

Don't Meddle With My Daughter!

By Wanderer

Welcome to the wonderful world of Japan's take on Western superheroes. A world where the brave soldiers of N.U.D.E fight the super powered villains of BLOWJOB. The story begins as the daughter of a previous heroine takes up her mother's mantle to fight crime. It is a world full of lewd, rape, incest and more! Have 1,000CP to start your decade with.

Origins

Age: 14+1d8 for the younger generation and 30+1d8 for the older generation

Gender: In this world it is mostly women doing all of the fighting. But feel free to pick your gender. Do not feel confined to only just male and female if you want to be something in between or no gender at all.

While there are the two main factions that grant you memories of this world, you can choose to be a drop in if you want a fresh start.

N.U.D.E. – You are a proud member of the Next Ultimate Defense Exports, also known as N.U.D.E. It is the local SHIELD expy and is made almost entirely of women in skimpy outfits.

BLOWJOB – The group of BLOWJOB was created after Zenovia was defeated by Athena and then kept as a breeding slave by the Japanese govt in an attempt to create an army of super soldiers. When that failed, they switched to new tech and sent their rape babies to die as a means to show off their new weapons. Understandably, Zenovia is pissed about this. She was finally able to escape with help. Now BLOWJOB is back and she and her many children are ready to take out their vengeance on humanity. As part of BLOWJOB, you are one of her many children. And no, they do not care about incest.

Perks- Take two 100CP perks for free and a discount per tier.

Superheroing 101 (First is Free, 100CP to take both) Despite the name, this can be taken to learn how to be a hero or a villain. Regardless of which side you pick you will gain the basic knowledge of having gone through super bootcamp for your side, granting enough knowledge to be an aspiring rookie. Both sides will gain basic combat training; including a weapon of choice, unarmed and small firearms. Heroes will learn investigation skills, team building exercises and civilian protection. Villains will learn basic manipulation, stealth, resource acquisition and how to come up with a basic evil plan.

Clothing Only Gets In The Way (100CP) A running gag in this world is that clothing and costumes seem to be made of paper as many people either end up naked or in tatters. You can toggle this ability to turn clothing and armor near you to be as durable as wet paper. This works best the less durable the target armor is naturally and some things will still take a while to remove.

Godly Beauty (100CP) In every superhero setting the heroes and villains are known for looking so great many appear as supermodels. But you are better than them. You can gain a touch of the divine if you like. Either because you are a god yourself, a child of one or just that perfect, this will boost your appearance to that of 11/10. Several people in setting with divine blood seem to attract basically everyone, men and women. Some are more subdued by such beauty, while others are much more open in their desires.

Nearly Unlimited Sexual Stamina (100CP) Athena claims that all of the women from her home were granted unlimited stamina and forced to be used as soldiers. Now, while you may or may not be a woman, you can also have access to a version of this. You might pass out once all is said and done, but now you have the stamina and skill needed to keep going until all of your partners have been sexually satisfied.

Paralyzing Spit (100CP) Your saliva can now be used to quickly paralyze others. A small amount on a finger was enough to quickly cause even the mighty Eighth Wonder to be captured. How long this lasts will also depend on how strong or regenerative the target is. As shown by Eighth Wonder this power will even affect secondary targets that are stupid enough to touch your spit. Numbing of touched areas is optional and this power can be toggled for when you do not want to paralyze your date.

Shadow Man (100CP) A rather weak power, but you can enter into shadows. This can be used to spy on others and even hitch a ride as they do all the moving. You could leverage this ability to become an assassin and strike when the target is unexpected. The downside if you cannot wear anything when using this power and will be nude.

Skilled Housewife (100CP) Much like Athena, you have all the skills needed to take care of a home and can do it at super speed, taking a minute to do what would normally take hours. Cooking, cleaning and maintenance are all things you excel at.

Keep it In The Family (200CP) Part of being divine is a protection from the negative side of incest. Just like with Zenovia and her children, to a less extent with Clara and her mother, or even Athena and her sister Artemis your family members also do not see a problem with incest with you. This works on anyone that is considered related to you. Including by blood, in-laws, step relations or adoption. While the protection from inbreeding will always stay on, you can toggle the family attraction aspect on and off for each person, just encase you are not attracted to certain people or genders.

