Location

You can either choose one of the locations below or roll d6 and receive +100 CP to let the whims of fate decide your path.

1.) The Slums

Jiang Feng and his family were a poor family that could only afford to live in a low end area in Huaxia. With this option you will be starting out somewhere nearby their home or inside if you are somehow related to Jiang Feng. For those seeking excitement this area is located close to the Animal Arena and a number of criminal enterprises.

2.) America

America is the dominant superpower on Earth technology-wise though it is lagging slightly cultivation-wise. It later on will become the leader of the Server Alliance against Huaxia. You may freely start out in any location of your choice in the United States. Additionally, you may decide whether you're a citizen or merely someone visiting the country.

3.) Divine Dominion

Divine Dominion is the main realm in which the game takes place. It however, is a true world that can be accessed through scattered portals. This option can be used to either decide your starting location in the game should you be a Player or you can choose to send your real body here allowing you to directly grow in power.

- A. Starting Villages - Free:** The Starting Villages are an assortment of villages scattered throughout Divine Dominion. Each of these cities are where the various Players arrive and can train until they reach level 10. This area is guarded by powerful guards who can deal with any monsters in the beginning area.
- B. Silvermoon +100 CP:** Silvermoon City is the second world that the Players gained access to after reaching Level 100. This area is inhabited by powerful beings ranging from the Sacred Level all the way to the Great Saint level.
- C. Dragonforge +200 CP:** Dragonforge is the final and most powerful world within the game. Players gain access to this location after reaching Level 250. This world is mostly controlled by the false Tagathata and the Divine Faction. Most of the beings here are Heavenly Saints while a few are on the level of Mythic Saints.

4.) The World of Tianji

The World of Tianji or as it would later be known the Great World of Secrets is a unique plane that connects to worlds across the universe. Like Divine Dominion you can

choose to arrive in this world via a terminal for safety or instead arrive with your real body allowing you to grow in power directly. This however, will put you at risk of dying for real. Should you choose to enter via a terminal you may reroll for your body's actual location.

5.) The Divine World

The Divine World is one of the most powerful planets in the universe. It is home to the Divine Race and a number of Divine Emperors. You may choose to start anywhere in this world though it is recommended you choose a lower ranked area if you are at the Divine Soul stage or lower. The default option will send you to a safe area appropriate for your amount of strength.

6.) Free Choice

Lucky you, feel free to pick any of the locations above or choose a location not listed. You could even choose to arrive in one of the other universes if you want.

Time

You will be starting out a few days before the main plot of the story begins. This will give you some time to settle in and perhaps make some changes if you want to shake things up.

Age and Gender

Age is freely chosen or whatever makes sense for your origin. Your gender remains the same as the previous jump or you may pay 50 CP to change instead.

Origins

You may choose one origin below. Any of the origins may be taken as a drop-in if you wish.

Protagonist - Free

There are quite a few individuals worthy of being called the Protagonist of their own stories within this world. These key figures are the main players of this world and the world whose actions can shape fate itself. Given your nature as a Jumper it shouldn't be a surprise that you can slot into this role. Perhaps you are starting your own story or supplementing the fate of another. Either way your actions will have far reaching effects in this world.

Player - Free

Player is a term that refers to any individual utilizing a terminal to enter one of the many hidden worlds. Though Divine Dominion and the Great World of Secrets are the most relevant of the worlds given the paths shown by fate. You are one of the individuals who is exploring these worlds taking power for yourself and spreading your influence. You may be a hero of justice or a dark villain venting their desires on an unforgiving world. Regardless of your choices the world is waiting for someone to explore it.

NPC - Free

NPC's is a term used to refer to the natural inhabitants of each world. These beings are born within these special dimensions and their fate is shaped by the Will of the World. You are one of the many beings born within one of these unique realms. Though your existence has made you an anomaly unbound by the World's Will while still allowing you to be one of its children. You can stay in the world you were born in or you could choose to explore the endless wonders of the universe.

Cultivator - Free

While they remain hidden on most worlds the Cultivators are a powerful force spread across the universe. Cultivators are individuals who have been trained to harness the energy of the universe to strengthen themselves. You are one of these individuals. Perhaps you are a hidden warrior on Earth guarding the planet, an invader scouting out new resources, or perhaps just a child discovering your new power. You can strive to reach the heavens like all cultivators or try to find your own path in this world.

Races

This section allows you to specify which species you belong to. There are a number of various races to choose from in the jump.

Dog +200 CP

Wild dogs are the weakest monsters in the game. These monsters resemble most standard dog breeds. These animals possess lower stats than every other species, but they can evolve to grow more powerful. Additionally, due to their weak stats they rely on gathering together into larger packs. This option will allow you to start out as an ordinary wild dog.

Human - Free

Humans are one of the most common races in this world. They may not have the special traits that the other races do, but their sheer potential is unrivaled. This potential coupled with their birth rate allows them to produce many legendary geniuses allowing them to stand above the other races. By choosing this option you will be one of the countless beings who stand under humanity's bastion. Your body will start out in peak condition similar to a trained athlete or soldier.

Shifters - Free

Shifters is a broad term that covers the majority of monsters as well as any Demi-Humans. For the most part Shifters generally resemble humans with animal features. For example, a rabbit Shifter would have rabbit ears and a tail. Taking this option allows you to become a normal Shifter. You will be slightly stronger than a normal human and you will gain a few advantages depending on your species. Using the earlier example, a rabbit Shifter would be extremely fast, have noticeably stronger legs, and heightened senses.

Angels - Free

The Angels are one of the races that make up the Divine Faction. Their power was greatly reduced after Lucifer's rebellion, but they still remain a mighty force. Angels generally appear as beautiful humans with varying amounts of white wings. The number of wings they possess is generally an indicator of their strength with two being the minimum and twelve being the maximum. This option allows you to become a member of the angelic host. Alternatively you may become one of the Fallen who rebelled alongside Lucifer. Fallen are very similar to their pure brethren with the exception of their black wings. Additionally, the holy abilities they possess are corrupted making their healing abilities into curses.

Mechanica - 100 CP

The Mechanica are an advanced race of sentient machines. They were wiped out in the Infernal-Divine War, but you may become a member of this fallen species by purchasing this option. You will become an A.I. though you will not be able to actively alter the game as a living program. You however, may freely customize your body given the modular nature of the Mechanica. Should your body be destroyed you may transfer your consciousness to a new form or a nearby network. The only way for someone to kill you is either through soul attacks or a digital assault.

Peacock - 100 CP

Peacock's are an interesting type of monster. They were one of the original Sacred Tribes and have many supportive abilities. Their main skills allow them to heal, boost the user's stats, and restrain their targets. Most of these abilities require them to touch a target with their feathers. Purchasing this will allow you to become a being similar to Little Peacock in power. Though given time perhaps you can grow to match the Great King of Peacocks Mahamayuri.

Gnomes - 100 CP

Gnomes are a species of humanoid individuals. They are slightly shorter than normal humans, but tend to be much stronger physically. Additionally, Gnomes are naturally born as expert smiths with an incredible aptitude towards any type of crafting. The Gnomes are also widely known as a neutral and friendly race willing to work with anyone who returns this treatment. While the Gnomes tend to lack an aptitude for combat, they make up for this with their powerful inventions. Lastly, the Gnomes are a very united species. Befriending or angering one of them is equivalent to doing so for the entire species.

