The Isekai Otokonoko Series by Shuffle

It's a trap! Ah, too late. You're stuck here now. Welcome to what would appear at first glance to be a fairly stereotypical isekai style fantasy setting, but take a closer look under the skirt and you will see the truth. The dominant species in this world are the elves, who are almost to a man either very beautiful, or girlishly cute. Yes. To a man. There are no women to be found in this world, although I wouldn't exactly say there are any actual *men* around either.

The all male elves breed through the use of magical rituals, which when combined with their long lives allows them to easily keep their numbers up. Of course this is helped by the current peaceful times, so peaceful in fact that the elves have very little to occupy their time, to the point that the main source of entertainment is sex, which most elves have taken to with great enthusiasm. However, soon the status quo will be thrown into disarray when a mage frustrated by being unable to get off from the pathetically small dicks of his own kind, decides to summon a human from another world to see what sex with a true man is like. You are trapped in this place for the next ten years. So enjoy that.

Location

Nalux: The main kingdom of the elves, although it's more of a theocracy in truth. The Church of Erinyes has seized almost complete control by ensuring that the first prince is unable to be crowned king. You may start out anywhere here you like.

Origins

There are no Origins to choice from this time, instead you may discount two Perks per tier except for the 600CP capstones for which you only get one, and one Item of each tier except for the 50CP option. Discounts are 50% off except for those costing 100CP, which become free. You may choose if you are a Drop-In, or have a history here.

Age, Gender, & Race

You may freely be a human, or a local elf, which will become an altform post-Jump. Elves have long lives, but never get as physically big or strong as a full grown man. Your gender must be male if you are an elf, while humans stay as they where before unless they pay 50CP to change it, or swap to male for free. Your age may be anything reasonable for your race and backstory.

Perks

Default Ass-umptions [free]: There are several unfortunate realities that will quickly make themselves known when trying to assfuck someone into the ground with a dick almost as long as their torso, but thankfully this setting doesn't seem to concern itself with such trivialities, and now you won't ever have to either.

Hentai logic makes sure that even a massively oversized dick will somehow pleasurably fit into the tightest of partners should that be your wish. And what's more, the relevant orifices will always be perfectly clean and ready for sex, saving you the hassle of having to do any preparation work before diving in.

Unexplored Territories [100]: One would think that in a kingdom where sexual intercourse is so ingrained into the culture that it has become the main source of entertainment, virgins would be an extremely rare commodity. However, if the adventures of a certain soon to be summoned human is anything to go by, they're actually not really all that uncommon.

In future Jumps you can always find more cute virgins around you than would be expected, if desired. And before entering the setting you may choose to insure that specific characters are virgins, so long as the true canon of that is at all vague. Someone with a steady boyfriend is probably still fair game if they haven't been stated to be sleeping together, but not so much those who already have a husband and three kids.

From Here to Eternity [100]: The elves of Nalux live quite the long lives indeed, and yet despite many of them spending a large part of said life screwing like rabbits, they never seem to lose enthusiasm for their favorite hobby. Wouldn't it be nice to also share in such eternal joys?

With this, you and your regular sexual partners won't ever grow bored of sex. No matter how long you may live, or how often you repeat the same moves and positions, the act of fucking will always be just as enjoyable, never becoming stale. This doesn't mean that you can't decide to try new things to spice up your love life even more if you wish to, it's just that it won't ever become necessary for you to do so.

Butt Babies [100]: A species of only males would normally have a rather serious problem reproducing, but through the power of some rather lewd magical rituals, they have somehow made it work around here. And it seems that you've been blessed with a more traditional version of their breeding magic.

Whenever you wish, you are now able to impregnate those of the same sex as you are, or be impregnated by them if you would prefer, via the use of good old fashioned sex. You have complete control of when this is on, and any resulting children will be a mix of their parents as normal. Just don't think too hard about the biology at work here, it's magic, I ain't gotta explain shit.

Submissive and Breedable [100]: This world may be sadly lacking in any girls of its own, but the natives sure seem to be perfectly designed to be the next best thing. Would you care to join the crowd?

This gives you either a feminine beauty, or girlish cuteness great enough to make the manliest of men question their sexuality, and an ass as pleasurable as any pussy. Could anyone really be blamed for getting caught by a trap so enticingly baited?

World of Traps Jump When? [200]: Sad that you have to leave this rare world full of feminine boys behind? Gay. But I suppose I can hook you up with something to help with indulging in your particular tastes going forward. So now at the start of a Jump you can go to a version of that world with a greater percentage of femboys, choosing the replaced demographics as desired, although if you change all the females to femboys they will still be able to breed somehow. What's more, you can also choose to femboyize specific canon characters while you're at it.

