

Age of Adepts Jump

v1.0

by DeverosSphere & Nerx

A glossary is available at the end of the jumpchain for any lore relevant terms.

Welcome to the large planar world of Lethon, the birthplace of the Adept civilization, a dark land filled with terrifying creatures and magical powers. Those who have arcane talents have the potential to become powerful magic users known as Adepts. Once upon a time the Adepts were revered as protectors who safeguarded human settlements from the many dangerous magical beasts inevitably, the protectors became the ruling class, they became stronger and crueler by researching natural laws and defeating strong magical beasts, absorbing their bloodlines and learning their secrets and enacting monstrous experiments in the pursuit of power. You will arrive in an adept tower, a school and resource site for the development of adepts however unlike other well known magical schools, in the worlds of adepts the teacher only holds lessons once a month and the students are expected to go into the dangerous woods to retrieve minor resources every week.

To survive in this world you will need power Gain **1000 CP**.

You are not the only person to appear in this danguos plane. A young man from an Earth-like planet has been teleported into the body of a beginner apprentice adept named Greem. Fortunately for him, he has a Biological Assistance Chip to ease his path however, it will take 2 years for his chip to work and his story to begin.

Origin

You can freely choose your age, sex, and gender.

Your race must be human unless you are a Bloodline Adept in which case your selected race will count for your bloodline but you will still require that you pay for the Bloodlines Grade.

- **Drop In [Free]** - You arrive in this plane as you are, with no memories, friends, or enemies.
- **Inhabitant [Free]** - .You were born into this plane perhaps as a commoner with talent or from a noble family with money regardless you are an Apprentice Adept now.

Starting Locations

You will arrive into an adept tower as a Beginner Apprentice Adept Roll a d6 to determine where you start. Alternatively pay **50 CP** to choose your Starting Location.

- **1. Adept Anderson's Swamp tower:** The Swamp Tower is a level three resource site belonging to the Sarubo Family, it is unkempt and cheaply constructed. The Swamp Tower is a simplified form of even an elementary tower that focuses on Darkness and Wind Elementium. This is the Tower that Greem is reincarnated into.
- **2. A Tower in the northern region:** The Northern region is ruled by the Northern Witches experts in Curses and Prophecy, thus they are almost all Principle Adepts. They are the most unified of the three great adept organizations, due to their constant expansion in the north they control a land that covers more than six billion square kilometers. They have the smallest number of adepts compared to the other organizations in part due to the belief that witches should always reign supreme over their male counterparts restricting their development. The land will soon have a shift in power with the return of the Witches of the Fate.
- **3. A Tower in the silver union:** The South West side of the Adept Mainland is controlled by the Silver Union. The Silver Union are Profound Adepts known as engineers, machinists, and alchemists who are notable for always wearing silver robes. The Capital of the silver union is a floating island where anyone who owns a store may trade freely any item, however there are only 165 stores and they can be freely contested by anyone once a decade.
- **4. A Tower of the United Adept Association:** The eastern region of the Adept Mainland is the territory of the United Adept Association. Nearly all kinds of Adepts could be found in this association. By utilizing a systematic cultivation road map, and a shareable knowledge system, it had attracted many Adepts who possessed powerful abilities. These Adepts had formed an association governed by strict rules, yet emphasizing impartiality.
- **5. A Tower Zhentarim Association:** Located within the center of the Adept Mainland, which is the most densely populated, unlike the other three major Adept forces, the Zhantarim Association does not have a clear direction of development or core bond between its members. This is where the Swamp tower that Adept Anderson rules is located.
- **6. A Tower in a Subservient plane [+150 CP]:** You start in a mid or small sized plane rather than Lethon. Your plane is owned by an Adept association or An Adept family. The resources and elementum density are far lesser making development more difficult. What's more because you did not come from the plane of adepts you may never be truly accepted as an Adept.

