Origin

- **Seer (Drop In)[Free]** - You are most likely a shop-keeper from the countless many of your family, descendants of Cassandra, you may or may not have the blessing, but you are quite invested in the shop-keeping business and have helped quite a lot of your customers with vague and cryptic advice. Also counts as a drop-in option.
- **A Guy On Vacation [Free]** - You are tired, maybe you have seen things that should not be seen, maybe you retired because of inept politicians, whatever the case, you are now on a vacation to live the life you had not lived before and maybe find yourself in the world outside.
- **Mad Scientist [Free]** - Your thinking is revolutionary and your inventions mind-boggling, the only reason you are a mad scientist and not a normal one, is because you are mad, now whether that is because of society labeling you as such or you actually are mad

doesn't matter, you have a tragic backstory that has left you bitter, but also determined to see the whole magical world be dragged screaming to a new future.

Perks

All Perks are discounted to half price for their respective Origin.

General Perks

- **Harry Potter Magic [Free]** - You have a basic knowledge of magic starting from Hogwarts graduates for Seer, more combat oriented knowledge similar to those auror and other law enforcement agencies get for A Guy On Vacation and depending on your field professional knowledge of their fields for example potioner knowledge for potion master and mistresses, wards for architects, esoteric or rare charm knowledge for innovative devices, for Mad Scientist. You also get a basic Wand attuned to you.
- **"Accidental" Magic [100 CP]** - Like Mr. Black you are capable of Silent and Wandless casting, making any magic look accidental and casted in impulse, great for cold-blooded murder to look like legitimate self-defense.
- **Coloured Wards [200 CP]** - It is well known that Mr. Black can cast undetectable wards, though not how he does it, you know the answer, there is mage sight that helps you look at wards, appearing as black and white patterns hanging in air or the structure it is protecting, there is a much rarer version which gives colour to these patterns, you can understand how to differentiate between old and new wards, different patterns and more with this vision, you can also make the wards undetectable by camouflaging the colour of the wards with the surrounding or using one of the non-visible colours. You have the colour vision without the hangover process it requires.
- **Magical Trait [200 CP]** - Some people have magic that can't be replicated through spells, only passed down and even then that is not a certainty, you have a magical trait that can be passed down to children, it can be Metamorphmagus, Parseltounge and the like.
- **Curse Of The Gods [200 CP Each]** - In this world, older families are either blessed or cursed by the gods, there are three known curses and blessings:
 - 1) The lovegoods are half-fae seeing the unseen and living half in the real world as they see too much in everything and as such concentration and focusing on the real world is difficult for them. This gives you affinity with mystical senses, scrying astral planes and granting similar sight in future jumps such as Dresden Files Sight.
 - 2) Curse of Cassandra, to see the future but never be believed, the gift is strong in you, as such you have the ability to see various future timelines and knowing which future is more likely to become the present, as all futures have the chance to come true and as such no future is truly false, you also have the capability of not seeing the future for whatever reason and have a instinct of which person or item would be needed at what place and at what vague time. As stated above, your predictions and prophecy, if directly told will never be believed no matter how you phrase it, though enough personal trust in

you as an individual will have the person believe you, even if they do not believe the future you have told them.

3) **Potter Luck [200 More CP]** , a mixed blessing given by the greek goddesses Nemesis and Tyche, your luck is incredible, more a force of nature than anything else, any game of chance is predestined to be won by you, no matter the game, no matter the rigging or cheating done, as long as there is even a minuscule chance of winning, you will win, but you don't have luck just in games, but in everything you do in life, your luck will always propel you to heights, whether they be of politics, finances or straight up power(if there is a possibility of such). There is also another side to this blessing, any enemy you have, will have misfortunes upon misfortunes heaved upon them, though they will not die with just this, but their operations will be curtailed to some extent, this blessing also enhances any plans or operations conducted against your enemies, no matter who does the planning. The downsides of this blessing is that you will forever live in interesting times, trouble and drama will always follow at your heels, any schemes or gang wars or assassinations going to take place in an area near you, will happen when you are there, if it will cause you extra trouble .

- **Something For Everyone [600 CP]** - Everything in life is a lesson and you are no different. No matter where you go or what you do, people assume you know everything they do and more aside. This will cause them to search your every word and action for a hidden meaning. And somehow they will find it. A lesson on making an omelet might give them a way to slip someone even the most foul-tasting poison/potion without them knowing it's there. Equally a lesson on how to weave baskets underwater will allow someone to go a week or more without breathing if they need to. There will always be at least one person who learns how to turn your most innocent act or word into some shattering revelation. The most amazing thing about all of this is, you don't need to do much of anything and someone will learn some new technique they never thought of before, or some lesson that will help or hinder them. Your enemies, when they go against you, will almost automatically fall into some trap based on a lesson they learned from you. This perk only affects people who know of you and the more they hold you in awe or fear, the harder they will try to search for meanings even in your most meaningless of actions.