Xuanling - 200 CP

The Xuanling are one of the Nine Great Races within the Great World of Secrets. Their race is known for two distinctive traits. The first is that the male Xuanling have the ability to grow larger based on their power. Supposedly the strongest Xuanlings can become as large and strong as living planets. The female Xuanlings on the other hand have the ability to fly and acquire wings. The more wings they possess the stronger the women are. Additionally, their race is known to be abnormally attractive by conventional standards. Using both of these states however, consumes a large amount of energy. Though this can be reduced through training.

Necropolitians - 200 CP

The Necropolitians are a powerful and bloodthirsty humanoid species that live in Purgatory. They resemble humanoid beings with pure black skin. This effect causes

them to appear as living shadows. They are significantly stronger than most species being born at the Spiritual rank (Rank 16 of 20) and the strength of a Divine Beast. Each of them possess the ability to manipulate shadows and control darkness. Lastly, Necropolitians have the ability to rapidly grow in power by devouring the essence of humans or other living beings.

Dragon - 300 CP

Regardless of which world they appear in, dragons are typically considered to be the strongest species. It is no different here though and by choosing this option you can become one of these mighty beasts. You may freely choose which clan you belong to as this will determine your abilities. For example, the Arcane Amulet Dragons can teleport anywhere in the world using runes. The only type of dragon you cannot choose with this are the pinnacle Dragon Clans as they are considered Sacred Beast. These include the Azure Dragons, the Green Dragons, and the Golden Dragons.

Sacred Beast - 100/400 CP

The Sacred Beasts are legendary monsters who have carved their deeds into the world. Some examples include the Fire Qulin, the Vermillion Bird, Yamata-no-Orochi, and many others. For 100 CP you may become a member of the Sacred Beast Tribes. These are made up of the descendants of the original Sacred Beasts. They possess abilities similar to their progenitor though to a lesser degree. They however, do have the potential to match if not surpass their ancestors through evolution.

- **True Sacred Beast - 400 CP:** If you aren't satisfied with becoming a descendant then you may purchase this option. With this you are a True Sacred Beast. Each True Sacred Beast is incredibly powerful and possesses a wide variety of powers. For example, Yamata-no-Orochi possesses mastery over eight types of magic and can actively use them all in combat simultaneously. You may either choose a canon Sacred Beast to replace (list in the notes) or create your own unique form.

Insect Race - 100/200/400 CP

The Insect Race is one of the Nine Great Races within the World of Tianji. They are divided into three categories consisting of the Warriors, the Mothers, and the Queens. The Warriors are said to heavily resemble the Zerg and fight in endless hordes. The mothers are responsible for birthing said horde and they all are led by the Queens. For 100 CP you may become one of the Insect Race Warriors. This will grant you a powerful body and an array of skills based around your main type such as being a spider.

- **Insect Mother - 200 CP:** The Insect Mothers are the beings who make up the bulk of the Insect Races leadership positions. These individuals also possess humanoid forms that they can switch to outside of their main insectoid bodies.

They also possess the ability to spawn Insect Warriors in massive numbers. The exact method varies based on the individual. Some can create spores that rapidly develop while others implant eggs in living beings using special appendages. You may choose a desired method if you wish to utilize this power.

- **Insect Queen - 400 CP:** For 400 CP instead you may become a being on par with the Bug Queen. This is the most powerful member of the Insect Race and their leader. Additionally, this position grants the user the ability to control other insectoid beings or hive mind using species. Lastly, all of your innate abilities such as reproductive rate or poisons will be significantly stronger.

Stone Apes - 100/400 CP

Born from the remnants of the Nuwa Rocks, the Undying Stone Apes are a majestic and formidable species. Carved from the essence of the goddess herself, these Sacred Beasts take the form of colossal stone monkeys. Although each of them are physical powerhouses, they can still be slain if their souls are damaged. Additionally, each of the monkeys are blessed with a great affinity for staves like their most infamous member.

- **Sage of Heaven - 400 CP:** Unlike your stone ape brethren, you stand as a unique creation—a Sage of Heaven born from the complete Nuwa Rock. Your legendary status mirrors that of the fabled Sun Wukong. You have been infused with the essence of the goddess in its entirety, making you an embodiment of divine strength and wisdom. You will start out with the might of a Rank 10 Great Saint by purchasing this. If you wish you may optionally replace Sun Wukong or become a part of his legend having been born as his sibling.

Hybrid - Varies

This option allows you to choose from any of the species above. You may become a freak of nature or just a bizarre existence that appeared one day. Granted more than likely you were created by one of the various beings that live here. The other option is that you could use this to gain a set of unique parents. The total price is number of species * 100 CP + Species cost. So becoming a Insect Queen x Sage of Heaven hybrid would cost 1,000 CP (400 + 400 + (100*2) = 1,000). You will gain unique advantages that are related to the species you choose.

Skills and Perks

All perks are discounted to their origins and the 100cp perks are free to their origin.

General Perks

The primary method of cultivation used throughout the universe is most similar to the system used in the Great World of Secrets. As Cultivation is a widely used power here you will gain access to it. For Free you will be boosted to the Yellow Realm at the 1-Star level which is equivalent to a peak Grandmaster on Earth. Though you can increase this starting point by paying a fee. Every 50 CP will allow you to move up one rank. This option however will only allow you to reach the Divine Emperor Realm at max for 500 CP. The only downside of using this option is that you will become an average cultivator for your given level. Granted this can be modified by applicable perks.

Charisma determines how attractive you are, how likely people are to listen to you, and anything else related to speech. Lastly, Insight determines your ability to make beneficial decisions, your resistance to magic, your ability to learn, and amplifies the power of spells. By purchasing this perk you may increase one of these stats to 100 which is the maximum value in the early game. Though you may purchase this multiple times to continuously add another 100 points to the chosen stat.

Strength in Darkness - 50 CP

Once the sun falls the world falls to the darkness. During this period all monsters have their stats increased by 10% across the board. You share this trait and have your overall power boosted whenever it is night time. This boost is time dependent meaning that it is still effective if you are indoors. You will still retain the boost even if you are in a bright environment. You may choose whether you wish to follow a 24 hour cycle or the pattern of whatever location you are in.

Let Your Ambitions Run Free - 50 CP

As long as you can return their feelings your relationships will remain unbreakable.

Tongue of the Beast - 50 CP

Tongue of the Beast is a power possessed by intelligent monsters. This power allows them to communicate with each other ignoring any language barriers. They're In Danger - 50 CP

The contracts forged by Players offer a variety of benefits. One of the lesser known boons is that they can allow contractors to sense when their partners are in danger. You have a similar ability that allows you to sense whenever your allies are in peril. The greater the danger the stronger the sensation will feel. Additionally, your allies can sense this as well whenever you are in peril. This feeling will tell you the overall threat level and give you a broad sense of what is going on.

The First - 100 CP

Those who pave the way are rewarded in this world. By being the first to accomplish something you can gain fame, power, and a variety of other benefits. This perk allows you to replicate this effect ensuring that anytime you are the first to accomplish something you will receive a reward. The reward will grow with the corresponding difficulty to the task. For example, being the first in a world to kill a god is more impressive than to reach a new location.

Loyal to the Maker - 100 CP

After the Players gained access to marriage they unlocked the ability to have children. Both Players and NPCs are capable of having children though this can create some problems when each parent belongs to a different faction. You however, seem to possess an intrinsic connection to your children and creations. This powerful bond unites you, ensuring their loyalty even over their other parents. No matter what happens you will always have a close bond with your creations. Lastly, this will also prevent any method that would take control of your creations or turn them against you.