Adept Development Branch

Within the Adept World, there are four branches that stand out with the other Adept branches being devised from these four major branches. **Select one Branch of Development.**

- **Bloodline Adepts** - Bloodline Adepts use the power of bloodlines to improve their own strength. Usually, they would choose some incredibly strong creatures from another world as the source for their bloodline, then they would improve the purity of their own blood and gain incredible abilities that aligned with that of ancient powerful creatures. They initially develop at a fast rate but they are almost incapable of reaching heights exceeding these ancient creatures.
- **Body Refining Adepts** - Body Refining Adepts go all out in the pursuit of strengthening their own bodies gaining resistances to many forms of magic. In order to stimulate their muscles, they might soak themselves in containers full of poisonous chemicals, or implant a deadly, highly radioactive meteorite into their body. In order to improve they might go out and endure the most extreme and deadly environments. They would do all of this to make their bodies incredibly strong so that nothing could hurt them.
- **Principle Adepts** - Principle Adepts are the most common type of Adept in the Adept World. Specialising in a specific elementium attribute of magic at the expense of all others. No matter if it is the Elementium Adept, who chased after the peak powers of their Elements, the Curse Adept, who used strange abilities to kill people unseen, or even the Black Arts Adept, who just enjoyed using violent killing abilities, usually utilizing the force of souls and emotion; all of them belonged to the branch of Principle Adepts.
- **Profound Adept** - Profound Adept, are considered the purest type of Adepts. They are not willing to 'contaminate' their own bloodline just to obtain a powerful ability, and they refuse to be coupled with specific Principles. Instead they gather knowledge of all types, immersing themselves in the world of knowledge, and use the knowledge they learn as their weapon. Thus, they are known as a weird group among Adepts, who only care about gathering and expanding their knowledge, but totally ignore their physical and combat development. They instead use machinery, golems and other creations to do the fighting for them.

You can be awoken by an outside force if needed otherwise when your body has reached a notable stage of development you will awaken needing to seek out a large amount of food before you can reenter the slumbering state. This chip helps you to record, organize, optimize and analyze information including spells. The chip analyses and gives possible outcomes allowing you to test and experiment with magic without

Inhabitant

- **Magical Charisma [-100 CP]** - Most people just seem to like you. It is almost as if you emit an unnatural charisma beyond your actions that makes it easier for people or creatures to like you. - **Wisdom of the world [-100 CP]** - Thanks to the planar consciousness you already understand a lot about your plane. You know the current political scope of the area you arrived into, the general uses of all common materials, creatures, and even how to best benefit from the power structure where you arrived. The understanding expands as your grade does.

Glossary

This glossary contains the terms that specific to the light novel "Age of Adepts"

- **Adept:** A powerful magic researcher whose development path originates from the plane of Lethon. Most planes consider the adepts as evil wizards due to their exantionative nature subjugating lesser planes as well as the lack of restrictions in magical research and experimentations especially on those from other planes. Their appearance can widely vary depending on their grade and what Branch of development. Most Adepts above first grade lose their more human aspects but there are high grade adepts that still appear human externally.
- **Adept Association:** This is the term of an organization composed of multiple fourth grade adepts that are unified in territory. There are currently only four adept associations the Northern Witches, the United Adept Association, the Silver Union and the Zhentarim.
- **Adept Family:** An adept family or adept clan is the term of a small sized organisation of adepts often ruled by a fourth grade adept.
- **Adept Grades:** An adepts grade is everything in the plane of the adepts. When you start you will be a beginner appreciated adept, considered little more than an ordinary person. Your grade will increase as your spirit does, your spirit is a representation of your magical capabilities and can be reinforced by various other values often referenced as body attributes.

Apprentice

Apprentice adepts sometimes referred to as grade zero adepts are still considered on a mortal scale with their lifespan still being on the scale of their race in humans this can be up to 120 years of age. Apprentice adepts grow in power in a similar manner to various other systems learning the basics of magic with their spirit being a representation of their level equivalent. Each improvement of spirit level is more difficult to achieve than the last. Greem was 15 years of age when he was reincarnated into the body of beginner apprentice adept.

