

Dragon Ball Heroes Jumpchain 1.0.1

Suggestions are on and this is a WIP Jump

If you Think a perk could be better then just make a suggestion.

[Made By GinryuB & A Lot of Others]

.those that help will be in the **Thanks** at the bottom of the jump

.Special Thanks to **Burkess, Færret, DeverosSphere & Aldar** for doing just so much work for this jump.

[Introduction]:

.So Welcome to this "Completely" normal world that just happens to have this game that so many people love, its yu-g@#@###. I'm joking with you.

This is the World of Dragon ball Heroes, a world that has developed a Massively popular card/arcade game based off the dragon ball franchise, the only real problem is soon a number of the games players started going missing, this has been the fault of the demon realm as in order to ruin the dragon ball time time they have been adding and replacing people, best i can say is have fun in this world of heavy altered dragon ball. Here's some points **+1000 cp** and try your best to not die, it's not just a card game after all, you start a month before our soon to be beat falls into his first adventure, and if you can save a few people lost in the new world, well thats up to you.

.Time Egg 600cp

- This item lets you restart the jump with all your memories once per jump, post spark this egg will let you make a new timeline once every ten years

.Transport Cube 800cp

- While this wouldn't let you leave a jump, this box lets you go to any location within the current jump, and anywhere at all post spark.

.Key Sword 800cp

- this weapon can seal any realm and grants a resistance to all darkness based powers.

.Universe Seed 800cp

- The Universe Seed is a seed that, when fully grown into the Universe Tree, can be used to create an entire universe. In order to do so, it requires enormous amounts of energy, which can be acquired from battles. Regardless of how close it is to completion, it can be used to acquire an Ultimate Form, greatly increasing the user's power, in addition to the seed still being able to gather energy during the form's usage.

[Drawbacks]:

Drawbacks: By **Burkess** from R/Jumpchain

.Guess the Demons Won?: 0cp

-So with this drawback all previous dragon ball jumps become corrupt time eggs within a vault that is hooked up to the time nest.

-(Must have taken a Dragon Ball jump before hand) for +200cp you may add those jumps right to the main timeline, granted this may cause the demons to win if you messed with the time too much. Hopefully you didn't do too much.

.And I took that personally: +300 CP

-All of the bad guys will always prioritize you. They could have the option to attack hundreds of other people, but they'll decide to go after you, specifically. Even if there's a better target. Your enemies really don't like you.

.Insufferable Glory Hound: +100 CP

-Goku believes he's your best friend and will show up to help you now. Whenever you're about to win a fight, Goku will appear and finish it for you. Unless he was there previously, he won't show up to help you until you're about to win. Everyone will credit Goku with the victory, despite you having done all of the work. For +300 extra CP, you now must participate in any fight that Goku does, and he'll always hog all of the action. You've gained the ability to teleport to Goku no matter where he is. This power automatically activates whenever Goku's about to fight. You can take Goku with you after this jump for free.

.To fight alone: +300 CP

-Events will conspire to have you face off against most enemies in 1 vs 1 battles. Coincidences will take place to make sure that you get a 1 vs 1 with the strongest opponent on the field. This doesn't happen all of the time, but it's often enough that you won't always be able to count on your friends to help you to victory.

.Training Montage: +500 CP

-Whenever you encounter a group of enemies, the weakest member of the enemy team will now be no weaker than 70% of the strength of the strongest member. The enemies are aware of this phenomenon and will work to exploit it to their benefit.

.Hang on Guys!: +300 CP

-Your allies will need to be rescued considerably more often than they normally would. You'll find yourself rushing to save your friends when they get overwhelmed by opponents that they need your help to defeat.

.Big Villain Team Up: +600 CP

-Villains from your past jumps have resurfaced here to fight you once more. They've joined your enemies and are working against you. For +400 more CP, all of these people are Ki users now if they weren't before.

.Generic Costume: +100 CP

-You're only allowed to wear the same equipment and clothing that the people in this world wear. And only in the same colors that they wear it in. For +100 more CP, you now can only wear three separate outfits. You can still choose to be naked as well.

.Expressive Face: +200 CP

-You have a max of six facial expressions. You decide which faces you're capable of making the moment you enter the jump. From then on, you can only make those faces, regardless of the situation you're in. Choose wisely. For +200 more CP, you can only pick one facial expression.