Hit'em Again - 100 CP

There are a variety of ways to increase the damage dealt to your targets. One of the simplest methods is to repeatedly strike an injured area. This attack deals an extra 10% damage to the target and most importantly it stacks. This method allows you to rapidly deal a massive amount of damage to a target should you be capable of dishing out a large amount of attacks. Additionally, this will not reset if you stop attacking that area temporarily or are otherwise interrupted.

Secret of the Pharmacist - 100 CP

Secret of the Pharmacist is a special skill that can be unlocked by joining the Pharmacist Guild. This skill boosts the success rate of any pill by 5% and increases your proficiency gain by a full 30%. For example, the 5% means that even a low-level Pharmacist technically has a chance of creating a Heavenly Saint ranked pill.

Shimmering Beauty - Free/100/200 CP

As is expected, nearly everyone of importance in this world is incredibly attractive. Especially given that Players can customize their appearances in the game. This perk lets you benefit from this as well as improving your appearance. For Free, you can become a solid 9 out of 10 much like most of the named individuals here. For 100 CP, you may boost your appearance further to match the number 1 individual on the Beauty Leaderboard Ling Feiyu. Her appearance alone is enough to captive those who see her.

Lastly, if you still aren't satisfied you may pay 200 CP to become an unparalleled figure. This will make your appearance on par with Chang'e who is considered the most beautiful woman in the Celestial Realm or Jiang Feng and Jiang Fen's fusion. This level of beauty is enough to make even the most beautiful of individuals seem lacking in comparison. The fusion on the other hand was a man handsome enough to seemingly charm every woman who saw him, even his enemies. At least this is a problem that most people want to have.

Gunners are a class which specialize in using firearms. They operate in close distance and long range combat depending on their weapons. You are an incredibly skilled Gunner on par with Ling Luo. Faction Boons - 200 CP

A major benefit to joining a faction is access to the Faction Honor stores. These stores allow you to purchase unique artifacts, guild war weapons, and many other benefits. You can gain Honor points by slaying members of opposing factions or otherwise benefiting the faction. This perk allows you to access an Honor store for any organization that you are a part of. Different Jumps will give you access to different rewards. This however, is a fair method to gain any unique items or support from a group.

Perfect Conversion - 200 CP

Whenever an individual in Divine Dominion ascends to a higher world or exits the realm their stats will be converted. This is believed to purify the user's energy into a higher form, but it also greatly weakens them. You however, will find that you can perfectly convert your stats and other traits. For example, the normal conversion is somewhere between 1:10 and 1:1000. Your stats though would be converted at a Perfect 1:1 ratio granting you the boost without any loss in strength. Additionally, this will allow you to freely convert your energy into different types. You just need to learn the initial process or gain access to the energy types.

Berserk Mode - 200 CP

You are either a boss character yourself or have gained the power of you. As a result all of your stats have been multiplied, particularly your health. When fighting a Player of similar levels it will take at least a dozen of them to match you.

If you aren't satisfied then you can pay another 100 CP to upgrade yourself to a Raid Boss. The Raid Bosses are a higher tier of bosses. These bosses are normally endgame bosses, the final opponent of the main quest, or the protectors of legendary items. This will greatly increase the multiplier that you received earlier. If it took a dozen Players to fight you before, now it will take hundreds to bring you down.

Creation God - 800 CP

The Creation Gods are the beings responsible for generating life within the universe. Not to be confused with normal deities, the Creation Gods exist as a separate system based on stars. Creation Gods are born at the 1st Star rank and can increase their power up to the 49th star. As a Creation God you are born with an incredibly strong body on par with a Divine Emperor, have the ability to create life, and a much stronger soul than other gods. When creating life you can freely shape your creations choosing their characteristics, unique abilities, and anything else you'd typically imagine someone like this could do. Lastly, as you grow stronger and refine your skills your overall abilities will grow at an exponential rate.

Protagonist

Family Safeguards - 100 CP

Honestly, cultivators are monsters on average, there's a reason they are referred to as murder-hobos so much. For example, one of the most common methods for cultivators to get revenge on each other is to annihilate or enslave their families. To prevent this you have managed to cast a protective aura on those you care about. Essentially, this protection passively guards anyone you care about from suffering. This protection however, is most useful on those who are not involved in a conflict directly. Though this will still prevent worse fates from occurring to your allies. For example, they might be captured but not tortured. If it counts as a "bad end" then this perk will prevent it from happening.

Lingering Touch - 100 CP

Before getting married Jiang Feng had a number of intimate encounters with various women some of whom were even his enemies. The most interesting part however, is that all of them, including his enemies, grew to love him. For example, despite being mortal foes the Infernal Archmistress still attended his wedding and was jealous of his wife. Whenever you have an intimate encounter with someone it will create a spark of desire within them. The greater the intimacy the faster this spark will grow. Given time this can make even your most hated foe into a star-struck lover. Lastly, while not recommended, this perk is still effective if either party forces intimacy such as when the Archmistress charmed Jiang Feng.

We Want Kids - 100 CP

When children are born in the game their power level is primarily dependent on the strength of both parents. As a result of this the strongest Players and NPCs became extremely attractive prospects. For example, the leaders of each faction had hundreds of thousands of fans who wanted to have a child with them. Like them you are a highly desirable partner attracting others in droves. This effect becomes more effective the more impressive you become. Additionally, this perk is particularly effective on wishful parents or those who wish to improve their lineage.

Heart of Power - 200 CP

There are rare powers known as Hearts that represent a user's talent with a field. They typically are acquired once a user hones their mastery of a skill to an immense degree. Purchasing this perk allows you to either acquire one of the following heart options or create your own heart:

- **Sword Heart:** Sword Heart is a skill that is unlocked when a swordsmen hone their swordsmanship to an immense degree. A Low Level Sword Heart increases the all damage by 10%, attack speed by 10%, and allows the user to store a large amount of Sword Chis within a pocket dimension. As you hone your skills further the heart can also be ranked up further vastly strengthening these boosts.
- **Magic Heart:** Magic Heart is a variant that can be acquired by talented mages. A Low Level Magic Heart increases the user's magic attack power by 10%, reduces casting time by 10%, and allows the user to store 100,000 mana inside an internal space. Both of the spell boosts can strengthen the user while effectively removing their concerns about running out of mana.

Reality and Digital - 200 CP

The barriers between the real world and the digital world are far thinner than what most believe. This property allows some to bring forth their power from the digital world into reality. You are one of these few individuals. This power allows you to summon the power, items, pets, and skills that you have gained in any digital interface onto your real body. For example, if you played the game leveling up your character you would be able to use the powers from your avatar. You can do this with other games or online software as well. Similarly you can send things from the real world into the digital world as well. Though you would need to find something worth sending first.

My Hero - 200 CP

Performing great deeds and kind acts is practically a requirement to become a hero. Though these acts seem to come naturally to you. You radiate a heroic aura that causes anyone around you to view you in a positive light. This will greatly endear those around you, though this can irritate evil individuals unless you restrain it. Additionally, whenever you perform a heroic deed there will be a corresponding response to it.

For example, helping a lost child might cause the parents to trust you, while saving a kingdom's princess from certain death could make you revered as a nation's hero. The rewards you receive and the emotional impact on the saved individual will scale with the event as well. Using the previous example, saving a princess from ransom might earn you her gratitude and a minor boon from the king. Saving her from being tortured and turned into a toy for monsters however, would likely earn her eternal love and a massive boon from the king. So please just try to be a good person and prevent bad things from happening.