Puppet Master (200CP) Puppet Master had the ability to create small insects that would attach to humans and burrow under the skin. With these he could cause the targets to go into violent rages and attack everyone around them. You now have a similar ability. While it does not have to be insects, you can create a vector and have it spread the infection before finally controlling when it will go off. While Puppet Master used rage, you can choose another emotion to induce.

Redemption (200CP) Athena seems to have the power to talk others into turning over a new leaf. Not just once, but twice she convinced Zenovia to reject evil and go into retirement. With this, you can connect with the inner goodness and desire to just stop fighting. You can bring people the peace they seek in their hearts.

Sharing The Love of Incestuous Supers (200CP) Let's not lie, you know why you are here. You love lewd heroines getting into weird situations. Maybe you love the incest angle of it all, but it won't have to end when the jump is over. If you are willing to pay a little you can take a bit of the world's metaphysics with you in two parts. Both will allow you to change new settings as you first enter them.

The first will allow you to drop a bit of the incest kink that Don't Meddle With My Daughter is known for. This could affect the entire world or selected individuals, such as targeting the main cast, you decide. They might not understand what is happening, but they will start to have desires for their family members. While some might stand back and deny it, others just need a little encouragement to give into this new form of family bonding.

The second part will affect the entire world of any superhero setting you visit, This aspect comes with the option to select which hentai physics you wish to add to the world; ranging from just light ecchi with the sexy outfits to the more darker aspects of the mind breaking rape. You can even make it just like this setting and have the rape of a superheroine be a light joke that does no lasting harm to their mind.

The changes will start the moment you enter the world or be retroactive. I know some will want things to run smoothly as if they have always been, while others will delight in watching the sudden jarring change of morality and seeing the people struggle to resist.

Soul Latex (200CP) This is the ability to create and control latex, buckles included. This substance is most often used to make clothing, bondage for others and working dildos. As with latex, it can be thickened or stretched thin to suit different needs. The tentacle straps are great for all of your domination needs and make capturing your foes much simpler. And just like Mei, you can grant small amounts of this created substance to others to wear and keep on hand for when they need it. Clara was given enough to have a summonable strapon at will. Granted she did use it on her own mother in a threesome with Mei. And as a bonus, the one wearing your latex can feel it as if it were real skin.

Elemental kinesis (200CP/400CP) (can be bought more than once for multiple elements) The power of the elements is a great tool that few can control properly. You may be one of the few to make these primordial forces to obey your command. Pick between the basics (Air, Earth, Electricity, Fire, Ice, or Water). For the basic 200CP, this ability allows you to create and control your element of choice. This is not an all encompassing creation. Earth will just make more of whatever stone is nearby. And this version is not limitless. You may still grow exhausted from overuse.

For an extra 200CP, your knowledge and control of your element goes much farther. You can change your body into your element of choice. This will allow for many new combat abilities. Such as being made of water can have many weapons pass right through you.

Demigod Children (400CP) A shady secret is that a lot of the heroes and villains in the world are the result of a forced breeding program on a captured goddess. Her children developed all sorts of strange powers. You too can have such genetics. Your children will gain random superpowers. Obviously some will be better than others. On top of this, your children have a greater chance of gaining powers from both parents. For example, Clara was starting to learn her father's psychic bullets.

Purifying Dick (400CP) A common thing in this world is the need to bring a goddess to a powerful enough orgasm to either break her mind control or cause her to pass out, sometimes both at once. From now on, by bringing someone to orgasm you can purify the target of mind altering effects. Such examples are mind control, possession, corruption, hypnosis and so on. A small downside is they might not always be willing to allow you to administer your aid or happy at how you cured them once all is said and done. Despite the name, you do not actually need a dick to make this perk work.

Hypno Eye (400CP) Legends claim that the user Phantasma Agoria was able to create a criminal empire in a single night. Later she became the leader of N.U.D.E. and uses her powers to control and fight off invading armies of BLOWJOB. Similar to her, you can take control of those that meet your eye, even through media. This is not perfect and does not work on people as strong as Eighth Wonder and does seem to wear off after a while.

Making Loyal Sex Slaves (600CP) It is odd how often this seems to happen. Much like Zenovia, you have the knowledge on how to break women into loyal servants through the power of rape. They will become wanton sluts fighting at your command in hopes of more dick. This is so strong they would be willing to murder their own child and husband for more sex. In the story, these women can easily be distracted by sex and have their brainwashing broken by a strong enough orgasm. You know how to prevent that small flaw.

