fate you've been made extremely resistant to being sealed. As you are now only the strongest seals will be able to contain you and even then not for long as your natural resistance weakens the seal from within.

Ki Vampire - 200 CP (Discounted for Evil Ki)

You have the ability to drain and feed on the ki of other beings either by physical touch or by absorbing any ki based attacks sent to you. Absorbing ki will both heal you and temporarily boost your power. Prolonged contact will eventually kill the victim.

Tele-Ki-nesis - 300 CP (Discounted for Evil Ki)

Through much mental training you've learned how to lift and control the physical world with your mind and ki. From lifting massive boulders without touching them, molding and shaping objects with your mind alone, and throwing objects vast distances, are just the tip of the iceberg for what you're capable of.

Corrupted Ki - 400 CP (Discounted for Evil Ki)

Your ki has a corruptive effect on the world, poisoning and tainting anything it comes into contact with. Poisoning the air, causing plant life and animals to rot and decay, even corrupting the ki of your foes, making it incredibly painful and difficult to use, are just the start of what you're capable of.

Ki Control Booster: Dark Corrupter

The corruptive nature of your ki has allowed you to infect and corrupt others, turning them into mindless berserkers, under your control. Those under your control will have their power greatly enhanced at the cost of their mind, losing themselves. The more powerful they are the more corruptive ki is required to affect them. Any victims that stay in this state for a prolonged period of time will eventually be stuck that way forever.

Inner Darkness - 500 CP (Discounted for Evil Ki)

Drawing on the darkness buried deep within yourself, you've have access to a form of ki known as **Dark Ki**, representing the negative aspects of yourself. This dark ki is wild, destructive, and deadly, granting you an immense increase in power. In addition, this dark ki can and be shaped into rudimentary forms like blades or spikes to be used as weapons against your foes. What's more this ki has a negative effect on the souls of your targets, dealing more damage to foes of a more positive nature.

Yardratian Training Booster: Evil Manifested

Your mastery of the Dark Ki has elevated its power to a level beyond, unlocking new abilities to utilize against your foes. For starters, this ki can now be shaped and molded into more complex

forms like limbs and even clones, granting you a higher degree of versatility than before. In addition, the sheer evil emitting from your ki is enough that any living lifeform near you will either die instantly if weak enough or be driven mad if able to survive.

However, the most important part is that your ki now takes on a black, tar-like form, as if all the evils of the world have merged with your ki, not only granting your ki attacks more weight and force but allowing your ki to stick to your target, causing immense damage not only to their body, but their mind and soul as well. Prolonged exposure to this ki will cause irreparable, if not fatal damage to mind, body, and soul.

Villainous Mode - 600 CP (Discounted for Evil Ki)

A unique form of power boost originally created by Towa, this form greatly boosts your power, while also allowing you access to new abilities. **Darkness Mixer**, which allows you to restore both ki and stamina while creating a protective field of dark lightning, **Rage Saucer** allows you to rapidly teleport to a foe and dealing a devastating blow, **Bloody Sauce** lets you release a ball of ki that injures your opponent as well as slowing them down, and **Baked Sphere** that allows you to release a miasma of evil ki that explodes violently upon contact with your target.

This mode has access to three stages, each more powerful than the last, but the risk of losing yourself to the dark energies increases with each stage. With further training and practice it's possible to limit and eventually negate the drawbacks of this power.

Yardratian Training Booster: Supervillainous Mode

Through training you've managed to harness and focus this dark power through your body and mind, unlocking an even greater form known as **Supervillainous Mode**. In this mode your body and aura undergoes a dark transformation, becoming darker with a broken infinity symbol appearing on your forehead and chest. Just as before this transformation is taxing on the mind and body, requires extensive training to master and utilize effectively, lest you risk losing yourself to your own darkness.

Your power is elevated even beyond that of the final stage of the previous form, enough to contend with foes that were once beyond your capabilities. In addition, your dark energy can corrupt other people, turning them into your thralls while granting them their own **Villainous Mode**. In addition to your previous abilities getting a major boost in power you gain access to new abilities, each more deadlier than the last.