However, attempts to use this to otherwise benefit yourself by retconning something to your favor will always fail. For example, if you try to go to a version of the world without someone in it by retroactively turning their mother into a trap, it will either simply not work, or said trap mother will just have birthed them somehow anyway.

The Other Kind of Trap [200]: It's all fun and games until some bratty mage hits you with a bondage spell. It's times like this that you'll be wanting to put your brain and tongue to good use. Luckily you have quite the gift for manipulation and trickery, quickly realizing just what other want to hear, and coming up with convincing lies. You're also oddly adept at coming across as harmless, even when your massive girth leaves you towering over those your talking to, you have good odds of putting them off their guard. Sometimes the winning move really is just talking someone into your bed.

I'm Famous Fucking Hot [200]: In less promiscuous times and places having a reputation as a notorious manwhore might actually make it somewhat harder to attract new lovers, or at least cause you to be viewed with suspicion, but around these parts it's more like free advertising to those looking for someone with such skills. Maybe you'd like to continue benefiting from this attitude?

Now those you would find attractive who hear about your amazing sexual abilities will slowly begin to desire to feel what sleeping with you is like. There's no guarantee that someone act on it depending on their personality, but hearing of your past exploits will never count against you, and the more said tales paint you as a masterful lover the more of a turn on it shall be for those who hear them.

“Sword” Master [200]: These may be peaceful times for Nalux, but there will always be a need for those who have chosen the path of the blade (the steel kind). This gives you the skills and physical abilities of someone well trained in the arts of melee combat. You can either be a true expert of the sword like one the holy knights of this land, or trade some raw fighting ability for the stealth and trickery of an assassin. Either way you're sure to be a lot more dangerous than most elves around here.

Kneeeeeeel Before (My) Rod! [400]: Like in most fantasy isekai worlds, slavery is alive and well here, and of course the only kind of slavery that matters is sex slavery! So why not get in on the action? Those who preform the ritual of submission by kissing your genitals and swearing themselves to you are legally made your slaves from then on, so that when you desire people will be able to tell on sight when others belong to you. And while this won't stop individuals from deciding to take personal action if you enslave someone they care for, as far as the authorities are concerned you are in the right, and they are breaking the law by trying to deprive you of your rightful property.

Just a Beast [400]: The local elves may have magic and long lives going for them, but even the largest of them have about the same strength and size of a human girl in her late teens, so that even a fairly normal grown man could easily overpower an elf if he can get his hands on them. This will help you keep this advantage going forward.

You will always be noticeably stronger (and bigger if you so wish) than usual for your race, gender, and age; about as much as an average human man is compared to these girly elves, giving you quite an advantage. Although this only accounts for a race's natural abilities, not boosts gained from things like channeling their chi, or suchlike.

A Real Man [400]: This land may be lacking females, but can you really call the natives men? Now the more aware that someone is of how much more masculine you are, the more of an advantage you will gain when acting against them, particularly when trying to establish sexual dominance in some way. As they take in how you tower over them, how much larger your muscles are, how aggressive and assertive you act, how huge your dick is, and so on, the less they will be able to bring themselves to properly resist you. This does require that you actually *are* notably more manly than your prey, and even then it might not help if they truly outclass you, but in the right circumstances this is a powerful force multiplier. As a bonus, any males notably less masculine than you can now count as female for any of your abilities that target such.

We're All the Main Wife [400]: Life is complicated enough without with bunch of immortal lovers constantly butting heads, so let's make that fate a bit easier to deal with. Your harem will now never mind that you have multiple partners, and only vie with each other over you in healthy ways, like a friendly competition to see who can please you the most before breakfast, with no danger of it escalating into something unfortunate. Their love and loyalty to you will also never lessen merely due to time or absence, truly staying yours throughout the ages.

Sorcerous Shota [600]: Caster supremacy is alive and well in this world, and you can count yourself among the greatest masters of the local magic. This magical expertise has granted you many useful spells and abilities, besides simply throwing elemental energies around, you can do such things as conjuring powerful bindings to restrain and control your foes, create charms that knock whoever next touches your hand unconscious, forge enchantments allowing you to make magical items and cursed gear, and even easily summon beings from nearby dimensions you know about. Truly there is very little that can stand against you around here! So long as you don't let anyone get their hands on you before you can finish casting your spells anyway.