Imperial Commander - 400 CP

Zhuge Liang is said to be the greatest strategist within the Three Realms. You however, are perhaps the only individual worthy of being called his equal. You have been taught

by the legendary general learning all the skills he possessed. As a result, you have become a masterful strategist capable of coordinating an army of millions with ease. Your most dangerous aspect though is not your logistics, but your ability to draw out your soldiers' combat prowess. Under your command ten average soldiers could kill fifty elites without suffering a single casualty. Additionally, you have mastered the vast amount of support skills and array techniques Zhuge Liang developed over his life.

The Shifter Emperor - 400 CP

The most important reason Jiang Feng was able to become the Shifter Emperor was his ability to absorb bloodlines. The Shifter Emperor must not only possess innumerable bloodlines, but refine them to their maximum potential. This culminates in the formation of the Shifter Emperor Bloodline. You now possess this bloodline and can consume any other bloodline you encounter absorbing their power. You can freely absorb a new bloodline by either transmuting a being, being given their blood, or through consuming their material another way. This method also works on non-organic or energy based life forms though the exact method might vary.

You Can't Hurt Me With My Own Skills - 400 CP

Most beings possess a resistance to threats that belong to the same conceptual existence. For example, as gaining his Dragon bloodline Jiang Feng became resistant to any dragon based skills. Similarly, you are resistant to any skill type that you possess or can otherwise be classified under. The greater your conceptual alignment with the concept the more you resist it. Using the earlier example a dragon would be resistant while a Dragon King would be nearly immune due to their greater weight with the concept of dragons.

Wheel of Reincarnation - 600 CP

The Wheel of Reincarnation is one of the most powerful abilities in the world. It is the foundation of the universe's souls and what allows for reincarnation to occur. You are the Wheel of Reincarnation made manifest much like Jiang Feng's daughter Si-Si. This allows you to reincarnate souls, grants you absolute control over any spiritual being, and use the Six Paths of Reincarnation. Each of the six paths are extremely powerful Sacred Domains. Together all six grant the user a variety of powers making them the ultimate well rounded warrior. Additionally, as a physical manifestation of the reincarnation system you can impose it into other worlds. Should a world lack a similar system or a damaged version then you can directly impose it, likely absorbing the damaged variants. Should there be an intact version you may still do this, but you may not be able to access the souls within the current system.

The Golden Pearls - 600 CP

After using the Golden Dragon Ring, Jiang Feng was able to awaken a Dragon bloodline. This bloodline belonged to the Nine-Clawed Golden Dragons granting him great power. The power of his bloodline was divided into nine golden pills within his core. As he unlocked more and more pills he could access more of his bloodlines power. Additionally, this allowed him to transform into a dragon form which will grow both stronger and larger as well. By fully opening all nine pills the user can transform into a titanic golden dragon and fight foes multiple levels above them in strength. Additionally, each pill grants you the full energy reserves of someone your level. Meaning that unlocking all nine guarantees that you have at minimum nine times as much energy as a similarly ranked cultivator.

The Monster Transmutation System - 600 CP

The Monster Transmutation System is a unique system given to Jiang Feng. It grants the user the body of a monster and a variety of powers. These include Transmute Monster, Polymorph, Lottery, and a few others. Transmute Monster allows the user to harvest monster parts, experience pills, and even purified bloodlines. It also can be used to merge monsters by transmuting them together. This method can allow the user to rapidly evolve and absorb the bloodlines of other monsters. Alternatively you can merge other monsters together making them more powerful. It however, is difficult to do this on monsters that are stronger than the user. This however, has a 100% chance of working if done on a corpse rather than a live being.

Polymorph is a skill that allows the user to transform into a human body. As the user becomes stronger the time limit and range of the technique will grow. The Lottery is a system that activates each time the user ranks or levels up. One lottery draw is given per level up though this limit can be increased. The lottery draw will pick from a number of categories, such as bloodlines, techniques, and pills. The Refine ability allows the user to refine the purity of bloodlines and materials. Lastly, purchasing this perk will allow you to take a fully upgraded version of the system rather than the initial version Jiang received. This will also give you additional methods to acquire Exchange points along with the flat number of points that you've acquired from upgrading the system normally.

Player

The Most Popular Man in the World - 100 CP

The backbone of most guilds are the more popular Players. These individuals act as beacons drawing others to them and allow their organizations popularity to skyrocket. You are one of these individuals and remarkably skilled at this aspect. As a result nearly every organization imaginable will be desperate to recruit you or otherwise become associated with you. Any attempts at cultivating your fame in the future will also become more effective. Additionally, tales that increase our reputation will spread like wildfire, while negative stories are smothered. All together you will likely find yourself credibly popular anywhere you go and even those who oppose you will find themselves admiring you.

A Stronger Generation - 100 CP

Often the Player's children will be born stronger than their parents. This is due to them inheriting the combined potential of both parents. Your children and creations similarly will inherit the full potential of their parents. Should you fully develop any child you have it is likely they will end up equaling you if not surpassing you should you become lazy. Though you may choose to withhold some of your abilities or powers if you wish to for whatever reason. Lastly, you still have to have a child for this to work so you will be given the ability to have healthy children with any species. You may choose which species the child will belong to or if they will become a stable hybrid.

Travelers - 100 CP

The Travelers are special Players who simply wish to explore the world. They are invulnerable from any form of damage, but in exchange they cannot harm anyone. They are also forbidden from performing quests as nearly all of them include combat in some fashion. By taking this perk you can gain Traveler Status along with the ability to flip it on and off. The only restriction is that you must genuinely be trying to explore. Meaning that you can't turn it on and walk into an enemy base before disabling it as you assassinate their leader. This invulnerability however, will block any damage as long as you genuinely wish to explore.

Capture Skill - 200 CP

The Capture skill is an ability available to all Players that allows them to catch monsters. By successfully capturing a monster it will become their pet. This ability can be used to target any monster. Though the chance of success depends on the difference in power between you and the target. For example, targeting a dragon 50 levels above you might

have a 0.05% chance of success. Targeting a normal wolf at the same level as you might have a 90% chance of success. This perk grants you the capture skill and significantly increases your chances of success.

Creep Go Away - 200 CP

Given the hyper realistic nature of the game a few special systems had to be put in place. One of these was a defense for female Players to prevent sexual assault. Should a Player try to touch another unwillingly they would be hit with an attack capable of instantly killing them. This perk allows you to activate this system and place it on your allies and followers. It can't stop protect them from actual attacks, but any form of assault or attempted rape will activate it. The damage will always be enough to kill or at least heavily injure the target. Lastly, this system can be activated repeatedly against multiple offenders or an incredibly powerful individual.

We Have Time - 200 CP

While time should actively be progressing throughout the Divine Dominion it largely remains stagnant. For example, unless specified the next stage of a quest won't progress until the quest taker arrives. This perk allows you to apply this logic to your adventures. No major events will proceed until you arrive and choose for them to start. Even something as major as a world invasion will halt in place. You can use this time to relax, prepare your equipment, grow stronger, or complete other quests.

Luck's Favor - 400 CP

Murong Xiaoxiao was a female Player who became the Descendant of the Goddess of Luck. This gave her two simple, but incredibly powerful abilities. The first was the ability to manipulate luck. She could freely increase or decrease the luck of those around her by a significant degree. This also has a surprising amount of combat potential. For example, when fighting Jiang Feng she nearly killed him through accidents despite being vastly weaker and prevented him from leaving whenever he tried. The second was that her own luck became incredibly high allowing her to encounter fortuitous

events incredibly often. Purchasing this will allow you to claim a similar power for yourself. Perhaps you are a Descendant of the Goddess of Luck as well or maybe you really are just that lucky.