Beginner (Spirit above 5)

Intermediate (spirit above 10)

Advanced (spirit above 15)

Pseudo Adept (spirit above 19)

First Grade

First Grade Adepts have their lifespan increase to approximately 300 years. First grade adepts also require using their local Plane's laws to form a meta-physical core of their consciousness within themselves in order to advance to Second Grade. Should a first grade adept go to another plane different from the one which they advanced in, they would be pressured and weakened by the difference of the laws within the plane and the ones within their core. Although the spirit model used by Apprentis adepts is inaccurate at this stage it can be used to express part of the minimum requirement for advancing to the next grade. The following terms are used to the sub stages of First grade adepts. Greem was 18 years old when he advanced into a first grade adept having taken only 3 years to advance from beginner apprentice adept however this was due to external circumstance and he was considered a prodigy.

Novice (spirit above 100)

Veteran (any value above 500)

Advanced (any value above 1000)

Elite (1 value above 1500, all other values above 1000)

Second Grade

Second Grade Adepts have their lifespan increase to approximately 500 years. Second Grade Adepts also require infusing elementium and magical particles taken from outside into their bones, tendons, flesh, and organs in order to advance to third grade. They are able to infuse their spells with raw spirit and fragments of planar laws to boost their power. As with first grade there are terms used for sub stages of second grade and beyond adepts however they are no longer measurable by spirit level. Greem was 97 years old when he advanced into second grade adept having taken 79 years to advance however he was again considered a prodigy.

Second grade- Novice, Intermediate, Advanced (any value above 2000)

Third Grade

Third Grade Adepts have their lifespan increase to approximately 800 years. Third Grade Adepts require infusing elementium and magical particles into their mind, spirit, and soul origin in order to advance to Fourth Grade. They are able to infuse their spells with raw spirit and fragments of planar laws to boost their power. This is the earliest stage that an adept can influence non-planar laws. Greem was 115 years old when he advanced into third grade adept having taken 18 years to advance however he was again considered a prodigy.

Third grade- Novice, Intermediate, Advanced (any value above 3000)

Fourth Grade

Fourth Grade Adepts utilize principles, the smallest unit of a non-planar law. These principles are connected to elementium attributes or effects one can attach to objects

or attacks, effects such as [always hit your mark], where no matter what the opponent does (unless they use principles themselves) the attack will always hit the mark regardless of things like dodging, teleportation or defending. Greem was over 200 years old when he advanced into fourth grade adept having taken approximately 100 years to advance however he was again considered a prodigy.

Fourth grade- Novice, Intermediate, Advanced (any value above 4000)

Fifth Grade

Fifth Grade adepts are no longer tied down by a mortal life span and are only known to die from conflict or damage. Fifth Grade Adepts are able utilize an entire law after they master and combine multiple principles. At this stage of development adepts are forced to leave planar systems or the planes's laws will suppress their further development. This action by the planar consciousness is due to the expanded resource cost for further development being too high for the plane to support and would eventually lead to the destruction of the plane and all its inhabitants as have occurred to a number of ancient powerful planes that are now barren wastelands. Greem was approximately 500 or 600 years old when he advanced into fifth grade adept having taken approximately 300 years to advance however he was again considered a prodigy.

Fifth grade- Novice, Intermediate, Advanced (any value above 5000)

Little is known about adepts above the fifth level beyond myths the following is what can be determined from the content of the light novel.

Sixth Grade

Sixth Grade Adepts master and combine multiple laws to form a bigger law. They can also temporarily ignore the power of a smaller plane in order to fully use their power regardless of the planes's laws.

Seventh Grade

Seventh Grade Adepts can leave implants in their origin plane as well as focus more of their law abilities into planes.

Eighth Grade

Eighth Grade Adepts have their own law origin, a set of own personal laws like a plane does, which they are capable of injecting into other planes, forcibly changing their laws.

Ninth Grade and beyond

Ninth Grade Adepts are capable of destroying a small Plane with a single blow. Currently it is unknown if there are any grades beyond the ninth as the strongest known beings are all ninth grade. The currently known ninth grades are The eleven Scourge Lords, A small but unknown number of True Titans, Over a dozen 'major gods' from different factions, the three Ninth Grade Adepts known as The Three Sovereigns and the Ninth Grade 'Dragon God'.

- **Adept Tower:** An adept tower is a magical stronghold that magnifies the owner's magical power to the point where they can fight to a stalemate with those of a higher grade. The tower functions as a magical school for apprentice adepts as well as

condensing the ambient magical energy to generate the magical crystals that are used as currency in the planes of adepts.