Absurdly A-Dick-ting [600]: ...I guess that could count as a cheat ability? To be blunt, you have a super dick. A massive tool of lewd conquest that gives far more gratification than any normal genitalia should ever be able to, with enough stamina to easily leave a half dozen lovers in a blissed out heap. But that's not the scary part. For when you wish, the more sexual pleasure you give someone the more loving and submissive to you they shall become, with their consent during the process being completely unnecessary. This is to the point where you could rape someone, and so long as you kept it up for long enough while forcing rapture upon them, in the end they would completely forgive you and simply desire to become your new love slave. I'd say use this wisely, but we both know that's not going to happen.

Items

Items you already possess may be freely imported into suitably similar options here, combining all their benefits and granting them a new altform.

Big Bag of Gold [50]: It's a big bag of gold, duh. This is enough to live a simple, but comfortable life for a few years, or buy you some rather expensive and hard to acquire contraband, but this will not be replenished after it is gone. Do with it as you please.

Jumpchain Otokonoko [100]: What some mementos to help you remember all the fun you've had? At the end of each Jump you will now gain a few lewd doujins your more perverted escapades in that setting. Being porn they tend to skip over the less sexy bits, but are otherwise of excellent quality. Maybe you can make some copies and sell them?

Fabulous Fashions [100]: It seems like most of the tailors around here have forgotten how to make anything other than fetish wear, but to be fair, it is all quite sexy. This item gives you a small wardrobe that will fill itself with lewd outfits just like the kind that are so popular in Nalux, perfectly sized for whoever is looking inside. Never worry about coming across as drab or prudish again!

A Little Tied Up [100]: Rope, only a ninnyhammer would caught without it when out adventuring. This particular rope is enchanted to tie very quickly and easily, as well as be oddly easy on their skin when someone is bound and tied up by it, but I'm sure that last part is pure coincidence.

MANacles [200]: These mana sealing shackles are a powerful tool for dealing with any troublesome magic users. Simply clasp them around the wrists of the offending mage and even the mightiest of them will be completely unable to cast the simplest of spells until the cuffs are removed

They do have the rather major downside of being relatively fragile by shackle standards, so you might want to use some normal restraints as well to make sure your captive doesn't try bashing these against a nearby rock, or some other similarly brutish method of escape.

Chocolate Light District [200]: The dark elves are well known to be the greatest and highest quality prostitutes and erotic dancers in the land (mostly because that's the path they were forced into after they lost a conflict long ago, but never mind that for now) and what you have here is a dark elf house of pleasure who's employees' skills and beauty rivals even those at the great Hippoerna, where the heir of the dark elf royal line himself works. And as the owner of this establishment and master of those who work within, you will quickly become quite wealthy should you open it's doors to the public, although if you would prefer to simply keep it as your personal play ground that's certainly within your rights to do as well.

In future Jumps your brothel will always be ignored for simply conducting its business, no matter what the local laws may be. And while only the original staff of elf boys will come with you as followers when moving on to a new Jump, you can hire locals to work here in the meantime, in which case you will find your elves to be masters at prettying up any newbies, as well as training them in the arts of dancing and sex.

It's Only a Model [200]: It's all well and good to declare yourself harem king of the world, but what's the point if you don't have a place to keep all your sex slaves and fuck them in style? Thankfully I have just the thing for you!

This magnificent palace is just as luxurious any aspiring emperor could hope for. Its numerous rooms are full of only the most opulent furnishings and finest appliances, all in the style most appealing to your aesthetic tastes. But all the rest pales in comparison to your master bedroom, in which is a massive bed made from the softest and most comfortable materials, it is more than large enough to fit a dozen partners, and is already set up for any fetishes like bondage you wish to indulge in.

Don't Panic [400]: Summoning people from another world is a serious matter not to be taken lightly, which is why you shouldn't leave books detailing how to do so lying around where some irresponsible and horny mage might find them. And yet here we are.

This large tome is a repository of a great amount of information on any “nearby” dimensions in the local multiverse, and the main inhabitants there of. And while harmless in the hands of a magical novice, a decent wizard would be able to use the knowledge contained within to make any attempts to magically touch these other planes with their spells vastly easier, not to mention telling you what might be able to be called forth from them. This particular grimoire will even update itself so that it will still be about any new close by dimensions whenever you travel to a new universe.