.Mute Protagonist: +200 CP

-You've gained the ability to communicate your thoughts and feelings through gestures and body language. You're incapable of speaking. People will sometimes misinterpret what you want in comical ways or just pretend that you agree with them in an attempt to get you to do stuff for them. For +200 extra CP, only people who have names and main characters from this franchise get voices. Cell, Gohan, and Frieza can talk normally. Even Appule gets a voice, despite being a minor character. But a taxi driver or a shopkeeper? They're as mute as you are.

.Determined Fighters: +300 CP

-When you would strike a finishing blow against an opponent, they'll sometimes have a second wind that lets them stand back up again, injured but still able to fight. They'll often give a short monologue explaining how they won't back down. For +300 more CP, this happens every time. You could swat a fly and it would spit blood and ask you if that's the best you can do.

.Recruitment Drive: +400 CP

-Your enemies now have 50% more minions on their side. They'll have recruited some extra allies who make the most sense logically. For +400 more CP, the enemies are accompanied by recolored clones of themselves. This is treated as being completely normal.

.Are you done powering up?: +200 CP

-You know that thing people do where they stand there while they yell and power up? Now nobody does that. Everyone in this world instantly powers up, transforms, and they charge their attacks up very quickly. You don't gain these benefits. For +200 extra CP, you're required to yell when you power up or launch big attacks.

.Excessive Collateral damage: +300 CP

-Any battle involving you is significantly more destructive and will quickly level the place you're fighting in. The landscape might as well be paper mache for all the resistance it offers. Small altercations can make the area look like a hurricane came through, and the aftermath of big battles resemble the grand canyon.

.Pragmatic Fighters: +300 CP

-This world is filled with arrogant people who throw away easy victories by constantly taunting their foes and giving them chances to fight back. Even the good guys will sometimes let the bad guys fight back and turn the tables on them. Not anymore. Everyone in this universe is significantly more pragmatic and will focus entirely on achieving their goals in battle, by any means they have available to them, while still retaining their personalities. There's very little discussion and everyone fights at 100% from the very beginning, with a single minded determination to crush their enemies. For +300 extra CP, your enemies are like machines, always taking the most advantageous route they can think of and leveraging their powers in ways they'd normally not use if it gives them an advantage. They'll even be willing to train in preparation to destroy you!

.Super Saiyan Bargain Sale: +600 CP

-Every organic and inorganic being now has their own version of the super saiyan transformation. Just like going Super Saiyan, this multiplies their power by 50 times. For +400 extra CP, there is now a SSJ2, SSJ3, and SSJ4 equivalent for every being to potentially unlock.

.Big Appetite: +200 CP

-In order to feel satisfied, you must eat your body weight in food everyday. Your stomach will expand to safely fit this much food in it and you won't suffer any negative effects from this overeating. Failing to do this will leave you constantly feeling hungry.

.Dated Graphics: +100 CP

-You now perceive the world in the same animation style as the video game. You can freely toggle this animation style on and off for any future jumps you visit.

.Stay tuned for the next episode of.... +300cp

-Before you would only be here for 10 years but now when you enter the game for the first time your sent back to the start of Dragon ball and can't leave the game nor the jump till you complete dragon ball heroes, prison planet. You do not remember taking this drawback, no just not playing the game.

[END?]:

.**End your Jumpchain game and return home:** -Choose this option to end your Jumpchain game and return home.

.**End your Jumpchain game and remain within the setting:**

-Choose this option to end your Jumpchain game and remain within the setting.

.**Continue your Jumpchain game and move on to the next Jump:**

-Choose this option to continue your Jumpchain game and move on to the next Jump.

[Notes]:

.I've put on suggestions

.Cards keep their personality but only have the powers on the cards and will follow orders.

.**Super Saiyan Bargain Sale** includes the jumper in the drawback as well but any forms gain by this drawback aren't jump backed to work.

.I moved **Techniques of the Yardratian** to 4ap as the power over fusions was a bit too good over all.

.The effects of **Dragons Resolve**, will massively decrease the negative effects of the **Majin** race absorbing others, and being overpowered by their personality traits, what would turn a buu in to a 4 year old would only make them slightly impulsive, this will basically drop the effects to 1% normal.

1.0.1 Notes:

.Added to the introduction

.Fixed the wording on a few perks
