Your name and face is known worldwide. Maybe you published an article, or maybe you were on the front page of the paper. Regardless of how it happened, your face and name are known across the country. Good luck trying to stay under the radar when everyone knows you.

Wanted - 200

Manticore put a 50,000 bounty on you, and distributed posters all over. You can try to have it rescinded, but even if you have the bounty removed afterward people will believe they can collect it if they turn you in.

True Lies - 200

It seems one of James Cameron's other works has found a way into Dark Angel. Harry Tasker has been assigned to capture you by Omega. He and his team are all "normals" but they are expertly trained good guys. You could just kill them, but the Omega organization might just send more then.

Gossamer - 300

A whole squad of Gossamer has been released in the sewers of the town you are in. There are a couple of trackers that have your scent, but the rest are all hunters that are trained to kill. All of them can shoot out a ball of snot that can stun whoever it hits, and the hunters are trained killers.

I Corporation - 300

The corporation from the Dark Angel video game is here. A rival military contractor to Manticore, it had a parallel genetics program but with theirs being more accepting of Transgenics.

Red Series - 300

You pissed off the wrong person and now twice during the 10 years you are staying here you will have to deal with a squad of 10 Red Series soldiers. They are immune to pain, have super strength, & are fearless. They are trained convicts that are given super soldier implants that can wipe out a city or take out a company of soldiers by themselves. You can try to wait them out as they will die after a year due to their implants, but if you do so the death toll where you are will be astronomical.

Loco - 300

Well it seems the city you live in has its very own Manticore serial killer. They are very intelligent and you are on their list. You will not be aware of their identity, and you will not know their agenda. They could decide to tease you for months leaving trophies or maybe they will go after you right away.

I Thought You Were Dead - 300

At least twice a year for the next decade someone you thought was dead will show back up to make your life interesting.

May 22 Movement - 300

The terrorist group called the May 22 Movement will be a larger more organized threat. The end goal of the group is still a mystery, but they are often seen attacking corporate and government interests.

Mark of Cain - 300

You have a distinguishable barcode tattoo on your neck that marks you as a valuable person to Manticore. The tattoo can not be removed, and any attempts to will be extraordinarily painful and any damage or removal of it will regenerate within a week or two. After 10 years you can have it disappear or keep it.

X7's - 400

It seems you really pissed off someone, you have a full Platoon of X7's after you. They are stronger than X5's and have a linked hivemind. Together they operate like a supercomputer at problem solving and off near perfect coverage of each other during operations.

The Comet - 500

After thousands of years there are at least tens of millions of members of the Familiars, and they are waiting for the comet to arrive. Within the first 3 years of you being here the comet will pass by Earth, and this one will kill off all non-Familiars and Transgenics who do not have the immunity to the disease it will bring to Earth again. If you want you can let it happen, you could try to destroy the comet and hope the debris doesn't still reach earth, maybe create an immunity and find a way to spread it to everyone, or maybe even make everyone on earth a Transgenic in time. Whatever you decide, after this is over you will still have to find a way to deal with a massive worldwide conspiracy involving the "Conclave."

Max - 500

You take the place of Max in the Dark Angel universe, ten years earlier in 2009 as she escapes Manticore's Gillette base. If you take the Flushed drawback the Seizures will be more frequent and sometimes it will take longer for the pills to take effect, and you can not try to treat them until 2019. The Heat drawback still only affects you 3 times a year until 2029, but now the effects are pronounced and any perk or power will have no effect stopping it. Mark of Cain will now regenerate within 48 hours and Manticore is actively looking for your barcode. You will have to get to Seattle to help Logan with his Eyes Only crusade from 2019 until 2021, but how you do it is up to you. You will also have to release the experiments from the Seattle Manticore facility and eventually found Freak Nation. Those are the only obligations you have after becoming Max, but you will have Manticore and the Familiars interested in you regardless of any changes you may or may not have made.

Final Choices

After ten years in the setting you are required to choose one of these options:

1. End your Jumpchain game and return home
2. End your Jumpchain game and remain within the setting
3. Continue your Jumpchain game and move on to the next Jump

Notes:

- By Soulreaper31337, because Dark Angel is Awesome and needed a jump.
- I have not read the books in over 10 years so that knowledge is pretty faded, the video game I played once and I only really recalled the competitor government contractor to Manticore and the fact that there are even more Max look-alikes, but the show I rewatched recently so the jump mostly reflects that.
- 3 Origins reflected the series fairly well. Normal named after the character for those were not Manticore, Familiar, or Transgenic. Manticore for both its namesake and the Familiar group that came before it. Transgenic is a given for Max and the other Manticore subjects.
- General perks. Beauty is a given with Jessica Alba, Michael Weatherly, and Jensen Ackles. Beauty also prevents your appearance from being changed against your will. Polyglot was originally a Manticore perk for silent communication, but I felt a general language perk was more appropriate. Polyglot applies to all forms of language from sign language and english all the way to computer and alien languages. Added a Natural perk for the Familiars/Breeding Cult/Conclave from the show/books, the familiars may have had psychic powers so that is why the peak of body and mind with ability to easily overcome obstacles of human limits. I reworked the Natural perk to reflect the psychic/psionic potential since the telekinetic in the exposure episode is proof the breeding cult had found something along the way. This does not awaken the abilities, you have to figure that out. Since I was asked, for further clarification the Natural perk ensures you have infinite psionic potential and a body that will always be able to contain your power. This means there is no limit on what you can do as long as it relates to anything psychic, psionic, psyker, etc. Being able to generate psionic energy no matter what was also included, because as a natural being able to use your psionic abilities anywhere you go is your right.
- Normal perks. Jam Pony Messenger is a simple courier perk, reflects Logans and the normals being the good cooks, Normal gets his own perk since he was able to operate a hectic business and by the end of the 2nd season he was truly respected by his employees given the 180 he took, Bodyguard is a jab at the pilot episode, Detective is about not just eyes only but the police and private detectives who kept doing superb work, Happy Ending is a comment made directly during the Aquatic Transgenic episode and reflects the ending of the books, & finally Eyes Only truly states just how good with digital media Logan was some of his feats especially after Manticore was aware of him just showed how he was operating on a different level compared to anyone else. Added Logan's Luck to reflect his nature to survive things that should have killed him.
- Manticore perks. I Want the Records is Lydecker and White being able to get the information out of people, Psychology is a bit a twist on the training that allows their soldiers to erase memories, Ranger is a direct stab at Lydecker being he was former Army Ranger and he also spent over a decade tracking the X5's, Escape & Evade was stated to be a course at Manticore so a gimmie, Transgenic Technology this reflects the fact that someone would have had to create much of the technology necessary for Manticore, Phalanx reflects both the Familiar and transgenic immense capabilities with all forms of combat, & Father may seem weaker compared to the other 600 perks but as long as you put any time into genetics you can easily make perfected subjects with no side effects. Both Transgenic Technology & Father perks apply to all medical, transgenic, genetic, cybernetic, & transhuman applications of the perks. If you have both Transgenic Technology and Father you can rapidly learn, and then build any medical and transhuman technology. Since I was asked, yes both Transgenic Technology & Father apply to all S.T.E.M. (Science, Technology, Engineering, & Math), magitech, and other such applications of the transgenic umbrella. Also reworded Transgenic Technology again, hopefully it is more straightforward about applying to all STEM but you are the best with Transgenic Tech. Added Sandeman to give the knowledge of all transgenics, genetics & technology to make those changes included, but all of this knowledge is the perfected version so the best version of genetics and technology.
- Transgenic Perks. I Don't Sleep is actually pretty accurate for what was shown for not only the X5's but most transgenics, Cat's Grace is spot on for Max being able to fall from any height with no injury, Cat Burglar is again about Max's job to pay the bigger bills, Survivor reflects the Transgenics made for certain environments all rolled together & i added perk protection from loss / theft / suppression / removal here,

Universal Donor is a direct quote and reflects the miraculous effects of a Transgenic blood transfusion but instead of double edged healing i made it a perk sharing other perks, The X5 perk may actually undersell just how advanced the genetic treatments of the X5's were, & The Anomaly perk is actually based on a Transgenic from the BOO episode guy got his head cut off and still kept ticking. For the X5 perk if you or someone else has enough understanding of genetics you could replicate the X5 treatment. Added Nine Lives since Max should have died multiple times and this reflected that.

- Most of the Items are self explanatory, so unless asked I will not give notes about them.
- Added an aircraft to the general item section. I originally had it in Manticore before I released it, but I removed it to equalize the number of items for each section. You can import both Manticore Lab and Father's House to further upgrade your aircraft. If you want to import a vessel to receive upgrades, go ahead, size or type do not matter.
- Since I was asked I updated Terminal City so if you import any of the other building items into it they will be incorporated and all will be upgraded. You can merge the building location items together. If you want Terminal City with your own business along with your personal house that has a manticore lab underneath it, go ahead. Terminal City, Manticore Lab, & Father's House can be imported to upgrade personal dwelling like a spaceship with those items and properties. You can also move them over to your Warehouse if you desire.
- Present item does include ammo as accessories, so if you want multiple magazines of different ammunition you can do that. Smgs include the more modern personal defense weapons like the P90, lots of them in the show, since it is just a modern smg classification. You can have all the accessories included in a bag that can only contain accessories for the gun and then the bag with any lost accessories will return to you if lost or stolen. For example if you got the most common weapon from the setting the P90 you could get bag with a long barrel, an enhanced receiver, a few scopes, some suppressors, AP ammo, Hollow Point ammo, FMJ ammo, a FN Herstal case, & whatever else you want that all go in a bag along with any further improvements you discover or make for the P90; but only the gun and those accessories can go in the bag/case that would return to you if lost or stolen. Since I was asked, yes you can import a pair of firearms to upgrade them. Yes revolvers are included as a pistol or pair of pistols. If you want to import a melee weapon to upgrade it go ahead.
- Companions.
- Drawbacks. I actually left out quite a few drawbacks I had, since many of them were starting to overlap with each other. The main one I will leave a note for is Comet; if I recall in the books nothing happened after the comet hinting at the Familiars being wrong, but for this drawback will guarantee that it does contain an illness that will wipe out over 95% of the population again. Honestly for the numbers of Familiars it could be as low as under a million or as high as a billion. I just assumed strict but growing family planning and losing some still to venom, and came to the conclusions of 10's of millions.