The Player Hunter - 400 CP

Due to the innovative set up of the game NPCs were able to grow stronger by fighting Players. This allowed them to gain experience and steal the Player's equipment. Having become particularly skilled at this method you have earned the title Player Hunter. This title doubles all of your stats when fighting against Players and allows you to conceal the Red Name from these acts. Additionally, when killing other Players they will always drop either their most valuable equipment or whatever is most useful to you. Lastly, this will multiply the experience you gain from killing Players. In future settings this effect will extend to any sentient being.

Shifter Hierophant - 400 CP

The Shifter Hierophant is a Secret Class that can be unlocked by aiding the Shifter Faction. This class grants the user access to almost a dozen special skills. Some of the most notable include Revive, Commune, and Summon. Revive allows the user to resurrect anyone who has died regardless of how much time has passed or their strength. Commune is a skill that boosts your Charisma stat, allows you to speak to any being, and has a high chance of turning enemies into allies. Though the last part can be affected by their loyalty to another group. Summon allows the user to call their allies or summon random allied beings. Lastly, possessing this class automatically grants you a high ranking position in the Shifters Faction if you desire it.

Synergistic Training - 600 CP

The hardest part about training multiple classes is the sheer amount of time it takes. There however, is a great amount of overlap between each of the various professions. You have learned how to apply this, allowing you to rapidly train multiple skills. For example, mastering a dozen professions would accelerate your learning speeds faster than if you were focusing on a single class. As you learn more and more skills your speed of development will only grow. So try your hand at whatever you wish and become a master of all.

A True Warrior - 600 CP

Warriors in the game are theoretically capable of mastering any weapon, but it still requires you to put in the effort. As a result the vast majority of warriors only master a single weapon. Ye Wufeng broke this mold through his intense life and death training. The end result was that he was able to genuinely master all weapons in the game and push his stats far beyond others through training. It would seem that you are an equal to

the battle maniac having pushed yourself just as far. The end result is that you are now considered a true master of any handheld weapon. Lastly, your sheer skill level is now sufficient to allow you to fight off a dozen people of your level at once.

Inheritor - 600 CP

The Inheritors are the leaders of their respective species and incredibly powerful individuals. Becoming an inheritor allows you to choose one gift such as equipment, pills, skills, or some special unique aspects to your species. For example, the Spirit Inheritor can choose Spirit Forms for their gift. These gifts are pinnacle level options within the world. Each time you purchase this option you may become the Inheritor of a species or group. There is a list of Inheritors within the Notes section if you need a reference. As the Inheritor of your group you will be revered by anyone under the chosen group. Lastly, should you become strong enough this allows you to automatically become the leader of that group with the full loyalty of its people. This will even suppress any other Inheritors should you belong to a larger faction like the Divine or Infernals.

NPC

A Monster's Heart - 100 CP

Monsters come in many shapes and sizes in this world leading to a variety of traits. One however, that no monster will ever demonstrate though is treachery. Monsters and Shifters possess a sense of honor that makes them extremely loyal. Should they swear fealty to someone they will never betray their master no matter what happens. With this perk no one who is loyal to you will ever betray you. Be it through treason, mind control, bribery, or any other method they will be untouched remaining with you till the end.

Swearing to Lord God - 100 CP

The highest authority within the Divine Dominion is known as Lord God. This is the main A.I. responsible for running the world. One way that the NPCs and monsters demonstrate their reverence is by swearing to Lord God. As they are beings born from the world, breaking this oath will instantly kill them. From now on any oath or deal made with you will be similarly binding. Additionally, these bindings will be made as long as the individual agrees even if only half heartedly. For example, if you dare or bet against your opponent it will count even if they jokingly reply.

Eternal Lineage - 100 CP

In Divine Dominion it is possible for interspecies relations to occur. Though this can occasionally have some interesting effects when it comes to children. This perk allows you to deal with some of these issues. First, much like the other instances here you are capable of having healthy children with any other species. Second, focusing further on that issue you can decide what species the child will be born or whether they will be a hybrid.

This also lets you determine how their traits manifest to a degree. For example, a human-dragon hybrid might have dragon wings on a human body or simply be able to switch between two forms. Lastly, to assist with these instances the world allows the Players to have some control over their fertility. Like them you can freely control your fertility either guaranteeing or making it impossible for a pregnancy to occur.

We Will Never Give In - 200 CP

The presence of a powerful leader can act as a pillar to support their entire force. You share this trait making your presence function like a beacon to your followers. As long as you are with them or they are able to learn about your efforts their morale will remain at the peak. For example, after arriving in Dragonquarry the Shifters lost their morale

due to the gods' suppression. Jiang Feng however, was able to fully restore it with an announcement letting his followers know that he was preparing a counterattack. While in this state your allies will be able to unleash power beyond your normal limits.

Artifact Awakening - 200 CP

Once an artifact reaches the Sacred Level it will gain a sentient artifact spirit. You can imbue artifacts with spirits awakening them. The spirits are able to greatly enhance the efficiency and power of their artifacts. You may customize the spirit if you wish though by default it will be based around the item in question. For example, a knight's sword is likely to be an honorable warrior. Lastly, having a spirit allows the artifacts to grow over time. This can be accelerated by giving them access to high quality materials or by having a skilled blacksmith upgrade them.

Strength From Eating - 200 CP

After the Divine Pharmacist Hua's grandson was born they learned the child possessed a powerful innate ability. This power allowed him to absorb any ability or item to convert it into his own power. This skill allows the user to increase their power at an incredibly fast rate as long as they have a sufficient amount of treasures to maintain their growth. This ability also allows the user to safely contain excessive amounts of energy so that their body can process it.

Unbreakable Defense - 400 CP

Dugu Nine Swords is a defensive skill developed by Dugu Qiubai. The skill allows the user to form a nigh-unbreakable defense that can deflect any skill. Having comprehended this skill you have given yourself an incredibly powerful defensive ability. It is nearly impossible for anyone to injure you unless they are significantly stronger than you. Your skill allows you to block any type of attack as long as the ability lacks enough raw power to shatter your defenses.

Consume - 400 CP

Hundun is a devil-like Sacred Beast with a number of abilities. His most fearsome ability however, is his ability to devour attacks. He can swallow any attack and concentrate it, increasing the power of the attack. This attack can either be absorbed for energy or fired back as a more devastating attack. This also includes non energy based attacks. For example, Hundun was able to absorb Black Widow's poison. After he spit it back at her the poison was able to bypass her resistance after it was concentrated. You can do this with any attack, though attacks that are significantly more powerful than you can overwhelm you.

Buddhist Serenity - 400 CP

Buddhism is a broad term used to refer to those who cultivate inner peace and justice. Buddhist monks are known for their immense kindness and power. You possess a monstrous talent for the Buddhist arts on par with the Buddha Tathāgata and the Golden Cicada along with a few other abilities. The first of which is that you radiate an aura of

benevolence which can calm those around you. This can cause individuals such as bloodlusted berserkers or those suffering from immense grief to calm down in your presence.

Second, as a Buddhist you are anathema to demons or any evil entities. Your energy will now become devastating to them allowing you to either purify them or erase them from existence. This will also passively imbue any of your other powers with this energy though you can disable this if you wish. Lastly, you have a mastery of all Buddhist techniques be they conventional, forbidden, or lost. Though the strength of these techniques will be dependent on your power level.

Relentless Drive - 600 CP

The most powerful monster within the American Server in Divine Dominion was a man named Voldemort. He was an incredibly powerful wizard, but his most terrifying trait was his resilience. Despite being brought to the brink of death on multiple occasions he was able to rapidly grow stronger. You seem to share this trait with Voldemort and possess the ability to rapidly grow in strength.