Psychic Bullet (600CP) The ability held by BM Shooter is to cause anything concentrated on to explode. It requires the user to lock onto a stationary target, but after, they cannot hide. Even behind a wall or miles away they can still be hit. Just make some finger guns and say "bang" or another word of your choosing to hit them the same as if it were a normal gun.

Eighth Wonder (600CP - undiscounted) The gods of this world have powers and only after unlocking eight of them can they be considered for leadership. You are going to gain Athena's power set, which is just being Power Girl. Luckily this version does not come with the massive increase to your libido, unless you want it to.

1. *Hypersonic Flight* - Faster than a jet and able to fly across Japan in minutes
2. *Super Speed* to the point that you can become a one person gangbang on your own mother

3. *Super Strength* enough to easily rip through several feet of solid steel blast doors, toss oil tankers and destroy buildings
4. *Super Durability* to take not only bullets, but rocket launchers and being thrown through buildings.
5. *Hearing* powerful enough to hear your baby crying from across a city
6. *Heat Vision* that can cut through buildings.
7. *Super Sight* that can see through walls and is strong enough to read people's minds. (claimed in chapter 5)
8. *Time travel* if hit with enough energy, but only in twenty year leaps.

Items - Take one 100CP item for free and one discount per pricing tier. Feel free to import other items to meet the new requirements if desired.

Super Costume (Free) As a gift for visiting this lovely world, have a free costume. If lost or destroyed, a new costume can be found in the nearest closet.

House (100CP) You gain a nice two story suburban home. All property taxes are already paid for. You may import a previous home into this one. Any upgrades will persist into new worlds. After the jump, you may use this as a warehouse attachment or place it into a new world as you see fit.

Spirit Camera (100CP) Photos taken by this camera will reveal a person's past, lies, secrets and hidden desires. You might not be surprised how often the photos come out revealing infidelity. This can be a great tool to collect blackmail.

Judgement's Lance (200CP) A holy staff wielded by the heroine Sister Velocity. This relic is known to have two particular powers. The first is the ability to make a shield to protect the innocent. The second is to attack more than just the physical, it will damage the evil in the target's soul. The normal version has a crucifix on the top, but yours can hold a different religious symbol.

Mind Control Dildo/Butt plug (200CP) This dildo/butt plug combination has some fancy super science built into it. Not only will it act like the normal versions, but it will convert all five senses into pure pleasure for the target and vibrate at a frequency granting a thousand times the normal pleasure. Just a normal conversation is enough to keep a woman in a state of constant orgasm.

Parasite Futa Cock (200CP) This is an alien parasite that attaches to females and cranks their libidos up while lowering their inhibitions. Expect the infected to go on a raping spree as a result. This version will allow the user to impregnate other women using the host's DNA as the "father". The parasite will fall off after a while after it has grown tired from enough sex. It comes in a stasis box to keep the parasite safe for long storage.

Sex Plant Seed (200CP) You gain a seed for the plant seen in chapter 2. These things are used to gain energy through orgasmic bliss. They emit a pheromone that attracts females of any species before infecting their nervous system with vines to collect the energy. The females are then used as breeders to attack and have sex with any male they can and will gain energy from either side reaching orgasm. What you do with the stored energy is up to you, but know that even one large enough to take over a city block could not contain a single orgasm from Eighth Wonder.

Giant Robots With Controls (400CP) The Japanese govt switched to using robots over superheroes and would test them on their former agents in BLOWJOB. You can now take one of these robots home with you. The standard model has tentacles with camera eyes on the ends and enough dexterity to rip the clothing off of Athena. Other models come with stealth tech and cargo bays to capture large amounts of women with their vacuums. You can make a custom one if you like. Your version comes with a small tablet to remote control it with UI so simple even children can use them.

Orb of Energy (400CP) This is a rather large power source for your use. While the outside of the building can look as you please, the interior has a room with a three story crystal ball in the middle that produces an obscene amount of power. One of these was able to power a giant death machine with a disintegration cannon while another powered a flying airship capable of single handedly destroying Tokyo.

Teleportation System (400CP) A rather neat thing is that N.U.D.E has teleporters all over Japan and their base. This will allow you to establish a similar network between properties that you own and the blueprints on how to make more.

