

Can you hear it, the sound of rain against the walls of your cell? Can you feel it, the shifting of the ship against the waves? Can you hear it, the sounds of battle echoing through the night? You can't you... but you and I both know that there is something more out there. A thing of spiritual greatness, both perverted and pure, that flows through this land of Gold. Something that attracts the greatest and worst of mankind. Something that draws forth the demons of yore into the land of the living. Welcome Jumper to Japan circa 1600 AD, Welcome to Nioh.

These yokai can appear completely human or humanish. Regardless, with this knowledge you can create these yokai from the deceased as clean slates or perfectly resurrect someone fully as your servant.

and 9 Tails (-600CP, Discount Yokai): Whatever you began as, you are more, so much more. The power of amrita you have taken has altered your existence into something beyond most Yokai. Your true form though allows you to become an extremely powerful yokai, one that can be considered a god of the land that you currently exist in. This new existence allows for several boons for you. Your physical strength and durability increases to greater levels than before and you can now warp reality around you to create a small pocket dimension through which you can trap others in until either you or they have perished.

William Adams (-800CP): Irish Geralt is now your ally. Taking this companion means that you have a companion whose rounded off in all class perks and has the Benevolent King Perk.

Main Drawbacks

No CP Limit

The Honor Saga (+0CP): You're sticking around for just a little longer it seems. Taking this drawback means that you will be staying for an additional decade. But hey! You can at least be present for Date Masamune's attempted insurrection and the siege on the Sanada-Maru in Osaka.

A Guest of the Tower (+100CP): There's been a slight mixup jumper. You see William was supposed to exist in this universe but due to an error... he doesn't. You'd happily replace him wouldn't you? Taking this drawback causes you to take the place of William Adams and play the events of Nioh with the goal of taking back Saoirse from Edward Kelley. As a reward, you may take Saoirse as a free Guardian Spirit once you take her back. If you wish to make this more interesting though, we can accommodate that.

- Way of the Strong (+100CP)
- Way of the Demon (+200CP)
- Way of the Wise (+400CP)
- Way of the Nioh (+600CP)

Taking one of these bonuses ups the threat level to the appropriate level for the jump. You may only take one though, so choose wisely.

Power of Stones (+100CP): Normally you would be able to acquire amrita through a combination of slaying your enemies and using hardened amrita stones. Not so anymore, as for now you can only acquire amrita through crushing soul/spirit stones that litter land.

A Common Drunk (-100CP): Despite the opportunities, you will be considered nothing more than a common drunk. While you may still be respected in an official capacity, you will never have a romantic relationship for the duration of your time here.

That Guy (+100CP): During your travels, normal shortcuts that you could access are blocked off. You can't use any powers to get around these shortcuts but you can pay to open them. There's a man on the other side of the barriers who will open these doors should you provide him with enough of a specific item type. However these items are usually trash or refuse and in some cases a little bit worse.

Zither's String (+200CP): Do you hear someone playing music? That's a yokai called a Biwa Boku Boku. This spirit can call forth minor elemental spirits and summoning revenants. These revenants are now more numerous and so are the Biwa Boku Boku's.

No one expects the Inquisition! (+200CP): Seems a good deal of foreign barbarians are appearing in Japan lately. These spies will be attempting to incite conflict in the land to farm out amrita wherever you go. However, expect the most successful of these agents to be members of the Spanish Inquisition.

You Require More Training (+200CP): Those skills that you bought from the origins? Now you have to actually train to the level required in order to use them. It'll be great, you'll truly understand what you are doing.

Tough Economy (+300CP): The war between the Tokugawa and Toyotomi is taking its toll on the economy of Japan. As a result, your ability to acquire monetary funds is non-existent. You will always be scrounging and saving to make ends meet.

The Honorable Way (+300CP): It's not exactly honorable to come into this setting with powers beyond the scope of the world. Your powers are stripped from you for the remainder of this jump leaving you with just your body mod and what you buy here.

Cut Supply Lines (-300CP): So you have some pretty cool stuff from your previous journeys dontcha? Of course you don't silly, this is medieval Japan not some other story. Everyone got on fine with the items on hand and now so can you! Your access to your warehouse is cutoff and all out of jump items are unusable until you ten years are up.