Marbling Drop lets you unleash an explosive wave of ki before surrounding yourself in a ki sphere that then fires out multiple bouncing ki spheres at targets. **Peeler Storm** allows the user to unleash a barrage of buzzsaw-like ki attacks towards their targets to shred them into pieces, the speed of this attack making it difficult to avoid. And lastly, the **Gigantic Ki Blast**, where the user creates a massive ki sphere and launches it toward the ground similar to a meteor, the impact releasing a powerful shockwave of ki, decimating the surroundings as well as any opponents in the vicinity.

Tele-Ki-nesis Booster: E.S.Ki.

Why stop at simple telekinesis? You can now use your ki to replicate other psychic abilities ranging from telepathy, psychometry, precognition, mind control, mental projection and more.

Ki Vampire Booster: Parasite

Rather than taking ki from your target you can instead inject your ki into them, slowly infecting them and crystalizing them. Once the victim is fully crystallized you can then absorb the crystal into your body, not only permanently gaining a boost in your ki but also any skills, abilities, and techniques that they have. The stronger the target the longer and more difficult the process becomes. You can also choose to stop and even reverse the process if you so choose.

God Ki Perk Tree:

Undetectable - 100 CP (Free for God Ki)

A unique trait of God Ki is that it is undetectable by mortals using regular ki, any form of sensing, scanners, or tracking will be unable to detect your energy signature.

Pressure - 200 CP (Discounted for God Ki)

Despite being unable to be detected by those with normal ki, one sign that someone is using **God Ki** is the sudden feeling of pressure, as if gravity had suddenly increased around the user. Whenever you flare or release your power you can also release a powerful pressure on your targets, making them feel as if there's suddenly a great weight on their shoulders. The more power you release and the greater the power difference between you the greater the feeling. This can be perfect for intimidation and scaring off weaker or cowardly opponents.

Genki Dama - 300 CP (Discounted for God Ki)

A technique created and taught by King Kai, the **Genki Dama** aka the **Spirit Bomb** allows the user to draw on and gather the energies of lifeforms and the environment and combine it all into an orb of pure ki in order to attack an opponent. The more lifeforms you draw energy from and the longer you draw energy the larger and more powerful the **Spirit Bomb** becomes. You can also draw on energy from sentient beings but only if the power is given willingly.

Kaioken - 400 CP (Discounted for God Ki)

Another powerful technique created by King Kai this allows the user to temporarily enhance their base power level, strength, speed, and even perception to levels beyond their current limits. In addition, the user can multiply the boost for even greater power, allowing them to match and even surpass foes that they once were struggling with. However, the downsides are quite severe as this technique requires precise ki control to use and maintain effectively and prolonged usage of this ability will cause great strain on the body, even to the point of crippling the user. With enough training and practice it's possible to not only limit the drawbacks of this technique but reach even higher levels of power.

Ki Control Booster: Super Kaioken

Thanks to your understanding of ki you've managed to not only greatly limit the drawbacks of the **Kaioken** but create a superior version known as the **Super Kaioken**. This version amplifies your attributes similar to the normal Kaioken but on a far greater level, a single boost of S. Kaioken being worth that of a Kaioken X10 boost. Although the S. Kaioken suffers from the same drawbacks as its original, your level of ki control allows you to mitigate and reduce these drawbacks simply by reaching higher and higher levels of Kaioken, every 10 levels of normal Kaioken equaling one level of S. Kaioken.

Destructive Power - 500 CP (Discounted for God Ki)

You have undergone tutelage from a **God of Destruction** and have come out far greater than you once were. Your understanding of god ki has reached a level that allows you to use and control it as easily as breathing, allowing it to flow through your body as if it was a natural part of you. As a result, your power has skyrocketed tremendously, enough to cause tremors across the universe simply from punching. In addition, this vastly increases your stamina and endurance, allowing you to fight for months, potentially even years without end and endure those same universe shaking blows.