- **Apprentice Adept:** those who have the capacity to learn magic and are learning at an adept tower are called apprentice adepts. Not all apprentice adepts have the talent or capabilities to become first grade adepts with the majority of those who do being unable to afford the ritual cost. In the cases where the adept organisation that owns the tower believe the apprentice adept will succeed they will offer to fund the ritual in exchange for a term of servitude to the organisation. Those who are unfortunate enough to remain in the apprentice stage for their life can easily find positions of comfort in the non-adept societies within Lethon holding the positions of similar standing to a noble's magical adviser.
- **Arcane talent:** natural aptitude or skill towards magic.
- **Attributes:** In the plane of adepts, every normal human being possessed some basic body attributes at birth. After years of research and classification, which had been done by generations upon generations of Adepts, they had finally categorized these into four different attributes: Strength, Physique, Agility, and Spirit. As one could guess, Adepts were differentiated based on these four basic attributes.

Strength:

Strength was primarily used to quantify a person's musculature and body strength. This attribute was very important for close combat Adepts. The strength attribute would affect one's base damage when using close combat weapons, and it also affected one's melee accuracy.

Agility:

Agility was used to quantify body synchronization, flexibility, reflexes, and balance. It was extremely vital for those warriors who wore light or medium armor, or for those bandits who wore leather armor, and for any people who wished to become good archers.

Physique:

Physique represents a person's health and endurance. Any increase in physique would improve a person's Fortitude and Concentration. Therefore, it is very important for all professions.

Fortitude, also known as the ability to resist poison or disease.

Concentration. This is a very important skill for spellcasters.

Spirit:

Spirit determined a person's learning and inferring ability. This attribute was especially important for Adepts because it decided the number of spells an Adept could cast. It also made it easier for them to cast spells, as well as increased the power of their spells.

- **Biological Assistance Chip:** A biological assistance chip is an advanced piece of technology from an earth like planet. The chip functions in a similar manner to a top of the line computer it records, organizes, optimizes and analyzes information. An unexpected side effect of the chip is that it intergrades with the soul origin of an individual allowing it to grow as the user advances their grade.

- **Bloodlines:** Bloodlines are artificially constructed genetic structures of various creatures that can be integrated into an individual to rapidly develop to the level in a method similar to genetic splicing.
- **Bloodlines Origin:** This is the creature that a bloodline is tied to as the creature expands in its development the maximum grade of the bloodline improves. In most circumstances the bloodline origin will be dead or beyond reach however a bloodline origin has the capability to manipulate or take control of those who are directly connected to its bloodline. It is possible but extremely difficult to take control of a bloodline by becoming the bloodline origin.
- **Child of an Adept:** Due to the alterations to an adept's body's as they advance and the high density of magical energy in their cells, it is extremely rare for adepts of first grade or above to be able to reproduce in the traditional way. Those who are born from an adept start life with a naturally high density on magical energy as such finding it easy to gather elementum particles and understand the principles behind magic at an early age it is almost unheard of for an adept's child to fail the ritual to become a first grade adept.
- **Development Branch:** This is the method of development four major branches Bloodline Adepts, Body Refining Adepts, Principle Adepts and Profound Adept
- **Elementium:** The plane of Lethon contains a mystical material called Elementium sometimes referred to as elementum particles or magical particles. Based on the differences in these basic 'elements', these Elementium were classified into six types: Earth, Fire, Water, Wind, Light and Darkness.
- **Elementium Affinity:** Adepts have differing levels of affinity toward the elemental types, meaning that an adept can progress in the development of that elementum type via the Elementium attributes that best fit. Elementium Affinity often leads apprentice adepts to developing an Elementium attribute that fits their elementum affinity best in an attempt to progress more efficiently and at a quicker rate.
- **Elementium Attributes:** Due to the precise elementum affinity and the rarity of research text some elementum attributes are more commonly developed than others. Due in part to the dynamic nature of elemental affinity and attribute distribution this document will not go into the ratios of elementum types required for each elementum attribute. Also be aware that although some elementum attributes may sound impossibly powerful they are only of scalable usability meaning that they will be less effective the higher the grade of your opponent.