This ability is most pronounced when you suffer a loss. The more you suffer and the closer to the brink of death you reach the more you will grow. Even a minor loss however, will result in your strength growing noticeably. Should you lose everything then you may end up rapidly reaching multiple realms above your current power. This will likely come in the form of an opportunity or other resource that will aid you.

The Heavenly Path - 600 CP

The Heavenly Path is the second force that makes up the universe alongside the Wheel of Reincarnation. The Heavenly Path represents the will of the world, making it impossible for anyone to escape the user's sight. It also bestows the user an unmatched comprehensive ability. Only true genius individuals like Jiang Fan or Sun Wukong have a hope of competing with you. Lastly, as the user's overall talent is boosted to an immense degree. Supposedly the incarnation of the Heavenly Path has the potential to become the most powerful warrior in the universe given enough time to grow.

The Descendants - 600 CP

The Descendants are individuals who were able to inherit the bloodlines and abilities of legendary figures. Some examples of these figures included the Mother of Humanity Nuwa, the Father of Humanity Fuxi, the Goddess of Luck, and the Dark Lady of the Nine Heavens. There are many more, but these are some of the most notable figures to have descendants. Each of the descendants gained incredible power even beyond that of most Inheritors. By purchasing this you may become a descendant of a mythological being or deity. You will start out with their power in a relatively weaker state, but given time you can acquire the full power of your ancestor. Lastly, in future Jumps you may be recognized as the child or inheritor of your chosen figure. For example, choosing Zeus would eventually let you become a new Olympian in any Greek setting.

Cultivator

Imposition - 100 CP

Imposition is a manifestation of one's aura. Normally someone can learn to manifest an imposition by taking on a role or learning certain methods to cultivate your aura. This perk can be used to gain your own imposition. You may either develop your own aura or choose a specific imposition. For example, Jiang Feng developed a fierce and primal imposition in the game as the Shifter Emperor. Some other examples include elegance, prideful and cold, or fierce and sharp. Lastly, these impositions grow exponentially more powerful as you become stronger.

Who Called My Name - 100 CP

After becoming a Creator God Jiang Feng gained the ability to sense anyone who mentioned him. This sixth sense would effectively summon his consciousness allowing him to see anyone talking about him. You have a similar ability which allows you to spectate any situation where you are mentioned. You can limit this thankfully to certain individuals or other specifications to prevent your mind from constantly getting prodded.

Separate Identities - 100 CP

While the game initially served as a method of entertainment it was later used as a substitute for real wars. As a result, becoming an influential Player could result in someone acquiring real power. This however, also brought a great deal of danger to certain Players. To deal with this issue some individuals developed methods to conceal themselves. You have been taught these methods and learned to perfectly conceal your identity.

As long as you wish to remain hidden it will be impossible to locate you. People will overlook you, miss connections, and simply be unable to identify you. To everyone else you will be no different than a face in the crowd. This effect however, only works as long as you aren't actively drawing their attention. So the government wouldn't be able to find you as a Player, but if you were a secret agent attacking them then they would likely be able to find you.

Combat Rating - 200 CP

After any fight you will be given a combat rating. While in the World of Tianji all combat will be ranked upon completions. These ratings range from C to S rank. By taking this perk the Will of the World will rank your battles accordingly. You will be given rewards based on your ratings. For example, an S rank typically will increase your combat

power, energy reserves, grant you a treasure, and occasionally other benefits. The difficulty of the opponent, your own strength, and the length of the battle are some of the main factors used to grade the fighting.

Egypt's Wrath - 200 CP

The Pharaoh was a powerful monster sealed beneath the Pyramids in Egypt. This Peak Abyssal level monster possessed many terrifying powers. The greatest of which was its ability to increase its strength by consuming the blood of others, turning them into its puppets. Somehow though you have acquired its abilities. Like the Pharaoh you have the ability to grow stronger by absorbing the blood of others. Additionally any individual you drain will be resurrected as a zombie. They will still possess their full strength though their intelligence is normally decreased.

Powerful Evolutions - 200/400 CP

When a cultivator forms their Black Pill and Earth Soul the quality can vary. For the most part individuals awaken C rank while B and A ranks are rare. The received grade depends on a number of factors such as your innate potential. This perk allows you to improve your innate potential which will affect the quality of any efforts you undertake in the future. For 200 CP you may upgrade your potential so that you will at least develop an A rank ability. Though if you aren't satisfied then you can pay an additional 200 CP. This will push your potential to the peak of what is possible if not beyond. Now at minimum any powers you develop will be S rank or higher. Lastly, this mainly refers to talents such as the things that either rely on your effort or are chosen randomly. For example, having the 400 CP version would basically guarantee that you awakened an Omega-level power as a Marvel Mutant.

Suppressing Fate - 400 CP

The mere existence of the Sacred Beasts generates unique phenomena and provides benefits to their lands. The most important benefit that the Divine Beast grants is their

ability to suppress fate. This allows the worlds they inhabit and in some cases entire universes to stave off disasters. Additionally, this suppressed fate allows worlds to prosper granting them immense fortune. Like the Sacred Beast you have a powerful karmic presence which alters fate. This effect grows more powerful the stronger you are.

Notably, this effect has resulted in many Sacred Beasts being treated as honored individuals throughout the universe. For example, the greatest Sacred Beasts the Immemorial Sacred Beasts will not be harmed by virtually anyone in the universe and factions will do everything in their power to recruit them peacefully. This will apply to you as well granting you immense status if you remain a neutral figure. This will even extend to any enemies you gain. They will be far more willing to either imprison you or gently recruit you.

Machine Heart - 400 CP

In Divine Dominion the A.I. are incredibly advanced and seem no different from people. You have a natural affinity for communicating with and understanding the inner workings of machines and artificial intelligences. This affinity allows you to breathe life into advanced systems, even on platforms normally considered low-grade or obsolete by conventional standards. This unique ability also allows you to awaken dormant A.I. and activate dormant functions within machinery, unlocking their full potential. With your assistance, even the most rudimentary of machines can exhibit levels of intelligence and functionality previously thought impossible.

Invincible Soul - 400 CP

After the Divine Monk Xumi was slain his soul wandered throughout the Divine Dominion. He was able to maintain his soul through his immense willpower. In fact as long as his will remained it was impossible for him to be destroyed. Like Xumi your soul can never be destroyed as long as your will remains. Additionally, knowing this you have extensively trained your willpower giving you a nigh-unbreakable will. It would take truly immense amounts of suffering to even have a chance of breaking you down. Lastly, should your body be destroyed this will allow your soul to remain, but you will need to restore your body before the end of a Jump to continue with your Chain.

Grand Game Of Chess - 600 CP

The two elders of the Heavenly Legacy race are incredibly manipulative. Realizing that a calamity was approaching the universe they effectively played a game of chess using galactic species as pieces over millions of years. You are an equally manipulated bastard able to make entire universes dance to your tunes. Most importantly no one will even realize the depths of your schemes unless you directly explain it. Lastly, seemingly

every plan you develop is filled with numerous contingencies ensuring that in even the worst situation you'll still come out on top.

World Maker - 600 CP

World Maker is one of the weaker systems created by Mo Zhuang. It allows the user to create a code which can affect reality. This code can be used to create stable worlds, robots even stronger than the user, new life forms, and other constructs. The only limit is the amount of energy that the user is able to mobilize for their creations. For example, you could easily assemble a castle out of starship grade metals in seconds if you possessed a large enough energy pool.