Yardratian Training Booster: Destroyer's Ego

You've learned far more than simply how to use **God Ki** effectively, it seems that the **God of Destruction** has taken a shine to you and has chosen to impart upon you some of their abilities, specifically the **Power of Destruction**, a unique form of energy only able to be used by Gods of Destruction. As you are now you can only create small motes of this energy, yet even these tiny orbs are enough to put massive holes in mountains. With enough training, you'll be able to reduce entire worlds to dust with a simple poke of your finger. And in time you'll be able to unlock **an even greater form**.

Angelic Skill - 600 CP (Discounted for God Ki)

Despite the sheer power of the Gods of Destruction there exists beings above even them, their attendants: the **Angels of Zeno**. Tasked with both attending to and keeping the Gods under control these beings are known not only for their power but their immense skill, skill that they have chosen to impart upon you. Your understanding of your body, your movement, the flow of motion and energy, and the feeling of the environment around you has now reached an otherworldly level, allowing you to keep up with beings that surpass you in power with pure skill alone.

Yardratian Training Booster: Angel's Instinct

You've impressed the angels enough that they decide to impart upon you one last yet most important lesson: how to move without thinking. In a pitched battle the time between thinking of an action and then doing it can be all the difference between victory or defeat, life or death. As such training oneself to react as fast as possible is necessary to survive and yet even this doesn't solve the issue.

The Angels of Zeno however have solved this issue by separating their mind from their body, allowing them to move, act, and even fight with no input required from their mind. As a result,

they waste no time or energy having to think about their next move, and they have now shared this technique with you.

As you are now you can only maintain this technique for brief moments of time, requiring constant focus to use. In time you'll be able to achieve the same feats as the angels and potentially awaken **a new level of power**.

Pressure Booster: Crushing Force

Rather than making it feel like there's a great weight on their shoulders it now truly feels like that to your opponents. Flaring and releasing your power will actually cause your targets to feel a powerful force crushing down on them. With enough power it can send your opponents crashing to the ground, being crushed by the sheer weight of your might. This could even be used to kill your opponent, crushing them until they are nothing but paste. The direction of this crushing force can be changed at will, either pushing them away, sending them flying into the air, or pulling them closer like a vortex.

Genki Dama Booster: Spirit Mode

After gathering all of that energy, rather than use it as an attack you can instead absorb it into yourself, granting you a boost in power based on how much energy you absorbed. While in Spirit Mode your ki aura is so strong that just being near you causes damage to the opponent, increasing the more ki you've absorbed. Rather than using the energy yourself you can instead choose to transfer it to a willing participant.

Artificial Ki Perk Tree:

Artificial - 100 CP (Free for Artificial Ki)

Rather than ki you have a unique energy that mimics ki which is unable to be sensed or detected by any means. In addition, the artificial nature of this energy makes it unable to be absorbed, manipulated, or corrupted.

Android Barrier - 200 CP (Discounted for Artificial Ki)

This gives you the ability to generate a powerful barrier around you, increasing your defensive capabilities. The more energy put into this barrier the stronger and more durable it becomes. If you want you can change the size and shape of the barrier, either making it small enough to only cover you or potentially large enough to encompass a planet if need be.

Analyzer - 300 CP (Discounted for Artificial Ki)

Your brain has been enhanced and optimized for analyzing anything and everything, using the information and data gained to create solutions to various problems and issues you may encounter. From calculating exact change and taxes, to helping with housework and homework, to analyzing an opponent's fighting style to predict their next attack, the possibilities are virtually limitless.

Android Augmentations - 400 CP (Discounted for Artificial Ki)

You have been enhanced via several cybernetic augmentations, increasing your physical capabilities by a couple orders of magnitude. These augmentations have been grafted into your body at the cellular level, meaning that despite being cybernetic you can still grow and increase your power by training. These enhancements are protected from weather and hacking and if damaged will repair themselves via internal nanomachines.