Insert Alter Boy Joke Here [400]: Ah, what a grand and intoxicating innocence. You are now the head of your own religion. This only gives one (very impressive) church to start you out; but the virginal priests are all exceptional beauties even by local standards, completely devoted to you as their pope/god, are very skilled at gaining new converts, and possess useful magic well suited to aiding your faithful. In future Jumps you may place this main church into the new world in a suitable place of your choice. And while only the original priests will join you as followers, they will also be able to teach their brand of magic to any new faithful that they ordain in these other universes.

Little Pink Bottle [400]: You'd better not let the church know you've got your hands on an eternally refilling vial of their valuable “holy water”, even if it isn't really holy, or water. What you actually have here is an incredibly strong magical aphrodisiac for the church's rituals. Those who drink this potion will temporarily be filled with nigh unbearable arousal, and gain almost unlimited sexual stamina. In fact, the effects are so potent that those unused to them will quickly find most of their strength drained away, as all they can focus on is the overwhelming lust burning in their body, making them easy pickings for more unscrupulous sorts. Thankfully, by buying this here you will have already build up a tolerance, and can simply enjoy the benefits.

'Tis a Silly Place [600]: Do you feel like you're really going to miss this place once you move on? Then just take the whole kingdom of Nalux with you! That's right, not only are you now considered to generally be the guy in charge around here, but Nalux as a whole will follow you on your Chain. When entering into a new Jump you may choose whether it is placed into some particularly safe corner of the world, kept as a pocket dimension that can be accessed from your Warehouse, or be put into a sort of storage where time is frozen, but is completely inaccessible during that Jump.

No Old Dogs [600]: The law of the land is that one cannot be crowned king until they physically come of age, and so in a bid for more power the Church of Erinyes cursed the first prince with an enchanted collar that would prevent him from ever growing into a full adult, ensuring that Nalux would remain kingless. And while that's all well and good, anyone without the naturally long life of an elf would be able to see the true potential of such a “curse”. This is a never ending supply of nearly indestructible collars that halt all aging for those who wear one, and since they are intended to be worn LONG term, every choker comes with a full guarantee of comfort. Although the cursed part still shows up through the fact that only you are able to put one onto someone, and then only you will ever be able to remove it thereafter. Buy now and I'll throw in the ability to customize the appearance of each collar as you like, so that you'll be better able to accessorize your new ageless pets!

Companions

Mass Summoning [50/300]: Who says only one person can be brought into a new universe at a time? Each purchase of this option allows you to import, or create, one Companion who will receive 600CP to spend on the Perks and Items on offer here, following the same Discount rules as you do. For 300CP you may instead import/make a full set of 8 Companions.

The Trapped [50]: No one could blame you for growing attached to some of the cuties inhabiting this world, and I'm not so cruel as to deny you the opportunity to take them along with you. For each purchase of this option you may bring one person of your choice with you on your Chain as a new Companion. You won't even need to gain their consent to do so!

Incugaki [50]: Another being brought here from a different world, although this one blends in a lot better than that other guy. With dark skin, light purple hair, along with the pointed ears and feminine cuteness the elves are known for, this bratty succubus (male) was the end result of an amateur summoning gone wrong. And upon arriving in Nalux was extremely put out by the lacking sexual quality of the locals, that is until he came across you. He can sense that your "life force" is the perfect food for him, and will go to great lengths to convince you to feed him long term.

And other than possibly leaving you a bit tired, doing so is guaranteed to be a VERY enjoyable experience. As while your new friend here isn't particularly good for much else, his natural born skills at sex, and demonically pleasurable body, means that there are few who could claim to be a better lay. Strangely, he also has a great deal of hidden potential in the domestic arts, like coking and cleaning, combined with his barely hidden masochistic side, it would be quite easy to *correct* this shitty brat into a submissive, if very lusty, housewife with a bit of effort on your part.

Drawbacks

The Otherworlder [0]: Why should some random Japanese man be allowed to enjoy what is rightfully yours? Take this and you'll replace the MC as the human summoned by the wizard Asdia, just make sure you're able to deal with that little brat. Taking this option sets your race to human, your gender to male, and your starting location to the personal chambers of Asdia.

Generic Brand Traps [0]: Frankly most of the details of this world are very vague at absolute best, with it seeming to be a basic anime style fantasy setting, outside of only having femboys and no girls that is. So if you wish you may use this as an add-on to another suitably generic isekai fantasy themed Jump, with Nalux being placed in some peaceful corner of that world. CP must be kept completely separate between the two Jumps, and the locals will all be femboyized as if hit with World of Traps Jump When? perk at full power. As the weird traps only thing is kind of important to the the plot here.