System Maker - 600 CP

The Heaven's Legacy race is the most powerful of the Nine Great Races. This is mainly due to their incredibly powerful technological capabilities. One of their greatest feats is the ability to create systems. You are the student of these elders having been taught everything they know. This knowledge covers the entirety of the Heavenly Legacies technological understanding. Of course you were only given this position due to your unparalleled intellect and scientific talent. Given time you could easily create new wonders on par with the Monster Transmutation System or the Celestial Arcanum System. You can also study other systems which will allow you to modify them, improve them, or replicate their features.

Special Techniques/Powers

You will receive a **400 CP stipend** to spend on techniques. You receive **three discounts** that can be used on any technique below. 50 and 100 CP techniques will become Free, all others will have their price cut in half.

Fly - 50 CP

Fly is a skill possessed by most high level beings and monsters. It allows the user to float and move in the air. This skill however, allows the user to do so without any wings or any other method of flight. There is no limit to how long it can be used. Lastly, the maximum speed you can reach is dependent on your personal power.

Change - 50 CP

Change is a skill possessed by many large monsters. This skill allows them to freely alter their size at will. The minimum size is typically around the size of a small animal. The maximum size is their true form which is why older monsters acquire this power. While shrunk none of your physical powers will be decreased. So you could punch someone with your full strength even if you're currently only a thousandth of your full size.

Drain Life - 100 CP

Drain Life is a passive Divine Skill created by Jiang Feng. The skill grants the user two main effects. The first of which is that it reduces the casting time of all spells by a full 50%. For one reason or another your territory is plagued by internal strife, factional rivalries, and political turmoil. This has led to frequent power struggles, civil unrest, and potential rebellions. Taking this drawback complicates governance and diplomacy, requiring skillful negotiation, compromise, and sometimes forceful intervention to maintain stability and unity within your territory. Alternatively you could simply go full dictator though that would likely cause further issues. Additionally, this will seal the Guards and Citizen Loyalty perks until you have dealt with the issue.

Invasive Dungeons +200 TP (Requires Dungeon Generation)

Normally the monsters and other horrors within the Dungeons would be unable to leave. If you remove this protective effect then you may receive 200 TP rather than pay it. Granted they are likely far weaker than you depending on how many Jumps you've gone to. You may freely design their personality, appearance, and species if you wish.

Wait, I Recognize Him - 0 CP

Divine Dominion takes inspiration from many tales from throughout the world. For the most part this consists of mythology, but just as many tales come from other sources. For example, there is an old man known as Master Roshi the Tortoise Warrior. If you wish you may effectively create some Easter Eggs by scattering some individuals you may recognize throughout the world. These beings will possess skills similar to their counterparts. Jiang Feng joked that maybe a Super Saiyan was wandering around Divine Dominion, well with this you could make that true.

We're Number One - 0 CP

Like many eastern stories the story seems to praise China a great deal and makes them superior to the other countries. If you're tired of this trope then you can switch it up a bit. This option allows you to flip flop the world so that another country is given the main character role. This will have minor effects overall such as slightly changing names altering the locations of certain groups. For example, the Jiang family might become the Rivers (due to translation) if you choose an European country or the United States. So feel free to make another the country the ultimate superpower of your dreams via a main character.

I Hit My Head +100 CP

Something appears to have gone wrong upon entering the jump. As a result you have forgotten all information related to the future of this setting beyond what your origin provides. You will have no knowledge of events or people that have not yet occurred. As far as you are aware this world is a brand new setting waiting for you to discover its secrets.

The cause of this memory erasure is unknown and cannot be reversed by any means available to you. You will have to rely on your instincts and natural abilities to survive and thrive in this new world. While this may give you a sense of freedom and the chance to start anew, it also means that you are vulnerable to being caught off guard by unexpected events and enemies.

Have a Lick +100 CP

Many of the individuals in this world have strange quirks. For example, Heifeng and his son Heixue both carry around drumsticks that they constantly lick. Like the other beings who live here you have some sort of quirk. This won't actively harm you, but it will likely make you look foolish frequently. At the very least these instances are great for making everyone laugh and dissolving the tension.

Why'd Things Change +100 CP

Near the end of the story the translator for the novel appeared to change. As a result many terms used throughout the story were suddenly altered making it difficult to understand what was going on. These changes will be minor overall, but it will still require some effort to understand exactly what everyone is talking about. This doesn't pose any danger, but it will certainly be irritating.

Cartoon Mode +100 CP

Cartoon Mode is a special setting applied for kids younger than 18 who enter Divine Dominion. It hides any gore, adult content, and cursing in order to make the world kid friendly. Somehow it seems Cartoon Mode was applied to you, but something went wrong. Instead the incorrect version has been applied to you. This means if you're an adult you've been stuck with the kiddo version. Similarly if you're a child then you're going to be getting the full-on realistic version of the world. Should you start off as a child and remain in the world long enough the settings will also flip, activating Cartoon Mode once you're old enough.

Anytime you transition between bodies you will briefly lose fine control. Should you lack any transformations or alt-forms then this will occur whenever you wake up.

Sheltered Youth +200 CP

Simply going about life and gaining new experiences is the simplest way for someone to grow. This however, can be more difficult if you remain alone or isolated. Like Nangong Tiaotiao, you grew up in a sheltered environment. While this likely came with a number of advantages it has left you easily flustered, lacking confidence, and without an overall sense of caution. Thankfully you can work on all of these issues by simply living your life. It will take some time, but should be able to grow past these issues given time. Especially if you are given help from close allies or friends.

The Lonely Path +200 CP

One of the biggest draws of Divine Dominion is being able to form parties and bonds with your allies. Unfortunately for you that isn't going to be an option. By taking this drawback any encounters you have with companions you acquire on your journey will always end in fleeting moments. You will be spending a vast amount of this Jump alone, so I hope you can handle most issues on your own. The only beings that will bypass this restriction are summons or those whose existence you are actively maintaining.

Blind To Love +200 CP

Despite how intelligent many of the characters are they remain blind in certain aspects. Seemingly fulfilling a trope these individuals lack the ability to identify whenever someone is attracted to them. Like these previously mentioned individuals you are unable to tell when someone is interested in you. This could lead to tension between you and your prospective lover should you continuously ignore them. More than likely it will lead to situations such as a dramatic reveal causing problems in the middle of an important mission.

Lacking Funds +200 CP

While money may not be an end all solution to everything it can help you with quite a few problems. You sadly seem to be cursed to lack money. Even if you come into a windfall of cash something will seemingly immediately come up that requires you to spend it. This doesn't effect your ability to make money, but you will never be able to

enjoy the fruits of your labor for long. You may however, invest this money into equipment, improve your territory, or donate it to your allies. This restriction only applies to you individual for the duration of the Jump.

Infernal Poison +400 CP

There are a number of deadly poisons and curses throughout the world. One of the worst ones however, is the Infernal Curse. This curse is normally cast by powerful Infernals on foes who escape them. This curse seals the user's power and causes them immense agony. This curse has been cast on you, limiting your strength. Additionally, whenever you draw on large amounts of power your body will be reeked by immense amounts of pain.

In order to cleanse this you will require the aid of a powerful Buddhist or an incredibly skilled Pharmacist. Though it should only take you a few months to deal with this if you dedicate your efforts. Granted until then you will need to be careful unless you have a truly massive base power level. Lastly, should you be an Infernal yourself then you will suffer a similar curse made by the Divines or Shifters. You will also require the aid of a powerful Infernal rather than a Buddhist.

Devoted Patriot +400 CP

After the game became a substitute for actual war it inspired many people to become patriots for their respective countries. Some individuals, however, take this a step further, displaying true zealot-like behavior. You are one of these individuals and have a fanatical loyalty towards your home country. Any insults towards your homeland will enrage you completely. Similarly you will greatly look down on anyone belonging to another nation if they are not allied with you. For example, the Japanese Players would hate the Chinese and like the Americans.