Ki Control Booster: Super Android

Whether through the absorption of another android or good ole fashioned training, you have transformed into a more powerful state known as a **Super Android**. As a super android your power has been boosted by about a dozen orders of magnitude, putting you far beyond the level of an average android. In addition, you gain access to new abilities, ranging from energy absorption, technique mimicry, regeneration, body possession, and more.

Perpetual Energy Generator - 500 CP (Discounted for Artificial Ki)

The very device that made Androids 17 & 18 so feared is now implanted into you. The **Perpetual Energy Generator** allows your body to produce an endless supply of artificial ki, essentially giving you endless stamina, allowing you to fight forever if necessary. Do note, that infinite energy does not mean infinite power, you can still be overpowered by stronger opponents, this device simply means that in terms of stamina, you'll always come out on top.

Yardratian Training Booster: Overclock Mode

Somehow your training with the Yardratians have allowed you to tamper with the **Perpetual Energy Generator**, allowing you to overclock it, resulting in a massive boost in power. While in this **Overclock Mode** your physical and mental capabilities are boosted by at minimum a dozen orders of magnitude, allowing you to confront foes that were once your superior. You can further push the generator for even greater power but be warned: overuse of this mode will damage the generator and result in burnout, causing the device to shut down and enter repair mode. The longer you use Overclock Mode the longer the repair time. During this time you'll lose access to the endless energy of the generator and will have to rely on your own stores of energy.

Ultimate Creation - 600 CP (Discounted for Artificial Ki)

You are the culmination of decades of genetic experimentation to create the ultimate lifeform. An artificial lifeform created from the genetic material of several lifeforms, with access to all of their skills, experiences, and abilities with little to none of the drawbacks. In addition, you also have the ability to drain a target of all biomass to process and use to empower yourself. In addition to all of this, you are currently still evolving and are capable of reaching even greater heights than before. With enough training and consuming of biomass you'll one day evolve into a form that is simply...**Perfect**. See **Notes** for further details.

Yardratian Training Booster: Perfection

Or you've already achieved that form. This is the culmination of countless time spent training and absorbing biomass, your **Perfect** form. This form offers you a massive increase in power, several dozen orders of magnitude. In addition, the abilities and skills of the people used to create you have been enhanced as well, even allowing you to mix and match them for a variety

of effects. You still have the ability to absorb biomass to get stronger, but now you also absorb any beneficial traits, skills, and abilities that they possess to add to your collection.

Lastly, and most importantly, within your body is a small clump of cells and tissue that contains everything about you. Your mind, soul, personality, abilities, etc are all stored within this clump. Should you ever be destroyed, this clump, should it be intact, will absorb the ambient energy from its surroundings and regrow you a new body over a period of time, the more energy available, the faster the growth. Once completed it requires 10 years or a new jump to grow another one, whichever faster.

Android Barrier Booster: Absorption Barrier

The barrier that you can create now has the ability to absorb any energy based attack it comes into contact with and transfer it to you for a temporary boost in power. This can give you a major edge in a battle however it can't absorb physical attacks and maintaining the barrier still costs energy.

Analyzer Booster: Supercomputer

Your mind has been enhanced to the levels of a supercomputer, granting you massively increased intelligence, computational power, data processing, and reaction time. You can process information in a femtosecond, one of the shortest measurements of time. Your reaction time can be boosted to the point that from your perspective everything has frozen solid.

The amount of energy contained in these beans is enough that a single bean can keep you fed for 10 whole days. This bag contains 20 beans.

These incredible pieces of technology are the brainchild of Dr. Brief and the Capsule Corporation. These small devices with a single button are able to store objects hundred or even

thousands of times their size. With just a single press of a button and a simple toss the capsule explodes and releases the contents within. One of the best tools for training and improving your power, widely used by various characters from the Dragon Ball franchise. This is perfect for getting stronger as training and sparing in increased gravity will increase your power level and muscles by many leaps and bounds.