Who Are You? (+300CP): One of your companions has been altered as you entered this world. Their eyes have turned golden and while they may act as they normally have around you, they have been corrupted by the power of Amrita and will attempt to incite war and strife in order to wipe out those that draw their ire. They can be saved, but it would require you to battle a monstrous yokai version of them that has augmented versions of all their powers.

Meetings From a Distant Shore (+400CP): The afterlife holds many denizens and a pair of them seem to have developed some manner of interest in you. These beings are Oda Nobunaga and his wife, Lady Noh. At a certain point in time during your jump you will receive letters from the late warlord. These letters will begin innocently enough, the two will ask questions of your life, ideas, and experiences. Then the letters will take a more demanding tone before finally sending a letter calling you to a duel against them and you must battle them in order to leave the jump once the ten years are up.

Twilight World (+400CP): The world will now become shrouded in an abnormal twilight as the day turns to dusk. This twilight world strengthens the yokai of the area, giving them added effects and boosts that they would not normally have.

I AM THE HOLLOW MAN (+400CP): Whatever your body was, however you looked, ignore it. You are now one of the many Edward Kelley clones employed by Sir John Dee, official spymaster for Queen Elizabeth I. You cannot disobey orders from Dee and as a result you must ensure England's superiority and protection in the name of Queen and Country.

You Will Give Back What Is Mine! (+600CP): On your arrival here, the method entry warped the landscape, not permanently and not for long but enough to kill a certain homunculus. Now wherever you go, an amber orb containing a mermaid will follow. It will always be a part of your possessions, and it cannot be sold or thrown away and it's true owner wants it back. For the remainder of this jump, William will hunt you down and while he may start off as weak, his power will begin to grow exponentially to match yours.

Special Drawbacks

The following Drawbacks provide rewards in jump and post jump. Take with caution.

Maroboshi (+600CP): Tales of your exploits have begun to spread throughout Japan and a collection of old masters have taken notice. Before the jumps end, you must face these masters one after another in a long fight within a location of their choice. Are you prepared Jumper? Should you complete this challenge a small door will be added to your warehouse. This door leads into a copy of the location that your battle took place in and you may fight copies of the masters you had previously fought. This may allow you to increase your skills, strengths, and acquire the various weapons and armor they utilize.

The Abyss (+600CP): During your jump you will be drawn to a realm that exists between the living world and the spirit world. Here you may be able to enter four minor pocket dimensions before battling an avatar that will unlock the next level or you can battle them directly without removing their protections. As you go lower into the abyss, the level of danger that these enemies exhibit will begin to increase exponentially, adding various status effects and buffs to their abilities. In any case, you must reach the lowest floor of the abyss before you can leave as taking this drawback extends your time here past the original ten years.

Should you succeed in this endeavor, you will have access to the Abyss from then on through a shrine located in your warehouse. Using this shrine will allow you to choose the floors that you will fight through and the chance to acquire drops of defilements. Small droplets of absolute corruption. By tainting an item with these droplets, you have the chance of eventually purifying these items through battle in the abyss and these items will have a far greater power than they would have originally.

Guardian Spirit Drawbacks

Below are several drawbacks that can increase the Guardian Points you may receive.

A Singular Spirit (+100GP): Many warriors who utilize Guardian Spirits can use two at once. You on the other hand, can only have one spirit bonded at any time.

Gotta Catch Them All (+200GP): You have a desire to get as many of the Guardian Spirits as you can and you cannot leave this jump until you have acquired all Guardian Spirits.

Nerfed (+400GP): Originally Guardian Spirits would work alongside any special effects from items and equipment, then the nerfs came into being. As a result, when using a living weapon, the abilities of that living weapon will supersede all items based abilities that you may have until the effect has worn off.

As You Are (+600GP): You won't have access to your Guardian Spirits for the jump. You will have to fight with only the skills you have brought in with you. Your Guardian Spirits and your capacity for attaining them will not be accessible until the end of the jump.

Decisions, Decisions, Decisions

Stay: You have decided that you like this world and choose to end your jump chain here.

Return: You have journeyed enough and decide to return to your home with all your abilities and items.

Move On: You have decided to continue your Journey beyond this world and into the next.