Seer

- **Making Contacts [100 CP]** - You are a master in making contacts with almost anyone regardless of their status and station and asking for them small or big favours, though they do need reasons for their involvement in your affairs, it matters not if you ask a retired general to pass on a weather magic book to a man who helped his country or a isolated government to accept a visitor if he helps them with a national problem. This help can be asked for small tasks though works better at country or national level.
- **Revolutionary Finding [200 CP]** - Like the Seers, you have the ability to find Weapons, Spells, Books that will revolutionize their respective fields, if shared freely with others, you can also find applications and uses of currently available spells or items that will

change the world overnight. For Example Mr. Black showed the use of a Tanning Spell(a very simple cosmetic spell) to kill a vampire, changing the paradigm of not only how combat spells are classified, but the danger of vampires to wizards

- **It Takes A Long Time [400 CP]** - For others, for you as long as any action can be learned under a month without somehow augmenting your learning process, you can learn that action instantly, for example casting a spell correctly the first time after reading it or apparating masterfully after just learning it. The ability cannot give you any knowledge or give you something you do not have, and actions that require preparations like meditation or daily exercises for muscle development, cannot be done.
- **Cursing Descendants [600 CP]** - You are like Cassandra, not that you have power to view the future, but as your descendants get further removed from your bloodline, the more there weaknesses and limitations weaknes, whether the weakness be in superpowers, race or anything innate, not only does their limitation get lax and loose, they also get more creative in finding loopholes in the limitations of their powers, the further they are from you in generations. Works only in Innate powers.

A Guy On Vacation

- **A Guy In Need Of Vacation [100 CP]** - You do not get rest, all these shopkeepers, aurors and even vampires keep asking you little favours, dealing with some monsters, saving some dragons or supplying some rare potion, if you agree to help, you will get their gratitude, respect and perhaps even their life long friendship proportional to the difficulty of their favour, be careful though, being too helpful may make you a guy in need of vacation.
- **A Guy On Vacation [200 CP]** - You must have done something truly awe inspiring before your retirement or perhaps after it, as wherever you go no matter how secretive, you will be welcomed as a visitor of appropriate standing, in the beginning this perk may grant you freedom through national borders and such but when your fame grows, it's effect will also increase allowing you to visit any secret laboratory or classified area as long as you are just a visitor.
- **Legend [400 CP]** - As the name of Mr. Black spreads worldwide, it looks like Harry's aptitude in every field rises accordingly, you have a similar ability, if any myth, rumor or legend about you or your persona becomes famous, so does your talent, it does not matter if you are famous or infamous, if the legend is entirely fictional or grounded in reality, all that matters is your story spreads wide.
- **The Black Effect [600 CP]** - You are almost as deadly as Mr. Black, all because of this ability, your enemies when actively planning against you or your loved ones, get a severe case of accident, this accident can be anything, whether it be an actual accident or an attack by a third party or totally ridiculous deaths like falling from the stairs getting up and falling from the stairs again 13 times in a row then get stabbed by bladed implements that were just lying there. These accidents can be lethal or non-lethal though you cannot single out anyone, until mastery. The range of the effect starts from a modest 3-4 city blocks and increases with your fame and reputation.

Mad Scientist

- **Professional Name [100 CP]** - In this world there is trend for people with revolutionary thinking to have code-names based on their field of expertise, like Doctor, Architect, Tailor, Professor and Henchgirl, you can have a similar name for a chosen field, which will grant you the will to see through any projects regarding that field, increased intuition and reverse engineering of technology in the chosen field.
- **Muggle Technology?! [200 CP]** - You know it, general knowledge of upto graduate level in every scientific field is known to you, not only this, but the knowledge seems very eager to help you and as such whenever you are using magic for creation of something or other, the knowledge will leap up with helpful facts and connect seemingly disconnected facts to help in whatever magical creation you are making next. Post Jump, the helpfulness and eagerness spreads to the rest of the knowledge you have in your mind.
- **Milkshake! [400 CP]** - You are a prodigy at making potions, capable of preparing any type of exotic ingredients and making potions that give nightmares to even experienced masters, you have knowledge of many potions made in this world and change them to taste like strawberry milkshake or any other flavour you like, you have a knack for learning new recipes, modifying old recipes to work with new ingredients and creating new potions wholesale with creatures out of this world. You also have the less regarded ability to mix cooking talent and knowledge of chemistry with your potion making, which makes your potion making linked with cooking knowledge and chemistry.
- **Mad [600 CP]** - You are mad, who else would try to mix magic with science, you though have seen the idiocy in the distinction of magic and science, to you they are all but one, knowledge of magic helps science and knowledge of science help magic, though only in related fields, the more specific you are in a field, the narrower the focus of the boost to related fields, for example knowledge of thermodynamics will help in spells and magic related to temperature, ice and fire and vice versa in case of science, but with knowledge of combustion will only help in fire magic and the like. Another benefit of your madness is that any project, whether it be a mega-structure, a vehicle, a weapon or a utility device, when created through a mixture of magic and science will cover the disadvantages and weaknesses and improve the benefits and advantages of similar devices, compared to those created with only science or magic.