Regardless of what type of weapon you use, (hammer, spear, axe, sword, staff, etc), it will be perfect and easy to use. Most importantly, you have a telekinetic connection to your weapon allowing you to control it with nothing but your mind.

Time Ring - 600CP:

An incredible item only found and used by the Supreme Kai, this item grants the user back and forth through time, allowing them to both witness and alter it to their whims. Another important ability of this ring is that it protects you from any and all time based manipulations, even rendering you immune to any attempts to change your personal timeline. For example, someone going back in time and killing your past self wouldn't affect you so long as you keep wearing the ring.

Hyperbolic Time Chamber - 600CP:

The ultimate training room for rapid improvement and growth, the Hyperbolic Time Chamber also known as the Room of Spirit and Time. This chamber is unique in the fact that it is an

entirely separate dimension connected to the normal world via an unassuming door. Upon accessing this dimension you're taking to a small building that contains enough rooms and resources to support up to 20 people. Traveling further out will reveal the dimension, which is just a blank wide void that stretches on forever. Just the threshold has gravity 10 times that of normal Earth and it increases the farther you travel.

The air in the chamber is only 1/4th that of earths and the temperature can fluctuate from bone-chilling cold to skin-blistering hot in an instant. But its most impressive feature is that time flows differently in the chamber, a single day outside translating to one year inside. This allows fighters to get incredibly strong in a short period of time. Ordinarily the chamber was only limited to allowing two uses per person before being unable to be used again, but this one is the improved version created by Dende, allowing you to use it as many times as you wish.

Dragon Balls - 600/1000CP:

The iconic items of the Dragon Ball franchise, these 7 orange orbs with stars in them have the ability to grant wishes once all seven have been found. Once found the user can summon a massive dragon known as Shenron to grant them their wish. These wishes can range from resurrecting the dead, information, restoring youth, immortality, and anything else you can think of, within reason.

Ordinarily Shenron would only be able to grant a single wish but thanks to some modifications by Dende he can instead grant 3 (2 if one was used for mass resurrection). While Shenron is powerful there are limits to what he is capable of, like killing beings beyond him, resurrecting someone who died either twice or from natural causes, making people fall in love, looking for objects in another dimension or reality and granting the same wish twice.

However if you're willing to pay a substantial price than for an extra 400cp then your dragon balls have now become Super Dragon Balls. These are on a level far beyond that of any set of dragon balls created. Their size is such that they are often compared to planets, oftentimes actually being disguised as such. Using these summons the Dragon God Zalama, who will grant you any wish with no limits.

However, one important detail about the dragon balls is that after the wish is granted they will split up and scatter across the planet, or universe for the Super Dragon Balls, and go dormant for one year. See **Notes** for further details.

Katchin - 600/1000CP:

Said to be the strongest metal in the universe, this metal is durable enough to withstand world shattering attacks with little to no damage, often requiring either immense strength or esoteric abilities to break it. An even greater variant known as Kachi Katchin is said to be the strongest metal in the multiverse, requiring attacks that can shake the universe to have a chance at scratching it. Anything made with either of these metals will be the closest thing to indestructible. Either purchase will grant you a warehouse sized block of the metal to use as you see fit.

Notes

Thanks to everyone for their ideas and help making this possible.

Ultimate Creation+Jumper Max

Unlike Cell you don't need to absorb special androids to achieve your perfect form, just good ole' fashioned training and absorbing biomass. The more powerful the person you consume the faster you reach your perfect form. You possess the same genetic template that was used to create Cell and as such have access to all of his abilities. Your form is yours to customize and decide. You can also choose whether or not to be the same size as Cell Max for the Jumper Max perk.

(Super) Dragon Balls

The dragon balls will scatter upon granting a wish, but it is possible to prevent that and store all 7 until they're ready to be used again. These also don't come with the risk of creating shadow dragons, unless you want them too for some reason. The Super Dragon Balls will be disguised as uninhabited planets, for your convenience. The only wishes that can't be granted by the SDBs is for your spark or omnipotence, everything else is fair game.