Common:

Due to them being directly linked to raw affinity of elementum types earth, fire, water, and wind are the most common elementum attributes.

Earth:

The user can use magic to create, shape and manipulate earth and "earthen" elements including most solid objects, specifically all minerals and mineral compositions regardless of their state (mountain, boulder, sand or dust), dirt, soil, etc.

Fire:

Fire magic can be used to create, shape and manipulate fire, the rapid oxidation of a material in the exothermic process of combustion, releasing heat, light, and various reaction products, flame being the visible portion of the fire.

Water:

The user can use magic to create, shape and manipulate water, inorganic compounds with liquid, gas (steam, water vapor), and solid (ice) states, including changing them from one state to others.

Wind:

The user can use magic to create, shape and manipulate air, gases and various compounds due to it being a transparent Wind magic is versatile and very difficult to block or dodge.

Uncommon:

Although dark and light are elementum types they tend to be more uncommon as elementum attributes it is believed that this is due to the day and night cycle enriching the elementum at different times. The other four uncommon elementum attributes are each composed of two common elementum affinities.

Dark:

A Darkness attribute user can create, shape and manipulate darkness and shadows. By itself, darkness is mostly used to cloud everything into total darkness as such the development branches favor stealth and assassination tactics.

Light:

The user can create, shape and manipulate visible light, commonly referred to as light, is electromagnetic radiation that is visible to the human eye, and is responsible for the sense of sight. The main development branches specialised for the light attribute focus on the use of illusion and laser based attacks.

Acid:

One of the more dangerous elementum attributes for an unprepared apprentice adept, this elementum attribute uses primarily earth and fire elementum particles to develop. The user can create, control and otherwise manipulate acids, bases, and other caustic/corrosive substances, controlling the causticity, where and how the acid affects the object, amount of fumes it releases, etc.

Electric:

The development techniques used by this elementum attribute often result in a more combat focused mindset the elementum attribute uses primarily wind and fire elementum particles to develop. Electric elementum attribute users can create, shape and manipulate electricity, a form of energy resulting from the movement of charged particles.

Ice:

Although the development techniques for this elementum attribute are often mistaken as a branch water development the development branches focus more on the reduction of kinetic energy. This elementum attribute uses primarily wind and water elementum particles to develop. The user of Ice magic can create,

shape and manipulate forms of frozen liquids into a solid state and can appear naturally in forms of snow, slush, hail, icicles, ice spikes, glaciers, pack ice, frost and cold by reducing the kinetic energy within an area of space.

Nature:

Sometimes referred to as the plant attribute this elementum attribute extends to all types of organic animal life. This elementum attribute uses primarily earth and water elementum particles to develop. Nature Attribute users are connected directly to the natural world and thus can communicate, influence, manipulate and control nature. This includes animals, plants, funguses and the matter and energy of which all these things are composed. This magic only extends to the height of their grade as most creatures steadily build up a resistance as they increase in grade.

Rare:

Crystal:

The user can create, shape and manipulate crystals and crystalline materials: homogeneous solids formed by a repeating, three-dimensional pattern of atoms, ions, or molecules and having fixed distances between constituent parts..

Curse:

The user can create/generate, remove and manipulate curses, that involves placing curses on people, become stronger with curses, manipulate curses to different effects. They can even manifest curses as energy or powers itself.

Magnetic:

The user can create, shape and manipulate metal and magnetic fields. Metals are generally malleable, they can be hammered or pressed permanently out of shape without breaking or cracking as well as be able to be fused or melted and are able to be drawn out into a thin wire.

Magma:

The user can create, shape and manipulate molten rock , a mixture of molten or semi-molten rock, volatiles, and solids, it may also contain suspended crystals, dissolved gas and gas bubbles.

Mental:

The user can manipulate, modify and control the thoughts, mindsets, and upper brain functions, allowing the ability to render others unconscious, suppress their memories, and negate the use of abilities, increase/decrease mental capacity, modify minds to be agreeable, control minds, sway sensations to induce altered perception, bestow/heal mental disorders, create/penetrate mental barriers, etc.

Poison:

The user can create, shape and manipulate poisons and poisonous substances. The user can also use these to create medicine to disease-causing bacterial secretions.