N.U.D.E. HQ or BLOWJOB HQ (600CP) You have become the leader of a branch of either the hero organization of N.U.D.E. or the villainous group of BLOWJOB. While this will come with paperwork to do, it also comes fully staffed with soldiers and heroines for N.U.D.E. and an army of orcs and super villains for BLOWJOB. Both bases tend to have a good amount of advanced tech ranging from teleportation devices, nationwide surveillance, healing bays, automatic turrets and a small army's worth of firepower.

Giant Death Robot (600CP) This is a copy of the massive robot seen at the end of the series. It is taller than most skyscrapers and sports a disintegration beam. Even being grazed by this thing will cause a person to evaporate with just enough time to traumatize their wife. It might not be best to show this off as it will upset a lot of people.

Companions

Import/Create (50 per 2, 300 for 8) You may import previous companions or create all new ones. They will gain 600CP to spend on themselves.

Athena and Clara (100CP) On the surface this is a pair of loving mother and her daughter. In truth they are a pair of hyper sexual goddesses. The mother is known for her massive bust and habit of taking a lot to satisfy. During her time as a heroine she has been through a number of sexual encounters, including being turned into a broken sex slave and raped by her own daughter. The daughter is known to be upbeat and very fond of women. She has gone on more than one mind control raping spree and is aroused by her own mother. As for powers, both are just Power Girl and Supergirl expies. The youngest child from the ending is optional if you like.

If you like, you can have the mind controlled versions from a darker timeline where the hyper sluts Deepthroat (Athena) and Rimjob (Clara) took over the world. In the finale of the series we were told of the timeline where Athena nearly destroyed the world as Deepthroat after she took over BLOWJOB. This version was only stopped by her daughter Clara. These versions are what would have happened if both mother and daughter had been captured and broken together. Expect them to be violent, hate humanity and very incestuous sluts. In this timeline the mind controlled Working together they did destroy their world. They will be far more open in their desires and take what they want when they want. Be warned, even holding back Athena regularly broke her husband's hips. These women will not be holding back. If

you take the youngest daughter as well, just expect her temper tantrums to cause a lot of collateral damage.

Canon Character (50CP) There are many people in the setting that you might have hit it off with. You can take them with you into future worlds for a small price.

Expy (50CP) This entire world is meant to be a parody and even the main family are expies of Power Girl and Super Girl. If you want you can create an expy of any heroine or villain that caught your eye in another world and have them have always been part of this world.

Incestuous Family (100CP or 200CP) Here is your free form custom family to make. This will net you up to three family members of your relation specification. While mother and daughters are the most common, some prefer aunts, cousins, sisters and so on. How exactly they are related to you, if at all, is up to you. No matter how they are related, they are very prone to incest and being a happy and loving family that likes to share. If you have a particular race from a previous jump you want them to be, you can import that race for them for an additional 100CP. They will receive 600CP on powers that they will all share.

Drawbacks - No drawback limit and companions can take drawbacks if desired.

The Old Guard (0CP) Instead of starting when Clara takes up her costume, you may instead start many years prior when Athena first made her way into the hero game. Start twenty years before the main story when Athena is a young and eager heroine. You may only stay for the standard decade or stay until the main story and the decade after that.

Replacement option (0CP) If you like you may replace one of the main characters. This will affect the plot, so have fun.

SFW (0CP) Really? You wanted to visit a world or super powered incest and you want to remove all of the lewd? Fine, do so if you like, but you won't get any points for this.

Embarrassing PR (100CP) In the age of smartphones not everything can be covered up. Expect people to get photos exposing you in compromising ways and spread them on the news and online. Full nudity, being sexually molested by robots and monsters can become common and give you a certain reputation.

Prude (100CP) In a world of lewd where heroes and villains often end up naked by the end of the fight, you are the modest one. Often left crying from the shock of finding yourself naked, being molested or raped by your enemies.

Paper Clothing (100CP) Much like Athena, your clothing and armor seems to be rendered useless almost all of the time. Attacks just seem to destroy them without mercy. I hope you can stand having horny civilians taking your pictures in the nude.

Skimpy Outfit (100CP) Just as many of the local heroines, your superhero costume could easily be confused for that of a stripper. It is almost as if someone is expecting to use you as fanservice.

