

The Versaphone Supplement

By Firriga

Get ready to connect to the metaverse like you've never seen before! Phirri LLC brings you a state-of-the-art mobile device that allows unlimited access to the r/Jumpchain* Reddit Thread! In partnership with the r/Jumpchain moderators**, you may now interact with your fellow Jumpers no matter when or where they are in the omniverse!

But wait, there's more! The Versaphone is always built the same (factory standard) but they don't all do the do the same. As our beloved customer, you get the chance to customize your versaphone with several verse-spanning features.

As a special offer, we're offering 1000 VP (Versapoints) to all Jumpers!

*Warning: The Versaphone may only access the ROLEPLAY flair of r/Jumpchain. Versaphone Users can only see, comment, and post on the ROLEPLAY flair.

**We thus far have only cooperated with moderators of fifteen timelines as with the creation of this document. We are not responsible if your Versaphone happens to instead log-in into the Fourth Timeline's (more commonly known as Earth-1218) r/Jumpchain, whose moderators are unaware of this product and the larger omniverse beyond their own fictional headcanons.

Features

r/Jumpchain_{ROLEPLAY} Access – Free

As previously stated, the base feature of the Versaphone is that you will have unlimited access to the r/Jumpchain_{ROLEPLAY} thread. You may see, comment, or post on the _{ROLEPLAY}thread as you please at any time. This is a direct link that does not rely on the internet so long as Reddit servers are still online or the r/Jumpchain thread is still up.

Unbattery – Free

You'd expect our versaphone to require some sort of energy but not at all! The fact that you exist fuels this device so nothing short of your death could stop this phone from running out. So, uh, try to exist.

Instant Messaging – 100 CP, Free if you purchase Jumper Bazaar or SOS

Distress

Tired of posting on the thread just to get the attention of that one Jumper you want to contact because they have been on this world and is your best bet save your life but your post ended up getting ignored in favor of the latest angst post by another Jumper that clearly needs a therapist rather than hamstringing advice of other mentally scarred worldhoppers? Then just shoot them a direct message! Yes, now you can privately message other Jumpers so you may endlessly harass them on the best way to destroy the Imperium because they were the Emperor's primarch that one time and will TOTALLY divulge the secret weaknesses of their beloved brothers and family of the Imperium they worked so hard to save and preserve.

Health App – 100 CP

Feeling like you caught something nasty during a vacation Jump to one of those NSFW worlds because you decided to skimp on the STD immunity perk? Now you can check yourself before you crap yourself to death with this non-intrusive health-checking app! It keeps a fully detailed profile on your current physical, spiritual, mental, and existential health, and lets you know if you have some sort of illness whether it's biological or supernatural. It can even detect curses and mind-altering effects placed on you.

Group Chat – 100 CP

Have some companions and followers but due to some dimensional shenanigans, you're now separated with no way to contact each other? You now have at least one way! Your companions and followers now get their own versaphones but none of the features you have besides messaging.

Meta Bound – 100 CP

Never lose your mobile device again! Your versaphone is now keyed to your existential superposition. Meaning that no matter when, where, how, or not, you can simply summon your versaphone at will and disappear it elsewhere all the same.

Mental Command – 200 CP

Are you in some sort of self-imposed situation that has led to a lack of opposable thumbs? Well, never need for thumbs again! Now your versaphones can be completely mentally controlled! By scanning your psychic waves, the versaphone can be commanded to utilize any of its installed features.

Choice Banking App – 200 CP

By taking this option, you have agreed to open an account with our bank company, Choice Banking Service. As part of the service, you are permitted to a debit account that will store any henceforth unused CP from Jump documents to be used on later Jumps.

Warehouse Delivery App – 200 CP

Are you in a situation where opening a way to your warehouse full of your prized and incredibly dangerous would be a very bad idea? Then you may want to consider our very own Cosmic Delivery App! By clicking through a filterable list of all your various stuff, it will teleport to you with one click of a button and anything you have on hand goes back easily just the same! Something to note is that there's a total weight limit for any stuff that can be delivered in and out of the warehouse in a single day which is about 10% of the total stuff you own. The daily limit resets every day at midnight by Earth standard time. Additionally, companions, followers, and pets count as "stuff" in this context.

The Jumper Bazaar – 300 CP

Ever made a purchase you deeply regret? Have you gotten bored of your current assortment of complete utter BS boon cheats? Ever wonder what could be out there in the greater eldritch

omniverse? Do you just enjoy making bad choices that results in horrible things being imposed upon your sapience? If you answered “yes” to any of these questions then this feature is for you! I present to you r/Jumpchain’s Jumper Bazaar! Here you may trade just about anything using our microcurrency known as Bazaar Points, or BP for short. You start off with 1000 BP courtesy of Phirri LLC. The Bazaar is a free market where Jumpers may put up their perks, powers, magic, items (fiat or not), and even their companions/followers (with their consent, of course. Yes, that includes pets and slaves) for sale as well as pricing it however they please. But those are only examples. Jumpers can put literally ANYTHING on sale so long as they own it. You could even sell your soul! So come down to the Bazaar today! Transactions are fully automated and instant, and you cannot put up anything that you do not own. You can also put up requests for certain things that can only be gained from another universe or a different timeline of the universe you’re in (like an alternate universe version of somebody or an item that no longer exists in your time) along with an estimate of how much you’re willing to pay for said thing.

SOS Distress – 300 CP

Are you in a pinch? Do you need help from somebody just as badass or pathetic as you? Are you just lonely? You can send a backup request through r/Jumpchain for some jolly good cooperation! Or you could answer the call yourself and get transported to where requester is but it won’t count to your Jump time. While you’re in another Jumper’s Chain, you can stay as long as you need to until either the Jump ends, you opt to leave, or the requester kicks you out. Some Jumpers may request a fee for their service which could be anything from CP, BP, or some other thing an omniverse traveler may have access to.

I’m Calling God – 600 CP

Ever lamented that you could never seem to talk to your Benefactor unless they feel like talking themselves? Do you have a complaint? Do you need someone to talk to? Do you feel like bitchin’ at somebody and it just so happens your Benefactor is the subject of your bitchin’? Well, now you can! Your Versaphone is now a direct hotline to your Benefactor and they’re contractually obligated to indulge you! They also can’t hang up so your call doesn’t end until you allow it to end. Additionally, once per Jump, you can make a single request of your Benefactor and they have to oblige you. The limitations of this request are the limitations of the Wish spell from D&D except that, in this case, it’s also possible to replicate the effects of 9th level spells (or higher if you’re including older editions). You can’t use the request to request for more requests, if you’re wondering. Be careful of what you ask for though, genie and monkey’s paw logic apply.