Sound:

The user can create, shape and manipulate sound, a periodic disturbance of a medium that radiates outward linearly in the form of a pressure wave. The effect

these waves upon the ear is perceived as sound. The user can use this magic to mimic, intensify, hush, and distort, as well warp, strengthen, echo, speed up, and slow down sound, using it as a powerful physical force and high-speed movement.

Spiritual:

The user can create, shape, manipulate or damage their own or others' spiritual power, which is generated by every sentient being that possesses a soul, or in places with powerful spiritual influence. They can convert it into various forms of energy, manifest it into solid form, or merge into existing objects.

Extremely Rare:

Aether:

The user can create, shape and manipulate Aether, a powerful and unique element said to flow throughout the universe. Aether is an all purpose elemental attribute that allows control of elemental, cosmic, spiritual, and transcendental forces.

Aura:

The user can create, shape and manipulate aura, the invisible etheric phenomenon/emanation produced by and surrounding a person or object. Users of this power are able to increase their natural abilities, attract and repel the aura of others, sense the aura, and project it. Different types of aura are located in various parts of the physical body such as the forehead, spine, throat, heart, and stomach.

Corrosive:

The user can create, shape and manipulate corrosive energy and the process of corrosion on any substances. Anything affected by this energy is broken down into simpler forms of matter and degrades the useful properties of materials and structures including strength, appearance and permeability to liquids and gases.. Corrosion can be concentrated locally to form a pit or crack, or it can extend across a wide area more or less uniformly corroding the surface. They can increase or decrease the rate of corrosion or even reverse the effect.

Demonic:

The user can create, shape and manipulate malevolent energy. They are capable of inflicting excruciating pain, both physically and spiritually tormenting the victim. It has the potential to corrupt one's soul, and is very effective against the holy elemental attribute. More powerful users can even ultimately summon/resurrect/create evil spirits, elemental entities.

Death:

The user can create, shape and manipulate the essence of Death, which is present in all mortals throughout the universe. They are able to cause things to wither, rot, weaken, and eventually die. They can use this magic to sense and manipulate Death, control decayed matter or to gain assistance from the dead by creating, manipulating and when needed destroying multiple variations of Undead.

Gravity:

The user can create, shape and manipulate gravity, a natural phenomenon by which all matter is brought together, toward one another. The user can bend gravity to make the environment very “heavy” or “light”, cause objects to “fall” toward another object instead of the ground, flatten objects, and generate miniature black holes to compress objects into oblivion. They can repel and attract matter and energy regardless of its mass or move objects in a manner similar to telekinesis. Offensive uses of this magic include repulsing people or objects with such force as to shatter practically anything, increasing gravity to crush or immobilize opponents, decreasing it to render them defenseless, or surrounding one's body in a gravitational field to amplify physical strength. Defensive uses include creating a gravitational force-field to repel all manner of attacks or anchoring oneself to the ground.

Holy:

The user can create, shape and manipulate holy energy that's highly effective against demonic and corrosive entities. The Holy elementium attribute is the primary method for the faith development method used by gods in part due to its ability to manipulate health and the healing process, speeding any or all aspects of healing to the point of regenerating, or slowing and blocking healing even if the victim possesses healing abilities such as Regenerative Healing Factor. Holy magic can be used to sense the health of anyone and the causes of wounds, diseases or injuries, the health history and possibly even weaknesses. Some users are able to control the mental health of themselves and others, causing others to go into artificial deviation, obsession and love.

Probability:

The user manipulates the probability of an event to happen, making unlikely things occur more often or instantly and preventing liable events from happening. They can cause and prevent both good and bad luck, sudden deaths, natural disasters, and even apocalyptic events.

Legendary:**Chaos:**

The user can create, shape and manipulate the chaotic forces in the universe, allowing them to manipulate and even shatter planar laws. They are able to change, mutate, destroy or otherwise manipulate any matter, space/time, living beings, organizations or minds and spirits. The users are able to display power beyond their grade however they do not have full control over the reactions with them only able to guide the manner in which these forces act.

Evolution:

The user can manipulate the evolution of species and individuals, including themselves. Advancing or decreasing evolutionary steps shifting their adaptations to create new species, etc. They are able to grant advancements in abilities especially those related to expanding the normal abilities of the species, remove existing weaknesses or granting the species a potential to gain power.