Forgotten Payments +400 CP

It seems that your benefactor forgot to pay for access to the game or failed to upgrade your deal. As a result you have been restricted and aren't allowed to use items that don't belong here. In addition, you have been banned from accessing your warehouse while you are here. You get to keep access to your powers, but any items that don't belong to this universe are forbidden.

Powers Begone +400 CP

So you thought that you could just use your other powers in order to blitz the setting did you? Well now you can't, your out of jump powers have been locked away. If you are going to survive in this world then you're going to do it with the powers that belong to this setting. As a small mercy you will be allowed to use any powers that can fit this

setting. Some examples of the other settings that would fit are the I Shall Seal the Heavens jump, the Coiling Dragon (part 1 and 2) jump, the Monster Paradise jump, and any other jump related to a Cultivation setting.

Night and Day +400 CP

In order to control the imprisoned humans the Necropolitians cursed them. This curse caused them to transform into monsters during the day and made them lose control of themselves. Somehow you have been afflicted with a similar curse. You may choose whether this curse affects you during the day period or night time. While transformed you will shift into a monstrous form such as a large serpent or insect. This curse can either be removed or altered. Breaking it requires a powerful cleansing pill or a high level healer. Altering it requires similar assistance, but instead allows you to gain control over your cursed state. This will become an alt-form should you successfully alter it.

A Fallen Lover +600 CP

Unfortunately the tales of most heroes end in tragedy. One of the most common instances that demonstrates this is the death of the hero's lover. So I've got good news and bad news for you. The good news is that during the first year of this Jump you will meet someone that could be considered your true soulmate. They will be a perfectly compatible individual of incredible beauty. The bad news is that sometime afterwards they will be slain in front of you and it will be impossible for you to save them.

This event may very well drive you mad with rage or grief should you be unable to control yourself. As a mercy you will also be given an opportunity to revive them. You will either be given a quest or somehow acquire information that will allow you to resurrect them. Should you successfully revive them you may take them as a companion for Free and import them for Free in any future jump with a 800 CP allotment. Of course, you will only remember that you took this drawback once the Jump finishes, after all the tragedy has to be genuine.

An Angered Force +600 CP

The greatest event within Divine Dominion history was the Divine-Infernal War which drew nearly every species into a conflict. Since then everyone has been preparing for the second war and attempting to gather allies. Somehow though on your quest to do so you managed to do the opposite. Either through your actions or perhaps even simple bad luck you have managed to alienate an entire faction. Now they have chosen to treat you as hostile in any situation. You will be barred from working with them in all, but the most extreme circumstances and you'll likely be attacked on sight by any of their members. You can choose any of the major factions of species groups for this. Some

examples include the Divines, Inferals, Shifters, Elves, Elementals, or any of the other listed races.

A Persistent Foe +600 CP

Shen Ye was an irritating and persistent foe for Jiang Feng during the near entirety of his journey. Despite being killed repeatedly, he would end up returning even stronger each time. You have an enemy like Shen Ye who will continuously grow stronger and will be unable to be permanently dealt with. You will only be able to permanently kill them once you have reached the last year of the Jump. For one reason or another they hate you with a burning passion and seek to defeat you. They will do anything they can to hurt you even if it brings harms to themselves.

Work For It +600 CP

Throughout his journey Jiang Feng would frequently increase his power in massive leaps. Unfortunately for him directly afterwards he would either be sealed or suffer from a condition that limited his power. These instances prevented him from simply overpowering his foes immediately until he worked for the new power. By taking this drawback you will similarly be unable to have any massive power boost throughout the Jump. Should you still somehow manage to multiply your power then you will quickly suffer afterwards. For example, you might be cursed so that you can only access 10% of your stats. Though as a small mercy should this happen you will be given an opportunity to unlock your full power. It however, will be locked behind something difficult such as a quest or require the aid of a powerful NPC.

Distorted Reflection +600 CP

Before freeing Wukong it was revealed that Tathagata had replaced all of the gods within Heaven using the Divine Spawning Pool. This allowed him to create clones of the gods warped to his desires while retaining their memories. Having been inspired by this your benefactor created a clone of you possessing every option in this Jump that you purchased. They also possess all of your memories, though their personality is a dark reflection of yours. They will be pursuing you throughout the Jump with the intention of killing you. Should they succeed they will replace you as the Jumper.

Scenarios

You may take any number of scenarios unless there are any specific requirements. In addition you are unable to proceed to the next jump until you accomplish this goal.

- All scenarios can take place after the main jump so there is no need to worry about conflicting goals or lack of time. *To clarify, you will essentially be taking the jump again, only you will have a specific goal instead of just needing to survive. There is no punishment for failure aside from losing access to the reward of the Scenario. **You will not chain-fail** if you give up unless explicitly stated otherwise.*
- Alternatively, you may take multiple compatible scenarios concurrently with your main jump. **You will not chain-fail** if you fail or give up on any scenarios, unless explicitly stated otherwise. You do still chain-fail if you die though, so maybe think twice before you take all of them at once.
- Each scenario you take will give you **500 CP** as well to spend on the document upon successful completion.

The Shifter Emperor(ess)

Congratulations, you are now the protagonist of our story. That's right you will be replacing Jiang Feng. Optionally you may swap him to Jiang Fenya if you are female along with some other characters to maintain the storyline. The jump will last until the story ends canonically or you die. You will face all of the challenges that Jiang Feng did. You will start out with all of Jiang Feng's abilities though you will only get to keep them if you complete the scenario. There is a list detailing many of the options that you start with and what you'll acquire over the course of the Jump in the Notes Section. You will receive all of the same opportunities to succeed as he did however should you follow his path. Lastly you will receive his memories so that you know what's going on and have his experience.

Rewards:

For completing this scenario you will receive a variety of rewards.

- First any technique or item you learned/gathered through your journey will gain Fiat backing ensuring that you can keep them.
- Second, all restrictions on any ability you gained whether through an action in the jump or by purchasing it will have its limits removed.
- Third, you will get to take ALL of your friends, family, and forces with you. This will include any territory, empires, and whatever areas you control. You may choose whether they all share a single companion slot or if they are divided up based on their affiliations.

Ending

Go Home: Maybe your time in this world made you realize life wasn't that bad. Go home with the abilities you've gathered and enjoy your life.

Stay Here: Maybe you've gotten attached and are determined to make this your home. If you really want to stay here, take +1000 CP for additional purchases and get ready for the long-haul here.

Keep Going: Perhaps this is just one more stop on the road for you. Maybe you did nothing or maybe you changed everything. Regardless, you're determined to continue your journey. Maybe the next world will be a bit nicer than here.

Notes

All perks that have active and passive effects may be freely toggled on and off.

Rankings

I tried to organize most of the rankings listed in the story, but they are not listed fully anywhere (the translator even jokes about this a few times). Additionally, the author seems to use some terms interchangeably.

- For example, the Superpowers level system is abandoned for the Great World of Secrets system after a certain point.
- It's unclear how an Infinity rank individual compares a Deity due to the Stat Conversion between the worlds. For example, the stats between Divine Dominion and the Great World of Secrets are believed to be converted at a ratio of 100:1 meaning that experts from Divine Dominion become much weaker when they leave their world.
 - Personally I'm ruling that without the stat conversion each Divine Dominion rank is equal to their Great World of Secrets counterpart. Meaning that a non-converted Mythic Saint should match a Divine Emperor.