Sexual Target (200CP) Lots of perverted things happen in this world. Tentacle plants that want men to fuck them, sexy monster girls with mind control, pheromones that cause gangbangs and more. While a wise person could avoid all of this, not you. Not anymore. Either through just being in the wrong place at

the wrong time or just being the main target, you seem to keep getting caught up in these events. You can expect to wake up sticky often. This is a drawback, so remember that some characters are mind broken via rape and even males get anally raped by Clara.

Super Libido (200CP) A common symptom of their divine origin is that Athena and Clara have a near unending libido. They can fight it off, but seem to quickly give in. You now also share this trait. Expect to not be saying no when it comes to getting laid and you might need to find several partners to keep up.

Time Travel Woes (200CP) Athena's husband is the reason she spared Zenovia. You see, while Athena was pregnant with their child, Zenovia was pregnant with Athena's husband. Heck, even Zenovia is from a farther future and had a bad clash with Clara, her granddaughter back when Zenovia was a child. All this is to say that you are going to have a lot of weird events involving time travel. You might move or others from different times will show up. Trying to keep track of it all will be a headache, but expect to get dragged into the future war to save the solar system,

Enemy of Blowjob! (300CP) Much like how Zenovia blames Eighth Wonder for her betraying her trust when she was a child, and then leaving her children homeless and as criminals, she now believes you had something to do with it. Not only does she hate you for the constant rape she had to endure, but her children are looking to get revenge for their mother.

Wanted By N.U.D.E. (300CP) Something in your past, real or fictional, has placed you as a villain in the eyes of N.U.D.E. They have a large number of heroines at their disposal and will be hunting you down. Expect to find people trying to lock you up on a regular basis.

Not So Happy Ending (300CP) The ending was brutal. A good amount of the cast got disintegrated in a final battle at the end of the series. That sucks, but the final epilog has most of them come back without an explanation. Not this time. Because you took this, those people will stay dead. Athena's husband, the villains and even Clara will all be gone unless you can take out the final death robot. You will forget taking this drawback until the battle starts and you witness the first people die. The only way to save anyone will be to stop Black Stinger once and for all.

Endings

Go Home – Are you tired of it all and wish to stop your chain? You can take this option and go back to Earth with all you have gained.

Stay – Perhaps you have taken a liking to this world and want to end your wandering. You may do so now.

Move On – Why give up now when there are so many new worlds to visit? Just go pick your next setting already.

Notes

Here are the entire 17.5 chapters to read. Minus the more heavily porn versions. Amazing Eighth Wonder is the first sequel story after that main story when the artist wanted to get more into the porn side of things.

<https://bato.to/chapter/989169>

Amazing Eighth Wonder

<https://mangadex.org/title/af96c6a2-b3f7-405b-821a-019fed3d44db/uchi-no-musume-ni-te-o-dasu-na-amazing-eighth-wonder>

There is at least one more where the family goes to the future to save the world, But I cannot find the link right now.

Uncanny Eighth Wonder seems to be the ending set in the future and can be found on nhentai.com

<https://nhentai.net/parody/uchi-no-musume-ni-te-o-dasuna/popular>

If you are wondering what the youngest daughter is named, it changes from site to site. I have seen Sara, Sella and Alex

Gonna be honest, I am pretty sure Paralyzing Spit did not work on Athena because she was still moving around giving handjobs and sucking dick. She claims it did work, but it is more likely she is just a slut wanting to get gangbanged by a bunch of highschoolers. The perk will work as she pretended it did.

Change Log:

v 0.2

Added actual ages to Age and allow freeform gender

Fixed Slou Latex to be all latex and not leather. Possible translation error between sites.

Moved perks into origin trees

Leaving items as free floating without origin trees

Added in a character replacement drawback

v 0.3

Moved back to free floating perks.

Added spaces between each purchase for easier viewing

Added a replacement for your costume if lost or destroyed

Added Orb of Energy item

Made Eighth Wonder power 600cp and undiscounted

Fluffed some text

Broke Fucking Gods Into Submission into two perks: Nearly Unlimited Stamina and Fucking Them Sane

Added Clothing Only Gets In The Way

v 0.4

Changed perk name Fucking Them Sane into Purifying Dick

Added a world toggle

Added item Judgement's Lance

v 0.4.1

Typos and fluff

v 0.5

Fixed typo in name

Added Paralyzing spit

Added Superheroing 101

Added Elemental kinesis

Fluff perk descriptions

Fixing spelling errors