Fate:

The user is able to perceive, shape and manipulate the destiny and fate of anything/anyone allowing them to affect reality in several ways both overt and hidden. This allows them to control/decide anything and everything's destiny and fate. Some users may even be able to manipulate the destinies of users of planar laws as well.

Genesis:

The user can create, shape and manipulate the cycles of life, including the order in which it happens, how it develops, when it starts, when it ends, etc., which allows them to decide/determine how and why life develops and how long/short the process of growth/life is. They can decide whether or not life goes extinct or continues to flourish for years to come.

Power:

The user can create, manipulate, remove, change, etc, the supernatural energies/properties in all beings that give them powers, including themselves, thus allowing every variation of powers and manipulative abilities.

Reality:

The user can create, shape and manipulate the stage of reality, letting them control it. This allows them to assign what will and when it will happen. Some users can even change the very nature of people and things by changing their role in reality.

Space:

Users can create, shape and manipulate physical aspects of space within an area of one's choosing, including an area and whatever is inside of that area. They can trap subjects or objects in space and push that space, throwing subject and object away from them or to create wormholes, paradoxes, and other strange events by warping spatial areas and twisting them around.

Time:

The user can manipulate time in the general area or for a specific target in various ways, with the most basic of acts revolving around accelerating, slowing, stopping and even rewinding or looping time. The range of the affected area is proportional to the mastery of the user, with those at higher levels being able affect the entire space-time continuum.

- **Gods:** The term gods refer to those who use faith as a method of development who have achieved the first grade and above they have their own internal labeling structure including demi-god, lesser god and major gods. The god's perspective on their followers vary from all loving to militaristic depending on which of the five opposing factions they are in as well as their own personalities. From the perspective of their followers these gods can be perceived as good and evil sometimes being perceived as demon gods on occasions where a plane is being used as a conflict zone between two opposing gods. The gods communicate with their followers though the use brain nodes known as Channels of Faith. Ordinary beings upon converting to a god's believer would be left with

a strange brand upon their soul by that god. This brand is like a mystical, magical switch. As long as the believer is in a state of devout prayer, the node constructs a narrow yet stable channel of faith between the believer and their god, thus allowing for the transfer of faith power. Through this channel a portion of the god's consciousness and power can be sent to strengthen their followers by granting them use of divine magic even expanding the followers grade to the extent of allowing them to become a god and or a fourth grade equivalent of whatever development path they were on.

- **Greem:** The protagonist of the Age of Adepts Light novel.
- **Law Origin:** An internal set of personalised laws that function in the same manner as planar laws.
- **Lethon:** The plane that is the origin point of the adepts civilization it is also one of the largest known planes that still exists.
- **Major gods:** The Major gods are ninth grade gods who are split between five opposing factions each with their own primary deity. There is a deep-seated hatred and ingrained vendettas between each faction.
- **Magic:** A process of altering the physical and spiritual world through the application of energy and Elementium.
- **Magical Particles:** see Elementium.
- **Meta-physical core:** A central vessel within an individual that can be used to store their consciousness, Elementium and Laws.
- **Ninth Grade 'Dragon God':** The dragons have always possessed enviable bodies and physical strength. Punching above their weight and fighting enemies above their grade has never been a problem for them. Thus, a single Ninth Grade 'Dragon God' is still a match for both the adepts and the gods. In fact, his power even allowed him to carve out a place for the dragon race and extend their reach to many material planes.
- **non-planar laws:** More commonly referred to simply as law are the starting laws of the multiverse that determine the range of natural and magical phenomena within all planes.
- **Northern Witches:** The Northern Witches occupied the northern region of the Adept Mainland, controlling a land that covered more than six billion square kilometers, which was then divided into dozens of human kingdoms of all sizes. The rulers and nobles of these kingdoms were ordinary humans, but they all recognized the Northern Witches as the guardians of their kingdoms. There are 13 total cliques of witches seven of which are active at the time of the start of this jumpchain with the witches of fate returning a few years after. The Northern Witches have their own special code of law and conduct, which extends both to personal values and legal matters with-in the Northern Witches. All witches are required to swear loyalty to Salem. All witches should always reign supreme over their male counterparts. The Capital is a neutral place.
- **Planar Consciousness:** A consciousness formed by the will of all living things inside of the plane. The consciousness itself is normally only at the level of an instinctive animal reacting as such however it is constantly watching all things within the plane as well as a relative distance outside of itself.
- **Plane:** A plane is the term for a world or universe although there are sizes of planes this is a measure of the power of a plane rather than its relative size as some planes are