Homely Illegitimate Man [+100]: You are now a rather unattractive individual, not hideous, but definitely lacking in beauty even by human standards. You're also a bit overweight, although that doesn't seem to slow you down much when having sex. But don't worry, good looks aren't everything, having a huge dick is far more important!

Binary Sex [+100]: Speaking of... A major problem for some elves is that the crappy dicks of this world just can't get them off, no matter how much they might wish to be the "female" during sex, and you share their predicament. Now you will be unable to get off at all from any sexual acts were you are in the female position. Alternately, you may choose to be unable to orgasm, or otherwise enjoy yourself, when you are the one doing the penetrating.

Cats in the Tournament Arc [+100]: Having a harem isn't always as easy as you'd think. During your time here you're going to find that your lovers are all extremely competitive, and not very fond of cooperating with their rivals. Thankfully they won't be any more likely to get violent, or be upset at you for all your sexual conquests, than normal, but expect a lot of headaches from all their arguing, attempts to one up each other, and schemes to monopolize your attention as much as they can.

A Man's World [+100]: Look, we're going for a certain theme here, so consider this a bribe to play along. You and your Companions are all male now, and will be unable to change that fact in any way for your stay here. Although once the ten years are up anyone who had had their gender swapped can become female again for free.

Furthermore, it is impossible to find any other females here no matter what you might try. Summoning a girl from another world, growing one in a lab, traveling to a more normal dimension, zapping some elf with a gender bending spell, all shall disappoint without fail. Whenever you see someone for the next decade, you can just freely assume that they have a dick.

Gotta Catch Them All [+200]: The human summoned to this world would soon find himself with a harem full of some extremely powerful individuals, many of whom could have made his life very complicated, or very short, if he had failed in his attempts to enslave them. I hope you're just as good as he is, since you've become obsessed with making important and/or strong people into your slaves. While this won't make you any less intelligent in how you go about accomplishing your plans than normal, you will feel compelled to establish dominance over the very best. Whether they be skilled warriors, high nobility, or the closest thing to the god of the state religion made flesh, you will start scheming to make them yours soon enough. At least around here they're all going to be cute?

Not Here for the Plot [+200]: Do most of your thinking with your smaller head? Well you're going to fit in here just fine. Besides the obvious effect of simply being super horny all the time, and most your desires in life reflecting that fact, your initial plans to handle any obstacles will now generally boil down to trying to figure out how to best fuck your way to victory. Honestly not the *worst* way you can go about things in this place, but trying to seduce the person who wants to kill you is rarely the most efficient, or smartest, option available.

Enchantile Dysfunction [+200]: Elves may be rather small and weak compared to real men, but they have one major advantage over all of mankind, magic. And like a normal human, you are sadly unable to use any magic at all. It doesn't matter if you brought it with you from some other setting, or you try to learn it here, for the next ten years you will be unable to cast even the simplest of spells. Perhaps even worse, you have very little mana resistance, making it easy to affect you using magic. If you took Sorcerous Shota, then all your knowledge will be theoretical until the end of this Jump.

2koma [+300]: Being from a world made up of only natural bottoms has left the elves ill prepared to resist should a man with a *real* dick be brought into the picture. And whether you're a top, or a bottom, you have a very similar weakness to sex. Once the fucking starts you lose almost all will and ability to stop the other party from continuing, and someone skilled, or well “equipped” enough could very well mind break you into a loyal slave just by inflecting enough pleasure. Good luck. You're going to need it.

What Cheat Powers? [+300]: Sadly getting summoned to this world doesn't come with any nifty new abilities, and in your case it seems to have actually removed whatever ones you already had. This makes it so that you have lost access to all of your Perks and Items other than your Bodymod and whatever you have purchased in this Jump. The same goes for all of your Companions. Sorry, bud. This just ain't that kind of an isekai power fantasy.

End Choices

Gnawed Off Leg: Why would you want to go back home? Well I won't stop you. Take all that you have earned so far and return safely to your original world.

Trapped: Looks like you fell for that ruse real hard. Admiral Ackbar would be ashamed. Stay in this world with all that you have gained in your journeys.

Escaped: Free at least! Now onward to a probably far less homosexual adventure!

Notes

Absurdly A-Dick-ting can apply to your pussy should you be female.

The Trapped can only be used to buy cannon Companions from this setting. If you use Generic Brand Traps to combine this Jump with another, than you will have to use whatever Companion options it offers to take characters from that IP.

Incugaki is based on Selim from Succubus♂ o Zetsurin de Toriko ni suru.

Changelog

Version 1.0

Initial release.

Version 1.1

Fixed one typo.

Added a line on Item imports.