internally large in scope however due to the small amount of resources, elementum and magic they are still considered small from external standards. Due to the near infinite space between planes it is a rare occurrence for a new plane to be found.

- **Planar laws:** planar laws are variations on the non-planar laws that function within a plane as determined by the planar consciousness or a high grade entity that has either dominated or coerced the planar consciousness into enacting them. These laws determine the range of natural and magical phenomena normally possible within that plane. In situations where a class or job system is active within a plane the system tends to have been developed through the use of planar law as a method of structuring spiritual development.
- **Principles:** Principles are the smallest unit of a law allowing their user to manipulate a range of natural and magical phenomena.
- **Scourge Lords:** The Scourge Lords come from the disaster plane, the largest known plane. Due to the near destruction of the disaster plane from the scourge lords draining its resources the disaster plane is a barren wasteland that is being slowly repaired by the scourge lords who ravage and feed other planes to the disaster plane.
- **Silver Union:** The Silver Union is made from a group of Profound Adepts who are notable for always wearing silver robes. Using alchemical knowledge and resources gathered from countless Planes, they constructed a magnificent and majestic floating city in the sky and countless fortresses which they used to invade new Planes.
- **Soul Origin:** The soul Origin is the core of an entity's spirit, it is protected by layers of spirit that are built up through improving the grade. If the soul receive damage normally the spirit will be torn away and take a short time to repair however if the soul origin is damaged it inflicts severe pain. The damage could take hundreds of years to repair preventing any progression and in some cases cripple the entity forever.
- **Spiritual development:** A general term for the method of development that improves the grade of the individual.
- **The Three Sovereigns:** The only three Ninth Grade adepts. The Adept Civilization reached a new peak when Salem, Ignaz, and Saint Patrick became Ninth Grade Adepts and were crowned as The Three Sovereigns; the three major Adept organizations were each founded by a sovereign. Salem united the Northern Witches and was crowned the Witch Queen, Ignaz founded the Adept Association and was the first president, and Saint Patrick created the Silver Union and was given the title "Creator".
- **True Titans:** A true titan is a terrifying giant that could smash a small-sized plane to pieces with their bare fists. Newborn Titans possess physical power rivaling Fourth Grade body refining adepts, and mature titans are no less potent than Seventh Grades body refining adepts with the most powerful of their kind having the enormous strength of the Ninth Grade. True Titans came into existence due to the will of the multiverse For the purpose of hunting and exterminate the Scourge Lords.
- **United Adept Association:** The eastern region of the Adept Mainland was the territory of the United Adept Association. Nearly all kinds of Adepts could be found in this association. By utilizing a systematic cultivation road map, and a shareable knowledge system, it had attracted many Adepts who possessed powerful abilities. These Adepts

had formed an association governed by strict rules, yet emphasizing impartiality. Unlike the other associations, they are strictly one formed group, rather than tightly scattered units. Their modus operandi involves scouts travelling the stars in search of planes to invade, whose coordinates are then put on the open market for individuals to purchase. Afterwards the buyers then form an initial assault unit and build a base on the plane. Once the base is built, everyone else is allowed to join the attack on the plane and all the resources of the plane fall under the care of the association and the loot is divided by merit.

- **Zhentarim Association:** the Zhantarim Association is a consortium of Adept families that do not have a clear direction of development or core bond between its members. The center region of Adept Mainland was a vast land with abundant resources, but the human colonies here were scattered. Each human colony was a small kingdom, usually guarded by at least one Adept family. Therefore, the center region was made up by many Adept Families. In order to counter the invasion from all three major Adept forces toward the center region, Adept families of all sizes had grouped together and formed the Zhentarim Association, combining their might to ensure they maintained their place in the world.
